COURT DECISION

Matter of Clearview Gardens Fifth Corp. vs. Murdock:—On March 31, 1959, the Board granted a variance under Sections 7e and 7h of the Zoning Resolution to permit in a residence use district, the erection and maintenance of a gasoline service station, lubricatorium, minor auto repairs, car wash, storage, office and sales and the parking and storage of motor vehicles for a stated term of fifteen years; Calendar Number 132-58-BZ; premises 17-39 to 17-61 (17-55 official) Francis Lewis Boulevard, 157-63 to 157-71 18th Avenue, northeast corner, 157-52 to 157-64 17th Road and 17-38 to 17-48 160th Street, Block 4747, Lot 31, Whitestone, Borough of Queens. Upon court review, Mr. Justice Latham, at Supreme Court, Special Term, affirmed the Board's decision and denied the petitioners' motion. (N. Y. Law Journal, June 12, 1959, page 12).

NOTICE TO APPELLANTS AND APPLICANTS

No appeal or application will be entertained in connection with which court proceedings are pending or in progress, unless exception is granted by the chairman, nor accepted which is not filed within thirty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal or application shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal or application.

At the time of filing an appeal or application, the appellant or applicant shall forward a signed notice of appeal addressed to the Administrative Official either Borough Superintendent of Buildings or Fire Commissioner and file with this board a duplicate of said notice.

Appellants and applicants are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal or application.

Appeals and applications will be simplified and disposition of same expedited by conforming to these directions.

MAX H. FOLEY, Chairman

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. III on December 2, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; laid over to June 23, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated November 7, 1958 acting on Alt. Applic. No. 1756-58, reads:

"1. The proposed increase in use to include gasoline service station, lubritorium, office, sale of auto accessories, locker rm., parking of cars waiting to be served, parking & storage for more than 5 motor vehicles, sale of used cars & auto laundry, is contrary to the decision of the B.S. & A. of Dec. 12, 1950, re: Cal. 726-27-BZ, and is contrary to Art. 2, Sec. 4(46) of Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board, which recommended that the application be granted under certain conditions; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions e and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7e and i, to permit in a business use district at an existing gasoline service station previously granted by the Board, the extension of uses to include auto repairs and car wash, sale of used cars and the parking and storage of more than five motor vehicles, *on condition* that the work shall be done in accordance with drawings filed herewith dated September 9, 1958, 1 sheet, and November 18, 1958, 3 sheets; that repairs shall be made with hand tools only and all repair work done inside the accessory building; that car washing shall be of the non-automatic type; that existing signs shall be maintained as shown on approved drawings; that in all other respects the premises and occupancy shall comply with all laws, rules and regulations applicable thereto; that these additional uses shall be co-terminous with the term of the existing variance, November 12, 1970; and that all permits required and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

231-28-BZ—Vol. II

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on February 17, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; laid over to June 23, 1959, at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated January 7, 1959 acting on N.B. Applic. No. 3690-58, reads:

"1. Proposed demolition of existing gasoline station & office, and reconstruction and extension of uses to gasoline service station, lubricatory, minor auto repairs (hand tools only), store, utility room and car washing and parking and storage of motor vehicles in a business use district is contrary to Art. II Sec. 4 of the Zoning Resolution and to Board of Standards Appeals Resolution Cal. 231-28-BZ.

3. Installation of a ground sign in a business use district is contrary to Art. II Sec. 4 (49) of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted under certain conditions; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c to permit in a business use district the rehabilitation of an existing gasoline station including lubricatorium, minor auto repairs with hand tools only, non-automatic car washing, utility room and store, and parking and storage of motor vehicles, in accordance with drawings filed with this application dated January 30, 1959, 5 sheets, *on condition* that in all other respects the building and occupancy shall comply with all laws, rules and regulations applicable thereto; and that all permits shall be obtained and all work completed and a certificate of occupancy issued within the provisions of Section 22A of the Zoning Resolution.

100-59-A

APPLICANT—Lama, Proskauer and Prober for Socony Mobil Oil Company, Incorporated, owner.

SUBJECT—Application January 30, 1959—filed pursuant to Section 35 General City Laws re premises which is partly in bed of a mapped street.

PREMISES AFFECTED—97-44 Sutphin Boulevard, 146-01 to 146-09 Liberty Avenue, northwest corner and 97-25 to 97-45 146th Street, Block 10031, Lot 25, Jamaica, Borough of Queens.

APPEARANCES—

For Applicant: Alfred A. Lama.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated January 7, 1959 on N.B. Applic. 3690/58, reads:

"2. Proposed premises are partly in bed of a mapped street and is contrary to Sec. 35 of the General City Law."

and

WHEREAS, the applicant states that the proposed building will be 20 feet by 50 feet in area, located on a lot 195.78 feet by 53.19 feet, irregular, in business use, D area, class 1 height district, to be used and occupied as a gasoline service station; that all uses and conditions are more fully described

in Calendar Number 231-28-BZ, Volume II; that the north end of the lot is in the bed of proposed street widening; that this small area will be used for a sign with a pole and concrete base; and

WHEREAS, the Borough President of Queens has advised this Board that the Final Map of the Borough of Queens adopted by the Board of Estimate and Apportionment on June 8, 1917 shows an indicated corner cutoff at the intersection of 146th Street and Sutphin Boulevard; this is a triangular area about 41 feet by 19 feet, which is in private ownership; that there is no proceeding now pending to acquire title to the proposed corner cutoff; and

WHEREAS, the premises were inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the decision of the Borough Superintendent, acting on N.B. App. 3690-58, Objection No. 2 be and it hereby is *modified* under the powers vested in the Board by Section 35 of the General City Law, and that the appeal be and it hereby is *granted, on condition* that the portion of the property which is in the bed of a mapped street shall not be used for construction purposes; and that all other laws, rules and regulations applicable thereto shall be complied with.

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. III on February 11, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on May 12, 1959 after due notice by publication in the Bulletin; laid over to June 9, 1959 at 10 A. M. for continued hearing; applicant to send out proper notices; then to June 23, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated January 15, 1959 acting on N.B. Applic. No. 4138-58, reads:

"1. The proposed erection of a gasoline service station, auto washing (non-automatic), lubrication, office sales of accessories, minor repairs with hand tools only, parking and storage of cars awaiting service on a lot in a business use district is contrary to Art. 2, Sec. 4(a) items 29 and 46 of the Z.R.

"2. The proposed ground sign in a business use district is contrary to Art. 2, Sec. 4(a) item 49 of the Z.R."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions f and i of the Zoning Resolution.

MINUTES

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7f and i to permit in a business use district, the erection and maintenance of a gasoline service station and uses lawfully accessory thereto *on condition* that all work shall be done in accordance with drawings filed with this application dated January 28, 1959, 5 sheets, except that the south wall of the accessory building shall extend along the south lot line and a brick wall, 5 feet 6 inches in height, shall extend from the southwest corner of the accessory building to the west lot line; that a woven wire fence 5 feet 6 inches in height shall extend along the west lot line from the termination of the brick wall on the south lot line to the building line of Roosevelt Avenue; that in all other respects all laws, rules and regulations applicable thereto shall be complied with; and that all permits shall be obtained and all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

1478-39-BZ—Vol. II

APPLICANT—James T. Bredin, for Hillside Jamaica Home Building Corp., owner; Parkage Inc., lessee.

SUBJECT—Application reopened November 5, 1958 as Vol. II—decision of the Borough Superintendent, under section 7c of the Zoning Resolution, to permit in a business and residence use district, the extension of the existing parking lot into the residence portion of the premises, the capacity of the proposed lot will exceed 150 cars.

PREMISES AFFECTED—175-01 to 175-65 Hillside Avenue, northwest corner of Edgerton Boulevard, Block 9835, Lots 16, 18 and 61, Jamaica, Borough of Queens.

APPEARANCES—

For Applicant: James T. Bredin.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative 0

Negative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on November 5, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; then to June 23, 1959 at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated October 2, 1958 acting on Alt. Applic. No. 1200-58, reads:

"1. The proposed increase in area of a parking lot in a business use district so that the capacity will exceed 149 cars is contrary to 21-F of the Z.R.

2. The proposed use of a portion of the lot, which is in a residence use district, as part of the above parking lot is contrary to Art. 2, Sec. 3 of the Z.R.

These premises have been the subject of a variance by the Board under Cal. #1478-39-BZ., Vol. #25 Bul. #12:"

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should not be granted; and

WHEREAS, the Board found that there was no justification for the exercise of discretion to grant a zoning variance under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the decision of the Borough Superintendent, acting on Alt. App. 1200-58, Objections Nos. 1 and 2 be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

586-41-BZ

APPLICANT—Norman Lederer and Leonard Joseph, for Carl Walter Wolf, owner.

SUBJECT—Application reopened May 5, 1959 for consideration as to extension of term of variance, expired February 19, 1959—decision of the Borough Superintendent, previously granted on condition, under section 7h of the Zoning Resolution, permitting in a business and residence use district, for a term of years, the parking and storage of more than five (5) motor vehicles.

PREMISES AFFECTED—311-315 Beach 44th Street, west side, 75.33 feet north of Rockaway Beach Boulevard and 308-314 Beach 45th Street, east side, 53.22 feet north of Rockaway Beach Boulevard, Block 368, Lot 7 and part of lot 1, Far Rockaway, Borough of Queens.

APPEARANCES—

For Applicant: Norman Lederer.

For Opposition: None.

ACTION OF BOARD—Term of variance extended.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, the applicant requested reopening of this application and extension of the term of variance, which had expired by time limitation February 19, 1959; and

WHEREAS, this application was reopened on May 5, 1959 and set for hearing on June 23, 1959 at 10 A.M., subject to regular procedure, waiving all requirements except a new decision of the Borough Superintendent and two publications in the Bulletin; and

WHEREAS, a public hearing was held on this application on June 23, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated April 13, 1959 acting on Alt. Applic. No. 806-49, reads:

"1. The extension of the use of this plot for parking & storage of more than 5 motor vehicles, beyond Feb. 19, 1959 is contrary to the decision of the Bd. S. & A. on Feb. 19, 1957. Re: Cal. 586/41 BZ."

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on July 17, 1941, as amended by resolutions adopted through February 19, 1957, only as to the term of the variance, so that as amended this clause shall read:

"*granted* under Section 7, subdivision h, for a term of five years, to permit; that in all other respects the resolutions above cited shall be complied with; and that all permits required and a new certificate of occupancy shall be obtained." (Alt. App. 806/49)

911-47-BZ—Vol. II

APPLICANT—Lama, Proskauer and Prober, for Jewel Plumbing and Heating Co., Inc.

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; laid over to June 23, 1959, at 10 A. M. for inspection and decision; applicant to file new plans showing the vehicular entrance and exit from Bruner Avenue, proper fences, sidewalks and curb cuts; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated December 17, 1958 acting on Alt. Applic. No. 1075-58, reads:

"1. Extension of building for factory use, office, and drafting room in a residence use district is contrary to Art. II Sect. 3 of the Z.R.

"2. Area coverage over 55% in a D-1 district is contrary to Art. IV Sect. 14-A of the Z.R."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision e of the Zoning Resolution, as to use, and that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21, and is therefore entitled to relief, as to area, on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use and area district regulation of the Zoning Resolution and that the application be and it hereby is granted under Sections 7e and 21 to permit in a residence use, D-1 area district, the extension of a marble factory occupying more than the permitted area, for a term of ten years *on condition* that all work shall be done in accordance with drawings filed with this application dated January 16, 1959, 4 sheets and June 19, 1959, 3 sheets; except that the presently existing gate on Bruner Avenue be closed and that the opening be provided with a solid wooden fence properly constructed and painted; that the outside crane on the Bruner Avenue side be moved to the Adee Avenue side; that the truck door opening in the present building on the Bruner Avenue side be closed and no loading or unloading shall be carried on in the Bruner Avenue side of the property; that a single door not more than 3 feet 6 inches wide may be provided on the Bruner Avenue side; that the present sign on Bruner Avenue side of the building shall be removed and a non-illuminated sign not more than 50 square feet may be attached to the Adee Avenue face of the building; that in all other respects the building and occupancy shall comply with all laws, rules and regulations applicable thereto; and that all permits shall be obtained and all work completed and a certificate of occupancy issued within the provisions of Section 22A of the Zoning Resolution.

123-59-BZ

APPLICANT—Lama, Proskauer and Prober for Sidney Tannenbaum, owner.

SUBJECT—Application March 2, 1959—decision of the Borough Superintendent, under section 7i of the Zoning Resolution, to permit in a retail use district, the use of an existing building for an automobile repair shop, body and fender work, painting, spraying and welding, for a stated term of ten (10) years.

PREMISES AFFECTED—2004 Fulton Street, south side, 220 feet east of Howard Avenue, Block 1549, Lot 12, Borough of Brooklyn.

APPEARANCES—

For Applicant: Alfred A. Lama.

For Opposition: Robert A. Fraser, G. Fanlcon, Mary Hendrick and David D. Wormsley.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; laid over to June 23, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated February 6, 1959 acting on Alt. Applic. No. 2-59, reads:

"1. Proposed change of occupancy to automobile repairing, body and fender work, painting and spraying and welding in a Retail Zone is contrary to Article II, PP. 4-A and as per Article II, PP. 4-a, subsections 4 and 29 of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7i to permit in a retail use district, the use of an existing building for an automobile repair shop, body and fender work, painting and spraying and welding, for a term of ten years *on condition* that all work shall be done in accordance with drawings submitted with this application dated March 2, 1959, 3 sheets, and May 12, 1959, one sheet; that the space heater to be used in the premises shall be of a type approved by the Board for explosive atmospheres; that no more than one-half gallon of paint shall be used in any one day for spraying operations; that all other laws, rules and regulations applicable to the building and occupancy shall be complied with; and that all permits shall be obtained and all work completed and a certificate of occupancy issued within the requirements of Section 22A of the Zoning Resolution.

Present: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker.

746-38-SA—Vol. II

APPLICANT—John Wood Company, Bennett Pump Division, owner.

APPEARANCES—

For Applicant: John Medel.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 746-38-SA—Vol. II

Subject: Amendment to resolution as to additional model gasoline dispensers.

John Wood Company, Bennett Pump Division, requested by letter dated October 6, 1958 that the resolution adopted July 18, 1939 and amended through April 9, 1957 under Calendar Number 746-38-SA, Volumes I and II be amended so as to include new model gasoline dispensing pumps. The application was reopened by a vote of the Board, November 5, 1958.

Description

The new Models 2056, 2057, 2066, 2067, 2086 and 2087 gasoline dispensers are basically the same in design as the Models 956, 957, 966, 967, 986 and 987 dispensers previously approved by the Board, November 23, 1954 under Calendar Number 746-38-SA, Volume I. The principle difference is in the appearance of the housing.

The new model dispensers have been tested and approved by the Underwriters' Laboratories file MH 1964.

Recommendation

The Committee on Test recommends that the resolution adopted July 18, 1939 and amended through April 9, 1957 under Calendar Number 746-38-SA, Volumes I and II be amended so as to include the new model dispensers 2056, 2057, 2066, 2067, 2086 and 2087 on condition that the requirements of the resolution adopted July 18, 1939 under Calendar Number 746-38-SA be complied with.

(Sgd.) SAMUEL L. BECKER,

Director,

JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

162-43-SM

APPLICANT—New Castle Products, owner.

APPEARANCES—

For Applicant: R. W. Bettner.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 162-43-SM

Subject: Amendment to resolution as additional fabric on approved folding door.

New Castle Products, Inc., requested by letter dated

MINUTES

March 6, 1958, that the resolution adopted October 31, 1944 and amended July 2, 1957 under Calendar Number 162-43-SM be amended so as to include an additional fabric on the approved door. The application was reopened by a vote of the Board, July 15, 1958.

Purpose

The material is used as a space divider or as door, where a fire resistive opening protective assembly is not required.

Description

The facing of the door is to be a vinyl plastic coated cotton drill fabric, the plastic is applied to both face and back side and is a compound that has stabilizers, filler material and flameproofing compounds.

The second requested change in the construction is a liner material known as "Soundmaster". This consists of a paper web to which has been sealed strips of 0.130 chip board which has been sprayed with the same vinyl plastic as on the face fabric.

Inspection and Test

Samples of the face material and the material known as Soundmaster were tested at the Better Fabrics Testing Bureau in accordance with the requirements of the Flameproofing Rules of the Board.

There was no flashing or flaming in any of the samples tested and all flow was confined to within the charred area.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends that the resolution adopted October 31, 1944 and amended July 2, 1957 under Calendar Number 162-43-SM be amended so as to include the use face material as herein described and the liner known as Soundmaster, on condition that the requirements of the resolution adopted October 31, 1944 and as amended July 2, 1957 under Calendar Number 162-43-SM be complied with.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

38-47-SM—Vol. II

APPLICANT—Bergen Building Block, Inc., owner.

APPEARANCES—

For Applicant: Horace Bush.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 38-47-SM-Vol. II.

Subject: Amendment to resolution as to additional masonry units.

Bergen Building Block, Inc., Ridgeway Park, New Jersey, requested by letter dated February 2, 1959 that the resolution adopted July 13, 1948 and amended through January 18, 1955 under Calendar Number 38-47-SM—Vols. I & II be amended so as to include blocks made of Lelite aggregate. The application was reopened by a vote of the Board, February 25, 1959.

Purpose

The materials are load bearing masonry units made with Lelite aggregate.

Description

The requested units are manufactured with the aggregate Lelite, approved by the Board under Calendar Number 407-48-SM. The manufacturing facilities, process of manufacture, curing facilities and storage are the same as described in the action taken by the Board, July 13, 1948 under Calendar Number 38-47-SM-Vol. I.

Inspection and Test

Sample blocks were tested by Gulick-Henderson Laboratories, Inc. The tests were conducted in accordance with the requirements of C26-326.0 Administrative Building Code.

Results were as follows:

8" x 8" x 18"	Solid = 2140 p.s.i.
8" x 8" x 18"	Hollow = 1929 p.s.i.
4" x 8" x 18"	Hollow = 1894 p.s.i.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends that the resolution adopted July 13, 1948 and amended through January 18, 1955 under Calendar Number 38-47-SM Vols. I & II be amended so as to include the masonry units as manufactured with Lelite in sizes as herein described, on condition that the requirements of the resolution adopted July 13, 1948 under Calendar Number 38-47-SM be complied with.

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 502-51-SA

Subject: Johnson Volatile Liquid Pumps.

Johnson Pump Co., New York, filed July 17, 1951 an application with the Board of Standards and Appeals for approval of the appliance known as Johnson Volatile Liquid Pumps under the provisions of the C19-57 and C19-69, Administrative Code and the Oil Burner Rules of the Board.

Purpose

The pump is designed for feeding, charging recycling or transferring and unloading of high volatile liquids.

Description

The pumps are multi stage vertical pumping units, the elements of which are rigidly mounted and enclosed within a steel outer suction barrel. The impellers are enclosed with wearing rings.

The nozzle head contains the suction and discharge nozzles which are usually 180° apart, but in special cases nozzles can be located in position other than standard. An inner flange, located above the nozzles, supports the pumping unit. The electric motor or steam turbine driving unit is mounted on the top flange of the nozzle head. Underwriters' approved explosion proof motors are used.

The drive shaft of steel extends from the pump drive to the bowl assembly. The pump impellers, either of bronze or cast iron, depending on the usage, are mounted on this shaft. The bowl assembly is of multi stage assembly designed for the pressure required and the bowl bearings are either bronze or micarta.

In the construction of the pumps, there is no like metal in contact, that is in the moving parts it will be bronze against steel or bronze against iron.

Inspection and Test

Details of construction of the pump were examined by Ass't. Engr. J. A. Darts, Committee on Test, and found to be satisfactory.

Recommendation

On the basis of the data submitted by the applicant, the Committee on Test recommends the approval of the Johnson Volatile Liquid Pumps as herein described for pumping oil and gasoline from barges or tanks when installed in accordance with the requirements of the Administrative Code and the Oil Burner Rules of the Board, on condition that the pump bear a label, permanently affixed, reading "Ap-

proved by the Board of Standards and Appeals for use in New York City under Calendar Number 502-51-SA".

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

and Commissioner Becker 3
Negative: 0
Not Voting: Commissioner Fox 1
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 709-51-SM

Subject: Amendment to resolution as to additional forms of construction.

Bestwall Certain-teed Sales Corporation requested by letter dated May 27, 1953 that the resolution adopted March 24, 1953 under Calendar Number 709-51-SM be amended so as to include additional forms of construction. The application was reopened by a vote of the Board June 9, 1953.

Purpose

The material is to be used as a fire resistive interior non load bearing partition.

Description

The 5/8 inch board is similar to the usual gypsum wall board except that to the gypsum core is added incombustible fibers and unexpanded vermiculite.

The requested construction is as follows:

Type I. This construction is a 2 1/4 inch thick laminated non load bearing partition formed of 5/8 inch wall board ribs and mounted on wood runners horizontally at a 45° angle, 8 inches on center. In addition Phillips head woodscrews are driven, on 20 inch centers at each wallboard joint.

The other face of the panel consisting of 5/8 inch wall board is then applied against the ribs and fastened with nails and screws in the same manner as the first face.

Type II. This partition is designated as a 4 inch partition and is constructed as follows:

A wood runner, 1 1/2 by 1 5/8 inch is first laid down. The wall boards laminated as described for Type I are affixed to each of the 1 1/2 inch runner, so that there is one laminated board on each face of the runner. The second layer of 5/8 inch board is then applied at right angles to the first layer of 5/8 inch board and attached with Phillip's head wood screws, (2 inches long) spaced 20 inches on centers at the joints through the inner layer and into the ribs and 8d (2 1/2 inch long) finishing nails are then driven at a 45° angle at 8 inch centers through the inner layer into the ribs.

The construction when completed consists of the wood runner, a layer of 5/8 inch wall board with 1/2 inch.

The materials used in the construction of this type of partition consisted of the following: Wood Runner Strips 1 inch by 1 5/8 inches; 5/8 inch gypsum wall board; Gypsum Wall-board Strips—double layer. 1/2 inch gypsum wall board both 3 1/4 inch and 6 1/4 inches wide laminated with a casein type

MINUTES

glue; 5d $\frac{1}{4}$ inch head $1\frac{5}{8}$ inches long—6d—2 inch long; wood screws No. 16 Phillip's head $1\frac{1}{2}$ inches long.

The laminated ribs giving a total of 1 inch in thickness are applied to one face of the wall board, the $6\frac{1}{4}$ inch wide rib was applied $3\frac{1}{4}$ inches from one long edge and the $3\frac{1}{4}$ inch rib was applied $15\frac{3}{4}$ inches from the $6\frac{1}{4}$ inch rib and the second $6\frac{1}{4}$ inch rib is then applied $15\frac{3}{4}$ inches from the $3\frac{1}{4}$ inch rib.

After setting, the wallboard rib units forming one face of the panel were attached to the wood runner with 5d nails spaced 8 inches on centers. As each successive wallboard rib unit was attached to the wood runner, the projecting rib of the preceding unit was coated with adhesive to provide a bond between wallboard units and also a $6\frac{1}{4}$ inch wide bearing area behind each vertical joint. With the units in place on one face of the assembly, 6d finishing nails were driven into the ribs. Thick ribs attached to each face of the runner and then $\frac{5}{8}$ inch wall board are attached, at right angles, to the first layer of $\frac{5}{8}$ inch wallboard. The overall thickness is 4 inches.

Type III. Is similar in construction to the Type II except that two floor runners 1 inch by $1\frac{5}{8}$ inches are used and are spaced $\frac{1}{2}$ inch apart so that the construction when completed consists of two wood runners, $\frac{1}{2}$ inch apart and two layers of $\frac{5}{8}$ inch wall board, the inner layer having the $\frac{1}{2}$ inch ribs, attached to the outside face of the wood runner. The total thickness is 5 inches.

Inspection and Test

The partitions were tested at the Underwriters Laboratory, Chicago, Illinois in accordance with the requirements of Article 11, Chapter 26, Administrative Building Code. The partitions successfully met the requirements of the fire and hose stream tests for the following fire resistive ratings.

Type I—1 Hour Fire Resistive Non-Load Bearing Partition.

Type II—2 Hour Fire Resistive Non-Load Bearing Partition.

Type III—3 Hour Fire Resistive Non-Load Bearing Partition.

The complete reports of the Underwriters Laboratory are on file with and are part of the record.

The partitions were also impact tested in the presence of Assistant Engineer J. A. Darts, Committee on Test and successfully met the requirements.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends that the resolution adopted March 24, 1953 under Calendar Number 709-51-SM be amended so as to include the load bearing partitions as herein described as Types I, II and III as one hour, two hour and three hour fire resistive non load bearing partition on condition that the wood burners shall be fireproof wood in classes of construction wherein fireproof wood is required and further that the requirements of the resolution adopted March 24, 1953 under Calendar Number 709-51-SM be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 710-51-SM

Subject: Amendment to resolution so as to use of " $\frac{5}{8}$ inch Firestop Bestwall" Ceiling on open web steel joists and concrete floor.

Certain-teed Products Corp., Ardsmore, Penna. requested by letter dated April 15, 1953 that the resolution adopted March 24, 1953 under Calendar Number 710-51-SM be amended so as to permit the use of the Certain-teed $\frac{5}{8}$ inch Firestop Bestwall Gypsum Board to be used in conjunction with open web steel joists and concrete floor. The application was reopened by a vote of the Board, June 9, 1953.

Purpose

The $\frac{5}{8}$ inch gypsum board is to be used as a substitute for lath and plaster as a one hour and 2 hour fire resistive ceiling.

Description

The material is the same as the material approved March 24, 1953 under Calendar Number 710-51-SM and when erected for use as a ceiling material with bar joists, the construction is as follows:

Type I. Bar joists spaced 24 inches on centers are welded to the load bearing beams and braced by channel bridging. Ribbed lath is placed on top of the joists and wired at each rib to each joist. Wire fabric, for the concrete reinforcement is next placed over the ribbed lath and spaced to be about 1 inch below the top surface of a 2 inch concrete slab. The concrete, of cement, sand and gravel and of a mix designed for 3800 p.s.i. is then placed on the rib lath and screeded to give a 2 inch thick slab.

The $\frac{5}{8}$ inch Firestop Bestwall is then applied to the ceiling side of the joists in the following manner; (or one half of the ceiling $\frac{3}{4}$ inch furring channels and the other half were $\frac{7}{8}$ inch nailing channels were used). The channels, spaced 16 inches on centers, are attached at right angles to the bottom chords of the joists with double wire ties at each crossing of the joists. The $\frac{5}{8}$ inch Firestop Bestwall was then fastened to the furring channels with sheet metal screws, 8 inches on center, and to the nailing channels with annular type nails spaced 6 inches on center.

Type II. This construction was basically the same as Type I except that $\frac{7}{8}$ inch nailing channels were used throughout and two layers of $\frac{5}{8}$ inch was used instead of one layer and the layers were so arranged that there were no through joists between the layers.

Inspection and Test

The two types of construction were tested at the Underwriters Laboratory in accordance with the requirements of C26-588.0 through C26-590 Administrative Building Code.

The Type II construction successfully met the fire and hose stream requirements of a one and one half hour fire resistive floor and ceiling construction, as the temperature on the joists exceeds 1000° at approximately 88 minutes. Type I successfully met the requirements of a 1 hour construction.

The complete reports are on file with and are part of the record.

Recommendation

On the basis of the tests and the data submitted by the applicant, The Committee on Test recommends that the resolution adopted March 24, 1953 under Calendar Number 710-51-SM be amended so as to include the two types of construction as herein described for use in New York City; the Type I as a one hour fire resistive floor and ceiling construction and the Type II as a one and one half hour

MINUTES

fire resistive floor and ceiling construction on condition that the joists used in conjunction with this assembly shall be approved joists and installed in accordance with their individual approvals and further that all other requirements of the resolution adopted March 24, 1953 under Calendar Number 710-51-SM are complied with.

Re: Calendar Number 679-53-SM.

Subject: Darex AEA

Dewey and Almy Chemical Co., Cambridge, Mass., filed August 20, 1953 an application with the Board of Standards and Appeals for approval of the material known as Darex AEA under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is an air entraining agent for portland cement.

Description

Darex AEA is a petroleum sulfonate made in the process of petroleum refining. Triethanolamine is added to this material. The material is marketed in liquid form.

Inspection and Test

The applicant has submitted an Evaluation of Some Air Entraining Agents—Concrete Laboratory Report No. C-499 as conducted by the United States Department of Interior, Bureau of Reclamation.

The tests basically showed that the compressive strength of the concrete is reduced as the air content increases when the w/c ratio is held constant. Each 1% of air increase reduces the 90 day strength by 280 and 260 p.s.i. for rich and lean mixes respectively, but it was also found that when the concrete contained 5 to 6% air that the strengths of the concrete were less seriously affected.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the data filed by the application, the Committee on Test recommends the approval of the material Darex AEA as manufactured by Dewey & Almy Chemical Co., for voluntary use in New York City as an air entraining agent for portland cement, on condition that any concrete made with this product shall comply with the requirement of the rules adopted April 4, 1955 under Calendar Number 64-55-SR and further that the amount of Darex AEA used shall be not more than 1 oz. per sack of cement and that containers in which the material is marketed shall be labeled

"Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 679-53-SM".

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

862-54-SA

APPLICANT—John Wood Company, Bennett Pump Division, owner.

APPEARANCES—

For Applicant: John Medel.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
and Commissioner Becker 3
Negative: Commissioner Fox 1
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 862-54-SA.

Subject: Amendment to resolution to include new Models.

John Wood Company, Bennett Pump Division, requested by letter dated October 6, 1958 that the resolution adopted November 14, 1956 and amended September 24, 1957, under Calendar Number 862-54-SA be amended to include the new Models 2052, 2053, 2062, 2063, 2072, 2073, 2082, and 2083 gasoline dispensers. The application was reopened by a vote of the Board November 5, 1958.

Description

The Models 2052, 2053, 2062, 2063, 2072, 2073, 2082 and 2083 gasoline dispensers are basically the same in design as the Models 1052, 1053, 1062, 1063, 1072, 1073, 1082 and 1083 gasoline dispensers, previously approved by the Board under Calendar Number 862-54-SA.

The only change has been in the appearance of the housings.

The new Model dispensers have been tested and approved by the Underwriters' Laboratories, file MH 1964.

Recommendation

The Committee on Test recommends that the resolution adopted November 14, 1956 and amended September 24, 1957 under Calendar Number 862-54-SA be amended so as to include the new model dispensers 2052, 2053, 2062, 2063, 2072, 2073, 2082 and 2083, on condition that the requirements of the resolution adopted November 14, 1956 and amended September 24, 1957 under Calendar Number 862-54-SA be complied with.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 341-57-SM.

Subject: SIKACRETE.

Sika Chemical Corp., Passaic, New Jersey, filed April 7, 1957 an application with the Board of Standards and Appeals for approval of the material sikacrete under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is an admixture for concrete and mortar.

Description

The material is a solution of organic and inorganic calcium salts in water. The inorganic portion consists of calcium chloride; the organic one is a hydroxylated carboxyl acid salt, in addition the following inorganic salts are added such as sodium and potassium chlorides, calcium silicates and chromates and organic nitrogen compounds.

Inspection and Test

Samples of the material were tested by the Haller Testing Laboratory, Toledo Testing Laboratory and R. Osborne Laboratory.

The tests were conducted on a comparative basis concrete without the admixture as a control and concrete with the admixture and in all cases the concrete with the admixture showed greater strengths. The complete reports are on file with and are part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material Sikacrete for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code as an admixture to concrete and mortar, on condition that the amount of sikacrete used shall not exceed 1 quart per sack of cement, that correction shall be made in the water cement ratio so that no increase in slump results in its use, that concrete made with Sikacrete be permitted to set for at least 72 hours before removal of forms and that the containers in which the material is marketed shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 341-57-SM".

For Applicant: None.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 863-57-SM

Subject: Flagg Extra Heavy Malleable Iron Pipe Fittings, Sizes 2½ inches to 8 inches.

Stanley G. Flagg & Co., Inc., Philadelphia, Pa., filed November 21, 1957 an application with the Board of Standards and Appeals for approval of the material known as Flagg Extra Heavy Malleable Iron Pipe Fittings, Sizes 2½ inches to 8 inches, under the provisions of C26-1383 and C26-1391.0 Administrative Building Code.

Purpose

The material is to be used in stand pipes.

Description

The fittings are malleable iron and are identified by the following markings on the fitting—Flagg 300 WSP, wherein the W.S.P. refers to Working Steam Pressure, Flagg 300 W.O.G. wherein the W.O.G. refers to water, oil, gas and on the reverse side of the fitting, in raised numerals is indicated the size of the fitting.

Inspection and Test

Various sizes and types of fittings were tested by Sam Tour & Co., Inc., Testing Laboratory, in tension, compression and hydrostatically.

MINUTES

In the hydrostatic tests the fittings all leaked at the threads at pressures ranging from 3000 to 6000 p.s.i. In compression, the fitting, a 6 inch Ell, failed at 95,900 pounds and in tension, also a 6 inch Ell failed 37,100 p.s.i. and all successfully met the requirements.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the Flagg Extra Heavy Malleable Iron Pipe Fittings, Sizes 2½ inches to 8 inches for use in New York City under the provisions of C26-1383 and C26-1391.0 Administrative Building Code on condition that the fittings be stamped "Approved by the Board of Standards and Appeals under Calendar Number 863-57-SM".

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 900-57-SM

Subject: Amendment to resolution as to additional size tile.

Joseph Platzker for Curtis Wright Corporation, New York, requested by letter dated March 31, 1959 that the resolution adopted November 18, 1958 under Calendar Number 900-57-SM be amended so as to include additional size tile. The application was reopened by a vote of the Board, April 28, 1959.

Purpose

The material is to be used as an incombustible wall & ceiling covering.

Description

There has been no change in the composition of the tile; the only change being in the size of the tile increasing from 10 inches by 10 inches to 10 inches by 20 inches and 20 inches by 20 inches and in rolls 2 feet 0 inches wide and 4 feet 0 inches wide.

Recommendation

The Committee on Test recommends that the resolution adopted November 18, 1958 under Calendar Number 900-57-SM be amended so as to include the additional size tiles as herein described on condition that the requirements of the resolution adopted November 18, 1958 under Calendar Number 900-57-SM are complied with.

982-57-SM

APPLICANT—The National Plastic Products Co., owner.

APPEARANCES—

For Applicant: John K. Foster.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,

Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 982-57-SM

Subject: Nevamar Board.

National Plastics Products Co., Odenton, Maryland, filed December 16, 1957 an application with the Board of Standards and Appeals for approval of the material known as Nevamar Board under the provisions C-26-667.0 Administrative Building Code.

Purpose

The material is to be used as a decorative wall covering but not to be used in stairways or corridors.

Description

Nevamar Board is a rigid panel, ¼ and ⅝ inches in thickness and consists of a surface of melamine resin, under which is a phenolic core; both bonded to a pressed wood core and faced on the back with a phenolic layer. This is all bonded together under high pressure to form a rigid laminate.

Inspection and Test

Samples of the material were examined by Ass't. Engr. J. A. Darts, Committee on Test, and the thickness was found to be ⅝ and ¼ inches.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends the approval of the material Nevamar Board, ⅝ and ¼ inches in thickness for voluntary use in New York City under the following conditions: both the ¼ inch and ⅝ inch for use under C26-667.0.3 and C26-667.0.8 and the ¼ inch under the provisions of C26-667.0.7.a Administrative Building Code, on condition that in all cases the board shall be backed up solidly by an incombustible backing and that all cartons or wrappers in which the material is marketed shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 982-57-SM".

(Sgd.) SAMUEL L. BECKER,
Director,

JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 47-58-SA.

Subject: Williamson Special Counter-Flow Gas Furnace
Models 1625-07, 1625-10, 1525-07, 1525-10, 1525-12
and 1525-15, approval of.

The Williamson Co., Cincinnati, Ohio, filed January 28, 1958, an application with the Board of Standards and Appeals for approval of the appliance known as Williamson Special Counter-Flow Gas Furnace Models 1625-07, 1625-10, 1525-07, 1525-10, 1525-12 and 1525-15 for use in New York City under the provisions of Article 12, Chapter 26 of the Administrative Building Code.

Purpose

Gas fired warm air furnace for domestic use.

Description

The Williamson Special Series Counter-flow Models are basement type floor furnaces designed for an input rating which varies from 75,000 BTU per hour from Model 1525-07 to 150,000 BTU per hour for Model 1525-15, also 75,000 BTU per hour for 1625-07* and 100,000 BTU per hour for Model 1625-10*.

The heat exchanger is oval design made of 14 to 20 gauge hot rolled steel, hand arc welded. Lower baffle is made of 16 or 18 gauge aluminized steel or GA 430 stainless steel. Upper baffle standard steel tubes are welded into the heat exchanger to give more rigidity. Heat exchanger is mounted on legs to provide air circulation over entire surface of

heat exchanger. Draft Diverter 26 gauge G.I. or 21 gauge C.R.S. Painted.

Gas burner is cast iron single port with rectangular cast iron flame spreader on Models 1525-07, 1525-12 and 1625-07, circular flame spreader on Models 1525-10, 1525-15 and 1625-10, pilot light and adjustable primary air shutter.

Blower is silent centrifugal type with permanent lubricated sealed bearings.

Motor is split phase long hour duty with built in overload protection.

Filter is spun glass replaceable type.

Controls are a thermostat, safety pilot, gas valve and automatic fan and limit control.

Casing has all of the above components housed in a 20-24 gauge C.R.S. casing, insulated with foil faced glass wool (4 sides) 1/2" x 1/2" Den. Finished in one coat baked enamel.

Inspection and Test

All details of construction were examined by Assistant Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file and is part of the record.

Recommendation

On the basis of the examination and test and data filed by the applicant the Committee on Test recommends the approval of the appliance known as Williamson Special Counter-Flow Gas Furnace, Models 1625-07, 1625-10, 1525-07, 1525-10, 1525-12 and 1525-15 for use in New York City under the provisions of Article 12 of the Administrative Building Code.

The Committee further recommends that the Williamson Special Series Counter-flow Models may be installed with the following minimum clearances in inches from combustible construction in accordance with the tests of the American Gas Association as listed in table.

MODEL	BTU	A	B	C	D	El	Er	F	REMARKS
1525-07	(75,000)	1	6	6	0	1	1	NC	C-1 inch when TYPE "B" vent is provided.
1525-07X	(75,000)								F-Combustible flooring, when special base is used on X model.
1525-10	(100,000)	1	6	6	0	1	6	NC	C-1 inch when TYPE "B" vent is provided.
1525-10X	(100,000)								Er-1 inch when TYPE "B" vent is provided. F-Combustible flooring when special base is used on X model.
1525-12	(125,000)	1	6	6	0	1	6	NC	C-1 inch when TYPE "B" vent is provided.
1525-12X	(125,000)								
1525-15	(150,000)	1	6	6	0	1	6	NC	C-1 inch when TYPE "B" vent is provided.
1525-15X	(150,000)								Er-1 inch when TYPE "B" vent is provided. F-"C" with special base.
1625-07 *	(75,000)	1	6	6	0	1	1	NC	C-1 inch when TYPE "B" vent is provided.
1625-07X*									F-"C" with special base.
1625-10 *	(100,000)	1	6	6	0	1	6	NC	C-1 inch when TYPE "B" vent is provided.
1625-10X*(100,000)									Er-1 inch when TYPE "B" vent is provided. F-"C" with special base.

Above Models also approved with suffix "X" when equipped with a special base for installation on combustible floors.

A — minimum clearance from top of furnace (casing, Bonnet or Plenum).

B — minimum clearance from front of unit.

C — minimum clearance from flue or vent connector in any direction.

D — minimum clearance from back of unit.

El— minimum clearance from left side of unit.

Er— minimum clearance from right side of unit.

F — Type of floor, C—Combustible, NC—non-Combustible.

In all cases however adequate ventilation shall be provided for and clearances shall be sufficient to allow for proper servicing of the furnaces.

*DIRECT DRIVE—Not recommended for air conditioning; all other models belt driven blowers.

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 82-58-SA

Subject: Coleman Gas-fired Warm Air Furnace, Models 2701, 2702 and 2600 series.

The Coleman Company, Inc., Philadelphia, Penn., filed February 14, 1958, an application with the Board of Standards and Appeals for approval of the appliance known as Coleman Gas-fired Warm Air Furnaces, Models 2701, 2702 and 2600 series for use in New York City under the provisions of Article 12, Chapter 26 of the Administrative Building Code.

Purpose

The appliance is a gas-fired warm air Residential Central Heating Furnace.

Description

The Trimboy up-flow models are a forced air circulation floor type furnace consisting of slotted head gas burners with standard controls that include heating thermostat, 24 volts diaphragm valve, 100% pilot shut-off, fan and limit control, gas pressure regulator (except on LP gas). Burners can be removed for cleaning without dismantling controls. The cast iron burners fire into a steel welded heating element—a combustion chamber and heat exchanger. Provision is

made for flue connection, dust filters can be changed quickly and easily. The assembled unit is housed in a steel metal lined casing with a Golden Glow enamel finish. These models are designed for an input rating which varies from 80,000 BTU per hour to 180,000 BTU per hour. May have direct drive or belt driven blowers. Fan switch is optional. Air conditioning unit may be installed with furnace or added later. Optional console cabinet may be installed on either side of furnace except on Model 2601, which is left side only.

The Trimboy down-flow models are the same as the up-flow models, except they may be used in homes with crawl space or slab floor construction. The down-flow furnaces are for crawl space perimeter systems, using conventional ducts or Blend-Air pipes and blenders. Works when crawl space is used as plenum. In homes with slab floors, heating ducts are buried in concrete slab and the furnace located over a plenum chamber in the floor. On Model 2613 add 1 inch to height for sub base when installed on combustible floor. These models are designed for an input rating which varies from 80,000 BTU per hour to 135,000 BTU per hour.

The horizontal-flow furnaces are designed for overhead suspension, attic and crawl space installation. Has centrifugal fan for forced air circulation, with heat inputs that vary from 80,000 BTU per hour to 145,000 BTU per hour. These furnaces used pressed steel gas burners installed within a steel heat exchanger. A flue connection and a draft diverter are provided. Burners may be mounted on either side of the furnace, with the diverter being mounted on the opposite side. Fan control automatically turns blower on and off to provide circulation of air. Limit control protects furnace from excessive temperature. Gas valve—100% shut-off on all gases in case of pilot failure. Blower is mounted on rubber mounts.

The low-boy basement type floor furnaces are designed for installation with low overhead clearance. These furnaces use sawed slot cast-iron type mated burners installed within a steel combustion chamber and heat exchanger. A flue connection and a draft diverter are provided. These furnaces are provided with belt driven centrifugal blower fans for forced up-flow air circulation. Heat inputs vary from 105,000 BTU per hour to 165,000 BTU per hour. Standard controls include heating thermostat with heat anticipator, 24 volt diaphragm valve, 100% pilot shut-off, fan and limit control, gas pressure regulator (except on LP gas). Dust filters are provided and can be changed easily. The assembled unit is housed in a steel casing with an enamel finish. Low boy is easily converted to air conditioning.

The air conditioning up-flow furnace is designed specifically for air conditioning applications. Has an input rating of 80,000 BTU per hour to 145,000 BTU per hour. This furnace is basically the same as the Trimboy up-flow models except for the blower design. The air conditioning up-flow furnace has a two speed, belt-drive blower.

The Trimboy Master up-flow furnaces are the same as the Trimboy up-flow furnaces except this series has special

MINUTES

order models for reduced input on Model 2701 for 70,000 BTU and 75,000 BTU, and for Model 2702, 90,000 BTU.

Inspection and Test

All details of construction were examined by Assistant Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file and is part of the record.

Recommendation

On the basis of the examination and test and data filed

by the applicant the Committee on Test recommends the approval of the appliance known as the Coleman gas-fired warm air furnace, Models 2701, 2702 and 2600 series for use in New York City under the provisions of Article 12 of the Administrative Building Code.

The Committee further recommends that the Coleman gas-fired warm air furnaces may be installed with the following approved minimum reduced clearances in inches from combustible construction in accordance with the tests of the American Gas Association as listed in table.

Subject: Little Bos'n Silent Glow Oil Burner, Model 650, approval of.

The Silent Glow Oil Burner Corporation, Hartford, Conn., filed March 14, 1958 an application with the Board of Standards and Appeals for approval of the Little Bos'n Silent Glow Oil Burner, Model 650, for use in New York City under the provisions of the Oil Burner Rules of the Board.

Purpose

A conversion type oil burner.

Description

The Little Bos'n Silent Glow Oil Burner is a high pressure gun type burner made up with an internal gear type fuel pump with pressure regulator, a combustion air blower fan with adjustable air intake, electric drive motor, a transformer and chrome steel electrodes for ignition. The burner housing is of steel and is designed for flange or pedestal mounting.

The firing range of the burner is from .65 gallon per hour to 1.65 gallons per hour on Number 2 fuel oil.

Inspection and Test

All details of construction were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The model 650 has been tested and listed by Underwriters' Laboratories, Guide No. 160 E 12.15, dated May 16, 1958.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the Little Bos'n Silent Glow Oil Burner, Model 650 for use in New York City under the provisions of the Oil Burner Rules of the Board, provided that each burner shall bear a label, permanently affixed, reading "Approved by the

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 160-58-SM

Subject: WRDA Water Reducing Agent for Portland Cement Concrete.

Dewey and Almy Chemical Co., Division of W. R. Grace and Co., filed March 17, 1958 an application with the Board of Standards and Appeals for approval of the material known as WRDA Water Reducing Agent for Portland Cement Concrete under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is an admixture to concrete and acts as a water reducing agent.

Description

The material is a water reducing cement dispersing agent, and as such, lessens the natural interparticle attraction between cement grains.

The description is as follows: It is an aqueous solution of highly purified calcium salts of lignin sulphonic acids, containing a catalyst, which counteracts the normal hydration retarding effect of dispersing admixtures, and a preservative, and it has a viscosity only slightly greater than that of water.

Inspection and Test

The applicant has submitted various tests reports from the following laboratories: Hub Testing Laboratory, Allentown Testing Laboratory, Hales Testing Laboratory, Walter H. Flood & Co. and others. The tests conducted were comparative tests, concrete without the admixture and concrete with the admixture and in all cases the concrete with the admixture showed higher strengths.

Recommendation

On the basis of the data submitted by the applicant, the Committee on Test recommends the approval of the material known as WRDA for voluntary use in New York City under C26-191.0 Administrative Building Code as an admixture to concrete, on condition that the amount of WRDA used shall not exceed 7 ounces per sack of cement and further that all containers in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 160-58-SM".

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 308-58-SM

Subject: Hercules Mortar Cement.

Hercules Cement Co., Philadelphia, Pa., filed May 13, 1958 an application with the Board of Standards and Appeals for approval of the material known as Hercules Mortar Cement under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is to be used as a cement for mortar.

Description

The mortar is manufactured by pulverized mixture of clinker and limestone to which is added a small amount of gypsum, air entraining agents and waterproofing agents.

The raw materials used to manufacture clinker is quarried at the plant and is of such a composition that no additives are required. This vein of rock is known as Jacksonburg cement rock and Jacksonburg cement limestone.

The raw materials are first crushed and then stored and later blended; after blending the raw material is ground in ball mills and the pulverized material is then stored in raw blending silos. The blended material is then fed into the kilns where it is calcined to form a clinker. The clinker is then stored again. Later the clinker is drawn for proportioning with the lime stone, gypsum. The air entraining agent and the waterproofing agent are added wet. All the ingredients are fed to a compeb mill where it is finely pulverized, then stored and bagged.

Inspection and Test

The Hercules Mortar Cement was approved by the Board, under Calendar Number 646-49-SM on May 31, 1950 and the applicant has submitted test reports showing compliance with the ASTM requirements. The compressive strengths were as follows:

3 days..... 725 p.s.i.
7 days..... 902 p.s.i.
28 days..... 1019 p.s.i.

which is beyond the ASTM requirements.

Recommendation

On the basis of the tests and the data submitted by the applicant, the Committee on Test recommends the approval of the material known as Hercules Mortar Cement as manufactured at Stockertown, Pa., for use in New York City pursuant to C26-312 and C26-314.0 Administrative Building Code, on condition that each bag in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 308-58-SM"

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 444-58-SM

Subject: Eastern Silent Ceiling, perforated Metal Acoustical Panels.

Eastern Products Corp., Acoustical Division, Baltimore, Md., filed July 22, 1958 an application with the Board of Standards and Appeals for approval of the material known as Eastern Silent Ceiling Perforated Metal Acoustical Panels under the provisions of C26-461.0 Administrative Building Code.

Purpose

The material is to be used as an incombustible acoustical ceiling.

Description

The system consists of perforated No. 26 gauge metal panels 1 foot 0 inches wide and in lengths up to 12 feet 0 inches and No. 12 wire clips.

In erection, the standard grillage as required under C26-461.0 is installed and the panels are clipped to this grillage by means of the wire clips.

Each panel is clipped to the hanger channel so that each panel is secured to the channel 5 feet 0 inches maximum in one direction and 1 foot 0 inches in a direction perpendicular to the 5 feet 0 inches direction. After erection of the panels, an incombustible acoustical blanket is then placed on the top of the panels.

Inspection and Test

A sample ceiling was tested in accordance with Federal Spec. SS-A-118 and was found to be incombustible. The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the Eastern Silent Ceiling, Perforated Metal Acoustical Panel, under the provisions of C26-191.0 Administrative Building Code, for voluntary installation as an incombustible acoustical ceiling as having met the requirements of C26-88.0 Administrative Building Code on condition that the ceiling be suspended from a grid constructed in accordance with the requirements of C26-461.0 Administrative Building Code and further that the cartons or containers in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and

Subject: Deegan Toilet Bowl Setting Wax Gasket.

The E. J. Deegan Mfg. Co., Inc., New York, filed July 22, 1958 an application with the Board of Standards and Appeals for approval of the material known as Deegan Toilet Bowl Setting Wax Gasket under the provisions of C26-1250.0 Administrative Building Code.

Purpose

The material is used to provide a ring of material impervious to moisture for use with toilet bowls.

Description

The ring of micro-petro wax is a compound of non-volatile and non-asphaltic materials and contains no oils; it is wholly a mineral product and will not support bacterial life; is gas proof, waterproof, will not freeze, dry or harden and will not stain tile or concrete surfaces.

The outside diameter of the ring is 6¼ inches, the inside diameter is 3½ inches and is 7⁄8 inches deep.

Inspection and Test

The ring was examined by Ass't Engr. J. A. Darts, Committee on Test and subjected to a six months test to determine if it would stain a slab of marble. There was no staining at the end of the test period. The gaskets meet Federal Specification H.H.C. 536A.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Deegan Toilet Bowl Setting Wax Gasket for use in New York City for setting toilet bowls when constructed and used in accordance with this report and the provisions of C26-1250.0 Administrative Building Code; provided each package or container shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 503-58-SM".

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 549-58-SM.

Subject: National Nailing System.

National Builders Supply Co., Malvern, Pa., filed September 18, 1958 an application with the Board of Standards and Appeals for approval of the material known as National Nailing System under the provisions of C26-461.0 Administrative Building Code.

Purpose

The material is to be used as an acoustical suspension system.

Description

The system is to be attached to a grid installed in accordance with the requirements of C26-461.0 Administrative Building Code and consists of a cold roll channel formed from .022 galvanized steel strip and a galvanized steel clip.

In installation the nailing channels are clipped to the 1½ inch furring channels by means of the channel clip. The acoustical tile base, either rock lath or plaster board is attached to the nailing channel by means of annular nails and the acoustical tile is mechanically attached to the base.

Inspection and Test

Details of construction were examined by Asst. Engr. J. A. Darts, Committee on Test, and the method of installation was noted.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends the approval of the material known as National Nailing System for use in New York City when attached to a grid system installed in accordance with the requirements of C26-461.0 and the use and extent of area covered shall be governed by the specific approval, granted by the Board, to the tiles weighing not more than three (3) lbs. per. sq. ft. used in conjunction with this system and further all cartons in which the system is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 549-58-SM".

677-58-SM

APPLICANT—Bordas Corp., for Cementos Del Caribe S.A., owner.

APPEARANCES—

For Applicant: Diego E. Bordas.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,

Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 677-58-SM

Subject: Caribe Portland Cement.

Bordas Corporation for Marmales Y Cementos Del Nare S. A., Barranquilla, Columbia, South America, filed November 25, 1958, an application with the Board of Standards and Appeals for approval of the material known as Caribe Portland Cement under C26-312.0. On May 28, 1959, the Bordas Corporation voided the original application and superseded it by an application showing the Owner-Manufacturer to be Cementos Del Caribe S. A.

Purpose

The material is a Type I Portland Cement.

Description

The limestone and clay, essential to the manufacture of cement are found at the plant site and the gypsum is purchased from mines located two hundred miles from the plant.

The equipment, located at the plant, consists of the following: jaw crusher, hammermill, conveyors, one compartment ball mill, three compartment compeb mill, pumps, blending tanks, storage tanks, silos, kilns, finish mills and packaging facilities.

The cement is manufactured by the wet slurry process.

Inspection and Test

The plant of the applicant was inspected by the Committee on Test consisting of Commissioners Sleeper and Fox. In addition to the inspection, two sample sacks of cement were removed from the hold of the Kurt Arlt and submitted to the Board of Water Supply for testing. The cement met the requirements of ASTM C 150-56 for Type I cement. The complete report is on file with and is part of the record.

Recommendation

On the basis of the inspection and test and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Caribe Portland Cement, Type I, for use in New York City under the provisions of C26-312.0 Administrative Building Code on condition that the cement be packaged in waterproof bags, suitable for export packaging and that each bag shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 677-58-SM" and further the owner-manufacturer shall submit, monthly, for a period of six months from the date of this resolution, and annually, thereafter, a certified copy of mill reports certifying that all cement manufactured at the applicants plant located in Barranquilla, Columbia, South America, and shipped into New York City complied with all requirements of this resolution including compliance with ASTM 150-56 specifications.

(Sgd.) HAROLD R. SLEEPER,
Commissioner,
HUGH P. FOX,
Commissioner.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 3-59-SM.

Subject: HORNBOND (Bonding Agent).

A. C. Horn Companies, Division of Sun Chemical Corp., New York, filed October 21, 1958 an application with the Board of Standards and Appeals for approval of the material known as HORNBOND (bonding agent) under the provisions of C26-191.0 and C26-464.0 Administrative Building Code.

Purpose

The material is a bonding agent to be used to bond plaster to concrete.

Description

HORNBOND is a liquid having a viscosity about equal to paint. Basically, this material is liquid latex emulsion combined with plasticizers. The Board has decided that the formulation is of a proprietary nature and has, therefore, placed the formula in a sealed envelope which has been placed in the Board's safe so that the constituent parts of the formula will not be disclosed but can be checked at any time, if necessary.

Inspection and Test

Samples of the material, HORNBOND, were identified and tests were conducted at Manhattan College in the presence of Ass't Engr. J. A. Darts, Committee on Test.

The following tests were conducted:

Tension, Shear, vibration, acidity and toxicity.

The tensile tests were made on three different groups of standard briquettes.

The first group consisted of three briquettes each of (1) neat cement; (2) Ottawa Sand Mortar; (3) Cowboy Sand Mortar; (4) Brown Coat; (5) Finish plaster; (6) Acoustical plaster and (7) Perlite plaster. Samples were tested and the halves saved.

The second group was made up by cementing together the halves of the first group, after testing, with Horn Bond.

The third group was made up of taking half briquettes of neat cement, placing them in the briquette molds; coating the exposed cross section with Horn Bond and then moulding the other half of brown coat, finish plaster, acoustical plaster and perlite plaster.

Results were as follows:

Group I

Neat Cement	331 p.s.i.
1:3 Ottawa Sand	252 p.s.i.
1:3 Cowboy Sand	292 p.s.i.
1:3 Brown Coat	170 p.s.i.
Acoustical Plaster	95 p.s.i.
1:3 Perlite	162 p.s.i.
Finish Plaster	352 p.s.i.

Group II

333 p.s.i. Fail in Cement
275 p.s.i. Fail in Mortar
357 p.s.i. Fail in Mortar
172 p.s.i. Fail in Plaster
133 p.s.i. Fail in Plaster
163 p.s.i. Fail in Plaster
425 p.s.i. Fail in Plaster

Group III

166 p.s.i. Plaster
110 p.s.i. Plaster
153 p.s.i. Plaster
338 p.s.i. Plaster

Shear:—Two of the samples tested in direct shear at an average of 252 lbs./sq. in.

Vibration:—At the end of 256,000 vibrations there was no sign of failure in the plaster or the bond.

Acidity:—At the end of twenty-five days there was no failure in the plaster or in the Horn Bond but the plaster finish was badly stained due to acid action.

Toxicity:—The toxic effect of the products of combustion was not more dangerous than the products of combustion of other materials used in construction.

The complete report of Manhattan College is on file with and is part of the record.

Recommendation

On the basis of the inspection and test and the data filed by the applicant, the Committee on Test recommends the approval of the material known as HORNBOND for voluntary use in New York City as a bonding agent to bond plaster to concrete or to cement mortar; the Committee further recommends that this material may be used as an adhesive to bond a finish coat directly over concrete, provided a three coat plaster is not required, for example, a line putty finish coat on concrete columns.

It is further recommended that, in no way shall this material be construed to be the equivalent, nor shall it be used in lieu of a coat of plaster and further that each container in which this material is marketed shall be marked, labeled or stamped, "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 3-59-SM".

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

18-59-SM

APPLICANT—Kelly Associates for Leavitt Bleacher Company, owner, W. G. Kelly, agent.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 18-59-SM.

Subject: No. 3 Telescoping Bleacher.

Kelly Associates for Leavitt Bleacher Co., Urbana, Illinois, filed January 9, 1959 an application with the Board of Standards and Appeals for approval of the No. 3 Telescoping Bleacher under the provisions of C26-191.0 Administrative Building Code.

Purpose

A folding bleacher for indoor seating.

Description

The device is a type of bleacher intended to be used for indoor spectator seating and may be telescoped or folded against the wall when not in use.

The standard section is 16 feet 0 inches long. Rise per row is 0 feet 10½ inches. Distance between foot and seat board is 1 foot 5½ inches and each row shall have a depth of 1 foot 10 inches. The seat apron boards form a vertical front when the bleacher is closed.

Each row is supported by four rigid frame uprights composed of eight angle columns welded in parts. The top of the column has a guide consisting of two ball bearing wheels, rolling under an I beam, and locked to this beam in a way to prevent any possibility of this section being uncoupled

MINUTES

in use. The eight base wheels, $3\frac{1}{2}$ inches by $1\frac{1}{4}$ inches are of non marking rubber.

The lumber for the seat apron and foot board are of Douglas Fir and are $1\frac{3}{16}$ inches thick.

In operation of the telescoping principle, one or more rows of seats may be used. Key lock, when open permits raising of front apron board which automatically releases first row stop. Lowering of same apron locks first row and resets keyed lock. The key shall be in the possession of a responsible person.

Inspection and Test

Details of construction were examined by Ass't Engr. J. A. Darts, Committee on Test and it was noted that the design was based on the ability to safely sustain a vertical live load of 120 lbs. per linear foot of seat and footboard and a sway load of 24 lbs. per foot of seatboard.

Recommendation

On the basis of the examination and the data filed by the applicant, The Committee on Test recommends the approval of the Leavitt No. 3 Telescoping Bleacher for use in New York City on condition that the device be constructed in accordance with this report and installed in accordance with the requirements of the pertinent section of Chapter 26 Administrative Building Code, provided that the height of the bleacher shall be limited to six tiers, that the bleachers shall be adequately anchored to the wall, irrespective to the number of tiers; that no seat occupant shall pass more than seven seats without the intervention of an aisle; that the aisle shall be a minimum width 6 feet 2 inches; that the aisles shall be provided with steps adequately secured when the bleachers are in use, to the main floor and further that the bleacher bears a label permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 18-59-SM".

(Sgd.) SAMUEL L. BECKER
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

143-59-SA

APPLICANT—E. J. Marre for C. A. Olsen Manufacturing Company, owner.

APPEARANCES—

For Applicant: E. J. Marre, Jr.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 143-59-SA

Subject: Luxaire Gas Fired Furnaces, Series G, SH, SHC, A, Y, H, HC and D, also to be marketed as Moncrief and Crane Sunnyland Furnaces, approval of.

E. J. Marre for C. A. Olsen Mfg. Co., Elyria, Ohio, filed March 10, 1959 an application with the Board of Standards and Appeals for approval of Luxaire Gas Fired Furnaces, Series G, SH, SHC, A, Y, H, HC and D also to be marketed by the Henry Furnace Co., as the Moncrief Furnaces and by the Crane Company as Crane Sunnyland Furnaces for use in New York City under the provisions of Article 12, Administrative Building Code.

Purpose

Gas Fired warm air furnaces for residential and commercial use.

Description

The G Series are gravity flow floor type furnaces consisting of a single port atmospheric gas burner with flame spreader and pilot light and a gas pressure regulator that is equipped with a slow opening device for noiseless ignition. The burner fires into a welded steel heating element—a combustion chamber and radiator. Provision is made for flue connection. The assembled unit is housed in an enameled steel cabinet.

The G Series are available in three sizes designated as G-86, G-110 and G-135, the numeral indicating in thousands the Btu input per hour.

The SH and SHC furnaces are floor type units made up of a sheet steel insulated cabinet housing a 16 gauge welded steel heating element with steel burner tubes and ribbon port burners. The heating element is connected to a flue opening through a built-in draft diverter. These furnaces are provided with centrifugal blower fans for forced circulation. Dust filters are also provided.

The SHC Models are similar to the SH Models, except that they are designed for counterflow. Input ratings vary from 75,000 Btu per hour for the SH-75 to 150,000 Btu per hour for the SH-150.

The A Series are basement type floor furnaces with the same type burners and heating element as in the G Series. A centrifugal blower fan and filters have been added for forced circulation.

Btu inputs vary from 105,000 Btu per hour for the A-105 to 260,000 Btu per hour for the A-250.

The Y Series are horizontal furnaces designed for overhead suspension or crawl space installation. These furnaces use a pressed steel slotted gas burner installed within a welded steel heat exchanger. A flue connection and built-in draft diverter are provided. The Y Series are designed for forced air circulation. Heat inputs vary from 80,000 Btu per hour for the Y-80 Model to 140,000 Btu per hour for the Y-140 Model.

The H and HC are floor type furnaces designed for upflow and counter flow, respectively. A similar burner and heat exchanger are used as in the A & G Series furnaces. A blower fan and filters are installed for forced air circulation. All parts are assembled within a steel cabinet finished in two tone baked enamel. A draft diverter and flue connection are provided.

The heat input varies from 100,000 Btu per hour for the H-100 to 140,000 Btu per hour for the H-140.

The D Series furnaces are similar to the Y Series, except that the blower fan has been removed.

The D furnaces are designed for duct installation or for installation with an auxiliary motor and fan.

In all Series, Minneapolis-Honeywell controls are furnished along with thermostat, gas valves, safety pilots limit switch and, except in the G and D Series, a fan switch. Gas pressure regulators and shut-off cocks are also provided.

The Suffix D when used in the model designation indicates a direct driven blower fan and the suffix E that the controls are external.

Inspection and Test

All details of construction were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

All furnaces listed in the application were tested and approved by the American Gas Association.

Recommendation

On the basis of the examination and the data filed by the applicant, The Committee on Test recommends the approval of the Luxaire Gas Fired Furnaces, Models G-86, G-110, G-135, SH-75-D, SH-75, SH-100-D, SH-100, SH-125, SH-150; SHC-75-D, SHC-100-D, SHC-100, SHC-125, SHC-150; A-105-ED, A-105-E, A-105-D, A-105, A-125-E, A-125, A-150, A-210, A-260; Y-80-ED, Y-80-E, Y-100-ED, Y-100-E, Y-120-E, Y-140-E; H-100-ED, H-100-E, H-115-E, H-140-E; HC-100-ED, HC-100-E,

MINUTES

HC-115-E, HC-140-E; D-80, D-100, D-120 and D-140 for use in New York City under the provisions of Article 12, Administrative Building Code and that such furnaces may be marketed as Moncrief Furnaces and Crane Sunnyland Furnaces provided that each furnace shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 143-59-SA". The Committee further recommends that the furnaces may be installed with the following clearances from combustible construction in accordance with the tests of the American Gas Association.

The gravity flow G series, the basement type A series, the horizontal type Y series, the duct type D series and the H-115-E and HC-115-E furnaces minimum clearance of 6 inches between combustible construction and the sides and rear of the furnace and any projecting flue box or draft hood and at least 18 inches of clear space in front of the furnace but in all cases sufficient clearance to permit proper servicing of the furnace.

The SH, SHC, H and HC series may be installed with the minimum clearances in inches from combustible construction as listed in the following table:

Model	A	B	C	D	El	Er	F
SH-75-D	1	6	6	1	0	0	C
SH-75							
SH-100-D	1	6	6	1	0	0	C
SH-100							
SH-125	1	6	6	1	0	0	C
SH-150	1	6	6	1	0	0	C
SHC-75-D	1	6	6	1	0	0	NC
SHC-100-D	1	6	6	1	0	0	NC
SHC-100							
SHC-125	1	6	6	1	0	0	NC
SHC-150	1	6	6	1	0	0	NC
H-100-ED	1	12	6	1	1	1	C
H-100-E							
H-140-E	2	13	6	1	1	1	C
HC-100-ED	1	12	6	1	1	1	NC
HC-100-E							
HC-140-E	1	13	6	1	1	1	NC

A—minimum clearance from top of furnace

B—minimum clearance from front of unit

C—minimum clearance from flue or vent connector

D—minimum clearance from back of unit

El—minimum clearance from left side of unit.

Er—minimum clearance from right side of unit.

F—type of flow, C—combustible, NC—non-combustible

In all cases however adequate ventilation shall be provided for and clearances shall be sufficient to allow for proper servicing of the furnaces.

The above furnaces are not to be installed in garages or similar occupancies.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this appliance in accordance with the above report.

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent

dated November 16, 1956 on Building Notice Application 3180/56 reads:

"1. Two lawful means of egress are required from each floor area, including cellar as per Section 271 of the Labor Law. Note: Fire Escape not acceptable as lawful means of egress on 7 story non-fireproof building under Labor Law amended 7-1-47."

and

WHEREAS, Section 271 of the Labor Law as later amended does not now require two means of egress from the floor area not used for factory; and

WHEREAS, the applicant states that the building is 7 stories 83 feet 8 inches in height, 24 feet front by 95 feet 1 inch in depth, at street level, 89 feet in depth at typical floor level of Class 3 construction, erected 1894 located in a local retail use B area, Class 2 height district and used and occupied since 1894 as follows: cellar—storage; first floor—store, 2 persons; second floor—storage of canned foods, 5 persons; third floor—storage and sale of plastic material, 2 persons; fourth floor—silk screening, 10 persons; fifth floor—storage of skirts and hats, 2 persons; sixth floor—manufacturing skirts, 20 persons; seventh floor—manufacturing hats, 20 persons; no change in use of occupancy is now proposed; the building is provided with an approved interior fire alarm system and regular monthly fire drills are maintained; there is one interior wood stairs, 2 feet 8 inches and 3 feet in width enclosed in wood studs, wood lath and plaster equipped with Kalamien self closing doors and leading from roof bulkhead direct to street; and there are two fire escapes, one front and one rear; the rear fire escape extends to roof by ladder; the front fire escape extends to street by counter balanced stair and the rear fire escape extends to yard by stair; the windows and doors on the course of the fire escape are fire proof self closing; there is no safe egress from the roof; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended that the appeal should not be granted.

Resolved, that the decision of the Borough Superintendent, acting on Building Notice Application 3180/56, Objection 1, be and it hereby is *affirmed* and that the appeal be and it hereby is *denied*.

566-58-A

APPLICANT—George P. Ames, for George and Isabelle Nizich, owners.

SUBJECT—Application reopened April 21, 1959 to reconsider the matter formerly before the Board—filed pursuant to section 35, General City Law re proposed erection of building in bed of mapped street—54th Road.

PREMISES AFFECTED—53-24 241st Street, west side, 218.42 feet south of 53rd Avenue, Block 8176, Lot 18, Douglaston, Borough of Queens.

APPEARANCES—

For Applicant: George P. Ames.

ACTION OF BOARD—Resolution amended.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated September 8, 1958 on N.B. Applic. 71/58, reads:

"(1) The proposed erection of a bldg. in the bed of a mapped street is contrary to Sec. 35 General City Law."

and

WHEREAS, the applicant states that the building will be 2 stories, 27 feet 2 inches in height, 25 feet front by 55 feet 6 inches in height, of class 4 construction, on lot 50.13 feet front by 105 feet in depth, in a residence use, G area, class ½ height district, used and occupied as a 1 family dwelling with accessory garage.

MINUTES

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on December 2, 1958, so that as amended it shall read:

"... that the cost of the proposed building shall be amortized at the rate of 2 per cent a year and that in the event the City determines to acquire the premises for street construction, remuneration for the site and the building herein permitted shall be in accordance with the determination of the Court; and that in all other respects the building and occupancy shall comply with all laws, rules and regulations applicable thereto."

636-58-A

APPLICANT—Lama, Proskauer and Prober, for Samed Realty Corp., owner.

SUBJECT—Application November 6, 1958—Appeal from a decision of the Borough Superintendent, re marquee, factory building.

PREMISES AFFECTED—747 Broadway, northeast corner of Flushing Avenue, Block 3127, Lot 1, Borough of Brooklyn.

APPEARANCES—

For Applicant: James E. Vassalotti.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the amended decision of the Borough Superintendent, dated April 9, 1959 on B. N. Applic. 2545/58, reads:

"1. Proposed marquee at the front of the factory bldg. violates the following provisions of 2.4.1.4.8 of the Administrative Code:

a) Marquee in front of bldg, not of public nature prohibited by par. 1.

b) Marquee within two feet of curb line prohibited by par. 2.

c) Marquee exceeds in length 75% of the street wall on which it fronts and also exceeds max. permitted length of 50 ft. as provided in par. 2.

d) The maximum vertical projected depth of the marquee exceeds 2 feet contrary to par. 3.

e) The marquee exceeds in length the width of any entrance plus 2½ feet on either side contrary to par. 2."

and

WHEREAS, the applicant states that the building is 110 feet by 240 feet 2½ inches irregular in area, 5 stories, 67 feet high, of nonfireproof construction, located in unrestricted use, B area, class 1½ height district, built in 1888, used and occupied since 1938 as follows: cellar—packaging of games, 10 persons; 1st floor—packaging of games and stores, 100 persons; 2nd floor—manufacturing of sweaters, 15 persons; 3rd floor—manufacturing of underwear, 30 persons; 4th floor—manufacturing of underwear, 40 persons; 5th floor—manufacturing of slippers, 40 persons; that Certificate of Occupancy 89932/38 issued against Alt. Applic. 4834/38 states use and occupancy: sub basement—motor room, no persons; basement and 1st floor—selling space, store and manufacturing, 70 persons; 2nd to 5th floors each—manufacturing, 50 persons; and

WHEREAS, the premises was inspected by a committee of the Board.

Resolved, that the decision of the Borough Superintendent, dated April 9, 1959, acting on N.B. Applic. 2545/58 be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the work be done as shown on plans filed with this appeal marked, "Received April 16, 1959," 4 sheets; that *on further condition* the outer edge of the marquee be at least 16 feet above the curb; that all exits in the building shall comply with the Labor Law; that all work in connection with the building shall comply with all laws, rules and regulations applicable; and that all per-

mits, including a certificate of occupancy, shall be obtained and all work completed within six months from the date of this resolution.

8-59-A

APPLICANT—Samuel Rosenblum for The Bennington Corporation, owner.

SUBJECT—Application January 6, 1959—appeal from a decision of the Borough Superintendent—re egress and live load.

PREMISES AFFECTED—31 West 37th Street, north side, 485 feet 6 inches west of Fifth Avenue, Block 839, Lot 22, Borough of Manhattan.

APPEARANCES—

For Applicant: Samuel Rosenblum and Milton J. Hauer.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, and Commissioner Becker 3
Negative: Commissioner Fox 1
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated December 19, 1958 on Alt. Applic. 1369/56, reads:

"2) Respectfully request reconsideration for acceptance of 75 lb. live load for proposed factory use on 2nd and 3rd floors. Denied.

3) Respectfully request reconsideration for acceptance of exterior fire escape, as second means of egress from 2nd and 3rd floor of proposed factory. Denied.

and

WHEREAS, the applicant states that the building is 36 feet by 79 feet in area, 3 stories, 38 feet high, of non fireproof construction, located in retail use, B area, class 2 height district, built prior to 1890, used since 1957 as follows: Cellar—boiler room and storage, no persons; 1st floor—restaurant and photo studio store, 50 persons; 2nd floor—photo processing and film developing, 20 persons; 3rd floor—photo studio, 20 persons; that the Certificate of Occupancy 46915/57 issued against Alt. Applic. 228/56 gives use and occupancy: Cellar—boiler room, no persons; 1st floor—offices and meeting rooms, 50 persons; 2nd and 3rd floors—office, 45 persons each floor; and

WHEREAS, the premises was inspected by a committee of the Board.

Resolved, that the decision of the Borough Superintendent, dated December 19, 1958, acting on Alt. Applic. 1369/56 be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that all work be performed in accordance with plans filed with this appeal marked, "Received January 6, 1959," 2 sheets, "April 30, 1959," 9 sheets; that *on further condition* the allowable loading for the second and third floors of the building shall be posted; and that all permits, including a certificate of occupancy, shall be obtained and all work completed within six months from the date of this resolution.

69-59-A

APPLICANT—Samuel Rosenblum for 1038 Corporation, owner.

SUBJECT—Application February 2, 1959—Appcal from a decision of the Borough Superintendent re review of Borough Superintendent's decision of zoning matter.

PREMISES AFFECTED—10-12 East 38th Street, south side, 200 feet east of Fifth Avenue, Block 867, Lot 64, Borough of Manhattan.

APPEARANCES—

For Applicant: Samuel Rosenblum and Milton I. Hauer.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

MINUTES

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated January 1, 1959 on Alt. Applic. 1288/58, reads:

"1. Provide rear yard as per Sec. 12 Zoning Resolution."

2. Provide fire tower—Sec. 270 LL."

and

WHEREAS, the applicant states that the building is 50 feet by 94 feet 10 inches in area, 11 stories and mezzanine, 139 feet 4½ inches high of fireproof construction, located in restricted retail use, B area, class 2 height district, built in 1916, presently occupied as follows: cellar—storage of scarfs and mechanical equipment, 2 persons; 1st floor—store, handkerchiefs and scarfs, 40 persons; mezzanine—12 persons; 2nd floor—commercial photographer, 16 persons; 3rd floor—stock room handkerchiefs, 3 persons; 4th floor—stockroom handkerchiefs and shipping, 5 persons; 5th floor—rear milliner manufacturing, 25 persons; 5th floor center, tailor, 5 persons; 5th floor front—textiles, 3 persons; 6th floor—costume jewelry, 25 persons; 7th floor front—textiles, 4 persons; 7th floor rear—costume jewelry, 25 persons; 8th floor—costume jewelry, 70 persons; 9th floor front—textiles, 3 persons; 9th floor rear—glove manufacturing, 20 persons; 10th floor front—manufacturing hoods and handkerchiefs, 20 persons; 10th floor rear—costume jewelry, 25 persons; 11th floor front—selling pipes and tobacco, 10 persons; 11th floor rear—textiles, 6 persons; that Certificate of Occupancy 609/17 issued against Alt. Applic. 1032/16 gives use and occupancy as follows: Basement—storage, etc., no persons; 1st floor—automobile storage, 6 persons; 2nd and 3rd floors—stores, 18 persons each floor; 4th floor—kitchen, lunchroom, etc., 9 persons; 5th and 6th floors—vacant; 7th floor—stock and light manufacturing, 50 persons; 8th floor—stockroom, 8 persons; 9th floor—showrooms, 20 persons; 10th floor—office and light manufacturing, 28 persons; 11th floor—offices and light manufacturing, 38 persons; that the present exit consists of one interior 3 foot 8 inch wide fireproof stair; that the building is equipped with a two-source sprinkler system and stand-pipe system; and

WHEREAS, the premises were inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the requirements of the Labor Law, as cited in a decision of the Borough Superintendent, acting on Alt. Applic. 1288/58, Objection Nos. 1 and 2 and that the appeal be and it hereby is *granted, on condition* that all work be done in accordance with the plans filed with this appeal marked, "Received February 2, 1959," 14 sheets; that modification of Item No. 1 of the decision of the Borough Superintendent is granted on the premise that the rear yard complies with Section 19g of the Zoning Resolution; that Item No. 2 of the decision of the Borough Superintendent is granted as a variance of the Labor Law; and that all permits, including a certificate of occupancy, shall be obtained and all work completed within six months from the date of this resolution.

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated February 4, 1959 on Alt. Applic. 1457/58, reads:

"7. Revised

Two means of egress are required for each occupant of a floor and without going through another occupant's (tenant's) space."

WHEREAS, the applicant states that the building is 200 feet 10 inches irregular in area, 2 stories, 34 feet high, of class 2 construction, located in unrestricted use, B area, class 2 height district; that the building was built in 1947 for White Motor Company; that the use and occupancy was: Cellar—boiler room; 1st floor—motor vehicle repair shop, service station and parts department, 75 persons; 2nd floor—offices, 150 persons; and

WHEREAS, the premises was inspected by a committee of the Board.

Resolved, that the decision of the Borough Superintendent, dated February 4, 1959, acting on Alt. Applic. 1457/58 be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the doors which form the two means of egress into another occupant's space be fitted with approved panic bolts on the applicant's side of the space and there shall be no locking device on the other side of the exit doors; that all work shall be completed in accordance with plans filed with this appeal marked, "Received February 17, 1959," 2 sheets; and that all permits, including a certificate of occupancy, shall be obtained and all work completed within six months from the date of this resolution.

99-59-A

APPLICANT—Ludwig P. Bono for 125 East Broadway Realty, owner.

SUBJECT—Application February 18, 1959—filed pursuant to Section 310 of the Multiple Dwelling Law for variation of Section 27, subdivision 2b re Egress, width of yard inadequate.

PREMISES AFFECTED—9-11 Pike Street and 121-125 East Broadway, southeast corner, Block 283, Lots 43 and 44, Borough of Manhattan.

APPEARANCES—

For Applicant: Ludwig P. Bono and Salvator Asaro.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,

Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated January 27, 1959 from Alt. Applic. 1155/58, reads:

"A-17 repeat—minimum 10'-0" wide yard required for a distance within 60'-0" of street. Sec. 27 subd 2b M.D.L.

"A-19—Location of proposed fire escape in yard less than 10'-0" required minimum width is contrary to Sec. 53 subd 2 M.D.L."

and

WHEREAS, the applicant states that the building is 48 feet 2 inches by 85 feet irregular in area, 6 stories, 66 feet 9 inches high, of non fireproof construction, located in retail use, C area, class 1 height district, built as two separate buildings, that 9 Pike Street was built in 1892 as a 7 story loft; that 11 Pike Street was built in 1898 as a 6 story old law tenement; that both buildings are now being converted into a 6 story, class 3, Multiple Dwelling; that the building is being equipped with a new interior stair, elevator, incinerator, kitchenettes and bathrooms; that the yard requirement of the Multiple Dwelling Law calls for the demolition of the rear wall of 9 Pike Street and rebuilding this wall, 5 feet to the west to increase the yard at this point

MINUTES

from the present 5 feet to the required 10 feet; that a 5 feet, full height, side yard has now been created for 9 Pike Street adjacent to East Broadway by the removal of the existing 1 story structure; that the front wall (with gate) and lot line wall, were left for structural reasons; that the structures are existing and have been already cut and it would be impractical to cut the corner building any further; that the combined area of the 2 buildings was reduced from 3681 square feet to 3067.3 square feet, namely a reduction of 613.7 square feet and the average coverage percentage reduced from 89.9 to 74.9, namely a reduction of 15 per cent; that this yard will not adversely affect light and ventilation for the Multiple Dwelling question since legal windows to street and rear yards have been provided, nor will it be detrimental to the adjacent property which has a blank wall; that these two structures which have been vacant for some time were used for shelter by derelicts and this structure will be redeemed into respectability and thus help to improve the appearance of the neighborhood; that the unforeseen and cumulative cost of this alteration has created a serious financial hardship to the owner; that it is fair to assume that this rare type of alteration must have deterred investors who were previously interested in this property; and

WHEREAS, the premises were inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the decision of the Borough Superintendent, acting on Alt. Applic. 1155/58, Objection Nos. A-17 and A-19 be and it hereby is *modified* under the powers vested in the Board by Section 310 of the Multiple Dwelling Law, and that the appeal be and it hereby is *granted, on condition* that all work required be performed in accordance with plans filed with this appeal marked, "Received February 18, 1959," 11 sheets; and that all permits, including a certificate of occupancy, shall be obtained and all work completed within six months from the date of this resolution.

APPLICANT—Ingram S. Carner, for Sutbros Realty Corporation, owner; Shell Oil Company, lessee.

SUBJECT—Application October 3, 1958—decision of the Borough Superintendent, under sections 7f, 7i and 7A of the Zoning Resolution, to permit in a retail use district, the erection and maintenance of a gasoline service station, office, sale of auto accessories, car washing—non automatic, minor automobile repairs with hand tools only, lubritorium, storage and parking and storage of more than five (5) motor vehicles waiting to be serviced for a stated term of fifteen (15) years.

PREMISES AFFECTED—2472-2484 Knapp Street and 3111-3121 Avenue Y, northwest corner, Block 7429, part of Lot 16, Borough of Brooklyn.

APPEARANCES—

For Applicant: Ingram S. Carner.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Murdock, Vice Chairman Kleinert, Commissioner Foley, Commissioner Sleeper and Commissioner Fox 5
Negative: 0

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on February 17, 1959 after due notice by publication in the Bulletin; laid over to March 10, 1959, for inspection and decision; hearing closed; and

WHEREAS, the district maps accompanying the Zoning Resolution show that the site and Knapp Street are in a retail use, D area class 1 height district; Avenue X and Avenue Y are in retail and residence use, D area, class 1 height districts; Brigham Street is in a residence use, D area, class 1 height district; and

WHEREAS, the decision of the Borough Superintendent, dated September 18, 1958 acting on amendment to N.B. Applic. No. 799-58, reads:

“1. Proposed gasoline service station, lubritorium, car washing (non-automatic), auto repairs with hand tools only, office, storage, sale of accessories, parking of more than (5) five motor vehicles awaiting service located within a retail district is contrary to Art. 2 Sect. 4-A of Zone Resolution.

2. Proposed show windows, curb cuts and signs within 75 feet of a residential zone is contrary to Art. 2 Section 7A of the Zoning Resolution.”

and

WHEREAS, the applicant states that the premises consist of a plot, 120 feet frontage by 100 feet in depth, presently vacant; that it is proposed to erect a modern gasoline service station, office, sales of auto accessories, non-automatic car wash, minor automobile repairs with hand tools only, lubritorium, storage and parking, and storage of more than five motor vehicles awaiting service; and

WHEREAS, the applicant states that there is an economic demand for development of the subject premises as proposed, as the property is located along Knapp Street which is a wide and heavily trafficked automobile thoroughfare; that the premises could be developed substantially as proposed so as to yield a fair return on the owner's investment, and a major oil company has entered into a purchase and/or lease agreement of the premises, conditions on its development as proposed; that the proposed use would not alter the essential character of the neighborhood as the premises is situated in a retail use district and is across the street from an unrestricted use district; that a grant of the proposed application would not affect values of nearby properties; that the subject premises is zoned for retail use, and a variance, subject to the numerous conditions and safeguards customarily imposed by the Board will safeguard adjoining properties to a far greater extent than if the property were to be developed with a conforming use; that the proposed building, being set back more than 65 feet from the Knapp Street building line will insure greater

traffic safety by giving clear visibility to traffic at the intersection, whereas a conforming use structure could theoretically be built flush to the building lines at the corner, partially obscuring the intersection and thereby endangering traffic; that the proposed gas station would not create any additional traffic but would be supported by the heavy automobile traffic which now exists; that the proposed uses of the premises would provide more light and ventilation to adjoining properties than if the premises were to be developed with a conforming use; that the building is limited to one story, 14 feet in height and approximately 1600 square feet in area; that a conforming use structure could theoretically be erected to occupy an area of approximately 7300 square feet or 60% of the area of the lot; that a conforming use structure could theoretically be erected to a height of 87 feet 6 inches along the Knapp Street building line, whereas the proposed structure is limited to only one story, 14 feet in height; and

WHEREAS, the applicant contends that a grant of this application would do substantial justice in that it would permit the property to be developed for the only beneficial manner for which there exists an economic demand, without adversely affecting anyone and without altering the essential character of the neighborhood; and

WHEREAS, the applicant states that the present owner has held title to the property since June 27, 1952 and that the assessed valuation of land is \$3,500; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions f, i, and A of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7f for a term of fifteen years, to permit the premises to be occupied as a gasoline service station and lawful accessory uses thereto, substantially as proposed and indicated on plans filed with this application marked, "Received October 3, 1958," 6 sheets, *on condition* that all uses now on the premises shall be removed and the premises shall be arranged as indicated on such plans; that along the lot line to the *west* there shall be erected a masonry wall not less than 5 feet, 6 inches in height with suitable terminating posts; that along the northerly lot line there shall be erected and maintained a woven wire fence of the chain link type on a

masonry base to a total height of not less than 5 feet 6 inches and with suitable terminating post at the building line; that the accessory building shall be in the location and of the design and arrangement as shown, and that area of the accessory building for the full length from rear to Avenue Y shall be maintained as a planting area with suitable planting material and properly protected by curbing of the width as shown; that the accessory building shall be of the design and arrangement as proposed, without cellar; that the doors to exterior toilet rooms shall be rearranged so that the doors thereto shall not be contiguous; that such building shall be faced with face brick on all sides; that signs shall be restricted to permanent signs attached to the front facade of the accessory building, excluding the pylon shown and all roof signs, but permitting the illuminated globes of the pumps and the erection of a post standard for supporting a sign which may be illuminated, advertising only the brand of gasoline on sale, and extending beyond the building line at right angles to Knapp Street for a distance of not over 4 feet; that no other signs shall be erected on the premises than that as herein permitted and no rotary signs shall be allowed; that there shall be no advertising devices displayed on the premises; that curb cuts shall be restricted to two curb cuts to Avenue Y, each 30 feet in width, as shown, and *two* of similar width to Knapp Street with no portion of the curb cuts nearer than 5 feet; that within the intersection there shall be a block of concrete extending for a distance of 5 feet along either building line from the intersection and not less than 12 inches in height; that such portable fire-fighting appliances shall be maintained as the Fire Commissioner shall direct; that there may be parking of cars waiting to be serviced; that under Section 7i there shall be for a similar term minor motor vehicle repairs for adjustments with hand tools only maintained solely within the accessory building; that under Section 7A and curb cuts or signs found contrary to such section may be permitted provided the requirements of this resolution are complied with; that during the term of this variance the premises shall be occupied for no other uses than the use herein permitted; and that all permits shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

* Correction—In the resolution in relation to the required masonry wall, the word "east" changed to "*west*," as indicated in italics.

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

NOTICE TO APPELLANTS AND APPLICANTS

No appeal or application will be entertained in connection with which court proceedings are pending or in progress, unless exception is granted by the chairman, nor accepted which is not filed within thirty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal or application shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal or application.

At the time of filing an appeal or application, the appellant or applicant shall forward a signed notice of appeal addressed to the Administrative Official either Borough Superintendent of Buildings or Fire Commissioner and file with this board a duplicate of said notice.

Appellants and applicants are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal or application.

Appeals and applications will be simplified and disposition of same expedited by conforming to these directions.

MAX H. FOLEY, *Chairman*

SM, 608-55-SM, 614-55-SM, 617-55-SM, 643-55-SA, 644-55-SM, 646-55-SA—Vol. II, 703-55-SM, 705-55-SA, 708-55-SA, 717-55-SA, 728-55-SA, 731-55-SM, 739-55-SA, 740-55-SA, 743-55-SA and 759-55-SA.

Corrections Affecting Calendar Numbers 336-55-SA, 160-56-SA, 291-55-BZ and 609-53-BZ.

CALENDAR

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on December 9, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on April 7, 1959 after due notice by publication in the Bulletin; laid over to April 28, 1959, at 10 A. M. for inspection and decision; applicant to file revised plan showing extra exit; hearing closed; then laid over to May 19, 1959 at 10 A. M. for applicant to file revised plans and revised application to correct conditions previously permitted or as now being requested; then laid over to June 30, 1959, at 10 A. M. for decision; applicant to file new plans showing actual existing conditions and a new decision of the Borough Superintendent as to store, signs, etc.; hearing previously closed; and

WHEREAS, the decision of the Borough Superintendent, dated November 3, 1958 acting on Alt. Applic. No. 932-58, reads:

"1. Proposed addition of motor vehicle repairs with hand tools only and accessory welding for body and fender work to an approved public garage on the above premises located in a business use district is contrary to Art. II Sect. 4 of the Z.R. and Bd. of S. & A. Cal. #192-24-BZ."

and

WHEREAS, a later decision of the Borough Superintendent, dated June 15, 1959 acting on Alt. Applic. No. 932-58, reads:

"1. Proposed addition of minor motor vehicle repairs with hand tools only limited to (A) body and fenders repairs with oxy-acetylene torch and (B) ignition and carburetor parts and service to an approved public garage on the above premises located in a business use district is contrary to Art. II Sect. 4 of the Z.R. and Bd. of S. & A. Cal. #192-24-BZ."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board on several occasions and the applicant has filed new plans and a new decision of the Borough Superintendent as to the store and signs, and the Committee recommended that the application be granted under certain conditions; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c as to the garage and 7i for a ten year term for the repair shop, to permit in a business use district in an existing two story building occupied as a public garage, the use of the store area on the first floor for sales and service for ignition, carburetors and parts and as a motor vehicle repair shop with hand tools only and incidental welding limited to body and fender repair, *on condition* that the work shall be done in accordance with the drawings filed herewith dated November 20, 1958, 1 sheet and June 23, 1959, 4 sheets; that the present shed in the alley on the north side of the plot shall be removed; that signs on the building shall be limited in area to those permitted in a business district; that in all other respects the premises shall comply with all laws,

rules and regulations applicable thereto; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

842-26-BZ—Vol. II

APPLICANT—Lama, Proskauer and Prober, for Max Roth, Helen B. Nixon and James D. Bennett, owners.

SUBJECT—Application reopened April 14, 1959 as Volume II—decision of the Borough Superintendent, under section 21 of the Zoning Resolution, to permit in a residence use, E-1 area district, the erection of a multiple dwelling, six stories in height, exceeding the permitted area coverage and total floor area.

PREMISES AFFECTED—1525 Avenue H, north side, 160 feet west of East 17th Street, Block 6691, Lots 54, 57 and 60, Borough of Brooklyn.

APPEARANCES—

For Applicant: Alfred A. Lama and Max Roth.

For Opposition: Harry Silverman.

ACTION OF BOARD—Application denied.

THE VOTE OF JUNE 16, 1959—

Negative: Vice Chairman Kleinert and Commissioner

Fox 2

Not Voting: Chairman Foley and Commissioner Becker 2

Absent: Commissioner Sleeper 1

THE VOTE TO GRANT—(JUNE 30, 1959)

Affirmative: 0

Negative: Chairman Foley, Commissioner Sleeper and

Commissioner Becker 3

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on April 15, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 16, 1959 after due notice by publication in the Bulletin; laid over to June 30, 1959, at 10 A. M. for inspection and complete vote; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated March 11, 1959 acting on N.B. Applic. No. 576-59, reads:

"1. Proposed multiple dwelling located in an "E-1" District is contrary to Article 4 Section 15A subdiv. a of the Zoning Resolution.

"2. Proposed building exceeds allotted building area for "E-1" District contrary to Article 4 Section 15A subdiv. d. of the Zoning Resolution.

"3. Total floor areas exceeds permitted area contrary to Article 4 Section 15(e) of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should not be granted; and

WHEREAS, the Board found that the applicant failed to substantiate a basis to warrant exercise of discretion to grant under Section 21 of the Zoning Resolution and was therefore not entitled to relief on the grounds of practical difficulty or unnecessary hardship.

Resolved, that the decision of the Borough Superintendent, acting on N.B. App. 576-59, Objections Nos. 1, 2 and 3 be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

214-27-BZ—Vol. II

APPLICANT—Lama, Proskauer and Prober, for Socony Mobil Oil Co., Inc., owner.

SUBJECT—Application reopened May 26, 1959 for consideration of vote of April 28, 1959—decision of the Borough Superintendent, previously granted on condition under section 7A of the Zoning Resolution, permitting in a manufacturing and residence use district, the reconstruction of an existing gasoline service station with the additional accessory uses of lubritorium, minor auto repairs,

MINUTES

car washing, utility room, store and parking and storage of more than five (5) motor vehicles with show windows and signs within 75 feet of a residence use district.

For Opposition: None.

For Administration: Samuel Bodian, Park Dept.

ACTION OF BOARD—Resolution of April 28, 1959 rescinded and application reopened and granted on condition.

THE VOTE—To Rescind Resolution of April 28, 1959.

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE VOTE—To Reopen and Grant on Condition.

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on September 23, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on April 7, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated July 3, 1958 acting on N.B. Applic. No. 615-58, reads:

"1. Proposed demolition, reconstruction and extension of use of existing gas station and metal garages to gasoline service station, lubritorium, minor auto repairs, car washing, utility room, store, and parking and storage of motor vehicles partly in a manufacturing use district and partly in a residence use district is contrary to Art. II Sect. 3 of the Z.R. and B.S.A. Cal. #214-27-BZ.

"2. Show window and signs within 75 ft. of a residence use district is contrary to Sect. 7-A of the Z.R."

and

WHEREAS, on April 28, 1959 under Vol. II, this application was granted on condition; and

WHEREAS, an application was made for rescindment of this resolution; and

WHEREAS, the application was set for consideration on June 30, 1959; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c to permit in a manufacturing and residence use district, the reconstruction of an existing gasoline service station, with the additional accessory uses of lubritorium, minor auto repairs, car washing, utility room, store and parking and storage of more than five motor vehicles *on condition* that all work shall be done in accordance with drawings filed with this application marked "Received June 19, 1959", 5 sheets; that the plot which is the subject of this resolution is bounded on the north by West Fordham Road, on the east by Cedar Avenue and on the west by a four foot strip of land which is under the jurisdiction of the Department of Parks and is now shown as Lot 95; that a curbing, built to the satisfaction of the Commissioner of Parks, shall be erected and maintained separating these premises from the property controlled by the Park Department; that the present revolving sign located in the four foot strip along Major Deegan Ex-

pressway is to be removed, as shown, and located inside the property, and shall be of a stationary non-flashing illuminated type; that in all other respects the premises and occupancy shall comply with all laws, rules and regulations applicable thereto; and that all permits shall be obtained, all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

302-29-BZ—Vol. V

APPLICANT—Reginald S. Hardy, for Max Mintz, owner.

M. for full vote of the Board; hearing previously closed; and

WHEREAS, the decision of the Borough Superintendent, dated May 6, 1958 acting on N.B. Applic. No. 313-58, reads:

"1. Provide rear yard as per Art. IV, PP. 17 of the Zoning Resolution.

"2. Proposed building and premises, partly in a Local Retail and partly in a Residence Zone, to be used for Gasoline service station, auto laundry (non-automatic), auto repair shop (hand tools only) & Lubritorium is contrary to Article II, PP. 3 & PP. 4c of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were in-
spected by a committee of the Board and the committee recommended that the application should be granted on con-
dition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision e of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7e to permit in a local retail and residence use district, the crection of a gaso-
line service station with accessory motor vehicle repair shop using hand tools only, non-automatic auto laundry and lubritorium, without the required rear yard, for a term of fifteen years *on condition* that all work shall be done in accordance with plans filed with this application marked "Received May 14, 1958", 4 sheets, and "June 3, 1959," 3 shcets; that in all other respects the premises and occu-
pancy shall comply with all laws, rules and regulations ap-
plicable thereto; and that all permits shall be obtained, all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolu-
tion.

63-49-BZ

APPLICANT—Paul Friedman, for Sundry Service Station, Inc., owner.

SUBJECT—Application reopened May 19, 1959 for con-
sideration as to extension of term of variancc, expired April 12, 1959—decision of the Borough Superintendent,

previously granted on condition under sections 7e and 7f of the Zoning Resolution, permitting in a local retail and retail use district, the erection and maintenance of a gasoline service station, lubritorium, auto laundry, sales room and office for a term of ten (10) years.

PREMISES AFFECTED—117-01 to 117-11 Springfield Boulevard and 216-02 to 216-10 Linden Boulevard, south-
east corner, Block 12734, Lot 8, St. Albans, Borough of Queens.

APPEARANCES—

For Applicant: Paul Friedman.

For Opposition: None.

ACTION OF BOARD—Term of Variance extended.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the applicant requested reopening of this application and extension of the term of variance, which had expired by time limitation April 12, 1959; and

WHEREAS, this application was reopened on May 19, 1959 and set for hearing on June 30, 1959 at 10 A. M., subject to regular procedure, waiving all requirements except a new decision of the Borough Superintendent and two publica-
tions in the Bulletin; and

WHEREAS, a public hearing was held on this application on June 30, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated April 17, 1959 acting on N. B. Applic. No. 6806-48, reads:

"1. Amendment dated 4/17/59 requesting the ex-
tension of the variance for a gasoline station, lubri-
torium, auto laundry, auto accessories, sales room and office on a lot which is partly in a retail district and partly in a local retail district is contrary to Art. 2, Sec. 4-A and 4-c of the Z. R. and contrary to the resolution of the Board under Cal. No. 63-49-BZ."

Resolved, that the Board of Standards and Appeals does hereby *amend* its resolution adopted on April 12, 1949, only as to the term of the variance, so that as amended it shall read:

"*granted* for a term of ten years from the date of this *amended* resolution, *on condition* that other than as herein amended, the above resolution shall be com-
piled with in all respects; that the planting required in such resolution shall be renewed and maintained; and that a new certificate of occupancy shall be obtained."

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on September 23, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 9, 1959 after due notice by publication in the Bulletin; laid over to June 16, 1959 at 10 A. M. for hearing at the request of objectors; then laid over to June 30, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated July 28, 1958 acting on Alt. Applic. No. 814-58, reads:

"1. The extension of a parking lot in an area partially in an unrestricted use district and partially in a residence use district is contrary to Art. II Sec. 3 of Zone Resolution.

(Note: Present parking lot was granted under BZ 145-56 Bull. 4, Vol. 42)."

Resolved, that the Board of Standards and Appeals does hereby amend the resolution adopted on June 15, 1957, only insofar as it relates to the extension of the parking lot, so that as amended it shall read:

"... granted under Section 7i, for a term expiring on June 15, 1962, to permit; that other than as herein amended the resolution above cited shall be complied with in all respects; that all work shall be done in accordance with plans filed with this application marked "Received July 29, 1958", 4 sheets; and that all permits, including a new Certificate of Occupancy, shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution from the date of this amended resolution.

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on June 2, 1959 after due notice by publication in the Bulletin; laid over to June 16, 1959, at 10 A. M. at the request of the objector; no further adjournments; then laid over to June 30, 1959, at 10 A. M. for inspection and decision; applicant to confer with Bohack Co. as to possible elimination of one driveway; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated December 15, 1958 and amended by decision on March 5, 1959 and thereafter on March 23, 1959, acting on N.B. Applic. No. 1156-58, reads:

"1. Parking and driveway to parking and loading area partly in a residence use district is contrary to Art. II Sect. 3 of the Z.R.

"2. Business sign above the level of the first floor ceiling in a local retail use district is contrary to Art. II Sect. 4-c of the Z.R.

"3. The rear yard less than 15% of the depth of the lot is contrary to Art. IV Sect. 14 of the Z.R."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board which recommended that the application be granted on the basis of the new drawing; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution, as to use, and that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21, and is therefore entitled to relief, as to area, on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use and area district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7c and 21 of the Zoning Resolution to permit in a local retail and residence use, D area district, the erection of a one story and cellar structure for use as a retail supermarket with accessory parking extending into the residence portion of the premises, with the proposed business sign extending above the first floor ceiling, and with the proposed building encroaching on the required rear yard, *on condition*, that all work shall be done in accordance with drawings filed herewith dated March 17, 1959, 2 sheets, February 3, 1959, 5 sheets and June 26, 1959, 2 sheets; that there shall be no roof signs; that a face brick wall 5 feet, 6 inches in height, with suitable coping shall be constructed along the Corlear Avenue front from the driveway to the south boundary of the property except that along Corlear Avenue for a distance of approximately ten feet from the driveway, such wall may be reduced to a height of 3 feet 6 inches; that in all other respects the premises and occupancy shall comply with all laws, rules and regulations applicable thereto, except as modified by the Board this day under Cal. No. 203-59-A; and that all permits required and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

203-59-A

APPLICANT—Reginald S. Hardy for Bohack Realty Corporation, owner.

SUBJECT—Application March 31, 1959—Appeal from a decision of the Borough Superintendent, re parapet wall.

MINUTES

PREMISES AFFECTED—298 West 231st Street, southeast corner of Tibbett Avenue, Block 3406, Lots 14, 29, 35, 36 and 37, Borough of The Bronx.

APPEARANCES—

For Applicant: R. S. Hardy and A. Herman.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the decision of Borough Superintendent, dated March 23, 1959 on N. B. Applic. 1156/58, reads:

“4—Provide 2 ft. parapet wall as per Sect. 8.4.9.2 of the B. C.”

and

WHEREAS, the applicant states that the proposed building will be 135 feet by 110 feet, irregular in area, 1 story, 15 feet high, of class 3 construction, located in local retail and residence district, D area, class 1 height district, to be used and occupied as a retail food market, 300 persons; and

WHEREAS, the architectural design provides for a glass facade on Tibbett Avenue front; that a parapet wall along this front will destroy desired effect of such facade; that all other walls will have a legal 2 feet high parapet wall; that a portion of the roof along Tibbett Avenue is raised to the same elevation as the top of the parapet walls on all other sides; that a parapet wall along this Avenue front will serve no useful functions, preventing spread of fire because there is no building adjacent to this area; that the store ceiling has 1 hour rating; that most of the building will not exceed 45 feet in height; and

WHEREAS, the premises was inspected by a committee of the Board.

Resolved, that the decision of the Borough Superintendent, dated March 23, 1959, acting on N. B. Applic. 1156/58, Objection 4, be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the work shall be done in accordance with drawings filed in connection with Cal. No. 24-59-BZ and also drawing filed in this appeal, dated April 29, 1959, 1 sheet; and that the premises and occupancy shall comply with all laws, rules and regulations applicable thereto other than as modified herein and as granted by the Board this day under Cal. No. 24-59-BZ.

APPEARANCES—

For Applicant: Joseph B. Klein and Henry J. Foster.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on June 30, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated April 14, 1959 acting on N. B. Applic. No. 36-59, reads:

"1. Proposed coverage exceeds that allowed for a "C" area district. Sec. 13(b) Zoning Res.

2. Proposed loading berth (not required) less than 25 feet from street intersection is not permitted. Sec. 19A(j) Zoning Res."

and

WHEREAS, the members of the Board are entirely familiar with the premises and surrounding area and are favorably disposed to grant the application; and

WHEREAS, the Board found that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21 of the Zoning Resolution, and is therefore entitled to relief as to area on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the Board of Standards and Appeals does hereby make a variation in the application of the area district regulations of the Zoning Resolution and that the application be and it hereby is granted under Sections 21 and 19A(j), to permit in a C area district, the erection of a structure occupying more than the permitted area coverage and with a loading berth, not required, less than 25 feet from the street intersection on condition that the work shall be done in accordance with the drawings filed with this application marked "Received April 30, 1959", 11 sheets; that all laws, rules and regulations applicable to the building and occupancy shall, in all other respects, be complied with; that the open area, terrace and covered walk, as well as the Wollman Memorial, as stated in the application, will be used by the public as part of the civic community; and that all permits shall be obtained and all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

Adjourned: 1:00 P. M.

JOSEPH J. DOYLE, Chief Clerk.

REGULAR MEETING

TUESDAY AFTERNOON, JUNE 30, 1959, 2 P.M.

Present: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker.

1238-23-A—Vol. II

APPLICANT—Fred C. Dahlem, for Edwin H. Morris & Co., owners.

SUBJECT—Application reopened March 10, 1959 as Volume II—appeal from a decision of the Borough Superin-

tendent—re Fifth Floor must remain vacant, exceeds tabular height, Class 3 construction.

PREMISES AFFECTED—31 West 54th Street, north side, 365 feet west of Fifth Avenue, Block 1270, Lot 16, Borough of Manhattan.

APPEARANCES—

For Applicant: Fred C. Dahlem.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated February 5, 1959 on Alt. Applic. 1477/57, reads:

"1. Fifth floor of class 3 commercial bldg. must remain vacant. Sect. C26-254.0 A.C.—exceeds tabular height."

and

WHEREAS, the applicant states that the building is 20 feet by 60 feet in area, 5 stories, 55 feet high, non-fireproof construction, located in restricted retail use, B area, class 1½ height district, built in 1876, used and occupied since 1956 in accordance with Certificate of Occupancy 45234, issued against Alt. Applic. 170/55 as follows: Cellar—storage, no persons; 1st to 4th floors—offices, 10 persons each floor; 5th floor—vacant; that the exits consist of an interior steel stair 3 feet wide from roof bulkhead to street, enclosed in fireproof construction with fireproof self-closing doors; that there is a rear fire escape from roof to yard with a gate in the yard fence; that it is requested to permit office use on the 5th floor; that the floor was altered to carry a 50 pounds per square foot live load; that the space is very valuable and is needed for the owner's use; and

WHEREAS, the premises was inspected by a committee of the Board.

Resolved, that the decision of the Borough Superintendent, dated February 5, 1959, acting on Alt. Applic. 1477/57, Obj. 1 be and it hereby is modified and that the appeal be and it hereby is granted on condition that all work be done as shown on drawings filed with this appeal dated February 20, 1959, 13 sheets and April 27, 1959, 1 sheet; that a one-source sprinkler system be installed throughout the building, including the cellar; and that all laws, rules and regulations applicable thereto shall be complied with and a certificate of occupancy obtained within one year from the date of this resolution.

303-55-A

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 336-55-SA.

Subject: Amendment to resolution as to additional trade name.

Metalmaster Corp., Newark, New Jersey, requested by letter dated November 10, 1958, that the resolution adopted July 12, 1955 and amended through December 2, 1958, be amended so as to permit the approved burners to be marketed under the additional trade names. The application was reopened January 13, 1959.

Recommendation

The Committee on Test recommends that the resolution adopted July 12, 1955 and amended through December 2, 1958 under Calendar Number 336-55-SA be amended so as to permit the approved Metalmaster Oil Burner to be marketed under the following trade name; *Burnco* Oil Burner, LaVal Oil Burner, Commander Oil Burner and Comet Oil Burner on condition that the requirements of the resolution adopted July 12, 1955 and as amended through December 2, 1958 under Calendar Number 336-55-SA be complied with.

(Sgd.) SAMUEL L. BECKER,
Director,

JOHN A. DARTS,
Ass't. Engr.,
GEORGE F. SKLENARIK,

APPEARANCES—

For Applicant: C. T. McDonald.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Acting Chairman Kleinert, Commissioner Foley, Commissioner Sleeper and Commissioner Fox. 4

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 160-56-SA

Subject: Met-L-Wood Type 2R2 ¼.

Met-L-Wood Corporation, Chicago, Illinois, filed December 19, 1956 an application with the Board of Standards and Appeals for approval of the material known as Met-L-Wood, Type 2R2 ¼ under the provisions of C26-88.0 and C26-191.0 Administrative Building Code.

Purpose

The material is to be used as pipe enclosure for columns, air conditioning ducts, risers and corridor soffits.

Description

The material is a prefabricated section consisting of an incombustible core, usually sheetrock, faced on both surfaces with electro-galvanized steel sheet of 26 gauge metal. The core is bonded to the facing metal by means of a non-corrosive, highly water resistant glue.

The sections are pre-cut, so that they can be formed into angle, channel or rectangular shape.

Inspection and Test

The material was tested by the R. W. Hunt Laboratory in accordance with SS-A-118a and met the requirements of incombustible material. Details of construction were examined by Ass't Engr. J. A. Darts, Committee on Test.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test, recommends the approval of the material known as Met-L-Wood, when constructed as herein described, as having met the requirements of C26-88.0, as an incombustible enclosure for air conditioning ducts, air conditioning risers, steam and/or water pipe lines on condition that the material shall be tagged, stamped or labeled, "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 160-56-SA."

The Committee further recommends that the enclosure shall not pierce any floor or partition and shall not be considered to have any hourly fire resistive rating.

(Sgd.) SAMUEL L. BECKER,
Director,

JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

*Correction—In the Report of Committee on Test, Type 2H2 ½ changed to "2R2 ¼ and under the heading of *Description*, the gauge of the steel sheet metal changed from "24" to "26".

*CORRECTION

Commissioner Fox 5

Negative: 0

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on February 17, 1959 after due notice by publication in the Bulletin; laid over to March 10, 1959, for inspection and decision; hearing closed; and

WHEREAS, the district maps accompanying the Zoning Resolution show that the site and 41st Avenue are in a residence use, B area, class 1½ height district; 79th Street and 80th Street are in residence and business use, B area, class 1½ height districts; Roosevelt Avenue is in a business use, B area, class 1½ height district; and

WHEREAS, the decision of the Borough Superintendent, dated September 26, 1958 acting on Alt. Applic. No. 1325-58, reads:

"1. Proposed use of land located in a Residence use district for parking and storage over five (5) motor vehicles is contrary to Article II section 3 of the Zoning Resolution."

and

WHEREAS, the applicant states that the premises consist of a plot, 29.5 feet frontage by 100 feet in depth, presently vacant, bound on the north by a row of two-car garages, located at the rear of the business property facing Roosevelt Avenue; that on the west the property contains a four story multiple dwelling; that on the south is the property and two family dwelling owned by the same owner as the subject premises; that it is proposed to prepare and treat the ground surface, installing fencing and curbing and such other work as required in conformance with parking regulations; and

WHEREAS, the applicant states that although the subject premises are located in a residential district, the nature of the immediate vicinity and the block on which the property is located is one of traffic congestion and saturation of car parking; that this situation is due to the fact that the property is located 100 feet from Roosevelt Avenue and two blocks from 82nd Street, both main business and shopping streets in this vicinity; that there is a large day time working population in this area and the need for parking facilities is very great; that furthermore, the recently opened Elmhurst General Hospital is one block distant and has greatly added to the constant need for parking facilities; and

WHEREAS, the applicant contends that the character of the immediate surrounding area on the subject block will not be adversely affected by the proposed parking; that the property immediately surrounding the subject premises consists of the following: on the north there is business property with a row of two-car garages located on the common lot line and on the west there is a four story apartment house; that to the south is located the property of the same owner as subject premises, containing a two family dwelling and two-car garage; that at the southern end of this block, there is now under construction, on both sides of the street, two large six-story apartment buildings, which upon completion will no doubt also contribute to the parking problem in this area; that although the proposed parking facility is quite small in number of cars, any off street parking space is greatly needed; that this property, by reason of its location, would not economically warrant improvement with a conforming building, and the proposed parking use would be logical for this property without detriment to any affected owner; and

WHEREAS, the applicant states that the present owner has held title to the property since October 22, 1954 and that the assessed valuation of land is \$4,500; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision h of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7h for a term of five years, to permit the plot to be occupied for parking and storage of motor vehicles, limited to the pleasure-car type only, substantially as proposed and indicated on plans filed with this application marked, "Received October 24, 1958," 2 sheets, "January 21, 1959," 1 sheet, *on condition* that all buildings and uses on the premises shall be removed and the premises shall be leveled substantially to the grade of 80th Street and shall be surfaced with clean gravel, treated with a binder and properly rolled; that along the rear lot line the retaining wall one foot, eight inches in height with existing wood fence thereon, found to be in good structural condition by the Borough Superintendent, may be retained; that along the *south* lot line there shall be erected a woven wire fence of the chain link type on a masonry base not less than 5 feet, 6 inches in

total height from the east end of the adjoining garage to the 80th Street building line; that a similar fence shall be constructed on the street building line, except for an opening for entrance and exit, not exceeding 10 feet, with a curb cut opposite shall be of similar width; that the fence as above required on the southerly side may be omitted from the garage to the street line to permit exiting from the two-car accessory garage of the adjoining house to the street through the parking lot, provided that at no time shall the cars parked on Lot 12 extend over the lot line to encroach on Lot 13; that signs shall be restricted to a permanent sign attached to the fence, advertising the parking and storage use and rates charged and such other information as may be required by the Commissioner of Licenses, and such sign shall not exceed five square feet, shall not be illuminated and shall not extend beyond the building line; that side-

walks and curbing in front of the premises shall be constructed or repaired to the satisfaction of the Borough President; that suitable timber bumpers shall be maintained along the side lot lines and rear and against the fence at the front for protection thereto; that such portable fire-fighting appliances shall be maintained as the Fire Commissioner shall direct; that during the term of this variance the premises shall be occupied for no other use as herein permitted; and that all permits shall be obtained, including a Certificate of Occupancy, and all work completed within six months from the date of this resolution.

* Correction—In the resolution in relation to the proposed fence, the words "side lot lines" changed to "*south lot line*" as indicated in italics and in relation to such fence the addition of the above italicized phrase.

RULES

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the building zone resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—postage to be added if the forms are forwarded by mail.

DISCONTINUANCE OF PROCEEDING

Matter of Beaux Arts Apartments, Inc. vs. Murdock:—On December 3, 1957, the Board granted a variance under Sections 7e and 21 of the Zoning Resolution, to permit in a residence use district and B area district, for a term of 20 years, the construction of a commercial building and exceeding the permitted area; Calendar Number 757-56-BZ; Premises 311-313 East 43rd Street, north side, 175 feet east of 2nd Avenue, Borough of Manhattan.

In Supreme Court, New York County, by Mr. Justice Epstein:—The above entitled proceeding was discontinued by stipulation and agreement by both parties, on July 3, 1959. (N. Y. Law Journal, July 7, 1959, page 3).

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

NOTICE TO APPELLANTS AND APPLICANTS

No appeal or application will be entertained in connection with which court proceedings are pending or in progress, unless exception is granted by the chairman, nor accepted which is not filed within thirty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal or application shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal or application.

At the time of filing an appeal or application, the appellant or applicant shall forward a signed notice of appeal addressed to the Administrative Official either Borough Superintendent of Buildings or Fire Commissioner and file with this board a duplicate of said notice.

Appellants and applicants are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal or application.

Appeals and applications will be simplified and disposition of same expedited by conforming to these directions.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on March 10, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on April 28, 1959 after due notice by publication in the Bulletin; laid over to May 5, 1959 at 10 A.M. for hearing at the request of objectors; then to May 26, 1959 at 10 A.M. for inspection and decision; hearing closed; then to June 30, 1959, at 10 A.M. for further inspection and decision; hearing previously closed; then to July 7, 1959, at 10 A.M. for decision; and

WHEREAS, the decision of the Borough Superintendent, dated February 3, 1959 acting on N.B. Applic. No. 239-59, reads:

"1. Proposed building and premises in a Retail Zone, to be used for Auto Showroom, Gasoline Service Station, Lubritorium, Car Washing, Minor Auto Repairs, Office and Sales, storage room, parking and storage of motor vehicles, is contrary to Art. II Para. 4-A as per Para. 4a subsection 29 and 46 of the zoning resolution.

2. Proposed ground sign violates Art. II, Para. 4-A as per Para. 4a, subsection 49 of the zoning resolution."

and WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions f, i and e of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7 subdivisions f, i and e, for a term of fifteen years, to permit in a retail use district the erection and maintenance of an auto

showroom, gasoline service station, lubritorium, car wash, minor auto repairs with hand tools only, office and sales, storage room, parking and storage of motor vehicles, as shown on plans filed with this application dated, February 13, 1959, 4 sheets, and June 24, 1959, 1 sheet, *on condition* that the ground sign shown on the drawings be omitted and that all laws, rules and regulations applicable shall be complied with; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

672-56-BZ—Vol. II

APPLICANT—Charles M. Spindler for Volokening, Inc., owner.

SUBJECT—Application reopened March 31, 1959, as Volume II, decision of the Borough Superintendent, under Sections 7c, 7h and 21 of the Zoning Resolution, to permit in a retail and residence use, C area district, the erection of a two story extension to the present one story factory building and used as an office building in conjunction with the factory, occupying more than the permitted area and the parking of more than five (5) motor vehicles for employees and patrons.

PREMISES AFFECTED—6702-6706 Third Avenue, west side, from 274-284 67th Street to 257-293 Senator Street, Block 5849, Lots 37, 45 and 47, Borough of Brooklyn.

WHEREAS, the premises and surrounding area where inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c, and h of the Zoning Resolution, as to use, and that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21, and is therefore entitled to relief, as to area, on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use and area district regulation of the Zoning Resolution and that the application be and it hereby is granted under Sections 7c, 7h and 21 of the Zoning Resolution, to permit in a retail and residence use, C area district, the erection of a two-story extension to the present one-story factory, for use as an office building in conjunction therewith and also to permit

MINUTES

part of the new office building to be rented to others, such building to occupy more than the permitted area, and for the parking of more than five motor vehicles of employees and patrons, *on condition* that the work shall be done in accordance with plans submitted herewith dated March 17, 1959, 6 sheets; that a twenty foot strip along the west boundary of proposed parking lot shall be densely planted with evergreens and shall be excluded from the parking area; that the parking lot shall be paved with clean gravel or steam cinders, rolled with a binder to a satisfactory surface; that the variance in regard to the parking lot only be for a term of 15 years; that in all other respects the premises shall comply with all laws, rules and regulations applicable thereto; and that all permits and a certificate of occupancy shall be obtained and all work completed within the provisions of Section 22A of the Zoning Resolution.

1019-57-BZ—Vol. II

APPLICANT—William I. Hohausser, for Arthur Enterprises, Inc., owner; U. S. Post Office, lessee.

SUBJECT—Application reopened June 2, 1959 as Vol. II—decision of the Borough Superintendent, under Sections 7e and 7c of the Zoning Resolution, to permit in a business and residence use district, the change in use of the first floor of an existing building from supermarket to post office.

PREMISES AFFECTED—549-559 West 180th Street, north side; 560 West 181st Street, south side, 100 feet east of St. Nicholas Avenue, Block 2153, Lot 81, Borough of Manhattan.

APPEARANCES—

For Applicant: Gershwin Kurlander and Robert D. Caserio.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on June 2, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 7, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated April 24, 1959 acting on Alt. Applic. No. 1245-57, reads:

"C11—Proposed change of use of the first floor to a post office is contrary to the Resol. of Bd. of Stds. & App. Cal. 1019-57-BZ." and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board in considering the variance granted under Volume I; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c and e of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7 c and e, for a term of twenty years, to permit in a business and residence use district, the change in use of the first floor of an existing building, from supermarket to post office *on condition* that the work shall be done in accordance with plans filed with this application marked "Received June 24, 1959," 4 sheets; and "May 7, 1959," 6 sheets; that the use and occupancy of the premises shall comply with all laws, rules and regulations applicable thereto; that the use and occupancy of the second floor shall comply with the requirements of the resolution granted under Volume One of Cal. No. 1019-57-BZ; and that all permits shall be obtained, all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

348-58-BZ

APPLICANT—Mario Lubic for Mario and Edward Lubic, owners.

SUBJECT—Application May 28, 1958—decision of the Borough Superintendent, under Section 7e of the Zoning Resolution, to permit in a business and residence use district, in an existing three-story, 12 family multiple dwelling, the conversion of one ground floor apartment for use as a restaurant.

PREMISES AFFECTED—1703 East 14th Street, east side, 92 feet, 3¼ inches south of Kings Highway, Block 6797, Lot 1, Borough of Brooklyn.

TUESDAY AFTERNOON, JULY 7, 1959, 2 P.M.

Present: Chairman Foley, Commissioner Fox and Commissioner Becker.

199-39-SM

APPLICANT—The Celotex Corporation, owner.

APPEARANCES—

For Applicant: William H. Pritchard.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 199-39-SM

Subject: Amendment to resolution as to nailing of shingles.

Celotex Corporation, New York, requested by letter dated November 19, 1958 that the resolution adopted September 19, 1939 and amended at various times through December 13, 1949 under Calendar Number 199-39-SM be amended so as to include the additional trade name of Celotex Strongwall

MINUTES

Sheathing and permission for direct application of wood siding shingles or asbestos. The application was reopened by a vote of the Board, December 2, 1958.

Purpose

The material is to be used for exterior sheathing.

Description

The material is a fiber board used for exterior sheathing. When asbestos cement shingles are nailed directly to the sheathing, the nails shall be a minimum of 1¼ inch with .190 inch diameter head; the nails are manufactured from a minimum of .102 inch aluminum wire with 20 sharp double rings per inch measuring .115 inch outside diameter and having a ⅛ inch long needle point. When wood shingles are used the nails shall be 1¾ inches long and 5/32 inch diameter heads.

On wood shingles 6 inches wide—2 nails are used, up to 10 inch side use 3 nails and over 10 inches wide use 4 nails. On asbestos shingles 24 inches long use 6 nails.

Inspection and Test

The applicant has submitted tests conducted by Armour Research Institute of Illinois Institute of Technology for both racking and nail holding power.

The panel withstood a load of 8200 lbs. and the average nail holding power of 45 lbs. The complete report is on file with and is part of the record.

Recommendation

On the basis of the data submitted by the applicant the Committee on Test recommends that the resolution adopted September 19, 1939 and amended at various times through December 13, 1949 under Calendar Number 199-39-SM be amended so as to include the material known as Celotex Strongwall Sheathing and permission to nail wood or asbestos shingles directly to the shingles on condition that the requirements of the resolution adopted September 19, 1939 under Calendar Number 199-39-SM be complied with.

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

333-39-SM

APPLICANT—Joseph Platzker, for De Yorgi Brothers Inc., owner.

APPEARANCES—

For Applicant: Joseph Platzker.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 333-39-SM—Vol. II

Subject: Amendment to resolution as to additional size block.

J. Platzker for De Yorgi Inc., Bronx, New York, requested by letter dated March 31, 1959 that the resolution adopted July 21, 1942 and amended at various times through February 19, 1957 under Calendar Number 333-39-SM—Vols. I and II. The application was reopened by a vote of the Board, April 28, 1959.

Purpose

The material is a cinder masonry unit.

Description

The blocks are made from the same material and in the same manner as the blocks approved under Calendar Number 333-39-SM—Vols. I & II.

Inspection and Test

Sample blocks were selected and tested at Manhattan College in accordance with the requirements of the Masonry Rules of the Board.

Results were as follows:

3" Solid Cinder — 9" High

Average Compressive Strength = 1660 p.s.i.

Absorption (lbs. per cu. ft.) = 10.0

4" Hollow Cinder — 9" High — Non-Load Bearing

Average Compressive Strength = 690 p.s.i.

Absorption (lbs. per cu. ft.) = 11.60

6" Solid Cinder — 9" High — Load Bearing

Average Compressive Strength = 1646 p.s.i.

Absorption (lbs. per cu. ft.) = 11.17

4" Solid Cinder 9" High — Load Bearing

Average Compressive Strength = 1550 p.s.i.

Absorption (lbs. per cu. ft.) = 11.27

8" Hollow Cinder — 9" High — Load Bearing

Average Compressive Strength = 1094 p.s.i.

Absorption (lbs. per cu. ft.) = 12.04

All blocks are 18 inches in length.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends that the resolution adopted July 21, 1942 and amended through February 19, 1957 under Calendar Number 333-39-SM—Vols. I and II be amended so as to include the additional size cinder masonry units as herein described on condition that the requirements of the resolution adopted July 21, 1942 under Calendar Number 333-39-SM—Vol. I are complied with.

(Sgd.) JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

331-45-SA

APPLICANT—Peter S. Gluck, for Fostoria Pressed Steel Corp., owner.

APPEARANCES—

For Applicant: Peter S. Gluck.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 331-45-SA

Subject: Amendment to resolution for additional use.

Peter S. Gluck for Fostoria Pressed Steel Corporation requested by letter dated October 9, 1958 that the resolution adopted January 22, 1946 under Calendar Number 331-45-SA be amended so as to permit the use of the Fostoria Even Ray System drying oven for paint baking on motor vehicles. The application was reopened by a vote of the Board, November 25, 1958.

Purpose

An electric oven for drying repainted motor vehicles.

MINUTES

Description

The Fostoria Even Ray System oven to be used for the drying of motor vehicles is the same as approved by the Board, January 22, 1946, under Calendar Number 331-45-SA.

When used for the drying of repainted motor vehicles maximum operating temperature will be automatically controlled at 150°F. A manually set timer will also be provided. Steel angles secured to the floor will be installed to act as guides for the motor vehicles as it is pushed into the oven and will serve to prevent breakage of lamps. The oven will also be made secure to the floor.

The oven is equipped with mechanical exhaust which will be used when the installation is made in small rooms or when hinged doors equipped with explosion type hardware will be provided on the oven. The fan capacity in each case will be adequate to maintain vapor concentrations in the oven below the explosive limit.

Recommendation

The Committee on Test recommends that the resolution adopted by the Board January 22, 1946 under Calendar Number 331-45-SA be amended so as to permit the Fostoria Even Ray System to be used for the drying of painted motor vehicles when installed in accordance with this report and the Paint Spray Rules on condition that the other requirements of the resolution adopted January 22, 1946 under Calendar Number 331-45-SA be complied with.

(Sgd.) JOHN A. DARTS,

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

590-49-SA

APPLICANT—Minneapolis Honeywell Regulator Company, owner.

APPEARANCES—

For Applicant: John R. Horan.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 590-49-SA

Subject: Amendment to resolution as to additional flame controls.

Minneapolis Honeywell Regulator Co., New York, requested by letter dated May 28, 1957 that the resolution adopted July 18, 1950 under Calendar Number 590-49-SA be amended so as to include additional flame controls. The application was reopened by a vote of the Board, June 25, 1957.

Purpose

The appliances are safety flame control devices.

Description

The R7023A is the replacement for the R7009A, approved under Calendar Number 590-49-SA and is used in conjunction with the R161 protectorelay to shut down the system within 4 seconds following oil flame failure.

The C7010A is a refinement of the approved C7003A photocell mount and is designed for mounting on 1¼ inch pipe.

The appliances have been approved by the Underwriters' Laboratory under MP268D, MP268E and MP268A.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends that the resolution adopted July 18, 1950 under Calendar Number 590-49-SA be amended so as to include the Models R7023A and C7010A on condition that the requirements of the resolution adopted July 18, 1950 under Calendar Number 590-49-SA be complied with.

(Sgd.) JOHN A. DARTS,

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

651-51-SM

APPLICANT—Jay R. Smith Manufacturing Company, owner.

APPEARANCES—

For Applicant: Otto Granino.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 651-51-SM

Subject: Reopen and amend the resolution so as to permit the relocation of vent hub and additional fittings designation.

Jay R. Smith Mfg. Co., owner-manufacturer, Union, New Jersey, requested by letter dated May 22, 1959 that the resolution adopted May 22, 1952, under Calendar Number 651-51-SM be amended so as to relocate vent hub and permit additional fittings designation, 3A-DH-7, 3B-DH-7, 5A-DH-7 and 5B-DH-7.

Purpose

A carrier for horizontal, vertical W.C. fittings.

Description

The modified fittings are equal in function and construction to the regular fittings, with the only major difference being that of venting arrangement. The modified fittings are equipped with a single 2 inch vent placed in a central location on the fitting, rather than off-center, dual vents as on the regular fittings.

Recommendation

The Committee on Test recommends that the resolution adopted May 22, 1952 under Calendar Number 651-51-SM be reopened and amended so as to permit the approval of relocation of vent hub and additional fittings designation, on condition that the requirements of the resolution adopted May 22, 1952 under Calendar Number 651-51-SM be complied with.

581-53-SM

APPLICANT—Sorkin Enterprises, for S. A. Eternit Emaile, Corp., owner.

MINUTES

APPEARANCES—

For Applicant: James A. Fitzpatrick.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker. 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 581-53-SM

Subject: Eternit (asbestos cement sheets).

Sorkin Enterprises for S. A. Eternit Emaile, Belgium, filed July 23, 1953 an application with the Board of Standards and Appeals for approval of the material known as Eternit (asbestos cement sheets) under the provisions of C26-88.0 and C26-667.0 Administrative Building Code and the Veneering Rules of the Board. A letter from the owner-manufacturer, dated June 2, 1958, states that the U. S. Plywood Corp., is now their representative and the name of the material is now known as Glasweld.

Purpose

The material is an incombustible panel to be used as an incombustible veneer and/or subdividing partition.

Description

The material is a compressed asbestos cement sheet with a special enameling treatment on the surface. The board varies in thickness from $\frac{1}{8}$ to $\frac{1}{2}$ inches and in size from 2'-0" x 10'-0" to 4'-0" x 10'-0". The weight of the board is $1\frac{1}{4}$ lbs. per sq. ft. for the $\frac{1}{8}$ inch thickness.

Inspection and Test

The material was tested in accordance with the requirements of C26-88.0 Administrative Building Code as to incombustibility and met the requirements. The applicant has also submitted an affidavit showing that the cement used complies with ASTM C150-56 Type I and a statement that the asbestos fibers are purchased from Canadian Johns-Manville Corporation, Asbestos Corp. Ltd., and Lake Asbestos of Quebec, Ltd.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Eternit (asbestos cement sheet) and also known as Glasweld, for use in New York City as an incombustible exterior veneer when installed in accordance with the Veneering Rules of the Board, as incombustible walls on Class 5 buildings as permitted under C26-243.0 and as incombustible subdividing partitions as permitted under C26-667.0 Administrative Building Code on condition that the packages or wrappings in which the material is marketed shall be tagged, stamped, or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 581-53-SM."

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

463-54-SA

APPLICANT—Reznor Manufacturing Company, owner.

APPEARANCES—

For Applicant: B. C. Van Kampen and Harry C. Brown.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 463-54-SA

Subject: Amendment to resolution as to change of ownership.

Reznor Manufacturing Co., Mercer, Pa., requested by letter dated April 3, 1959, that the resolution adopted September 20, 1955 under Calendar Number 463-54-SA be amended so as to show a change of ownership. The application was reopened by a vote of the Board May 12, 1959. The Reznor Manufacturing Co. also submitted a statement signed by Arthur A. Olsen which states that all assets and business had been purchased by the Reznor Manufacturing Co., of Mercer, Pa.

Recommendation

The Committee on Test recommends that the resolution adopted September 20, 1955 under Calendar Number 463-54-SA be amended so as to show a change of ownership, previous owner being Arthur A. Olsen & Co. and the new owner being Reznor Manufacturing Co. and further to permit the approved gasfired space heaters to be marketed by the Reznor Manufacturing Co. under the trade name Reznor, Model S Series, on condition that the requirements of the resolution adopted September 20, 1955 under Calendar Number 463-54-SA be complied with.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 849-57-SM

Subject: Columbia Approved Bowl Gasket.

The Columbia Can Co., Maspeth, N. Y., filed August 12, 1957, an application with the Board of Standards and Appeals for approval of the Columbia Approved Bowl Gasket for use in New York City under the provisions of C26-1250.0 of the Administrative Building Code.

Purpose

To provide a floor slab or ring of materials impervious to moisture for the bowl setting.

Description

The Columbia Approved Bowl Gasket pre-cast or pre-moulded of a combination of waxes. It is light in color. It takes the place of the following type of products. A rubber gasket, a felt gasket, hand formed gaskets made of putty and other various compounds. It is compounded to meet the federal specifications HHC536A. The ring is a 6 inch diameter gasket made from Microcrystalline Waxes and Petrolatum.

Inspection and Test

Samples of the material were examined by Ass't. Architect T. W. Farricker, Committee on Test and found to comply with the requirements of C26-1250.0 Administrative Building Code, and the provisions of Federal Specifications HHC536A.

Recommendation

On the basis of the examination and data filed by the applicant, the Committee on Test recommends the approval of the material known as Columbia Approved Bowl Gasket for use in New York City for bowl setting when constructed and used in accordance with this report and the provisions of C26-1250.0 Administrative Building Code, provided each package or container of the device shall bear a label reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 849-57-SM."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 45-58-SA

Subject: Williamson Special Hi-Boy Gas-Fired Domestic Warm Air Furnace, Models 1627-07, 1627-10, 1527-07, 1527-10, 1527-12 and 1527-15, approval of.

The Williamson Co., Cincinnati, Ohio, filed January 28, 1958, an application with the Board of Standards and Appeals for approval of the appliance known as Williamson Special Hi-Boy Gas-Fired Domestic Warm Air Furnace, Models 1627-07,* 1627-10,* 1527-07, 1527-10, 1527-12 and 1527-15 for use in New York City under the provisions of Article 12, Chapter 26, of the Administrative Building Code.

Purpose

Gas-Fired Warm Air Furnace for domestic use.

Description

The Williamson Special Hi-Boy Gas Furnace Models are basement type floor furnaces designed for an input rating which varies from 75,000 Btu per hour from Model 1527-07 to 150,000 Btu per hour for 1527-15 also 75,000 per hour for 1627-07* and 100,000 Btu per hour for Model 1627-10*.

The heat exchanger is oval design made of 14 to 20 gauge hot rolled steel, hand arc welded. Lower baffle is made of 16 or 18 gauge aluminized steel or 20 gauge 430 stainless steel. Upper baffle standard steel. Tubes are welded into the heat exchanger to give more heating surface and rigidity. Heat exchanger is mounted on legs to provide ample air circulation over entire surface of heat exchanger. Draft diverter is 26 gauge g.l or 21 gauge C.R.S. painted.

Gas burner is cast iron single port with rectangular cast iron flame spreader on Models 1527-07, 1527-12 and 1627-07*, Circular flame spreader on Models 1527-10, 1527-15 and 1627-10* with pilot light and adjustable primary air shutter.

Blower is silent centrifugal type with permanent lubricated sealed bearings.

Motor is split phase long hour duty with built in overload protection.

Filter is spun glass replaceable type.

Controls are a thermostat, safety pilot, gas valve and automatic fan and limit control.

Casing has all of the above components housed in a 20-24 gauge C.R.S. casing, insulated with foil, faced glass wool (4 sides) 1/2" x 1/2 lb. Density. Finished in one coat baked enamel.

Inspection and Test

All details of construction were examined by Ass't. Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file with and is part of the record.

Recommendation

On the basis of the examination and test and data filed by the applicant the Committee on Test recommends the approval of the appliance known as Williamson Special Hi-Boy Gas-Fired Domestic Warm Air Furnaces, Models 1627-07,* 1627-10,* 1527-07, 1527-10, 1527-12 and 1527-15 for use in New York City under the provisions of Article 12, Chapter 26, of the Administrative Building Code.

The Committee further recommends that the Williamson Special Hi-Boy Models may be installed with the following

MINUTES

minimum clearances in inches from combustible construction in accordance with the tests of the American Gas Association as listed in table.

For Use With Natural, Manufactured and Mixed Gases.

Model	BTU	A	B	C	D	EL	ER	F
1527-07	75,000	2	6	#6	0	1	1	C
1527-10	100,000	2	6	#6	0	1	1	C
1527-12	125,000	2	6	#6	0	1	1	C
1527-15	150,000	2	6	#6	0	1	1	C
Model	BTU	A	B	C	D	EL	ER	F
1627-07*	75,000	2	6	#6	0	1	1	C
1627-10*	100,000	2	6	#6	0	1	1	C

For Use with Propane Gas
Model 1527-12

All Models above approved for use with Liquefied Petroleum Gases, except Model 1527-12.

* Direct Drive—Not recommended for air conditioning.
Clearance may be 1 inch when type "B" vent is used.
A—minimum clearance from top of furnace (casing, Bonnet or Plenum).

B—minimum clearance from front of unit.

C—minimum clearance from flue or vent connector in any direction.

D—minimum clearance from back of unit.

EL—minimum clearance from left side of unit.

ER—minimum clearance from right side of unit.

F—Type of floor, C—combustible.

In all cases, however, adequate ventilation shall be provided for and clearances shall be sufficient to allow for proper servicing of the furnaces.

TYPES OF BLOWERS

1527-07 (75,000 BTU) LAU, A-7 Brundage, U X 9 — ¾	1527-15 (150,000 BTU) LAU A 10-E or Viking B-10 Brundage X 10

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 46-58-SA

Subject: Williamson Special Lo-Boy Gas Furnace, Models 1624-07*, 1624-10*, 1524-07, 1524-10, 1524-12 and 1524-15, approval of.

The Williamson Co., Cincinnati, Ohio, filed January 28, 1958, an application with the Board of Standards and Appeals for approval of the appliance known as Williamson Special Lo-Boy Gas Furnace, Models 1624-07*, 1624-10*, 1524-07, 1524-10, 1524-12 and 1524-15 for use in New York City under the provisions of Article 12, Chapter 26, of the Administrative Building Code.

Purpose

Gas-fired warm air furnace for domestic use.

Description

The Williamson Special Lo-Boy Gas Furnace Models are basement type floor furnace designed for an input rating which varies from 75,000 Btu per hour from Model 1524-07 to 150,000 Btu per hour for model 1524-15, also 75,000 Btu per hour for 1624-07* and 100,000 Btu per hour for Model 1624-10*.

The heat exchanger is oval design made of 14 to 20 gauge hot rolled steel, hand arc welded. Lower baffle is made of 16 or 18 gauge aluminized steel or GA 430 stainless steel. Upper baffle standard steel. Tubes are welded into the heat exchanger to give more heating surface and rigidity. Heat exchanger is mounted on legs to provide ample air circulation, over entire surface of heat exchanger. Draft diverter 26 G.1 or 21 gauge C.R.S., painted.

Gas burner is cast iron single port with rectangular cast iron flame spreader on Models 1524-07, 1524-12 and 1624-07*, Circular flame spreader on Models 1524-10, 1524-15 and 1624-10*, pilot light and adjustable primary air shutter.

Blower is silent centrifugal type with permanent lubricated sealed bearings.

Motor is split phase long hour duty with built in overload protection.

Filter is spun glass replaceable type.

Controls are a thermostat, safety pilot, gas valve and automatic fan and limit control.

Casing has all of the above components housed in a 20-24 gauge C.R.S. casing, insulated with foil faced glass wool (4 sides) ½" x ½ lb. Den. Finished in one coat baked enamel.

Inspection and Test

All details of construction were examined by Ass't Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file and is part of the record.

Recommendation

On the basis of the examination and test and data filed by the applicant the Committee on Test recommends the approval of the appliance known as Williamson Special Lo-Boy Gas-Fired Furnace, Models 1624-07*, 1624-10*, 1524-07, 1524-10, 1524-12 and 1524-15 for use in New York City under the provisions of Article 12, Chapter 26 of the Administrative Building Code.

The Committee further recommends that the Williamson Special Lo-Boy Models may be installed with the following minimum clearance of 6 inches from combustible construction in accordance with the tests of the American Gas Association.

In all cases however, adequate ventilation shall be provided for and clearances shall be sufficient to allow for proper servicing of the furnaces.

* Direct Drive—Not recommended for air conditioning, all other models, belt driven blowers.

Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 139-58-SM

Subject: Cafco Spray.

Columbia Acoustics & Fireproofing Co., a subsidiary of United States Mineral Wool Co., New Jersey, filed February 13, 1958 an application with the Board of Standards and Appeals for approval of the material known as Cafco Spray under the provisions of C26-588 to C26-590 and C-26-596 to 599.0 Administrative Building Code.

Purpose

Cafco is to be used as an acoustical and thermal insulation, a plaster base, and as a fire retardant on steel floors and beam construction.

Description

The material is the same as that approved November 27, 1956, under Calendar Number 633-55-SM.

Cafco is the trade name of a mixture of mineral wool, asbestos, and cementacious binders; the proportions of which are of a proprietary nature and are on file with the Board.

The fibers are applied by blowing them along with a mist of water, onto the surface which has been treated with a thin coat of latex type adhesive.

Inspection and Test

The material was tested at Underwriters' Laboratories, United States and Canada, in accordance with the requirements of C26-588.0 through C26-590.0 and C26-596.0 through C26-599.0 Administrative Building Code; ASTM E-119—"Fire Tests of Building Construction and Materials"; National Fire Protection Association #251; Underwriters' Laboratories No. 263.

PANEL I Was constructed as follows:

The floor and ceiling assembly was erected so as to fill the opening in the test furnace. Steel floor units were of two types, fluted (a) and cellular (b), and were spaced to span the furnace frame opening. The fluted type unit was formed of No. 16 USS gauge steel, 1½ in. deep, 2 ft. wide, 17 ft. 3 in. long. The cellular type unit was 1½ in. deep, 2 ft. wide, and composed of a No. 18 USS gauge galvanized top sheet spot welded to a No. 16 USS gauge flat bottom sheet in a unit 17 ft. 3 in. long. The floor units were covered with a concrete fill to a depth of 2½ in. The underside of the steel units was sprayed with a coating of Cafco adhesive followed by Cafco fiber built up and tamped to an average thickness of ¾ in.

RESULTS OF TEST:

The construction successfully met the fire and hose stream tests for a three hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratories Retardant 3749-3, is on file and is part of the record.

PANEL II Was constructed as follows:

The floor and ceiling assembly was erected so as to fill the opening in the test furnace. Steel floor units, consisting of two fluted 18 USS gauge units spot welded together forming a cellular unit (c) 3½ in. deep, 2 ft. wide, 17 ft. 3 in. long, were spaced to span the furnace frame opening. The floor units were covered to a depth of 2½ in. with a concrete fill. The underside of the units was sprayed with a coating of Cafco adhesive followed by Cafco fiber built up and tamped to an average thickness of 7/16 in.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for a three hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratories of Canada—Canadian Retardant 193 Application No. 57T128B, is on file and is part of the record.

PANEL III Was constructed as follows:

The floor and ceiling assembly was erected so as to fill the opening in the test furnace. Steel floor units, consisting of one fluted 18 USS gauge unit spot welded to a 16 USS gauge flat steel unit forming a cellular unit (b) 1½ in. deep, 2 ft. wide, 17 ft. 3 in. long, were spaced to span the furnace frame opening. The floor units were covered to a depth of 2½ in. with a concrete fill. The underside of the units was sprayed with a coating of Cafco adhesive followed by Cafco fiber built up and tamped to an average thickness of ½ in.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for a two hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratories of Canada—Canadian Retardant 193 Application No. 57T128C, is on file and is part of the record.

BEAM I Was constructed as follows:

A load bearing structural steel wide flange I beam was used. Lath hanger wire was bent into rectangular loops to fit around the beam spaced alternately 22 to 28 in. and the ends were overlapped and tied at the beam soffit. Rib lath, 3.4 lb. per sq. yd., ¾ in. rib, was cut to size, bent into L-shapes, placed on either side of the beam, and wire-tied on each side and on the soffit. The lath was overlapped at the soffit and between sheets. The lath was sprayed with a coating of Cafco adhesive followed by Cafco fiber built up and tamped to an average thickness of 1½ in.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for a four hour fire resistive floor and ceiling construction. The complete report Underwriters' Laboratories Retardant 3749-3, is on file and is part of the record.

BEAM II Was constructed as follows:

A load bearing structural steel wide flange I beam was used. The beam was sprayed directly with a coating of

MINUTES

Cafco adhesive followed by Cafco fiber built up and tamped to an average thickness of $2\frac{1}{8}$ in., following the contour of the beam.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for a three hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratory Retardant 3749-3, is on file and is part of the record.

BEAM III Was constructed as follows:

A load bearing structural steel wide flange I beam was used. The beam was sprayed directly with a coating of Cafco Adhesive followed by Cafco fiber built up and tamped to an average thickness of $1\frac{7}{16}$ " following the contour of the beam.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for two hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratories of Canada—Canadian Retardant 193 Application No. 57T128B, is on file and is part of the record.

BEAM IV Was constructed as follows:

A load bearing structural steel wide flange I beam was used. The beam was sprayed directly with a coating of Cafco Adhesive followed by Cafco fiber built up and tamped to an average thickness of $1\frac{1}{8}$ in., following the contour of the beam.

RESULTS OF TEST: The construction successfully met the fire and hose stream test for one hour fire resistive floor and ceiling construction. The complete report, Underwriters' Laboratories of Canada—Canadian Retardant 193 Application No. 57T128C, is on file and part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Cafco Spray for use in New York City as a fireproofing medium when used in constructions as herein described as a three and two hour fire resistive floor and ceiling construction as described under Panel I, II and III and as a fire proofing for structural steel beams having a fire resistive ratings of four, three, two and one hours respectively as herein described under Beam I, II, III and IV in classes of construction as permitted under the pertinent sections of the Administrative Building Code, on condition that all plans submitted to the Department of Buildings showing the proposed use of this construction shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 139-58-SM" and further that all bags or containers in which this material is marketed shall be similarly marked and further that this material shall only be marketed under the trade name of Cafco Blaze Shield.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

Re: Calendar Number 321-58-SA

Subject: Humphrey Gas-Fired Unit Heater, Series MD 60, 75, 90, 105, 120, 135, 150, 180, 210, 240 and 270, approval of.

The General Gas Light Co., Kalamazoo, Michigan, filed May 6, 1958, an application with the Board of Standards and Appeals for approval of the Humphrey Gas-Fired Unit Heater, Series MD 60, 75, 90, 105, 120, 135, 150, 180, 210, 240 and 270 for use in New York City under the provisions of Article 12, Chapter 26 of the Administrative Building Code.

Purpose

For heating Commercial Occupancies and Garages.

Description

These units are available in 11 sizes. There are seven single fan models, with capacities of 60,000, 75,000, 90,000, 105,000, 120,000, 135,000 and 150,000 BTU. Double fan units are available in four models, with capacities of 180,000, 210,000, 240,000 and 270,000 BTU.

The unit is composed of a sectionalized 20 gauge welded steel heat exchanger with no interior baffles. Universal type burner of pressed steel with raised ports. Finished in porcelain enamel, and burns all gases. Non-clogging pilot of stainless steel. All controls are inside the cabinet and accessible by removal of back panel. The AGA approved controls consist of Basoid Valve for Safety Pilot and Burner Control, Hand Shutoff Valve, Heat Limit and Fan Control, also a Pressure Regulator is provided. The propeller fan is a ball thrust bearing motor located at top of cabinet. Fan control, safety overload control and Summer Switch are Standard equipment. The above components are housed in a 22 gauge casing with a metallic gray baked enamel finish.

These units are designed to be suspended from ceiling or other substantial supports. When installed in garages, airplane hangers or other places of explosive atmosphere these units are provided with a 40-40 mesh screen, such screen to be installed totally enclosing the burner flame and far enough away so that the flame will not impinge on the screen or cause it to be heated up to a visible red color.

Inspection and Test

An installation test was conducted at the Gas Apparatus Service Co., Inc., 8924-5th Ave., Brooklyn, New York. Present at the test were Ass't. Architect T. W. Farricker, Committee on Test, also Mr. Bill Buckwald and Mr. Henry Myers, representing the applicant. The heater functioned as designed.

These heaters have been tested and approved by the American Gas Association, Inc. The complete report is on file with and is part of the record.

Recommendation

On the basis of the inspection and test and data filed by the applicant, the Committee on Test recommends the approval of the appliance known as Humphrey Gas-Fired Unit Heater, Series MD 60, 75, 90, 105, 120, 135, 150, 180, 210, 240 and 270 for use in New York City when installed in accordance with Article 12, Chapter 26, of the Administrative Building Code, on condition that each unit shall be installed so that its base is at least 8 feet 0 inches above the floor level, and a 40-40 mesh bronze screen will entirely cover the combustion air intake and further that the appliance bear a label permanently affixed reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 321-58-SA."

(Sgd.) JOHN A. DARTS,

Committee on Test.

MINUTES

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

354-58-SM

APPLICANT—Roddiss Plywood Corporation, owner.

APPEARANCES—

For Applicant: Eugene M. Ford.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 354-58-SM

Subject: Roddis Composite Fire Door.

Roddiss Plywood Corp., Marshfield, Wisconsin, filed May 23, 1958 an applicaiton with the Board of Standards and Appeals for approval of the Roddis Composite Fire Door under the provisions of C26-610 Administrative Building Code.

Purpose

The door is to be used as a $\frac{3}{4}$ hr. fire resistive opening protective assembly.

Description

The door is 3'-6" by 7'-0" by 0'-1- $\frac{3}{4}$ " in thickness. The core consists of chips, phenolic resin, fire proofing chemicals and minerals. The resin and fireproofing chemicals are thoroughly mixed with the chips and minerals. The powdered resin bender is 8% of the weight of the wood chip. The finished core thickness is 1 $\frac{1}{2}$ inch for the 1 $\frac{3}{4}$ inch door.

The edge strips are of fire proof wood. The side edge strips are $\frac{3}{4}$ inch wide and the end rails are $\frac{1}{2}$ inch wide. These edge strips are single tongue and grooved and glued with resorcinol resin.

The lock block is of asbestocore material and extends 7 $\frac{1}{4}$ " into the core.

The faces are two ply hardwood panels. The cross banding is 1/10 inch hardwood fire treated veneer and the face is 1/24" to 1/28" hardwood veneer. The hardware consists of 1 $\frac{1}{2}$ pairs of 4 $\frac{1}{2}$ inch full mortised steel hinges and the latch is a cylindrical latch with $\frac{3}{4}$ inch throw.

Inspection and Test

The door successfully met the fire and hose stream requirements when tested in accordance with the requirements of C26-610.0 Administrative Building Code at the Underwriters' Laboratory.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends the approval of the Roddis Composite Fire Door for use in New York City as a $\frac{3}{4}$ hour fire resistive opening protective assembly, on condition that the wired glass area in the door shall comply with the requirements of C26-668.0 Administrative Building Code and that the inspectiton and labeling shall comply with the Rules of the Board for the Inspection of Approved Opening Protective Assemblies.

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 497-58-SM

Subject: Sonotard Liquid.

L. Sonneborn Sons Inc., New York, filed August 22, 1958 an application with the Board of Standards and Appeals for approval of the material known as Sonotard Liquid under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is to be used as an admixture in concrete.

Description

The material, a liquid, is a 30% aqueous concentrate of an amphoteric complex salt of a partially substituted monobasic organic acid.

Inspection and Test

The applicant has submitted comparative tests conducted by Haller Testing Laboratories on concrete made with and without the admixture and in all cases the concrete made with the admixture had a higher compressive strength. The complete report is on file with and is part of the record.

Recommendation

On the basis of the data filed by the applicant the Committee on Test recommends the approval of the material known as Sonotard Liquid for voluntary use in New York City under C26-191.0 Administrative Building Code as an admixture to concrete, on condition that the maximum amount of Sonotard used shall not exceed 3 ounces per sack of cement and further that each container in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 497-58-SM."

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 526-58-SM

Subject: Pecora Tile-Stik.

MINUTES

C. A. McGinnis for Pecora Inc., Philadelphia, Pa., filed September 8, 1958 an application with the Board of Standards and Appeals for approval of the material known as Pecora Tile Stik under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is a portland cement mortar for setting ceramic tile.

Description

The material is a dry mix of portland cement, fine sand and a small quantity of extra chemicals to prevent the loss of water necessary for hydration of the portland cement in setting. The resulting dry material is mixed with water just prior to use to form a mortar. The exact formula is of such a nature that the Board has decided that it should remain confidential and kept in the Board's safe.

Inspection and Test

The applicant has submitted reports of tests conducted by Trinity Testing Laboratories Inc., conducted in accordance with the requirements of Commercial Standards 181-52 and all shear tests showed a factor of safety of at least 4. The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Pecora Tile-Stik for voluntary use in New York City as a self-curing cement mortar for setting ceramic tile when used in accordance with the manufacturers specification, on condition that the container in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 526-58-SM."

(Sgd.) JOHN A. DARTS,

547-58-SA

APPLICANT—Modine Manufacturing Company, owner.

APPEARANCES—

For Applicant: Owen Desmond.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 547-58-SA

Subject: Modine Gas-Fired Heaters, Models GB-50, GB-75, GB-105, GB-135, GB-165, GB-225 and GB-310.

The Modine Mfg. Co., Racine, Wisconsin, filed September 19, 1958, an application with the Board of Standards and Appeals for approval of the appliance known as Modine Gas-Fired Heaters, Models GB-50, GB-75, GB-105, GB-135, GB-165, GB-225 and GB-310 for use in New York City under the provisions of Article 12, of the Administrative Building Code.

Purpose

Gas-fired blower units primarily used with duct work to supply warm air for heating. Also units may be used without duct work and used similar to a unit heater. May be installed in commercial and industrial type buildings other than garages or similar occupancies.

Description

The Modine gas-fired blower units are manufactured in seven sizes, designed as Models GB-50, GB-75, GB-105, GB-135, GB-165, GB-225 and GB-310, having input ratings of 50,000; 75,000; 105,000; 165,000; 225,000 and 310,000 BTU/hour respectively. The design and construction of these models from the small to the large are very similar.

Details of materials and construction are as follows:

Heat Exchanger Tubes: Die formed from either 20 gauge aluminized steel or 22 gauge type 430 stainless steel. Modified rectangular cross section without baffles or other construction inside tubes.

Top and Bottom Headers: Die formed from either 20 gauge aluminized steel or 22 gauge type 430 stainless steel.

Burners: Die formed, elongated, rectangular parts constructed of 28 gauge type 430 stainless steel.

Mounted of Burner and Manifold: Burner and Manifold are mounted within the casing with (1) shoulder rivets and retaining clips and (2) cap screws respectively which can be removed simply for servicing.

Casing: Die formed 18 and 20 gauge steel, bonderized with baked enamel finish. Channels for suspended mounting of the unit are attached to the unit at the factory.

Draft Diverter: Built-in draft diverter of 24 gauge aluminized steel.

Controls: All units equipped with manual shut-off valve, manual pilot shut-off valve, gas pressure regulator, automatic gas valve, safety pilot valve with 100% pilot shut-off and an over heat limit control. A pilot line gum filter can be supplied where required.

Blower and Motor: Blower wheel is dynamically balanced and turns in Randell self-aligning sleeve bearings which are factory lubricated, requiring no further lubrication for the life of the unit. Motors are open frame split-phase type, 1725 RPM, with built-in automatic thermo-overload, designed particularly for belt fan duty to insure quiet operation.

The heat exchanger tubes are formed in halves and are seamwelded to provide a gas tight joint. These are in turn heliarc welded into the top and bottom headers to also provide a gas tight joint. The burner parts are brazed with a silver brazing alloy.

The burner tubes are lined up with the heat exchanger tubes in a manner such that the frames extend into the heat exchanger tubes giving a more even distribution of heat from top to bottom and also insuring that each tube receives an equal share of the heat.

The following are for various gases:

For use with Natural, Manufactured and Mixed Gases.

*GB-50, *GB-75, *GB-105, *GB-135 and *GB-165, *GB-225 and *GB-310.

For use with Propane Gas. GB-105 and GB-135.

For use with Liquefied Petroleum Gases:

The Models, except Nos. GB-105 and GB-135, listed above for use with Natural, Manufactured and Mixed Gases also are approved for use with liquefied petroleum gases with the same ratings and trade name.

For use with LP gas-air mixtures.

The models listed above for use with natural, manufactured, and mixed gases also are approved for use with LP gas-air mixtures with the same ratings and trade name.

Above Models approved with suffix A or S.

A—Aluminized heat exchanger.

S—Stainless steel heat exchanger.

*—Also approved under optional natural gas requirements.

Recommended Mounting Height of Unit Heaters:

MINUTES

Model	Feet Above Floor
GB-50	10
GB-75	11
GB-105	11
GB-135	12
GB-165	12
GB-225	14
GB-310	16

Inspection and Test

All details of construction were examined by Ass't. Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file and is part of the record.

Recommendation

On the basis of the examination and test and data filed by the applicant, the Committee on Test recommends the approval of the appliance known as Modine Gas-Fired Heaters, Models GB-50, GB-75, GB-105, GB-135, GB-165, GB-225 and GB-310 for use in New York City under the provisions of Article 12 of the Administrative Building Code.

The Committee further recommends that the Modine units may be installed with the minimum clearances of 6 inches from combustible construction in accordance with the tests of the American Gas Association.

In all cases however, adequate clearances shall be provided for and sufficient to allow for proper servicing of the furnaces.

The Committee further recommends that the units shall bear a label, permanently affixed reading as follows: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 547-58-SA."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

568-58-SM

APPLICANT—Tube Turns Plastics, Inc., owner.

APPEARANCES—

For Applicant: Daniel F. Burke.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and
Commissioner Becker 3
Negative 0
Absent: Vice Chairman Kleinert and Commissioner
Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 568-58-SM

Subject: Tube Turns Plastics, Inc., Unplasticized Polyvinyl Chloride Chemical Drainage Fittings, approval of.

Tube Turns Plastics, Inc., Louisville, Kentucky, filed September 29, 1958, an application with the Board of Standards and Appeals for approval of Tube Turns Plastics, Inc., Unplasticized Polyvinyl Chloride Chemical Drainage Fittings for use in New York City under the provisions of C26-191.0 and C26-1297.0 Administrative Building Code.

Purpose

Plastics fittings for use with plastic pipe in acid and chemical drain systems.

Description

These plastic fittings are made of an unplasticized polyvinyl chloride resin containing suitable pigments and stabilizers but with no added copolymers or plasticizers. The fittings are formed by an injection process and are made in

1½, 2, 3 and 4 inch nominal pipe sizes in the shape of 90° elbows, 90° short Y branch tees, 90° short Y branch cross tees, tee Y crosses, 45° Y branches, 45° Y branch crosses, couplings and increaser bushings all designed as socket fittings for solvent cemented connections. They are to be used with approved unplasticized polyvinyl chloride pipe of the same general composition as the fittings. Wall thickness for both fittings and plastic pipe is to be the same and will be equal to the thickness of schedule 40 or schedule 80 steel pipe, which corresponds to the thickness of standard weight pipe and extra strong pipe respectively.

Cemented joints made up with Tube Turn Plastics Inc. Solvent Cement set up in 5 minutes and develop full strength in 48 hours. Long pipe lines exposed to temperature changes are to be assembled with direction changes, bends or offsets to allow for thermal expansion and contraction. Risers are to be securely supported at the top and bottom, and horizontal lines are to be securely supported approximately every 6 feet in such a manner as to permit longitudinal movement in the piping.

Drain systems are tested for tightness after assembly.

The plastic pipe is marked with the manufacturer's name and the plastic fittings carry the trademark ttp.

Polyvinyl chloride resin is classed as corrosion resistant to most acids and chemicals and self extinguishing when exposed to flame.

Inspection and Test

All details of the data submitted by the applicant were examined by Asst. Engr. G. F. Sklenarik, Committee on Test

Physical properties of the polyvinyl chloride resin are:
Tensile Strength normal impact grade

7000 psi ASTM D 638-49T

Flexural Strength normal impact grade

14500 psi ASTM D 790-49T

Thermal Expansion normal impact grade

.00005" per °C ASTM D696-44T

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of Tube Turns Plastics Inc., Unplasticized Polyvinyl Chloride Chemical Drainage Fittings and cement for voluntary use in New York City only, for the handling of diluted acid and soluble chemical wastes; in accordance with this report and the provisions of C26-1265.0 through C26-1267.0 and C26-1297.0 Administrative Building Code on condition that all cartons in which the material is to be marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 568-58-SM."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

66-59-SA

APPLICANT—Ivan Pinsker for Metalwash Machinery Corporation, owner.

APPEARANCES—

For Applicant: Ivan Pinsker.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and
Commissioner Becker 3
Negative 0
Absent: Vice Chairman Kleinert and Commissioner
Sleeper 2

MINUTES

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 66-59-SA

Subject: Metalwash Finishing System, Model VRT Bake Oven, Gas-Fired.

Ivan Pinsker for Metalwash Machinery Corp., Elizabeth, New Jersey, filed February 3, 1959 an application with the Board of Standards and Appeals for approval of the Metalwash Finishing System, Model VRT Bake Oven, Gas Fired, under the provisions of C26-191.0 Administrative Building Code and the Paint Spray Rules of the Board.

Purpose

A system for the application of a plastic lacquer finish on metal parts.

Description

The unit is a conveyORIZED tunnel booth and drying oven contained in a single substantial sheet steel housing.

The metal parts to be treated are fastened on suitable carriers to a two strand pintle conveyor geared to travel at 20 inches per minute.

The first or washing stage consists of passing the metal parts through a filtered solvent spray area. The solvent, a flammable aromatic hydrocarbon, is pumped from a 50 gallon storage tank attached to the unit. The pump is an Ingersoll Rand KRVL standard bronze fitted vertical pump driven by a 2 HP explosion proof motor. The solvent is ejected from a series of shower head nozzles forming a solvent mist through which the conveyor passes. This is done to assure a dust free atmosphere beyond this point. The solvent drains back into the storage tank as the work proceeds to the second stage, the lacquering stage. Here the lacquer, a thermosetting melamine and alkyd plastic composition, is drawn from a second 50 gallon storage tank by means of a Viking LL 253 pump driven by a 5 H.P. explosion proof motor. A third 50 gallon storage tank adjoining the lacquer tank is used to store extra solvent for the lacquer. The lacquer is applied to the metal parts through shower head nozzles forming a lacquer mist through which the conveyor passes.

After being coated with the lacquer the work passes through a drain section where excess lacquer drips off and drains back to the tank and a preliminary drying of the metal parts occurs. In this first stage of drying, conveyor travel time is 10 minutes, then final air drying takes place for an additional 10 minutes, during which most of the solvent is evaporated and the lacquer coating is then ready to be polymerized to a glass smooth finish.

The final section of the system, the oven section, is where the polymerization takes place. It takes 30 minutes for the work to pass through this section before entering the dust proof return tunnel in the upper portion of the system. The oven space is heated from an adjoining section in which is installed a steel combustion chamber and heat exchanger. A maxon Premix Burner with a capacity of 1,800,000 Btu per hour is arranged to fire through a side opening into the combustion chamber. All combustion gases after passing through the heat exchanger are completely discharged to atmosphere in a manner conforming to the requirements of Article 12, Administrative Building Code.

The gas burner operates automatically. Ignition is by electric spark and gas pilot with a safety shut off, provided in case of flame failure or gas pressure failure. Air flow switches are provided on all exhaust and supply fans and the operating parts of the system are also electrically interconnected so as to shut down the system in case of failure of any such part. In addition a M-H Protect-o-glo gas safety flame control prevents reignition of the gas burner until the system has been purged for 5 minutes.

A motor driven circulating fan of 3990 cfm capacity is installed in the burner section and circulates heated filtered air to the oven section where a maximum temperature of 350°F is maintained. A safety limit switch is provided and set at 425°F.

The oven section has mechanical exhaust ventilation of 2450 cubic feet per minute. A special high temperature fan is used for this purpose. The drain section is provided with mechanical exhaust of 1309 cubic feet per minute capacity and the feed end of the system has mechanical exhaust of 3600 cubic feet per minute. The return tunnel has a fresh air supply of 3600 cubic feet per minute and a non-mechanical exhaust. All exhaust is discharged outdoors.

The gas burner is located at least 25 feet from the lacquering portion of the system.

A nine cylinder CO₂ extinguishing system is provided affording coverage to the solvent wash, lacquer coating and vapor drying areas and is designed to operate automatically on an 11° per minute rate of temperature rise or by manual release.

Inspection and Test

A typical installation of a Metalwash Finishing system, Model VRT was inspected at 34-51 56th St., Woodside, Queens, by Ass't Engr. G. F. Sklenarik, Committee on Test and M. I. Pinsker, representing the applicant.

This system will consume by evaporation approximately 14 gallons of solvent per hour when in full operation. The exhaust capacity provided at the spray and drain sections is 294,500 cubic feet per hour which gives an average solvent concentration of less than 0.15%. The low limit of explosibility for xylene, an aromatic hydrocarbon, is given as 1%.

The oven exhaust provides an additional exhaust capacity of 147,000 cubic feet per hour.

Recommendation

On the basis of the inspection and the data submitted by the applicant, The Committee on Test recommends the approval of the Metalwash Finishing System, Model VRT Bake Oven, Gas Fired, for use in New York City under the provisions of C26-191.0 Administrative Building Code, Rules 4.3 & 4.4 of the Paint Spray Rules and section C-19-11.0 Administrative Code when installed in accordance with this report, provided that the equipment is installed on the street level floor in a one story building and that the storage and handling of lacquer and solvent shall be as prescribed by the Fire Commissioner and further that each finishing system shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 66-59-SA".

(Sgd.) JOHN A. DARTS

Resolved, that the Board of Standards and Appeals does hereby approve this appliance in accordance with the above report.

109-59-SM

APPLICANT—Airtex Corporation, owner.

APPEARANCES—

For Applicant: E. N. Seaberg.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 109-59-SM

Subject: Airtex Corporation Radiant

Heating and Cooling Acoustical Ceiling.

Airtex Corporation of 2900 North Western Avenue, Chicago 18, Illinois, filed on February 1959, an application with the Board of Standards and Appeals for approval of

MINUTES

the material known as Airtex Ceiling under the provisions of C26-88, C26-178, C26-191 and C26-461.0 of the Administrative Building Code.

Purpose

The material is an incombustible acoustical ceiling also used for radiant heating and cooling.

Description

The ceiling consists of a standard channel suspension system installed in accordance with the requirements of C26-461 Administrative Building Code for light weight ceilings installed dry without plaster. To this channel suspension system is attached a water circulating coil consisting of a 1¼ inch square steel header pipe and ½ inch I.P.S. standard schedule 40 galvanized pipe by means of 13 gauge U.S.S. spring clip. This pipe assembly supports the incombustible acoustical and insulating blanket.

The aluminum ceiling panels and any approved acoustical tile used is supported by means of Standard tee bars which are in turn clipped to the standard channel suspension system by 12 gauge U.S.S. spring clips. The pipes are not used as supports.

The weight of the assembly including the pipes filled with water and steel metal acoustical pans used between rows of the system proper is 2.48 pounds per square foot.

Inspection and Test

Details of construction were checked by Ass't. Engineer J. A. Darts, Committee on Test, at 202 East 44th Street, and it was noted that the assembly was in accordance with data filed, which is in the record and that the two sets of clips used were of sufficient strength to carry the assembly.

Recommendation

On the basis of the inspection made and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Airtex Radiant Acoustical Ceiling for use in New York City under Sections C26-88, C26-178, C26-191 and C26-461.0 of the Administrative Building Code as an incombustible acoustical ceiling, on condition that the acoustical blanket be of incombustible mineral material, that the ceiling be hung from a standard suspension system installed in accordance with the requirements of C26-461.0 Administrative Building Code, that when the system is used for cooling, the area to be cooled shall be properly dehumidified.

The Committee on Test recommends that all acoustical tile or metal acoustical pans or ceiling board installed in connection with the system shall have been approved by the Board. If combustible or fire retarded acoustical tile is used the area of such tile used in connection with the system shall be limited as set forth in the Fiber Board Rules of the Board and the ceiling is not to be rated incombustible. The Committee on Test further recommends that all plans showing the proposed use of the system filed with the Department of Buildings shall be marked or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 109-59-SM."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

170-59-SA

APPLICANT—Gilbert and Barker Manufacturing Company, owner: William Keay, agent.

APPEARANCES—

For Applicant: William Keay.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0
Absent: Vice Chairman Kleinert and Commissioner
Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 170-59-SA

Subject: Gilbarco Gasoline Dispenser, Remote Control, Model 804.

Gilbert & Barker Mfg. Company, West Springfield, Mass., filed March 17, 1959 an application with the Board of Standards and Appeals for approval of the Gilbarco Gasoline Dispenser, Remote Control, Model 804, for use in New York City under the provisions of section C-19-69.0 Administrative Code.

Purpose

Gasoline dispensing units.

Description

The Model 804 dispenser is an island type dispenser to be used with remote pumping systems in gasoline service station application. The pedestal section of the housing contains the supply pipe riser, line strainer and pressure regulating valve. The upper section of the housing contains the solenoid feed line valve, the meter, the automatic computer, the computer reset interlock mechanism and the operating switch rod mechanism.

The pressure regulating valve which maintains liquid from the meter to the hose nozzle is installed in the supply pipe line riser at the inlet side of the meter.

The solenoid feed line valve is installed in the supply piping between the meter and the pressure regulating valve. It is interlocked with the operating handle and is opened and closed in sequence with the "on" and "off" position of the handle. The feed line valve is equipped with a built in relief device which prevents excessive pressure in the meter and hose as may be caused by expansion of the liquid due to temperature rise. The valve also prevents pressure in the hose of any other dispenser on the same line but not in use.

The hose arrangement is of the external cable suspended type and extends from the hose side of the dispenser housing approximately 13 feet to the tip of the nozzle. Maximum flow of product is 15 gallon per minute controlled at the nozzle which is of the non-automatic type.

Inspection and Test

All details of construction were examined by Ass't. Engineer G. F. Sklenarik, Committee on Test.

The Model 804 Gilbarco Gasoline Dispenser was tested and approved by Underwriters' Laboratories, file MH 1941.

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of the Gilbarco Gasoline Dispenser, Remote Control, Model 804, for use in New York City under the provisions of C-19-69.0 Administrative Code with approved pump provided that each dispenser shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 170-59-SA."

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 215-59-SA

Subject: Casey Jet Dryer, Gas-Fired.

Pan Industrial Corporation for Casey Manufacturing Company, Pittsburgh, Pa. filed April 7, 1959 an application with the Board of Standards and Appeals for approval of the Casey Jet Dryer, Gas-Fired for use in New York City under the provisions of Article 12 Administrative Building Code and Section C-19-11.0 Administrative Code.

Purpose

A machine for drying screen process printing.

Description

The Casey Jet Air Dryer is a unit for the drying of screen process prints made on sheets of paper by means of a silk screen and squeegee process and involving the use of a combustible ink.

The dryer is made up of component units, multiples of which can be included in an installation as may be required.

The basic parts of the Casey Jet Air Dryer are a woven carbon steel conveyor belt which carries the printed material placed thereon beneath a fibreglass insulated steel hood which serves to direct a flow of heated air onto the printed material. Beneath the hood and the conveyor is installed an exhaust plenum which serves to exhaust the vapors from the printed material by means of a motor driven fan and suitable duct work leading outdoors.

Heated air is supplied to the hood from two Janitrol gas-fired heaters installed in tandem along with a blower fan assembly and all connected together by duct work. The Janitrol heaters, approved by the Board under Calendar Number 349-52-SA, and the blower fan assembly are supported off the floor at the proper height to be in line with the side opening in the hood. The heaters are equipped with fully automatic safety pilots and a gas pressure regulator. A thermometer and adjustable limit switch are installed in the hot air hood with a range of 90°F to 200°F. Forty mesh brass screens are installed at the combustion air intakes to the gas heaters and also in the air duct between the heaters and the hot air supply hood.

The Janitrol heaters are designed for flue connection to carry off combustion products to outdoors.

After the printed matter is dried beneath the hood, it passes to a cooling box which, by means of a motor driven blower unit, blows room temperature air over the printed matter and cools it. The work is manually removed at the end of the conveyor system and stacked.

The entire system is grounded against static and the exhaust capacity at the plenum is greater than the supply of heated air to the hood to maintain a slightly negative pressure at that point.

The Casey Jet Dryer is made in the following sizes:

Model Number	BTU Input	BTU Output	CFM Input	CFM Exhaust
per hour in thousands				
3048	225	180	1700	1870
4848	350	280	1700	1870
4860	450	360	2625	2885
4872	450	360	3300	3630
4896	700	560	3300	3630
48120	900	720	3300	3630
6060	450	360	3300	3630
6096	900	720	5250	5775
7296	900	720	6600	7260

Static Pressure $\frac{3}{4}$ of an inch

The first two numbers in the model designation indicate in inches the width of the conveyor and the last two or three numerals indicate in inches the length of the hood.

Inspection and Test

A typical installation was inspected at 38 West 21st Street, New York by Assistant Engineer G. F. Sklenarik, Committee on Test. Present was Mr. J. Chambers, Mr. H. Barlam and others representing the applicant.

The dryer functioned satisfactorily as designed. In all installations an electrical interconnection will be provided so that the dryer can not be started unless the plenum exhaust is in operation.

Recommendation

On the basis of the inspection and the data filed by the applicant, the Committee on Test recommends the approval of the Casey Jet Dryer for use in New York City under the provisions of Article 12 Administrative Building Code and Section C-19-11.0 Administrative Code when installed in accordance with this report and the requirements of the Fire Commissioner provided that each dryer shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 215-59-SA."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

RULES

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the building zone resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—postage to be added if the forms are forwarded by mail.

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

AUG 10 1959

UNIVERSITY OF CALIFORNIA

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

NOTICE TO APPELLANTS AND APPLICANTS

No appeal or application will be entertained in connection with which court proceedings are pending or in progress, unless exception is granted by the chairman, nor accepted which is not filed within thirty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal or application shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal or application.

At the time of filing an appeal or application, the appellant or applicant shall forward a signed notice of appeal addressed to the Administrative Official either Borough Superintendent of Buildings or Fire Commissioner and file with this board a duplicate of said notice.

Appellants and applicants are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal or application.

Appeals and applications will be simplified and disposition of same expedited by conforming to these directions.

MAX H. FOLEY, Chairman

CALENDAR

For Opposition: None.

ACTION OF BOARD—Resolution amended.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the applicant requested reopening of this appli-cation and amendment of the Resolution to permit the re-duction in area by the reapportioning of the plot into two separate lots; and

WHEREAS, this application was reopened on June 16, 1959 and set for hearing on July 14, 1959 at 10 A. M., subject to regular procedure, waiving all requirements except a new decision of the Borough Superintendent and two publications in the Bulletin; and

WHEREAS, a public hearing was held on this application on July 14, 1959 after due notice by publication in the Bulle-tin; and

WHEREAS, the decision of the Borough Superintendent, dated April 22, 1959 acting on Alt. Applic. No. 379-59, reads:

"1. Proposed reapportionment of lot to wit, area of lot reduced, is contrary to B. S. A. Cal. No. 5-33-BZ, Vol. II."

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on June 26, 1956, by adding thereto:

"that the reduction in area shall be permitted by re-apportioning the area into two separate plots in accord-ance with drawings filed with this application dated, April

MINUTES

24, 1959, 4 sheets, *on condition* that all laws, rules and regulations applicable shall be complied with; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A from the date of this amended resolution."

13-33-BZ—Vol. III

APPLICANT—Henry J. Nurick, for Carjack Petroleum Corp., owner.

SUBJECT—Application reopened April 7, 1959 as Volume III—decision of the Borough Superintendent, under sections 7c and 7i of the Zoning Resolution, to permit in a business use district the alteration and modernization of the existing gasoline service station.

PREMISES AFFECTED—116-124 Kings Highway and 1652-58 Stillwell Avenue, southwest corner, Block 6253, Lot 29, Borough of Brooklyn.

APPEARANCES—

For Applicant: H. J. Nurick.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. III on April 7, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on June 30, 1959 after due notice by publication in the Bulletin; laid over to July 14, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated March 13, 1959 acting on Alt. Applic. No. 349-59, reads:

"1. Proposed extension to existing accessory building of a gasoline service station and change of occupancy to include office, lubritorium, gasoline service station, auto laundry, parking of cars awaiting service, motor vehicle repair shop, hand tools only, in a Business Zone, is contrary to Article II, PP. 4a, subsections 29 and 46 of the Zoning Resolution. Note—Premises were subject of a Bd. of Standards and Appeals variance under Cal. #13-33-BZ."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7c and i, to permit in a business use district, the alteration and modernization of the existing gasoline service station in accordance with drawings filed with this application dated, March 17, 1959, 4 sheets, and June 17, 1959, 1 sheet, *on condition* that all laws, rules and regulations applicable shall be complied with; and that all permits and a Certificate of Occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

289-36-BZ—Vol. II

APPLICANT—Joshua Brown, for Mrs. Anna Kelly, owner; Staten Island Oil Company, Inc.—John N. Leopold-President, lessee.

SUBJECT—Application reopened January 6, 1959 as Vol. II—decision of the Borough Superintendent, under sections 7f and 7i of the Zoning Resolution, to permit in a business use district, the restoration of a gasoline service station, auto repair shop and five (5) car garage formerly granted by the Board under Cal. No. 289-36-BZ and to

continue such uses with the additional uses of lubritorium, car wash, non-automatic, minor auto repairs with hand tools only, office and sale of auto parts and accessories and parking of more than five (5) cars awaiting service for a term of fifteen (15) years.

PREMISES AFFECTED—7 Androvette Street and 4409 Arthur Kill Road, northwest corner, Block 7406, Lot 1, Charleston, Borough of Richmond.

APPEARANCES—

For Applicant: Joshua Brown.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on January 6, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on May 19, 1959 after due notice by publication in the Bulletin; laid over, date to be set; for inspection and decision; hearing closed; then to July 14, 1959, at 10 A. M. for inspection and decision; and

WHEREAS, the decision of the Borough Superintendent, dated November 21, 1958 acting on Alt. Applic. No. 424-58, reads:

"1. Variance previously granted by the Board of Standards and Appeals under calendar number 289-36-BZ to permit the use of the premises as a gasoline selling station, minor repairing with hand tools only and 5 car garage, has expired. Further use as such or the proposed use as a gasoline service station, lubritorium including minor auto repair with hand tools only, car wash, non automatic, office and sales room, parking area for more than 5 vehicles awaiting service, partly located in a residence district and partly in a business district, must be referred to the Board of Standards and Appeals."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions f and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7 f and i, to permit in a business use district, the restoration of a gasoline service station, auto repair shop and five car garage, formerly granted by the Board under Cal. No. 289-36-BZ, and to continue such uses with the additional uses of lubritorium, non-automatic car wash, minor auto repairs with hand tools only, office and sale of auto parts and accessories, and parking of more than five cars awaiting service, for a term of fifteen years, *on condition* that working drawings be filed with this Board before being filed with the Borough Superintendent; that all laws, rules and regulations applicable shall be complied with; and that all permits and a Certificate of Occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

APPLICANT—Leonard F. Rothkrug, for Ludvik Hilman, Martin Rausman and George Pullman, doing business as Joint Realty Co., owner.

SUBJECT—Application filed November 14, 1958, pursuant to Section 35 of the General City Law, relating to curb cuts in bed of mapped street—proposed widening of Richmond Avenue and Amboy Road.

PREMISES AFFECTED—3880 Richmond Avenue and 4575 Amboy Road, northwest corner, Block 5585, Lot 62, Eltingville, Richmond.

APPEARANCES—

For Applicant: Leonard F. Rothkrug.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,

Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated November 7, 1958 on N. B. Applic. 126-58, reads:

“(3) Proposed curb cuts in the bed of a mapped street is contrary to Art. 35 of the General City Law.”

and

WHEREAS, the applicant states that the premises consists of a vacant lot, 119 feet by 111 feet, irregular, located in a retail use, D area, class 1 height district; that it is now proposed to erect and maintain a gasoline service station with accessory uses; that all work and uses are more fully described under Calendar Number 135-58-BZ; and

WHEREAS, the applicant contends that the proposed street widenings is of both Richmond Avenue and Amboy Road, that no part of the proposed gas station accessory building, pump islands or tanks are in the bed of the street; that the station has been designed to conform with the new street line; that the only use of streets will be as a driveway; that when the street widenings are affected, the gas station will be contained entirely within the new building line; and

WHEREAS, the premises were inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the decision of the Borough Superintendent, acting on N. B. Applic. 126-58, Objection No. 3 be and it hereby is *modified* under the powers vested in the Board by Section 35 of the General City Law, and that the appeal be and it hereby is *granted*, relating to the curb cut in the bed of the mapped street, *on condition* that when the street widenings are effected, the gas station will be entirely within the new building lines.

706-45-SM—Vol. III

APPLICANT—Flexicore Precast Inc., owner. Harold Perrine, Agent.

APPEARANCES—

For Applicant: Harold Perrine, Charles L. Pettibone, Robert L. Hubler, Jr. and Robert E. Smith.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 706-45-SM—Vol. III.

Subject: Amendment to resolution as to additional size of Flexicore Units.

H. Perrine for Flexicore Precast Inc., New York, requested by filing an application that the resolution adopted February 5, 1946 and amended October 1, 1957 under Calendar Number 706-45-SM—Vols. I and II be amended so as to permit the use of Flexicore Units of a size of 6" deep by 16" wide as a component part of a fire resistive floor and ceiling construction. The application was reopened by a vote of the Board as Calendar Number 706-45-SM—Vol. III on January 7, 1958.

Purpose

The material is to be used as a three hour fire resistive floor and/or roof construction.

Description

The requested slab is a prefabricated reinforced concrete unit manufactured in a size of 6 inches deep by 16 inches wide and in varying lengths. The units are manufactured in the same manner as the units previously approved as to strength.

Inspection and Test

A floor construction similar to that approved October 1, 1957, except that the units were six inches deep, was tested at the National Bureau of Standards, Washington, D. C., in accordance with the requirements of C26-588.0 through C26-590.0 and C26-596.0 through C26-599.0 Administrative Building Code. The construction successfully met the requirements of a three hour fire resistive floor and/or roof construction. The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends that the resolution adopted February 5, 1946 and amended October 1, 1957 under Calendar Number 706-45-SM—Vols. I and II be amended so as to include a Flexicore Slab 6" x 16", on condition that the balance of the construction, including topping and fireproofing of steel beams, as a three hour fire resistive floor and/or roof construction, on condition that the loads allowed shall not exceed the loads as approved February 5, 1946 under Calendar Number 706-45-SM—Vol. I and further that all other requirements of the resolution adopted February 5, 1946 under Calendar Number 706-45-

SM—Vol. I and as amended October 1, 1957 under Calendar Number 706-45-SM—Vol. II be complied with.

(Sgd.) JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

436-48-SA

APPLICANT—Dravo Corporation, owner.

APPEARANCES—

For Applicant: Howard A. Vernay, Jr.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 436-48-SA.

Subject: Amendment of the resolution as to include 40-40 mesh non-corrosive screen over combustion air inlet on Paraflo Heaters, for use in garages or places of explosive atmosphere.

The Dravo Corporation, New York, N. Y., requested by letter May 29, 1959, that the resolution adopted July 20, 1948, amended April 9, 1957, under Calendar Number 436-48-SA be amended so as to include 40-40 mesh non-corrosive screen over combustion air inlet on Paraflo Heaters, for use in garages or places of explosive atmosphere. Reopened by the Board, May 5, 1959.

Recommendation

The Committee on Test recommends that the resolution adopted July 20, 1948 and amended April 9, 1957, under Calendar Number 436-48-SA be amended so as to include 40-40 mesh non-corrosive screen over combustion air inlet on Paraflo Heaters, for use in garages or places of explosive atmosphere, on condition that each unit shall be installed so that its base is at least 8 feet 0 inches above the floor level, and further that the resolution adopted July 20, 1948 and amended April 9, 1957 under Calendar Number 436-48-SA be complied with.

(Sgd.) JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

552-55-SA

APPLICANT—Heil-Quaker Corporation, owner. Karl Mould, Agent.

APPEARANCES—

For Applicant: Karl Mould.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 552-55-SA

Subject: Amendment to resolution.

MINUTES

Heil-Quaker Corporation, Nashville, Tennessee, successor to Quaker Manufacturing Co., Div. of Florence Stove Co., requested by letter dated March 31, 1959, that the resolution adopted July 9, 1957 under Calendar Number 552-55-SA be reopened and amended to include the new Model Quaker Non-Radiant Vented Gas Heaters BV-200, BVS-350, BVS-358, BVS-500, BVS-508, BVS-650, BVS-658 and BVS-808. The resolution was reopened by a vote of the Board May 5, 1959.

Description

The Model BVS-350, BVS-358, BVS-500, BVS-508, BVS-650, BVS-658 and BVS-808 Non-Radiant Vented Gas Heaters are similar to the Model BVA-350, BVA-500, BVA-650 and BVA-808 heaters previously approved by the Board under Calendar Number 552-55-SA.

The differences in the new models are that the main fronts have a solid section instead of expanded metal and louvers, a P-592 M-H control is used instead of a C-586 M-H control, and minor changes in color and trim have been made.

Model numbers ending in the letter O indicate that such heaters are equipped with orifices for L. P. gas and have no pressure regulator.

Model numbers ending with the figure 8 indicate that such heaters are equipped with orifices for natural gas and have a gas pressure regulator.

All new models have been tested and approved by the American Gas Association for 6 inch clearance from sides, jacket and rear and 2 inch clearance from flue box or draft hood.

Recommendation

The Committee on Test recommends that the resolution adopted July 9, 1957 be amended so as to include the new model Quaker Non-Radiant Vented Gas Heaters BV-200, BVS-350, BVS-358, BVS-500, BVS-508, BVS-650, BVS-658 and BVS-808, on condition that the requirements of the resolution adopted July 9, 1957 under Calendar Number 552-58-SA be complied with.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

859-55-SA

APPLICANT—Thermobloc Division of Prat-Daniel Corporation, owner.

APPEARANCES—

For Applicant: David Y. Robinson.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 859-55-SA

Subject: Amendment to resolution.

Thermobloc Division of Prat-Daniel Corporation, South Norwalk, Conn., requested by letter dated June 10, 1957 that the resolution adopted June 26, 1956 under Calendar Number 859-55-SA be amended so as to permit the use of the Overhead Panelbloc Gas-Fired Radiant Heater, Models CR-63, CR-63B, CR-63BA, CR-125, CR-125B and CR125BA in garages and similar occupancies. The resolution was reopened by a vote of the Board, May 21, 1957.

Description

The Overhead Panelbloc suspended heaters were previously approved by the Board June 26, 1956 under Calendar

Number 859-55-SA. The request has been made to permit the use of these heaters, Models CR-63, CR-63B, CR-63BA, CR-125, CR-125B and CR-125BA in garages and similar occupancies when installed so that the bottom of the heater is at least 8 feet above the floor and when a 40-40 mesh bronze screen has been installed over the combustion air intake.

These heaters have been approved by Underwriters' Laboratories for use in garages and aircraft hangars.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends that the resolution adopted June 26, 1956 under Calendar Number 859-55-SA be amended so as to permit the use of the Overhead Panelbloc Gas-Fired Radiant Heater, Models CR-63, CR-63B, CR-63BA, CR-125, CR-125B and CR-125BA in garages and similar occupancies when installed so that the bottom of the heater is at least 8 feet above the floor and all air intake openings to the burners are provided with 40/40 mesh bronze screening made tight fitting at the edges and on condition that the other requirements of the resolution adopted June 26, 1956 under Calendar Number 859-55-SA be complied with.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

660-57-SA

APPLICANT—John Wood Company, owner.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3
Negative: 0
Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a committee on Test reads:

Re: Calendar Number 660-57-SA.

Subject: Reopen and amend the resolution so as to include additional model furnace.

John Wood Company, Conshohocken, Pa., requested by letter dated August 13, 1958, that the resolution adopted July 8, 1958, under Calendar Number 660-57-SA be amended so as to include additional new model furnace.

Description

The requested Model GH-125 gas-fired hi-boy furnace is similar to the models previously approved. The requested models have been approved by the American Gas Association under Certificate No. 4-(1412.0 & -1.0).001.

Recommendation

The Committee on Test recommends that the resolution adopted July 8, 1958 be reopened and amended so as to include the additional Model GH-125 gas-fired hi-boy furnace and correction of designation of Models GG-65 and GG-87 to gas-fired gravity warm air furnaces and all other approved furnaces to be known as forced air furnaces as requested by letter dated August 13, 1958 on condition that the resolution adopted July 8, 1958 under Calendar Number 660-57-SA be complied with.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

400-58-SM

APPLICANT—Baldwin-Hill Company, owner.

APPEARANCES—

For Applicant: Harold Perrine.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 400-58-SM

Subject: Styletone Incombustible Acoustical Tile.

H. Perrine for Baldwin-Hill Co., Trenton, New Jersey, filed July 2, 1958 an application with the Board of Standards and Appeals for approval of the material known as Styletone Incombustible Acoustical Tile under the provisions of C26-88.0 and C26-191.0 Administrative Building Code.

Purpose

The material is an incombustible acoustical tile.

Description

The material is manufactured from molten rock, spun and processed to form an incombustible tile. The tile is $\frac{3}{4}$ inch thick and is either 12" x 12" or 12" x 24" and weighs 1.3 lbs. per sq. ft. The tile is kerfed and rabbeted for mechanical suspension.

Inspection and Test

The tile was tested at the Riverbank Acoustical Laboratories of the Armour Research Foundation in accordance with the requirements of Federal Specification SS-118b and was found to be incombustible. The report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Styletone Incombustible Fissured Mineral Acoustical Tile as having met the requirements of C26-88.0 Administrative Building Code for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code as an incombustible acoustical tile, on condition that the tile be installed in an approved suspension system and further that the cartons in which the material is marketed, shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 400-58-SM".

169-59-SM

APPLICANT—Johns-Manville Sales Corporation, owner; Harold Perrine, Agent.

APPEARANCES—

For Applicant: Harold Perrine.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 16-59-SM

Subject: Panelglas Incombustible Acoustical Panel.

H. Perrine for Johns Manville Sales Corp., New York, filed March 19, 1959, an application with the Board of Standards and Appeals for approval of the material known as Panelglas Incombustible Acoustical Tile under the provisions of C26-88.0 and C26-191.0 Administrative Building Code.

Purpose

The material is an incombustible acoustical tile.

Description

The tile consists of fine textile fibers bonded in sheets and is painted on one side with a light reflective paint consisting of polyvinyl acetate resin, tricresylphosphate, plasticized with titanium dioxide pigment in a water vehicle.

The panel is furnished in $1\frac{1}{4}$ inch thickness, in sheets 24" x 24" and 24" x 48" and weighs 0.20 lbs. per sq. ft.

Inspection and Test

The material was tested in accordance with the requirements of Federal Specifications SS-A-118b at the manufacturers Research Center in the presence of Ass't. Engr. J. A. Darts, Committee on Test. The tile successfully met the requirements of incombustibility.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Panelglass Incombustible Acoustical Tile as having met the requirements of C26-88.0 Administrative Building Code for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code as an incombustible acoustical tile, on condition that the tile be installed in an approved suspension system and further that the cartons in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 169-59-SM".

256-59-SM

APPLICANT—A. J. Lesbirel, for Formica Corp, owner.

APPEARANCES—

For Applicant: William J. Marcil.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Fox and Commissioner Becker 3

Negative: 0

Absent: Vice Chairman Kleinert and Commissioner Sleeper 2

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 256-59-SM

Subject: Formica Wall Tile.

Mr. A. J. Lesbirel for Formica Corporation, Cincinnati, Ohio, filed April 20, 1959 an application with the Board of Standards and Appeals for approval of the material known as Formica Wall Tile for use in New York City under the provisions of C26-191.0 of the Administrative Building Code.

MINUTES

Purpose

For Wall Application in Bathroom Area.

Description

The Formica Wall Tile made of a sheet of translucent paper, a patterned sheet, and seven sheets of Kraft paper. The translucent sheet and patterned sheet are treated with melamineformaldehyde resins; the seven sheets of Kraft "filler stock" are treated with phenolformaldehyde resins. The translucent sheet becomes transparent during the curing operation, lending a tough, glossy surface to the Formica laminates.

The tiles will be applied in 10 inch x 10 inch square pieces .40 inch thick with a water proof Formica Fast Dry Contact Cement. The tiles will be applied on the job to existing walls of various non-combustible approved core materials. Caulking is applied at the tub line.

Inspection and Test

Samples of the material were flame tested at the Better Fabrics Testing Bureau in the presence of Ass't. Engr. J. A. Darts, Committee on Test, and W. H. Masterson representing the applicant.

The test was in accordance with Flameproofing Rules of the Board.

There was no flashing, flaming or glow outside the charred area in the samples tested.

Recommendation

On the basis of the inspection and test and data filed by the applicant, the Committee on Test recommends the approval of the material known as Formica Wall Tile for use in New York City when installed in accordance with the provisions of C26-191.0 of the Administrative Building Code, on condition that before the Formica Fast Dry Contact Cement is opened that precautions shall be taken since this is a flammable material; that when using the cement it will not be used near a flame, pilot light, etc., and no cigarette, pipe or cigar smoking; further that adequate ventilation be provided to carry off this vapor without lowering the temperature below 70°. The Committee further recommends that all cartons or bills of lading shall be marked or stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 256-59-SM."

(Sgd.) JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

"that certain minor changes in arrangement may be permitted as shown on revised proposed basement plan, marked 'Received June 30, 1959', one sheet, as follows: provide steel and reinforced concrete roof over workshop area; provide fireproof self-closing door between workshop and stairhall; enclose boiler room in 4-inch masonry partitions, provided with fireproof self-closing door; that stairhall as shown, provided with fireproof, self-closing door; and that other than as herein amended the resolution above cited shall be complied with." (Alt. App. 379/58)

779-58-A

APPLICANT—John T. Kelleher, Borough Superintendent.
OWNER OF PREMISES—Natmo Realty Corp.

SUBJECT—Application December 30, 1958—Revocation of Certificates of Occupancy No. 792-27 and 1030-30.

PREMISES AFFECTED—87-37 188th Street, Northeast corner of Palo Alto Avenue, Block 10501, Lot 60, Hollis, Borough of Queens.

APPEARANCES—

For Applicant: None.

For Opposition: Leonard F. Rothkrug.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative 0
Negative: Chairman Foley, Commissioner Fox and
Commissioner Becker 3
Absent: Vice Chairman Kleinert and Commissioner
Sleeper 2

THE RESOLUTION—

WHEREAS, the Borough Superintendent of Queens, Department of Buildings, request revocation of two certificates of occupancy issued by the Department of Buildings, the first being Certificate of Occupancy No. 792/27, issued on May 10, 1927, and the second Certificate of Occupancy No. 1030/30, issued on January 15, 1930; that Certificate of Occupancy 792/27 was issued on the basis of a non-existent application (No. 18815); that this certificate of occupancy was issued for a non-fireproof building, when in reality it was then and is now a frame building originally built as a two-family dwelling under N.B. Applic. 15973/24; that since this is a frame building over 20 feet in height, and no plans were ever filed setting forth its construction and architectural layout, the issuance of a certificate of occupancy for a sanitarium did not comply with Section 72 of the Building Code and was, therefore, illegal; that Certificate of Occupancy No. 1030/30 was issued on the basis of Alt. Applic. 5055/29, which was filed for the construction of a retaining wall only; that no plans for a sanitarium were filed with this application, nor was a certificate of occupancy requested on the application; that the issuance of this certificate of occupancy, therefore, compounded the illegality of issuance of Certificate of Occupancy No. 792/27; that although these premises were before the Board on two previous occasions, the question of the legality of issuance of either existing Certificates of Occupancy by the Building Department was not part of either action; that the first action before the Board, under Calendar Number 80-28-A, was for the issuance of a Certificate of Occupancy to the owner; that the Board denied this, but the entire action meant nothing since Cer-

tificate of Occupancy No. 792/27 was already existing; that the second action before the Board under Calendar Number 325-32-A, dealt with the existing Certificate of Occupancy No. 792/27 but not with the illegality of its issuance; that even had the Board revoked Certificate of Occupancy No. 792/27 in this action, it would have left intact Certificate of Occupancy No. 1030/30; that it would also appear from the record in the action that the Board was of the impression that these premises were non-fireproof instead of frame; and

WHEREAS, the present owner filed an application with this Board, under Calendar Number 68-59-A for a new use and arrangement; that this use, occupancy and arrangement are described in this appeal; and

WHEREAS, the Borough Superintendent of Queens, Department of Buildings, in his appeal filed with the Board on December 30, 1958, requested the revocation of Certificates of Occupancy Nos. 792/27 and 1030/30.

Resolved, that the request of the Borough Superintendent be and it hereby is *denied*.

68-59-A

APPLICANT—Leonard F. Rothkrug for Natmo Realty Corporation, owner—doing business as Holliswood Nursing Home.

SUBJECT—Application January 29, 1959—Appeal from a decision of the Borough Superintendent re frame construction sanitarium to nursing home.

PREMISES AFFECTED—87-37 188th Street, northeast corner of Palo Alto Avenue, Block 10501, Lot 60, Hollis, Borough of Queens.

Absent: Vice Chairman Kleinert and Commissioner
Sleeper 2

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated January 8, 1959 on Alt. Applic. 2719/56, reads:

"1. Proposed change in use from a sanitarium to nursing home is contrary to Board of Stds. and Appeals Res. 80-28-A and is referred back to the Board for reconsideration.

"2. The use of the premises as a nursing home in a wood frame—class 4 building exceeding 600 square feet and more than one story high is contrary to 4.2.1 Table Bldg. Code.

"3. Provide enclosure for stairways as per 6.4.1.8.1 Bldg. Code.

"4. Provide fireproof partitions for public hallways as per 6.3.2(c) Bldg. Code."

and

WHEREAS, the applicant states that the building is 18.8 feet by 70 feet in area, 2 stories, 22 feet high, of class 4 construction, located in residence use, G-1 area, class ½ height district, occupied since 1927 as a sanitarium in accordance with Certificate of Occupancy 792/27 and Certificate of Occupancy 1030/30 issued against Alt. Applic. 5055/29; that the applicant proposed to change the use to: Cellar—dining room, kitchen, storage and office; 1st floor—nursing home, 12 persons; 2nd floor—nursing home, 13 persons; that the exterior walls are cement plastered on the outside; that the exits consist of one interior 3 foot wide wood stair enclosed in wood stud partitions, plastered over wood lath; that the fireproof self-closing door will be installed at all stair openings; that a 3 foot wide steel stair is provided on the east wall of the building; that a two-source sprinkler system will be provided throughout; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the appeal should not be granted.

COURT DECISION

Matter of Jamo Builders, Inc. vs. Murdock:—On November 18, 1958, the Board denied an application, reopened June 3, 1958 as Volume III—based on a decision of the Borough Superintendent, under Section 7e of the Zoning Resolution, to permit in a local retail use district, the erection and maintenance of a gasoline service station, lubricatorium, and other accessory uses; Calendar Number 182-52-BZ—Vol. III; Premises 18-10 Utopia Parkway, 169-01 to 169-07 19th Avenue, northwest corner, 169-02 to 169-04 18th Avenue and 18-01 to 18-19 169th Street, Block 5743, Lot 75, Whitestone, Borough of Queens.

At Special Term, Supreme Court, Part I, Queens County, Mr. Justice Shapiro remanded the case to the Board for rehearing, as follows:

"In this case the determination against the petitioner was by a 3 to 2 vote of the board of standards and appeals. In open court the petitioner stipulated that if this matter were referred back to the board of standards and appeals for further consideration, he would waive his right to a further review thereof by the courts if said determination were again adverse to him. Upon that representation and in the exercise of the courts discretion, the matter is referred back to the board of standards and appeals for a review of the record and a reconsideration of its determination herein. Settle order which shall include the aforementioned representation of the petitioner." (N. Y. Law Journal, July 17, 1959, page 6.)

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on May 12, 1959 after due notice by publication in the Bulletin; laid over to June 9, 1959 for further hearing; applicant to submit new plan showing subdivision of lots on Block 2925, 2926, 2927, 2928 and 2929 and obtain list of owners of same who are to be notified of this adjourned hearing; applicant to discuss with owner the question of eliminating the parking of trucks on this station; then laid over to July 21, 1959 at 10 A.M. for decision; and

WHEREAS, the decision of the Borough Superintendent, dated August 28, 1958 acting on Alt. Applic. No. 1788-58, reads:

"1. The proposed extension to the existing gasoline station to include the use of auto washing (non-automatic), office & accessory sales, minor repairs with hand tools only & parking & storage of motor vehicles, in a res. use dist. is contrary to Art. 2 Sec. 3 of the Zone Res.

2. Ground sign is contrary to Art. 2 Sec. 3 of Zone Res."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c to permit in a residence use district the reconstruction and extension in area of an existing gasoline service station for use as non-automatic car wash, office and accessory sales, minor repairs with hand tools only and parking and storage of motor vehicles of the pleasure car type only *on condition* that the work be done in accordance with drawings filed with this application dated September 26, 1958, two sheets, June 3, 1959, one sheet and July 17, 1959, two sheets; that the curb cut on 71st Street shall be omitted; that the remaining fifty foot strip of Lot No. 1 is to be used for a conforming use; that in all other respects all laws, rules and regulations applicable shall be complied with; and all permits obtained and all work completed and a certificate of occupancy issued within the provisions of Section 22A of the Zoning Resolution.

Adjourned: 3:25 P.M.

Joseph J. Doyle, *Chief Clerk*.

1016-39-SM

APPLICANT—National Gypsum Company, owner.

APPEARANCES—

For Applicant: John K. Hovind.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 1016-39-SM

Subject: Reopen and amend as to additional trade names of approved tile, insulation tile and insulation plank.

National Gypsum Company, Buffalo, New York requested by letter dated May 19, 1959 that the resolution adopted January 23, 1940 and amended through June 24, 1958 under Calendar Number 1016-39-SM—Vols. I, II and III be amended so as to permit the approved tile, insulation tile and insulation plank to be marketed by the Sears Roebuck & Company under their trade name.

Recommendation

The Committee on Test recommends that the resolution adopted January 23, 1940 and amended through June 24, 1958 under Calendar Number 1016-39-SM be reopened and amended so as to permit the approved tile, insulation tile and insulation plank to be marketed by Sears Roebuck & Company under the following trade names: Sears Roebuck Insulation Board; S. R. Perforated Acoustical Tile; Random Perforated Acoustical Tile; Insulation Sheathing; Decorative Insulating Tile; Decorative Insulating Plank; Classic Pattern Tile; Strawtex Pattern Tile; Tesmattic Pattern Tile and Ceiltex Tile on condition that the requirements of the resolution adopted January 23, 1940 under Calendar Number are complied with.

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 487-42-SM

MINUTES

Subject: Amendment to resolution as to additional quarry.
New York Trap Rock Corp., requested by letter dated April 21, 1959, that the resolution adopted December 8, 1942 under Calendar Number 487-42-SM be amended so as to include an additional quarry. The application was reopened by a vote of the Board, May 19, 1959.

Recommendation

The Committee on Test recommends that the resolution adopted December 8, 1942 under Calendar Number 487-42-SM be amended so as to include the additional quarry located at West Nyack, as the trap rock is similar to the trap rock quarried at the approved Haverstraw Quarry, on condition that the requirements of the resolution adopted December 8, 1942 under Calendar Number 487-42-SM be complied with.

808-46-SM

APPLICANT—Sargent Building Specialties, Inc., owner.

APPEARANCES—

For Applicant: Alan A. Fishkin.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 808-46-SM

Subject: Reopen and amend as to modification of approved hopper door.

Sargent Building Specialties, Inc., requested by letter dated May 18, 1959 that the resolution adopted May 4, 1948 and amended July 18, 1950 under Calendar Number 808-46-SM be amended so as to permit a modification in the approved hopper door.

Purpose

The material is to be used as a hopper door having no fire resistive rating.

Description

The requested modification consists of changing the gauge of the scoop from 18 gauge to 10 gauge and the elimination of the insulation in back of the face plate.

Recommendation

The Committee on Test recommends that the resolution adopted May 4, 1948 and amended July 18, 1950 under Calendar Number 808-46-SM be reopened and amended so as to permit the modified incinerator hopper door, without insulation and having a 10 gauge scoop to be installed in locations where in an hourly rated incinerator hopper door is not required, on condition that the requirements of the resolution adopted May 4, 1948 be complied with. The Committee further recommends that this door shall be labeled

"non fire resistive rating" so as to differentiate this door from the presently approved door.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,

GEORGE F. SKLENARIK,
Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

274-49-SM

APPLICANT—Guilbert Inc., owner.

APPEARANCES—

For Applicant: Arthur Towne and N. R. Guilbert, Jr.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 274-49-SM

Subject: Amendment to resolution as to additional types of dumb-waiter doors.

Guilbert Inc., Philadelphia, Pa., requested by letter dated April 29, 1958 that the resolution adopted December 23, 1952 under Calendar Number 274-49-SM be amended so as to include additional designs of dumb waiter doors. The application was reopened by a vote of the Board, June 3, 1958.

Purpose

The door is to be used as an opening protective assembly in dumb waiter shafts.

Description

The requested doors are bi-parting vertical lift and slide down and swing access doors.

The maximum size openings to be protected are as follows: Bi-parting & vertical lift & slide down doors—4 feet by 0 inch by 5 feet by 9 inch high; Swing access.

The construction of the doors are contained in the Underwriters' Report Retardant 3212, Application No. 57C3752, Dated December 10, 1957 and marked Rec'd. June 11, 1958 and as shown on drawings marked Fig. 1, 2, 4, 5, 5A, 6 through 10, 12, 13, 17 through 26A, 29, 33 and 34 all of which are on file with and are part of the record.

Inspection and Test

The doors were tested at the Underwriters' Laboratory in accordance with the requirements of Article 11, Chapter 26, Administrative Building Code. The swinging access and the bi-parting doors were not rated as an hourly rated opening assembly and the vertical lift door successfully met the requirements as a rated 1½ hour opening protective assembly.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends that the resolution adopted December 23, 1952 under Calendar Number 274-49-SM be amended so as to include the additional doors as described herein, on condition that the requirements of the resolution adopted December 23, 1952 under Calendar Number 274-49-SM are complied with and further that only the vertical lift door be installed in locations requiring hourly rated opening protective assembly and further that all inspec-

MINUTES

tions of the doors, as required by the Rules of the Board for the Inspection of Opening Protective Assemblies be performed by the Underwriters' Laboratory, an approved inspection agency.

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

360-50-SA

APPLICANT—Automatic Burner Corp., owner.

APPEARANCES—

For Applicant: W. A. Doermann.

ACTION OF BOARD—Application reopened and Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 360-50-SA.

Subject: Reopen and amend as to additional trade name of approved oil burner.

Automatic Burner Corporation, Chicago, Illinois, requested by letter dated May 13, 1959 that the resolution adopted April 9, 1957 under Calendar Number 360-50-SA, wherein the Model 55J Oil Burner was approved, be amended so as to permit the approved oil burner to be marketed under an additional trade name.

Recommendation

The Committee on Test recommends that the resolution adopted April 9, 1957 under Calendar Number 360-50-SA be reopened and amended so as to permit the approved ABC Oil Burner, Model 55J to be marketed by the Thatcher Furnace Co., under the trade name of Thatcher Oil Burner, Models 951-1, 951-2, 951-3 and 951-4, on condition that the requirements of the resolution adopted October 17, 1950 under Calendar Number 360-50-SA be complied with.

(Sgd.) JOHN A. DARTS,
Asst. Engr.
GEORGE F. SKLENARIK,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

390-52-SM

APPLICANT—Tectum Corporation, owner.

APPEARANCES—

For Applicant: Harold Perrine.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

RE: Calendar Number 390-52-SM.

Subject: Tectum Roof Construction with 3 inch Tectum Roof Plank.

Tectum Corporation, Newark, Ohio, filed May 19, 1952, an application with the Board of Standards and Appeals for approval of the Tectum Roof Construction with 3 inch Tectum Roof Plank as a fire resistive roof under the provisions of Article 11, Chapter 26, Administrative Building Code.

Purpose

The material is to be used as a fire resistive roof.

Description

The material is the same as that approved by the Board as a roof tile and as an incombustible acoustical tile.

When used as a roof construction the assembly is constructed as follows:

Three inch Tectum planks, having tongue and groove joints are attached to the top flanges of the joists with washers and self tapping screws spaced 10 inches on center.

A five ply built up roofing with gravel topped is placed on top of the planks.

Furring channels are attached at right angles to the bottom chord of the joists with double strand saddle ties spaced 12 inches on center. The lath is attached to the furring channels and tied on 6 inch centers.

A perlite gypsum plaster is then applied to the face of the lath to a thickness of $\frac{3}{4}$ inch.

Inspection and Test

A construction as herein described was tested at the Underwriters' Laboratory in accordance with the requirements of Article 11, Chapter 26, Administrative Building Code. During the test a superimposed load of 65 pounds per square foot was applied. The construction successfully met the fire and hose stream test. The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends the approval of Tectum Roof Construction with 3 inch Tectum Roof Planks as a two hour fire resistive roof construction when constructed as herein described for use in New York City under the provisions of C26-240.0 Administrative Building Code, on condition that all plans submitted to the Department of Buildings showing the proposed use of this construction shall be stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 390-52-SM".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above reports.

741-54-SA

APPLICANT—The Rockwood Sprinkler Company, owner.

APPEARANCES—

For Applicant: Donald A. Knapp.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

MINUTES

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 741-54-SA.
Subject: Rockwood Foam System (fire extinguisher), ap-
proval of.

The Rockwood Sprinkler Company of Worcester, Mass., filed September 14, 1954, an application with the Board of Standards and Appeals for approval of the Rockwood Foam System including foam devices, foam liquid and proportioning system under the provisions of C26-178.o.b Administrative Building Code and the provisions of C19-161.0 Administrative Code.

Purpose

The system is to be used for extinguishing flammable liquid fires using either 3% or 6% foam stabilizer.

Description

This system includes a proportioning system for the introduction of mechanical foam liquid into the water supply, mechanical foam liquids and the foam making devices, including fixed foam makers which are piped directly into the fuel tank and foam nozzles for additional protection against possible spill fires in the vicinity of the storage tanks.

The Rockwood Type "F" proportioning system is designed to proportion foam liquid to water to obtain a foam solution satisfactory for use through foam makers. The design solution strength, i.e., the ratio of foam liquid to water, is dependent upon the type of foam liquid used and the nature of the hazard. This system will maintain the design proportion over a wide range of flows and pressures.

The main components of the system are a foam liquid tank, foam liquid pump, a water supply, duplex pressure gauge, water metering orifices or venturi, foam metering orifices and necessary valves, including automatic pressure control valve.

The foam liquid supply tank and pump along with the necessary piping and valves are sized to meet the requirements of the individual system. The liquid metering orifices are designed to meet the proportioning requirements.

The size and type of hazard to be protected determines the size and capacity of the proportioning system. After the system has been installed, proper operation consists of manually adjusting the foam liquid shut-off valve, so that the pressures in the foam liquid line and the water line, as read on the duplex pressure gauge, are equal or this pressure balance can be effected by use of Rockwood Pressure Control Valve. Proper proportioning will then occur independent of the number and size of the individual discharge outlets. The system is free from moving parts and should require little or no maintenance.

Rockwood Type No. 3 foam makers are designed to provide fire protection for flammable liquid storage tanks. They are made in standard sizes, ranging from 85 to 1500. Rockwood Foam Maker Systems are also available in sizes 85 to 520, for attachment to steel tank plates and these models can also be installed on tanks of other materials when modified for attachment. The size indicates the nominal liquid discharge of the device at 100 psi operating pressure and having a minimum operating pressure of 30 psi. Other models are available to meet special requirements. The actual discharge of expanded foam will be 8 to 10 times that of the solution discharge. Standard steel pipe flanges are an integral part of the foam chamber to simplify installation of the supply and discharge piping. The actual foam maker consists of an internal impinging bronze tip which breaks up the solution discharge into a high velocity spray. This spray in passing through the chamber body, induces air into the stream to foam the liquid. A perforated bronze aspirator is provided to prevent debris and other foreign matter from entering the chamber. A brass weather shield is also provided to further protect the interior of

the chamber body. Further, refinement of the foam is obtained as it passes through the chamber body and discharge piping to the tank.

A vapor seal is provided at the discharge end of the foam maker to prevent the escape of fuel vapor from the tank. These consist of a thin piece of scored glass or aluminum foil, protected against corrosion, encased in brass rings and which are designed to rupture or fracture under low pressures. Rubber gaskets are included to prevent leakage of foam or vapor and also to protect against accidental breakage during assembly. After operation of the device, the vapor seals are easily replaced. A deflector is recommended to be installed at the foam inlet to the tank. The purpose of this is to deflect the foam stream to the side of the tank and to decrease the tendency of the foam to agitate the fluid surface. When used with an approved foam liquid, these foam makers will discharge a good quality foam, suitable for use in extinguishing flammable liquid fires.

The Rockwood mechanical foam nozzles are available for lines up to 3½ inches. The part that these nozzles play in the overall protection of fuel storage tanks is to supplement the main foam making equipment and to protect the surrounding area against possible spill fires. The water discharge of these nozzles are from 20 to 600 gpm at 100 psi nozzle pressure. The minimum recommended nozzle pressure is 50 psi.

Rockwood "Double Strength" Foam Liquid is a mechanical foam solution of the "Low Expansion" of Hydrolized Protein type which contains iron salts as a stabilizer for the foam state, and sufficient preservatives to prevent decomposition of the liquid in storage. This liquid shows no signs of non-homogeneity or separation into layers on standing.

When mixed with either salt or fresh water and air in suitable proportions, Rock "Double Strength" foam liquid will produce a stable cohesive foam of satisfactory degree of fluidity for the extinguishment of oil and gasoline fires. The chemical formulas of both Regular & Double Strength Foam are of a proprietary nature and have therefore been placed in the Board's safe.

Inspection and Test

Rockwood Foam System was inspected and tested at Holden, Mass., on November 18, 1954 and found to operate as designed. Present at the test were Chief Engr. L. V. Huber of the Committee on Test. Fran Johnson, James Marston, Bill Atlas and Donald A. Knapp representing the Rockwood Sprinkler Company.

The purpose of the test was to demonstrate that the Rockwood Foam System produced satisfactory fire fighting foam and could be quickly and easily operated. In addition, it was intended to demonstrate the fire fighting efficiency of Rockwood Mechanical Foam on a gasoline fire using the standardized Joint-Army-Navy Specification (Jan C-266) test for this purpose.

The material successfully met the requirements of the test specifications.

Additional tests were conducted on a 820 square foot fire of 2200 gallons of No. 2 fuel oil.

The Type 3 Foam Maker extinguished the fire in less than 2 minutes. The Type 85 Foam Maker Chamber extinguished the fire in slightly over 2 minutes. The 1½" inch hose line nozzle extinguished the fire in 26 seconds.

The complete log and photographs are on file with and are part of the record.

Recommendation

On the basis of the inspection and tests and the data filed by the applicant, the Committee on Test recommends the approval of the Rockwood Foam System for use under the provisions of C19-161.0 Administrative Code, on condition that the systems are installed and operated in accordance with this report, the standards of the Underwriters' Laboratory and the Factory Mutual, and provided further that the foam shall be introduced or flowed on the top surface of the flammable mixture, and that sufficient mechanical foam stabilizer shall be provided at each installation to comply

MINUTES

with all rules, law, etc., having application.

The Committee further recommends that plans submitted to the Department Buildings and the Fire Department showing the installation shall be marked or stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 741-54-SA".

The Committee further recommends that the following conditions be complied with:

Foam hose stream equipment shall be provided as supplementary protection for spill fires.

The minimum number of hose streams are to be as called for in the following table. The equipment for producing foam hose streams shall have a solution rate of at least 50 g.p.m. Additional airfoam liquid will be provided on the basis of 50 g.p.m. of airfoam solution per hose stream for period shown in table. Equivalent areas are to be used if tanks are not circular.

Largest tank diameter	Minimum number of hose streams required	Minimum operating time
up to 35 feet	1	10 min.
over 35 to 65 feet	1	20 "
over 65 to 95 feet	2	20 "
over 95 to 117 ft. 6 in.	2	30 "
over 117 ft. 6 in.	3	30 "

Minimum operating time will be based on simultaneous operation of hose stream capacity indicated previously and number of hose streams indicated in table. Adjustment may be made where hose streams of greater capacity are provided.

REQUIREMENTS TO FILL PIPE LINES:

A quantity of airfoam liquid sufficient to produce airfoam solution to fill the piping between the source and the most remote tank shall also be provided.

FOAM DISCHARGE OUTLET:

Fixed discharge outlet or outlets to have capacity of one g.p.m. of solution for each ten square feet of tank area protected containing liquid hydrocarbons.

Fixed discharge outlets shall be a complete manufactured assembly including air aspirator, vapor seal, draft tube and deflector outlet except for underground tanks.

A suitable means of inspection shall be provided for proper maintenance and replacement of vapor seal.

Minimum numbers of fixed outlets to be installed shall comply with the standards of the National Board of Fire Underwriters.

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 211-55-SA

Subject: Janitrol Conversion Burner, Gas-Fired, Model JH-45, approval of.

Surface Combustion Corp., New York, N. Y., owner-manufacturer filed February 28, 1955 an application with the Board of Standards and Appeals for approval of the Janitrol

Conversion Burner, Model JH45, under the provisions of Article 12, Administrative Building Code.

Purpose

A conversion type gas burner.

Description

The Janitrol Model JH45 burner is a gun type burner designed for pedestal mounting or flange connection to a furnace or boiler. It consists of a single port jet burner installed concentrically in a blast tube which is made either in 4¼ and 4¾ inch diameters, 10 inches in length. An alloy steel flame spreader is installed 5½ inches ahead of the blast tube opening. Primary and secondary combustion air are adjustable.

The burner has pilot ignition with runner flame type pilot lighter. A thermocouple is used for automatic shut down of gas flow in case of pilot flame failure. Other equipment includes a manual shut-off valve, adjustable gas pressure regulator, adjustable pilot valve, thermostat, and low voltage solenoid valve.

The maximum input for the 4¼ inch diameter blast tube burner is 140,000 Btu per hour on natural gas at 3.3 inches w.c. For the 4¾ inch diameter blast tube burner it is 160,000 Btu per hour.

Inspection and Test

All details of construction were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The Janitrol JH-45 burner was tested and approved by the American Gas Association file 20-431.001.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the Janitrol Conversion Burner, Model JH-45 for use in New York City under the provisions of Article 12, Administrative Building Code, provided that each burner shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 211-55-SA."

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

380-55-SM

APPLICANT—Lally Column Company of New York, Inc., owner.

APPEARANCES—

For Applicant: George E. Strehan and Ernest J. Kortlander.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 380-55-SM

Subject: Lally Column Company of New York, Inc., Lally Column.

George E. Strehan for Lally Column Company of New York Inc., filed May 4, 1955 an application with the Board of Standards and Appeals for approval of the Lally Column Company of New York, Inc., Lally Column under the provisions of C26-191.0 Administrative Building Code.

MINUTES

Purpose

The material is to be used as a column for concentric loads.

Description

The material is a concrete column encased in a steel shell. The columns are designated as Heavyweight Round, Reinforced Heavyweight Rounds Rectangular. The specification for the steel is as follows—Heavyweight—ASTMA-A-53 having a minimum yield of 35,000 p.s.i.—Rectangular—A.I.S.I-C-1015 mill-tested carbon steel, seamless tubing annealed to 35,000 p.s.i. yield or flash-in welded hot-rolled steel tubing of equivalent strength. The caps and bases are ASTM. A-7 having a yield of 33,000 p.s.i.

The concrete is a stone or gravel concrete having a minimum strength of 4,200 p.s.i. and is of a mix of 1 part cement, 1½ parts of sand and 3 parts of stone or gravel.

Inspection and Test

A comprehensive series of tests were conducted at Fritz Engineering Laboratory, Lehigh University in order to arrive at a formula so as to set a load table for the columns. The tests included compression tests on the composite column, compression tests on the steel shell and compression tests on the concrete. The compression tests on the composite columns totaled 66 columns.

On the basis of these tests the following safe load formula were arrived at:

$$P = \frac{(A_s + A_c) (1700 - 0.485 \frac{l^2}{Rt^2})}{9} \text{ Formula 1}$$

$$P = \frac{18000}{1 + \frac{l^2}{18000 Rt^2}} \left\{ 1.6 - \frac{1}{200 Rt} \right\} (A_s + \frac{A_c}{9}) \text{ Formula 2}$$

Formula 1 is for columns having a slenderness ratio up to 120 and Formula 2 for those columns whose slenderness ratio exceeds 120 but limited 160.

P = Safe carrying capacity

l = length of column in inches

Rt = radius of gyration of the equivalent combined section

$$Rt = \sqrt{\frac{\text{Combined Moment of Inertia}}{A_s + A_c}} \frac{1}{9}$$

l = slenderness ratio

Rt

A_s = area of steel

A_c = area of concrete

The working loads for rectangular columns are determined by the minimum slenderness ratio about the weak axis.

The results of the tests showed an average safety factor of 3.2.

The complete log of the test and the evaluation of the tests are on file with and are part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the Lally Column Formula as shown under the heading Inspection and Test for use in computing safe working concentric loads on lally columns as herein described as manufactured by the Lally Column Company of New York, Inc., on condition that all columns manufactured under this approval shall be manufactured of materials as herein described; that all welding performed on the columns shall comply with the requirements of the Welding Rules of the Board; that all plans submitted to the Department of Buildings, showing

the proposed use of these columns shall be stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 380-55-SM and that all columns shall have ¼ inch inspection holes at the quarter points.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 426-55-SA.

Subject: Winkler Gas-fired & Oil-fired Warm Air Furnace, Models GO-V, GO-VD, GO-C or GO-CD, approval of.

The Stewart-Warner Corp., U. S. Machine Division, Lebanon, Indiana, filed May 16, 1955 an application with the Board of Standards and Appeals for approval of the appliance known as Winkler Gas-fired & Oil-fired Warm Air Furnace, Models GO-V or GO-VD, GO-C or GO-CD for use in New York City under the provisions of Article 12 of the Administrative Building Code and Oil Burner Rules of the Board.

Purpose

Gas-fired & Oil-fired warm air furnace heating for domestic use.

Description

There are two series of furnaces, the gas-fired furnace and the oil-fired furnace. Externally the units look identical. Each series is furnished in Model GO-V or GO-VD, Model GO-C or GO-CD.

The gas-fired units are manufactured in four (4) series (2 counterflow and 2 vertical), each series having a combination of three (3) Models, a total of 18 variations. The design and construction of these models from the small to the large are very similar.

The heater is an assembly of parts, namely a cabinet, burner assembly, heat exchanger, baffles, flue restrictor, draft hood and controls.

The heater cabinet is of 24 gauge c.r. steel with a hammerloid finish and is lined with ¼ inch foil-faced cellular asbestos.

The heat exchanger is 14 gauge accordinian type steel, having .035 alumninized baffles.

Top furnace baffle is .035 aluminized steel.

Gas burners are essentially the same on all models except for controls and accessories. The same burner tube, flame spreader, mounting flange, etc., is used on all models. All controls are ½ inch pipe size except 120,000 Btu input on manufactured gas which are ¾ inch for the regulator and manual shut-off valve. A pilot filter is furnished for manufactured gas.

Filter frame may be installed on either side, rear or top of fan housing.

The following are furnace packages and burner packages which may be combined to form the above complete furnace burner units.

Model GO-C or GO-CD furnace may be installed on combustible flooring only if furnace frame 608161B is used. It may be installed in closet, alcove or corner of utility room with clearances to combustible construction not less than those above.

On a concrete slab floor the furnace should be centered over a 20" x 20" x 11" to 13" deep plenum opening cast in floor.

** Approved when equipped with a Thermodisc No. MB-1 lower limit control set at 200°F or a Camstat No. L22A lower limit control and a Thermodisc No. MB-1 upper limit control set at 135°F or a crise No. H82 limit control.

Model GO-V and GO-VD furnace may be installed on combustible flooring in a closet or alcove or in a corner of a utility room with minimum clearance as listed above.

When unit is installed in closet two ventilating openings 8" x 16" (128 sq. in. free area) shall be provided 6" from ceiling and 6" from floor.

* Approved when equipped with a No. L22-8A-1 or a Thermodisc No. MB-1 limit control set at 200°F.

TYPES OF BLOWERS

Belt Driven—LAU A-9, Westinghouse, Marathon, Delco, General Electric.

Direct Driven—LAU DD9-9, Redwood.

The gas-fired series listed above are identical to the GO-V, GO-VD, GO-C or GO-CD oil-fired series, the only difference being these units use a No. 2 fuel oil high or low pressure gun type burner of a type approved by the Board, which has been substituted for the gas burner and has a stainless steel combustion chamber.

The GO-V and GO-C Models each having an 85,000 and 110,000 BTU output rating.

The GO-VD and GO-CD Models can be fired only in the smaller capacities in oil, 85,000 BTU output.

FIRING RATE

GO-V85	.75 gph	GO-C 85	.75 gph
GO-V110	1.00 gph	GO-C 110	1.00 gph
GO-VD85	.75 gph	GO-CD 85	.75 gph

Model GO-V or GO-VD furnace may be installed on combustible flooring in a closet or alcove or in a corner of the utility room with the minimum clearances as listed in the table.

Model GO-C or GO-CD Furnace may be installed on combustible flooring only if furnace frame 6C-81618 is used.

It may be installed in closet, alcove or corner of utility room with clearances to combustible construction not less than that shown in table.

When either vertical or counterflow unit is installed in closet, two ventilating openings 9" x 18" (162 sq. in. free area) shall be provided 6" from ceiling and 6" from floor.

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

517-55-SA

APPLICANT—Spider Staging, Inc., owner.

APPEARANCES—

For Applicant: Irving Milchman.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 517-55-SA

Subject: Spider Power Driven-Staging, Model ST-17 and ST-18.

Spider Staging, Inc., Renton, Washington, filed May 5, 1955 an application with the Board of Standards and Appeals for approval of the appliance known as Spider Power Driven Staging, Models ST-17 and ST-18 under the provisions of the Rules of the Board for the Erection, Alteration, Repair, Excavation for and Demolition of Building.

Purpose

A mechanical stirrup to be used on swinging scaffolds.

Description

The Model 17 is the air powered and Model 18 is the electric powered staging. The framework of the staging of both models is constructed of aluminum alloy tubing, and has a built-in stabilizer which limits the tilt of the stage to a maximum of 8° to the horizontal.

The air powered stage is equipped with a plunger type shut off valve which automatically cuts air off in line for upward travel if the wire rope becomes over loaded. The vane type motor develops 1¼ H.P. at 90 lbs. per sq. in. line pressure and 20 cu. ft. per minute. The motor will drive stage at a minimum of 50 lbs. per sq. in. at the motor. There is no brake required on the shaft of this motor as it stops instantly when air supply is cut either with the control valve or accidentally. The reduction gear is totally enclosed and sealed. The primary reduction is 48:1 worm gear set. The final reduction is 4:1 bevel gear set. Self locking worm and high reduction form a positive lock when power is off or air line breaks.

The electric powered stage is powered by a ½ H.P. heavy duty hoist type electric motor; single phase .110 volt A.C. 60 cycle. The reduction gear is completely enclosed and the total reduction between motor and drum shaft is 192:1. Self locking worm gears and high reduction form positive lock when power is off. An overload limit switch automatically cuts power whenever wire rope is overloaded. The electric stage is also equipped with an automatic emergency brake, inertia operated, which stops and holds drum if it should suddenly accelerate in the downward direction and which does not function under normal operating conditions.

A solenoid actuated brake on motor shaft makes single phase motor instantly reversible. When current is off—brake is on. Brake in no way gives and in keeping stage aloft, if power fails, the stage remains suspended irrespective of brake.

On both Models, the maximum length of cable is 350 feet of ¾ inch wire rope with a breaking strength of 8520 lbs.

The maximum lifting capacity of each stage is 1000 lbs.

Inspection and Test

The appliance was inspected and tested by Ass't. Engr. J. A. Darts, Committee on Test at Philadelphia, Pa. The stage was loaded to 950 lbs. and when the staging was loaded to 1000 lbs., the equipment would not operate and remained in a static position. The stage was also tested as to tilt and when the device was drawn in excess of 8°, the operation ceased.

The equipment was also examined by Chairman Foley and Vice Chairman Kleinert on a permanent installation.

The appliance has been approved by the State Board of Standards and Appeals.

Recommendation

On the basis of the inspection and test, the Committee on Test recommends the approval of the appliance known as Spider Power Driven Staging, Model 17 & Model 18 for use in pairs on swinging scaffolds in New York City, when installed and operated in accordance with this report and the requirements of the Rules of the Board for Erection, Alteration, Repair, Excavation for and Demolition of Buildings, provided the equipment shall bear a label permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 517-55-SA" and provided further:

1. That the maximum length of cable permitted on the drum shall be 350 ft.

2. That the live load shall on each stirrup not exceed 600 lbs.

3. That all persons permitted to use a swing stage equipped with the Spider Power Driven Staging shall be instructed in the operation of the device before suspending the stage.

4. That the supporting cables shall be inspected at least once each year by an Inspector of Rigging & Hoisting of the Department of Buildings.

5. That this recommendation is based on temporary installation and that for all permanent installations plans shall be filed in the Dep't. of Buildings and if denied, the applicant may file an appeal with the Board.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

684-55-SM

APPLICANT—Etna Pozzolana Corporation, owner.

APPEARANCES—

For Applicant: David Tiersten.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 684-55-SM.

Subject: Amendment to resolution as to additional use of approved Plasticizer.

Etna Pozzolana Corp., New York, requested by letter dated May 12, 1959 that the resolution adopted April 10, 1956 under Calendar Number 684-55-SM be amended so as to

MINUTES

permit the material Etnalon to be used as an admixture in mortar. The application was reopened by a vote of the Board June 2, 1959.

Purpose

The material is to be used as a plasticizer in Portland Cement mortar.

Description

There has been no change in the material, the request is for use in mortar in addition to concrete.

Recommendation

The Committee on Test recommends that the resolution adopted April 10, 1956 under Calendar Number 684-55-SM be amended so as to permit the approved material to be used as a plasticizer in mortar, on condition that the requirements of the resolution adopted April 10, 1956 under Calendar Number 684-55-SM be complied with.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

394-57-SA

APPLICANT—Gray Co., Inc., owner.

APPEARANCES—

For Applicant: P. D. Concagh and Michael Tapsak.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,
Commissioner Fox and Commissioner Becker 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 394-57-SA.

Subject: Graco Powerflo Reciprocating Pumps.

Gray Co., Inc., Minneapolis, Minn., filed April 8, 1957 an application with the Board of Standards and Appeals for approval of the Graco Powerflo Reciprocating Pumps—Various Models—under the provisions of the Paint Spraying Rules of the Board.

Purpose

The appliances are air powered pumps for paint spraying and distribution system.

Description

The appliances are air powered pumps designed to transfer flammable liquids, such as paints, lacquers, varnishes, thinners and solvents from original containers through a system of piping to the spray guns at paint spray booths in industrial plants. The pumps may only be used in inside mixing and handling rooms.

The motive power for these pumps is compressed air provided in conventional air supply lines commonly found in industrial plants. Prior to entering the air motor, the air passes through a pressure-reducing valve. Ordinarily, an air pressure of 25 to 40 psi will produce sufficient fluid pressure to move such fluid to any desired point.

The pumps are assigned a theoretical liquid pressure to inlet air pressure ratio. Thus, a pump with a 5-1 ratio, inlet air pressure being 40 psi, would be expected to produce a liquid discharge pressure of 200 psi less pressure losses from friction within the air motor and pump.

The air motors are of conventional design. They are always located above and outside of the liquid containers.

The pumps are of reciprocating-action design. The pump itself is always immersed in the liquid container. The pump action is controlled by a connecting rod or displacement

piston directly connected to the air motor. Liquid is drawn up through the pump intake valve into the area below the piston on the upstroke of the pump. At the same time, liquid in the area above the piston is pushed out through the outlet in the pump base into hose or supply lines. The pumps are double action, reciprocating displacing liquid on both the up and down strokes.

Liquid is forced up through a check valve in the center of the piston on the down stroke of the pump. As the adjustable check valve in the piston moves downward, it sets up a slight restriction, causing a slight liquid pressure build-up in the area below the piston which forces the intake valve closed. Liquid is then pushed up through the open piston check valve into the area above the piston. At the same time the displacement rod, moving down into the area above the piston, displaces one-half the liquid being moved through the piston, forcing it out through the pump outlet. The remaining one-half of the liquid in the area above the piston is the amount that is forced out on the upstroke of the pump.

These pumps are manufactured in various lengths and in two different riser-tube designs. The single-riser tube pumps are intended for installation through the 2-in. bung opening in closed-top containers. The liquid riser cylinder of these pumps is threaded directly into the base of the air-pump motor. The air and liquid-handling sections are separated by seals.

The double-riser tube or "divorced design" pumps are arranged for operation in full open top containers or barrels. In these pumps, the air motor is completely separated from the liquid lines.

The type designations, as indicated below, refer to pumps designed to accommodate various conditions of paint spraying and distribution operations.

Type Designation	Trade Name	Ratio	Tube Design
21*	Fast-Flo	1-1	Single
22**	Standard	1½-1	Divorced
32	Monark	2-1	Divorced
34	Monark	4-1	Divorced
35	Monark	5-1	Single
44	Mogul	3½-1	Divorced
48	Mogul	8-1	Single or Divorced
65	Bulldog	5-1	Divorced

All assemblies include air motor and pumping unit.

* Also provided with air-control valve, snap-on air-line coupler, and spout with bail hook.

**Also provided with air pressure regulator, liquid back-pressure valve and gauge.

Inspection and Test

The pumps were tested at the Underwriters' Laboratory and the complete report Misc. Hazard 6694 is on file with and is part of the record.

Recommendation

On the basis of the data submitted by the applicant and the tests conducted by the Underwriters' Laboratory, the Committee on Test recommends the approval of the appliance known as Graco Powerflo Reciprocating Pumps Types 21, 22, 32, 34, 35, 44, 48 and 65 for use in New York City, when constructed as herein described and operated in accordance to the requirements of the Paint Spraying Rules of the Board, on condition that each pump bear a label, permanently affixed reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 394-57-SA".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

MINUTES

436-57-SM

APPLICANT—Grand Haven Brass Foundry, owner.

SUBJECT—Application May 27, 1957—Grand Haven Brass Foundry Anti-Syphon Ballcock, Model G-730, approval of.

APPEARANCES—

For Applicant: David I. Jacobson.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 436-57-SM

Subject: Grand Haven Brass Foundry Anti-Syphon Ballcock, Model G-730.

Grand Haven Brass Foundry, Grand Haven, Michigan, filed May 27, 1957 an application with the Board of Standards and Appeals for approval of the Grand Haven Brass Foundry Anti-Syphon Ballcock, Model G-730 under the provisions of the Submerged Inlet Rules of the Board.

Purpose

The material is an anti-syphon ballcock.

Description

The ballcock consists of a body, plunger, leather seal, rubber seat, nylon seat, supply tube, refill tube and hush tube.

In operation, water is supplied to the unit through the supply tube. The plunger is sealed against the nylon seat by a lever which is controlled by the height of the water in flush tank. When the water is flushed in the tank, the lever permits the plunger to rise, permitting water to flow past the seat and into the larger chamber. In the larger chamber is a plastic ball that rises and seals against an air inlet cap when the water enters the chamber. As long as there is water flowing into the chamber, the plastic ball is in a raised position. The water then flows from the chamber into the flush tank via the hush tube.

As the water rises, the lever forces the plunger down against the seat causing the flow to stop. At this point the plastic ball drops away from the air inlet cap exposing the chamber to the atmosphere.

Should there be a negative pressure on the supply line, the free floating plunger will be drawn against the seat preventing back flow. If there should be a particle on the seat preventing the plunger sealing, the air inlet cap is of a sufficient size that rather than pulling water back through the supply line, air will be drawn into the line, thus eliminating the possibility of contamination.

Inspection and Test

Details of construction were examined by Ass't. Engr. J. A. Darts, Committee on Test and it was noted that there was a sufficient gap between the level in the tank and discharge, in compliance with the Submerged Inlet Rules. The appliance was also tested at the test bench at Kent & Flushing Avenues, Brooklyn, New York and successfully met the requirements as to anti-syphonage.

Recommendation

On the basis of the inspection and the data submitted by the applicant, the Committee on Test recommends the approval of the Grand Haven Brass Foundry Anti-Syphon Ballcock, Model G-730 for use in New York City under the provisions of C26-1277.0 Administrative Building Code, on condition that the material bear a label permanently affixed reading "Approved by the Board of Standards and

Appeals for use in New York City under Calendar Number 436-57-SM".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Re: Calendar Number 265-58-SM

Subject: Manhattan Weaving Co., Inc., Dacron-Saran Warp Filling for Drapery or Upholstery.

Manhattan Weaving Co., Inc., Patterson, New Jersey, filed April 23, 1958, an application with the Board of Standards and Appeals for approval of Dacron-Saran Warp

MINUTES

filling for drapery or upholstery under the provisions of the Flame Proofing Rules of the Board.

Purpose

For Drapery or Upholstering.

Description

The fabric is made of Dacron-Saran Warp Filling and is used for Drapery and Upholstery.

Inspection of Test

Samples of the material were flame tested at the Better Fabrics Testing Bureau in the presence of Ass't Engr. J. A. Darts, Committee on Test, and W. H. Masterson, representing the applicant.

The test was in accordance with the Flameproofing Rules of the Board.

There was no flashing, flaming or afterglow in either the charred or uncharred areas in the samples tested.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the inspection and test the Committee on Test concludes that the material known as Manhattan Weaving Co., Inc., Dacron-Saran Warp Filling for Drapery or Upholstery possesses inherent flame proofing properties and accordingly recommends the approval for drapery or upholstery. The Committee further recommends that this material shall not be used in locations wherein an approved opening protective assembly is required.

Tests on each specific installation or any retests thereof shall be made by the Fire Commissioner or in a Laboratory approved by him in accordance with the requirements of the Flameproofing Rules of the Board.

The Committee further recommends that all cartons or containers in which this material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 265-58-SM".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

502-58-SA

APPLICANT—Bowser, Inc., owner.

APPEARANCES—

For Applicant: D. E. Collins.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,
Commissioner Fox and Commissioner Becker 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 502-58-SA

Subject: Bowser Extractable Submerged Pump, Models 564-1, 564-2 and 564-3.

Bowser Inc., Fort Wayne, Indiana, filed August 25, 1958 an application with the Board of Standards and Appeals for approval of the Bowser Extractable Submerged Pump, Models 564-1, 564-2, 564-3, under the provisions of C19-69.0 Administrative Code.

Purpose

The pump is a submerged pump to transfer motor fuel.

Description

The appliance is intended to be installed directly in the storage tank so as to locate the pumping unit in the liquid,

eliminating vacuum requirements and placing the entire system under pressure.

The pump, a three stage centrifugal unit, hydraulically balanced is completely submerged, consists of bronze impellers, Ni-resistant diffusers, monel shaft. Side intake openings and built-in strainer screen prevent entrance of foreign matter and is self flushing.

The motor, also submerged, is a 60 cycle-single phase, 220 volt, 3450 r.p.m. explosion proof, radial ball bearing hermetically sealed in oil with a mechanical seal below the motor. Expansion shield at top of motor provides equal internal-external pressure. The motor is cooled by flow of liquid around the sealed construction.

Directly above the cartridge which houses the pump and motor, is the discharge head of cast iron which is equipped with a combination relief and check valve to protect the discharge portion of the installation against possible excessive pressure due to expansion. Any expansion is relieved directly back to storage. In the discharge head, there is also an open orifice, that is returned directly to the storage tank to avoid any air or vapor that may be brought into the system from the pump. This air or vapor is also returned directly to storage.

The motor is connected by means of 1/2 inch rigid aluminum conduit to the junction box at the top of the assembly, which box is explosion proof of the swivel type so as to permit either connection to the supply conduit. This box is grounded to the pump column and the wires fastened into the junction box are sealed in accordance with Underwriters' requirements.

Inspection and Test

Details of construction were examined by Ass't Engr. J. A. Darts, Committee on Test. The pumps have been approved by the Underwriters' Laboratory under MH 334 and MH 6333.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the appliance known as Bowser Extractable Submerged Pumps, Models 564-1, 564-2, 564-3 for use in New York City under the provisions of C19-69.0 Administrative Code, on condition that only explosion proof motors be used and that the appliance bear a label, permanently affixed, Reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 502-58-SA".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

700-58-SA

APPLICANT—Home Heating Devices, Inc., owner.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 700-58-SA

Subject: Heet-Saver, Model 59.

Home Heating Devices Inc., New York, N. Y., filed De-

MINUTES

cember 2, 1958 an application with the Board of Standards and Appeals for approval of the Heet-Saver, Model 59 for use in New York City under the provisions of the Oil Burner Rules of the Board.

Purpose

A device to recover part of the heat from flue gases.

Description

The Model 59 Heet-Saver is designed to be installed in the flue pipe of electrically operated oil fired heating appliances with a firing rate not over 2 gallons per hour. It is to be located between the oil burning appliance and the chimney but in back of any primary safety control mounted in the flue pipe.

The Heet-Saver is made up of 58 steel heat exchanger tubes $\frac{3}{8}$ inch O.D. with wall thickness of .042". The tubes are installed in a removable sheet steel casing made with 16 gauge end pieces and 19 gauge side pieces, and they are arranged in three banks to allow for free by-pass area. The exchanger section is assembled in a jig so that the 16 gauge end plates are pressed on tightly against the beads on the tubes. The casing is welded together and the outside ends of the tubes are flared out by means of a pneumatic tool so that a tight fit is obtained around the junction point of each tube.

The exchanger section is made removable so that it may be cleaned at regular intervals with a suitable detergent.

In operation the hot flue gases from the oil burner pass over the exchanger tubes and heat is transferred to air which is circulated through the tubes by a motor operated fan. The heated air is then conveyed by a duct to the space to be heated. Operation of the fan is automatic by means of a temperature operated switch installed in the flue pipe downstream from the heat reclaiming and set at a minimum temperature of 350°F for operation.

Inspection and Test

A typical installation was inspected at 1635 Howard Road, Baldwin, Long Island and the method of fabrication was witnessed at the plant of the applicant at Suffern, New York, by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The device was tested at the University of Maine, Department of Industrial Cooperation.

Tests made without the tube bank installed showed a draft of .03 inch w.c. with the flue gas temperature below the heater at 620°F. With the tube bank installed and the fan "off" the draft was .025 inch w.c., the temperatures being 648°F below the unit and 550°F above. With the fan "on" the draft was .026 inch w.c. with the temperature below the unit at 660°F and above the unit 470°F. When the tube banks were blanked out with sheet metal the draft reading was .022 inch w.c.

In an additional test, the oil burner was deliberately made to burn with a smoky flame.

After a considerable period of operation the side banks of tubes completely clogged with soot but there was no evident decrease in draft, and no other effects noticeable.

Recommendation

On the basis of the inspection and tests and the data submitted by the applicant, the Committee on Test recommends the approval of the Heet-Saver Model 59 for voluntary use in New York City when installed in accordance with this report and the Oil Burner Rules of the Board provided that each installation is made by a licensed oil burner installer and that each such device shall bear a label, permanently affixed, reading "Approved by the Board of Stand-

ards and Appeals for use in New York City under Calendar Number 700-58-SA."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 709-58-SM

Subject: Gold Bond Gypsum Block

J. K. Hovind for National Gypsum Company, Buffalo, New York, filed December 5, 1958, an application with the Board of Standards and Appeals for approval of Gold Bond Gypsum Block under the provisions of C26-88.0, C26-191.0, C26-239.0 through C26-241.0, C26-244.0, C26-310.0, C26-464.0, C26-572.0, C26-575.0, C26-609.0 and C26-633.0 through C26-641.0 Administrative Building Code.

Purpose

The material is an assembly used for fire resistive partitions, and for fire protection of columns, elevator shafts, etc.

Description

Gold Bond Gypsum Block are 12" high x 30" long in various thicknesses: 2" solid, 3" solid, 3" hollow and 4" hollow. The material is a precast block having square edges and smooth surfaces except for trademark or other scored impressions and are designed to receive plaster. The core holes in the hollow block are circular. The gypsum block are manufactured by a continuous machine mixing, molding and drying process and are composed primarily of gypsum with approximately 1" additives and not over 12½% wood fiber chips.

Gold Bond Gypsum Tile Cement is manufactured by the National Gypsum Company for use at the joints of gypsum block. It is composed of gypsum with a small percentage of additives.

Inspection and Test

Gold Bond Gypsum Block of the sizes and types hereinafter described were selected for tests at the manufacturer's plant by a representative of Pittsburgh Testing Laboratory. They were manufactured from Nova Scotia gypsum rock having a gypsum purity of 85% to 90% and contained 3% wood fibers. Fifteen of each type of gypsum block were tested in accordance with and exceeded the requirements of ASTM C52-54 and C52-41 as required under Section C26-310.0 Administrative Building Code. Fire endurance and hose stream tests were conducted at Ohio State University on non-bearing partitions herein described in accordance with the requirements of ASTM E119-55 and Section C26-609.0 Administrative Building Code.

PHYSICAL TESTS

15 representative Gold Bond Gypsum Blocks of each type were tested in accordance with ASTM C52-54 and C52-41 to determine size, weight, compressive strength when dry and when saturated, and the degree of water absorption.

Fire Endurance Tests

Fire endurance and hose stream tests were conducted at Ohio State University in accordance with the requirements of ASTM E119-55 as required under Section C26-609.0 Administrative Building Code.

2 hours fire endurance—Ohio State Test Report T-1101: 3" Hollow Gold Bond Gypsum Block set with 1/2" thick mortar joints composed of 1 part Gold Bond Gypsum Tile Cement mixed with 3 parts sand. 5/8" sanded gypsum plaster, previously approved under Calendar Number 711-39-SM, mixed 1 part gypsum to 3 parts sand was applied to one side of the partition only. The plaster thickness included 1/16" to 1/8" lime-putty finish and the over-all partition thickness was 3 5/8". The partition failed by temperature rise on the unexposed side at 2 hours and 29 minutes and successfully passed the hose stream test.

3 hours fire endurance—Ohio State Test Report T-1102: 4" Hollow Gold Bond Gypsum Block—partition construction same as 2 hour rated partition described above (Report T-1101) except that blocks were 4" thick and plaster thickness was 1/2" including lime-putty finish. The over-all partition thickness was 4 1/2". The partition failed by temperature rise on the unexposed side at 3 hours and 08 minutes and successfully passed the hose stream test.

4 hours fire endurance—Ohio State Test Report T-1103: 4" Hollow Gold Bond Gypsum Block—partition construction same as 3 hour rated partition described above (Report T-1102) except that 1/2" sanded gypsum plaster (including finish coat) was applied to each side of partition. The over-all partition thickness was 5". The partition failed by temperature rise of one thermocouple on the unexposed side at 4 hours and 59 minutes, and successfully passed the hose stream test.

The complete reports of the Pittsburgh Testing Laboratory and Ohio State University are on file with and are part of the record.

Recommendation

On the basis of the data furnished by the applicant and the inspections and tests conducted, the Committee on Test recommends that Gold Bond Gypsum Block in thicknesses of 2"-solid, 3"-solid, 3"-hollow and 4"-hollow, and Gold Bond Gypsum Tile Cement having met the requirements of ASTM C52-41 as required under Section C26-310.0 Administrative Building Code and having passed the fire endurance tests as hereinbefore described, be approved for use where permitted under Sections C26-239.0 through C26-241.0 and for voluntary use elsewhere as non-bearing fire partitions, fire resistive stairway enclosures, fire protection of

structural steel, and fireproof partitions under the provisions of Sections C26-575.0, C26-609.0 and C26-633.0 through 641.0 Administrative Building Code when constructed as follows:

PARTITIONS

Fire Endurance

- 4 hours—4" Hollow Gold Bond Gypsum Block with 1/2" (total thickness) sanded gypsum plaster (1:3) on each side.
- 3 hours—4" Hollow Gold Bond Gypsum Block with 1/2" (total thickness) sanded gypsum plaster (1:3) on one side only.
- 3 hours—3" Solid Gold Bond Gypsum Block, unplastered.
- 3 hours—3" Solid Gold Bond Gypsum Block with 1/2" (total thickness) sanded gypsum plaster (1:3) on one side only.
- 3 hours—3" Hollow Gold Bond Gypsum Block with 1/2" (total thickness) sanded gypsum plaster (1:3) on each side.
- 2 hours—3" Hollow Gold Bond Gypsum Block with 5/8" (total thickness) sanded gypsum plaster (1:3) on one side only.
- 1 hour—3" Hollow Gold Bond Gypsum Block, unplastered.
- 1 hour—2" Solid Gold Bond Gypsum Block, unplastered.

Structural steel, i.e., columns

Fire endurance

- 4 hours—2" Solid, 3" Solid or 3" Hollow Gold Bond Gypsum Block with 1/2" (total thickness) sanded gypsum plaster on outer side.
- 3 hours—2" Solid, 3" Solid or 3" Hollow Gold Bond Gypsum Block, unplastered.

The Committee on Test recommends further that the material and/or the Bills of Lading, Shipping Tickets and/or Invoices shall be tagged, stamped, or labelled as follows: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 709-58-SM".

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

APPLICANT—H. M. Ficken for Superior Combustion Industries, Incorporated, owner.

APPEARANCES—

For Applicant: Henry M. Ficken.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads.

Re: Calendar Number 103-59-SA.

Subject: Superior Gas Burner for Boilers, Models G2PG, G2RG, G4PG, G4RG, GTRG, GC4PG and GC4RG.

H. M. Ficken for Superior Combustion Industries Inc., New York, N. Y., filed February 18, 1959, an application with the Board of Standards and Appeals for approval of the Superior Gas Burner for Boilers, Models G2PG, G2RG, G4PG, G4RG, GTRG, GC4PG and GC4RG, for use in New York City under the provisions of Article 12, Administrative Building Code.

Purpose

Gas fired steam and hot water boilers.

Description

The Superior gas fired steam and hot water boilers are built to ASME code specifications and are designed as 2 pass or 4 pass down draft horizontal fire tube Scotch Marine type boilers.

The gas burners used are made of a ring type casting with a series of gas jets located in a concentric ring around the point of primary air supply. The size and number of jets used varies with the size of the boiler.

The gas, primary air and secondary air are interlocked and controlled by the boiler settings. The primary air is controlled by a vaned air inlet on the inner portion of the gas ring. The secondary air is regulated by an air band with diffuser vanes. The interlocking of the gas and air is regulated through the modulating motor and jack shaft assembly which controls the volume of gas by means of a butterfly valve and regulates the air by controlling an air damper.

The ignition assembly is of the continuous pilot type. The air for the pilot when burner is in operation is from the same source as the primary and secondary air for combustion. When the burner is not operating, air for the pilot is obtained from a small blower which is actuated by an interlocking device on the induced draft fan motor starters.

Electronic combustion controls are employed for safety shut down and boilers are equipped with relief valves, pressures at and dual low water cut off on steam boilers, and a single low water cut off on hot water boilers.

The G2PG units are made in sizes of 5 to 40 HP and have 2 pass boilers. They obtain sufficient draft from the induced draft fan.

The G2RG units are the same as the above but have an additional blower to supply the primary air.

The G4PG units are made in sizes of 20 to 600 HP and have 4 pass boilers. Draft is furnished by an induced draft fan.

The G4RG units are similar to the G4PG models but have an added blower for air assist.

The GC4PG and GC4RG are similar to the G4PG and G4RG models respectively but they are more "compact" and therefore vary in physical dimension.

The GTRG units are made in sizes varying from 25 to 500 HP and employ an added blower for forced draft.

Inspection and Test

All details of construction were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The Superior Gas Fired Boiler Assemblies were tested and approved by Underwriters' Laboratories, file MP1734.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the Superior Gas Fired Steam or Hot Water Boilers, Models G2PG, G2RG, G4PG, G4RG, GTRG, GC4PG and GC4RG for use in New York City when installed in accordance with this report and the requirements of Article 12, Administrative Building Code with the following minimum clearances in inches:

When the boilers are designed for operating steam pressures not over 50 psi.

A	B	C _h	C _v	D	E ₁	E _r
18	48	18	18	18	18	18

When the steam pressure is to be over 50 psi.

A	B	C _h	C _v	D	E ₁	E _r
48	96	36	36	36	36	36

A—clearance above top of boiler.

B—clearance from front of boiler.

C_h—clearance from flue pipe measured horizontally or below pipe.

C_v—clearance from flue pipe measured vertically or above pipe.

D—clearance from back of boiler.

236-59-SM

APPLICANT—City Lumber Company, for Norway Cement Export Ltd. (Dalen Portland Cement Fabrik A-s), owner; Silbo Steel Corp., agent.

APPEARANCES—

For Applicant: Richard Goldwater.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 236-59-SM

Subject: Norway Portland Cement.

City Lumber Co., for Norway Cement Export, Ltd., Munkedamsveien, Norway, filed April 15, 1959, an application with the Board of Standards and Appeals for approval of the material known as Norway Portland Cement under the provisions of C26-312.0 Administrative Building Code.

Purpose

The material is a Type I portland cement.

Description

The material is a portland cement that is manufactured by the dry process. The crushed limestone is fed to the raw mills from the feeding tables and are closely controlled. The mills are operated by means of an air separator which gives a mixture of great fineness and homogeneity. To further homogenize the mixture, it goes to large silos where

MINUTES

it is aerated and circulated before it is fed to the kilns. From the kilns, the cooled clinker is fed to the cement mills with the required amount of gypsum.

Inspection and Test

The plant of the applicant was inspected by the Committee on Test consisting of Commissioners Sleeper and Kleinert. In addition to the inspection, two sample sacks of cement were removed from the hold of the m/s Texas and submitted to the E. L. Conwell & Co. for testing. The cement met the requirements of ASTM C 150-56 for Type I cement. The complete report is on file with and is part of the record.

Recommendation

On the basis of the inspection and test and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Dalen Portland Cement Type I, for use in New York City under the provisions of C26-312.0 Administrative Building Code on condition that the cement be packaged in waterproof bags, suitable for export packaging and that each bag shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 236-59-SM" and further the owner-manufacturer shall submit, monthly, for a period of six months from the date of this resolution, and annually, thereafter, a certified copy of mill reports certifying that all cement manufactured at the applicants plant located in Brevik, Norway, and shipped into New York City complied with all requirements of this resolution including compliance with ASTM 150-56 specifications.

(Sgd.) EDWIN W. KLEINERT,
Vice Chairman,
HAROLD R. SLEEPER,
Commissioner.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

239-59-SM

APPLICANT—H. H. Robertson Company, owner.
APPEARANCES—

For Applicant: John D. Hegeman.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 239-59-SM

Subject: H. H. Robertson —Q-Floor Hanger.

H. H. Robertson Co., New York, filed April 16, 1959, an application with the Board of Standards and Appeals for approval of the material known as H. H. Robertson Q-Floor Hanger under the provisions of C26-461.0 Administrative Building Code.

Purpose

The material is a device for suspension of systems from H. H. Robertson cellular steel floor or steel roof deck.

Description

The hangers are available in the RK & RXX sections of H. H. Robertson cellular units in 18, 16 and 14 gauge and consists of a metal lab $1\frac{1}{2}$ inches long by $\frac{3}{4}$ inch wide, with a $\frac{13}{32}$ inch round hold located $\frac{1}{2}$ inch from the extreme end.

The tabs are formed by punching the horizontal web of the lower element between cells to provide the hanger tabs. The tabs are spaced not more than 12 inches on center in either direction.

The tabs are normally in a horizontal direction; when they are to be used, they are bent into the vertical position.

Inspection and Test

Samples of sections were tested at the Pittsburgh Testing Laboratory. Results were as follows: 18 gauge—520 lbs., 16 gauge—620 lbs., 14 gauge—820 lbs.

The construction has been accepted by the Underwriters' Laboratory as the tab will be covered by the fireproofing material and if used in conjunction with suspended ceilings, the ceiling will provide the protection.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as the H. H. Robertson Q Floor Hanger for use in New York City under the provisions of C26-461.0 Administrative Building Code, with loads per tab as follows: 18 gauge—125 lbs.; 16 gauge—150 lbs.; 14 gauge—200 lbs., as a means for suspension of systems from H. H. Robertson cellular steel floor or steel roof deck units, on condition that plans submitted to the Department of Buildings showing the proposed use of this material shall be stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 239-59-SM."

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

241-59-SM

APPLICANT—The Bar-Bell Products, Inc., owner.

APPEARANCES—

For Applicant: Joseph Pipas.

ACTION OF BOARD—Application reopened and resolution amend in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 241-59-SM

Subject: Reopen and amend the resolution as to include additional new model.

The Bar-Bell Products, Inc., Brooklyn, New York, requested by letter dated May 29, 1959, that the resolution adopted June 2, 1959 under Calendar Number 241-59-SM be amended so as to include additional new model Chemo-Safe "DD (Dual)".

Description

The requested new Model Chemo-Safe "DD (Dual)" is similar in construction to the model previously approved under Calendar Number 241-59-SM. The new model is a dual paint storage cabinet, having one cabinet atop another.

Inspection and Test

The cabinet was inspected and tested at 307 Scholes Street, Brooklyn, New York, and found to conform to the requirements of Rule 6.1.2 of the Paint Spraying Rules of the Board. Present at the test were Ass't. Architect T. W. Farricker of the Committee on Test and Messrs. J. Pipas and G. Cappelli, representing the applicant.

Recommendation

The Committee on Test recommends that the resolution adopted June 2, 1959, under Calendar Number 241-59-SM be reopened and amended so as to include additional new Model Chemo-Safe "DD (Dual)"; on condition that the re-

MINUTES

quirements of the resolution adopted June 2, 1959 under Calendar Number 241-59-SM be complied with.

The Committee further recommends that no more than 200 gallons of spray coating and dipping materials and thinners be stored in any one of the dual cabinets at any time.

(Sgd.) JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

THE RESOLUTION—

WHEREAS, the order and decision of the Fire Commissioner, dated July 21, 1958 on Order No. 4433-8, reads:

"5. Install an approved automatic sprinkler system where any building exceeds 10,000 square feet per floor. C19-136.0-4, Administrative Code.

6. Provide an approved buried storage system for volatile inflammable oil, installed as per Section C19-69.0, Administrative Code. Plans to be filed and approved by the Department of Buildings before work is commenced. C19-11.0, Administrative Code.

NOTE: A set of duplicate plans and specification sheets approved by the Department of Buildings are to be filed with the Division of Fire Prevention, Fire Department.

NOTE: This refers to Benzine and Xylol."

and

WHEREAS, the applicant states that the building is one and two stories, 16 feet 6 inches and 25 feet 6 inches in height, 96 feet by 490 feet, irregular in area at 1st floor, 96 feet by 119 feet at 2nd floor, of fireproof construction, erected in

1951, in unrestricted use, C area, class ½ height district, used and occupied since 1951 as follows: Partial cellar at front, bomb shelter, no persons; partial cellar at 169th Street—boiler room, no persons; 1st floor—warehouse, 20 persons; 2nd floor—office, 70 persons; that since 1956 the bomb shelter has been used for chemical storage, no persons; that no change in use or occupancy is proposed; that Certificate of Occupancy No. Q9864, dated October 7, 1954 lists the permissible use and occupancy as follows: Partial cellar and boiler room, no persons; 1st floor—warehouse, 6 persons; 2nd floor—offices, 70 persons; that the building is provided with three concrete and steel stairs leading direct to street, 3 feet 6 inches and 4 feet 6 inches wide, enclosed in lath and plaster partitions, with one-hour fireproof self-closing doors; that a scuttle is provided to the roof; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended the appeal be granted on certain conditions.

Resolved, that the order and decision of the Fire Commissioner, dated July 21, 1958, acting on Order #4433-8, Objections 5 and 6, be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that an automatic sprinkler system with spray heads shall be installed and maintained in the vault area where the chemicals are stored; and that all other laws, rules and regulations applicable shall be complied with.

12-59-A

APPLICANT—Sidney Daub for Alice Hampar and Dikranouhi Hampar, owners.

SUBJECT—Application December 31, 1958—Appeal from a decision of the Borough Superintendent—Re: Egress.

PREMISES AFFECTED—417 Lafayette Street, east side, 316.1 feet north of East 4th Street, Block 544, Lot 12, Borough of Manhattan.

APPEARANCES—

For Applicant: Sidney Daub.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative: 0

Negative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

THE RESOLUTION—

WHEREAS, the decision of Borough Superintendent, dated December 5, 1958, on Alt. Applic. 1142/58, reads:

"1. F. E. not acceptable as second means of egress from 8 story factory bldg. Sec. 271 LL."

and

WHEREAS, the applicant states that the building is 29 feet 6 inches by 133 feet in area, 8 stories, 100 feet high of class 1 construction, located in unrestricted use, B area, class 1½ height district, built in 1893, used and occupied since 1916 as follows: Boiler room and storage of hardware, 2 persons; 1st floor—hardware salesroom, 5 persons; 2nd floor—manufacturing display novelties, 15 persons; 3rd floor—storage of plastics, 1 person; 4th floor—printing, 20 persons; 5th floor—printing, 20 persons; 6th floor—manufacturing mascara pencils, 25 persons; 7th floor—manufacturing plastic novelties, 15 persons; 8th floor—manufacturing display novelties, 15 persons; that the building is equipped with a standpipe system and an interior alarm system; that the exits consist of one interior 3 foot wide steel stair with a fireproof enclosure and fireproof self-closing doors; that there are two 60° fire escapes, one on the front, the other on the rear of the building; that the rear openings have fireproof sash with wire glass; that the rear fire escape connects with the roof of 415 Lafayette Street to the south; that the front sash are of wood; that the front fire escape terminates at street with a vertical slide ladder; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board, which recommended that the appeal should not be granted in view of the bad housekeeping conditions, etc., on the premises.

Resolved, that the decision of the Borough Superintendent,

MINUTES

acting on Alt. Applic. 1142/58, Objection No. 1, be and it hereby is *affirmed* and that the appeal be and it hereby is *denied*.

71-59-A

APPLICANT—Joseph A. Igler for Rock-Time Incorporated, owner; Time, Incorporated, lessee.

SUBJECT—Application February 5, 1959—Appeal from the decision of the Borough Superintendent re hung ceiling construction; does not comply with C26-461.0, Administrative Code.

PREMISES AFFECTED—1261-1279 Avenue of Americas, west side, from West 50th Street to West 51st Street, 101-131 West 50th and 100-130 West 51st Street, Block 1003, Lots 17 and 29, Borough of Manhattan.

APPEARANCES—

For Applicant: Joseph B. Klein.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated January 27, 1959 on B. N. Applic. 4049/58, reads:

"Hung ceiling construction does not comply with C26-461.0 A.C."

and

WHEREAS, the applicant states that the building is 174 feet 6 inches by 340 feet 9 inches, 47 stories, 574 feet high, of class one construction, located in business and retail use, B area, class 2 height district, building to be used as an office building, and;

WHEREAS, the applicant states that it is proposed to install on 18, 19, 20, 23, 24, 25, 28, 29, 30, 31 and 33 floors a hung ceiling; that the purlins will be 4 feet 8 inches on centers of 1½ inch channels and hung in accordance with the requirement of the Administrative Code, but without cross furring from which purlins will be hung a dry decorative incombustible ceiling constructed of extruded aluminum members.

Resolved, that the decision of the Borough Superintendent, dated January 27, 1959, acting on B. N. Applic. 4049/58, be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the work be done in accordance with plans and calculations filed with this appeal dated, February 5, 1959, 8 sheets; and that all laws, rules and regulations applicable shall be complied with.

202-59-A

APPLICANT—Max Siegel Associates, for 296 Broad Street Corporation, owner.

SUBJECT—Application March 20, 1959—decision of the Borough Superintendent—re: Standpipe system.

PREMISES AFFECTED—316-320 West 57th Street, south side, 200 feet west of 8th Avenue, Block 1047, Lot 41, Borough of Manhattan.

APPEARANCES—

For Applicant: Max Siegel.

For Administration: Lieut. John P. Manfredi, Fire Dept.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated March 18, 1959 on Alt. Applic. 874/57, reads:

"(1) Existing standpipe system must be maintained and provided with a primary water supply as required by C26-1381.0 A.C. & C26-1405.0 A.C."

and

WHEREAS, the applicant states that the building is 75 feet by 112 feet 6 inches in area, 6 stories, mezzanine and

penthouse, 105 feet high, of class 1 construction, located in restricted retail use, B area, class 1½ height district, built in 1895, used since 1955 as follows: Cellar—storage, no persons; 1st floor—dancing school, rehearsal halls and art school, 65 persons; 2nd floor—dramatic school, auditorium, radio and T.V. Studios, 260 persons; 3rd floor—offices, dramatic school, auditorium and balcony, 120 persons; 4th floor—offices, 65 persons; 5th floor—offices, radio and T.V. training studios, 65 persons; 6th floor—office, radio & T.V. training studios, 75 persons; mezzanine—offices, radio and television training studios, 75 persons; pent house—office used in conjunction with mezzanine floor, 2 persons; that a Certificate of Occupancy 44601/55 was issued for these uses against Alt. Applic. 907/51; that the exits consist of one interior 3 foot 4 inch iron stair in fireproof enclosure; that there exists a Fire Alarm System, which will be activated to the satisfaction of the Fire Department; that there exists fire extinguishers in each Public Hall; that it is proposed to maintain the existing standpipe system as a dry line system, which can be fed in an emergency, by the Fire Department through the existing siamese connection on the front wall at grade; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended the appeal be granted under certain conditions.

Resolved, that the decision of the Borough Superintendent, dated March 18, 1959, acting on Alt. Applic. 874/57, Objection 1, be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that a street main connection shall be made to the standpipe system with a 250 gallon per minute booster pump on the line; that stair doors shall be made self-closing; that the present fire alarm system shall be activated; and that all other laws, rules and regulations shall be complied with.

WHEREAS, the applicant requested an amendment of the resolution and extension of time.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on July 1, 1958, by adding thereto:

"that the existing cellar area under the proposed extension may be used for grocery storage; that two openings protected with approved fireproof self-closing doors may be permitted between the buildings, all as shown on plans marked 'Received July 13, 1959', 2 sheets; that working drawings shall be submitted to the Board before they are filed with the Department of Buildings";

and amended as to time to complete the work, so that as *amended* this portion of the resolution shall read:

"that all permits required and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution; and that other than as herein amended the resolution above cited shall be complied with." (Alt. 4613/55)

512-48-BZ

APPLICANT—Peggy Cooney, for Socony Mobil Oil Company, Inc., owner.

SUBJECT—Application for consideration—reopening for amendment of resolution—re Application, decision of the Borough Superintendent; previously granted on condition, under Sections 7e, 7i and 7A of the Zoning Resolution, permitting in a restricted retail use district, the erection and maintenance of a motor vehicle repair shop and the parking and storage of more than five motor vehicles, with entrances beyond the permitted distance from intersection and with advertising signs nearer to the arterial highway than permitted.

PREMISES AFFECTED—135-16 to 135-22 Linden Boulevard and 114-02 to 114-10 Van Wyck Expressway, south-

MINUTES

west corner, Block 11661, Lots 7 and 9, Ozone Park, Borough of Queens.

APPEARANCES—

For Applicant: Peggy Cooney and E. H. Snackenberg.

ACTION OF BOARD—Application reopened and resolution amended.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, this application was granted by the Board on December 7, 1948, on certain conditions; and

WHEREAS, time to obtain permits and complete the work was extended on December 6, 1949; and

WHEREAS, the term of variance was extended on December 19, 1958; and

WHEREAS, the applicant requested an amendment of the resolution.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on December 17, 1948, as *amended* through December 19, 1958, only as to the number of approved gasoline storage tanks, so that as *amended* this portion of the resolution shall read:

"that there may be a total of ten 550 gallon approved gasoline storage tanks, as shown on revised plan marked 'Received July 9, 1959', one sheet." (Misc App 579/59)

For Applicant: George A. Diamond.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. IV on May 19, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 21, 1959 after due notice by publication in the Bulletin; and

WHEREAS, the decision of the Borough Superintendent, dated March 23, 1959 acting on N.B. Applic. No. 757-59, reads:

"1. The proposed structure exceeds in area that permitted by Art. IV Sec. 15(c) of the Zoning Resolution.

2. No portion of the proposed building may be erected closer than 10 feet from the building line under Art. IV, Sec. 15(d) of the Zoning Resolution"; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21 of the Zoning Resolution, and is therefore entitled to relief as to area on the grounds of practical difficulty and unnecessary hardship.

Resolved, that the Board of Standards and Appeals does hereby make a variation in the application of the area district regulations of the Zoning Resolution and that the application be and it hereby is granted under Section 21 to permit in an E area district, the erection of a class one masonry building, part three-story and basement and part one-story, as an adjunct to an existing Church and occupying more than the permitted area, with less than the required

setback on condition that the work be done in accordance with drawings filed with this application marked "Received April 17, 1959", 8 sheets; that in all other respects all laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained, all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

717-28-BZ—Vol. II

APPLICANT—Jules Lewis for 160 E. 87th Street Realty Co., owner.

SUBJECT—Application reopened November 12, 1958 as Vol. II—appeal from a decision of the Borough Superintendent, under Section 7c of the Zoning Resolution, to permit in a retail use district, in an existing six story building used as public garage, the erection of a seventh story to protect the cars presently parked on the existing roof, the rear columns of the building project beyond the zoning envelope of the building.

PREMISES AFFECTED—152-162 East 87th Street, south side, 35 feet 2 5/16 inches east of Lexington Avenue, Block 1515, Lots 47 to 51, Borough of Manhattan.

APPEARANCES—

For Applicant: Jules Lewis.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on November 12, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 14, 1959 after due notice by publication in the Bulletin; laid over to July 24, 1959, for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated October 1, 1958 acting on Alt. Applic. No. 1409-58, reads:

"1. Proposed addition of 7th story for garage for more than five autos, for pleasure cars exclusively in a retail district is an extension of a non-conforming use contrary to Sec. 6 & 4-A of Z.R.

5. Rear wall columns project beyond zoning envelope contrary to Sec. 12(a) of Z.R."

and,

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution, as to use, and that the applicant had substantiated a basis to warrant exercise of discretion to grant under Section 21, and is therefore entitled to relief, as to area, on the grounds of practical difficulty.

Resolved, that the Board of Standards and Appeals does hereby make a variation in the application of the use and area district regulation of the Zoning Resolution and that the application be and it hereby is granted under Sections 7c and 21 to permit in a retail use district, in an existing six story building used as a public garage, the erection of a seventh story to protect the cars presently parked on the existing roof, the rear columns of the building to project beyond the zoning envelope of the building, on condition that the work shall be done in accordance with drawings filed with this application dated October 16, 1958, 8 sheets; that where not inconsistent with the terms of this resolution, the requirements of the resolution adopted under Volume One shall be complied with; that in all other respects all laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained, all work completed

MINUTES

and a certificate of occupancy obtained within the requirements of Section 22A of the Zoning Resolution.

30-59-A

APPLICANT—Jules Lewis for 160 East 87th Street Realty Company, Incorporated, owner.

SUBJECT—Application October 16, 1958—appeal from a decision of the Borough Superintendent—re-open walls, 3-hour roof construction, stairs to lead to new roof.

PREMISES AFFECTED—152-162 East 87th Street, south side, 35 feet 2 $\frac{5}{16}$ inches east of Lexington Avenue, Block 1515, Lots 47 to 51, Borough of Manhattan.

APPEARANCES—

For Applicant: Jules Lewis.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated October 1, 1958 on Alt. Applic. 1409/58, reads:

"3. Provide 3 hour roof construction as per C26-239.0 Adm. Code.

4. Stairs to lead to new roof as per 6.4.1.11h B.C."

and
WHEREAS, the applicant states that the building is 129 feet 9 inches by 100 feet 8 $\frac{1}{2}$ inches in area, 6 stories, 69 feet 8 inches high, class 1 construction, located in retail use, B area, class 1 $\frac{1}{2}$ height district, used and occupied since 1930 as a garage; that use and occupancy is further described in Calendar Number 717-28-BZ, Volume II; that it is proposed to enclose present parking roof by construction of an "umbrella" roof of incombustible material; that the girders of this "umbrella" will be fireproofed with one inch vermiculite plaster over wire lath; that the 4 foot on center beams will be unprotected; that present exits consist of one interior 3 foot 8 inch wide fireproof stairs with self-closing kalamein doors; that the second egress consists of a rear fire escape leading through the 1st floor to the street; and

WHEREAS, the applicant proposes to extend the fire escape to the new roof and to extend present fireproof stair by an iron ladder through a scuttle in the new roof; and

WHEREAS, the premises was inspected by a committee of the Board and the committee recommended that the application should be granted on condition.

Resolved, that the decision of the Borough Superintendent, dated October 1, 1958, acting on Alt. App. 1409-58 be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the work be done in accordance with drawings filed with this appeal marked "Received October 16, 1958", 2 sheets, and "June 9, 1959", 3 sheets; that the new story and new roof shall be of not less than one and one-half hour approved, Class 2 construction; and that in all other respects all laws, rules and regulations applicable shall be complied with.

744-28-BZ—Vol. II

APPLICANT—Fred C. Dahlem, for Sidjack Realty Corp., owner.

SUBJECT—Application reopened June 2, 1959 as Vol. II—decision of the Borough Superintendent, under section 7h of the Zoning Resolution, to permit in a residence use district, the maintenance of a parking lot for the parking and storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1674-1676 Longfellow Avenue, northeast corner of East 173rd Street, Block 3010, Lots 1, 2 and 3, Borough of The Bronx.

APPEARANCES—

For Applicant: Fred C. Dahlem, Harry Kobrin and Harry Appleman.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on June 2, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 7, 1959 after due notice by publication in the Bulletin; laid over to July 24, 1959, for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated May 13, 1959 acting on Alt. Applic. No. 429-59, reads:

"1. In a residence district the proposed parking and storage of motor vehicles is contrary to Sect. 3, Art. II of the Zoning Resolution and is therefore denied."

and
WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision h of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7h, to permit in a residence use district, the maintenance of a parking lot for the parking and storage of more than five motor vehicles of the pleasure type only, for a term of ten years, *on condition* that the work be done as shown on drawings filed with this application marked, "Received May 15, 1959," 2 sheets; that the plot be paved with clean cinders or gravel, treated with a binder and properly graded and rolled; that all necessary retaining walls be provided to the satisfaction of the Borough Superintendent; that the entrance shall be omitted on Longfellow Avenue and the entrance located on East 173 Street; that all laws, rules and regulations applicable shall be complied with; and that all permits, including a Certificate of Occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

510-39-BZ—Vol. III

APPLICANT—Leonard F. Rothkrug, and Herbst & Ruschiano, for Robert Levine, William F. Walsh and Alfred Marer, owners; Shell Oil Company, lessee.

SUBJECT—Application reopened May 5, 1959 as Volume III—decision of the Borough Superintendent, under sections 7f, 7i and 7e of the Zoning Resolution, to permit in a business and unrestricted use district, the elimination of existing parking and storage of more than five (5) motor vehicles and in place thereof, erect and maintain a gasoline service station with accessory lubritorium, non-automatic car washing, minor motor vehicle repairs with hand tools only, office, storage and sale of auto accessories and parking on a portion of the premises, all for a temporary term of fifteen (15) years.

PREMISES AFFECTED—251-263 West 238th Street and 5821-5839 Broadway, northwest corner, Block 3414, Lots 334, 336 and 340, Borough of the Bronx.

APPEARANCES—

For Applicant: Leonard F. Rothkrug.

For Opposition: None.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: 0

Negative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. III on May 5, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 7, 1959 after due notice by publication in the Bulletin;

MINUTES

tin; laid over to July 24, 1959, for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated February 25, 1959 acting on N.B. Applic. No. 155-59, reads:

"1. Proposed use of gasoline service station, lubricatorium, minor repairs, car washing, office, sales and parking of motor vehicles on premises partly in a business use district is contrary to Art. II Sect. 4 of the Z.R. and Bd. S. & A. Cal. #510-39-BZ";

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board which recommended that the application should not be granted; and

WHEREAS, the Board found that there was no justification for the exercise of discretion to grant a zoning variance under Section 7, Subdivisions f, i and e of the Zoning Resolution.

Resolved, that the decision of the Borough Superintendent, acting on N.B. App. 155/59, Objection No. 1, dated February 25, 1959, be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

APPLICANT—Elliot Saltzman, for Newtal Corp., owner.

SUBJECT—Application December 30, 1958—decision of the Borough Superintendent, under sections 7c, 7i and 7A of the Zoning Resolution, to permit in a business and residence use district, the reconstruction of an existing gasoline service station, lubritorium, motor vehicle repairs with hand tools only, car washing, non-automatic, office and sale of accessories and the parking of more than five cars awaiting service, the existing use of dismantling and storage of used auto parts to be discontinued, the proposed reconstruction to have signs, show windows and curb cuts within 75 feet of a residence use district.

PREMISES AFFECTED—905-915 Pennsylvania Avenue and 125-133 Wortman Avenue, northeast corner, Block 4369, Lot 37, Borough of Brooklyn.

APPEARANCES—

For Applicant: Elliot Saltzman.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.
THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on July 14, 1959 after due notice by publication in the Bulletin; and laid over to July 24, 1959, for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated December 22, 1958 acting on N.B. Applic. No. 2379-58, reads:

"1. Proposed building and premises, partly in a Business and partly in a Residence zone, to be used for gasoline service station, motor vehicle repairs (hand tools only), lubritorium, car washing (non-automatic), office and sales of auto accessories, parking for more than 5 cars awaiting service is contrary to Art. II, PP. 3 & PP. 4a, subsections 29 & 46 of the Zoning Resolution.

"2. Signs, show windows and curb cut within 75' of a Residence Zone is contrary to Art. II, PP. 7-A of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c, i and A of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7c, i and A, to permit in a business and residence use district, the reconstruction of an existing gasoline service station, lubritorium motor vehicle repairs with hand tools only, non-automatic car washing, office and sale of accessories, and the parking for more than five cars awaiting service, the existing use of dismantling and storage of used auto parts to be discontinued, the proposed reconstruction to have signs, show windows and curb cuts within 75 feet of a residence use district, *on condition* that the work shall be done in accordance with drawings filed with this application marked, "Received December 30, 1958," 4 sheets; that all laws, rules and regulations applicable shall be complied with; and that all permits, including a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

sidewalk before July 22, 1959; hearing previously closed; and

WHEREAS, the decision of the Borough Superintendent, dated December 6, 1958 as amended by decision dated May 15, 1959, as thereafter amended by decision dated May 29, 1959, acting on Alt. Applic. No. 425-58, reads:

"C6. Proposed change in occupancy from a non-conforming use (stable) to other non-conforming uses (loading space, factory, including use of hand power tools), storage and offices, partly in a residence use district and partly in a retail use district is contrary to Sections 3, 4A and 6 of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision e of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby make a variation in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is granted under Section 7e to permit in a residence use district the change of use of an existing building from stable to manufacturing of walk-in refrigerators, using power tools and saws, storage and offices, on condition that the work be done in accordance with drawings filed with this application marked "Received January 5, 1959," 8 sheets, and "July 22, 1959," one sheet; that work on the front of the building shall be done in accordance with the drawing filed July 22, 1959; that the arcway be filled in and the sidewalk repaired to the satisfaction of the Borough President; that in all other respects all laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained, all work completed and a certificate of occupancy obtained within the provisions of Section 22A of the Zoning Resolution.

THE VOTE TO GRANT—

Affirmative: 0

Negative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on July 14, 1959 after due notice by publication in the Bulletin; laid over to July 24, 1959, for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated December 29, 1958 acting on Alt. Applic. No. 2729-58, reads:

"1. The extension of an existing non-storage public garage for more than five cars into adjacent buildings so that as altered the entire premises will be used conjunctively as a non-storage public garage for more than five cars at the first story level and the storage of plumbing supplies at the second story level portion; all in a residence use district is contrary to Art. II Sec. 3 of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were in-

spected by a committee of the Board; and

WHEREAS, the Board found that there was no justification for the exercise of discretion to grant a zoning variance under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the decision of the Borough Superintendent, acting on Alt. Applic. 2729, Objection No. One, be and it hereby is affirmed and that the application be and it hereby is denied.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,
Commissioner Fox and Commissioner Becker..... 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated July 16, 1959 on Alt. Applic. 1812/55, reads:

"1. The proposed change in occupancy from a Nursing and Convalescent Home to a Nursery School Day Care Agency in a frame (class IV) building is contrary to 4.1.3 (5c) and contrary to Board of Stds. and Appeals Res. 255-43-A and is referred back to the Board for reconsideration."

and

WHEREAS, the applicant states that the building is 45 feet by 116 feet irregular in area, on a lot 148 feet by 556 feet irregular, located in residence use, G-1 area, class ½ height district, basement, 2 stories and attic, 29 feet high, of class 4 construction, veneered with stone, used and occupied as follows: Basement—Heating, recreation, kitchen, wards and storage, 10 persons; 1st floor—nursing, sanitarium proprietary, nursing and convalescent for aged or chronic patients, 25 persons; 2nd floor—nursing and convalescent or chronic patients, (ambulatory only), 19 persons; attic—attendants sleeping quarters and storage, 2 persons; which use is substantially as shown on Certificate of Occupancy Q125469/58 issued against Alt. Applic. 1628/44; and

WHEREAS, the applicant states that the building has two interior wood stairs 3 feet 2 inches and 3 feet 11 inches wide, interior stair is centrally located from the basement floor to the attic floor; that this stair and hall is protected with a sprinkler system; that there is an interior fire alarm system; that a Fire Department call box is located on 216th Street in front of the premises; that it is proposed to change use and occupancy as follows: basement—boiler, classroom, kitchen, lounge and first aid office, 19 students and 6 employees; 1st floor—class rooms, offices, recreation, kitchen and pantry, 60 students and 6 employees; 2nd floor—classrooms, and offices, 36 students and 4 employees; attic—caretaker's quarters, 2 employees; that this use constitutes a school and day care agency; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended the appeal be granted on certain conditions.

Resolved, that the decision of the Borough Superintendent, dated July 16, 1959, acting on Alt. Applic. 1812/55, be and it hereby is *modified* and that the appeal be and it hereby is *granted* for a term of twenty years *on condition* that the work shall be done in accordance with drawings marked "Received May 14, 1959", 12 sheets and "July 17, 1959", 3 sheets; that a complete sprinkler system be installed throughout the building; and that all other laws, rules and regulations shall be complied with; that all doors shall open in the direction of egress and not interfere with the passage through the corridors; that an approved interior fire alarm system shall be installed and monthly fire drills maintained; that any accessory structures constructed on the plot shall comply with the Building Code, the Zoning Law and all other laws and regulations applicable thereto; that all permits shall be obtained and all work completed within twelve months from the date of this resolution.

795-38-SM

APPLICANT—Lehigh Portland Cement Company, owner.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Resolution amended in accordance with the report and recommendations of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker..... 4
Negative 0
Absent: Commissioner Sleeper..... 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 795-38-SM

Subject: Amendment to resolution as to additional cement mills.

Lehigh Portland Cement Co., Allentown, Pa., requested by letter dated November 4, 1958 that the resolution adopted December 13, 1958 under Calendar Number 795-38-SM be amended so as to include additional cement mills. The application was reopened by a vote of the Board, December 2, 1958.

Description

The method of manufacture at the requested plants is the same method used in the plants previously approved.

Inspection and Test

Samples of the cement from the requested mills were tested by E. L. Conwell & Co. and all cements tested meet the requirements of ASTM C150-56 as Type I, II and III. The complete report is on file with and is part of the record. The three plants were inspected by Director Wm. A. Nolan and Asst. Engr. J. A. Darts, Committee on Test.

Recommendation

On the basis of the tests, the Committee on Test recommends that the resolution adopted December 13, 1938 under Calendar Number 795-38-SM be amended so as to include Lehigh Portland Cement as manufactured at the applicants plants located at Fogelsville, Pa., Sandts Eddy, Pa., and Alsen, N. Y., on condition that the requirements of the resolution adopted December 13, 1938 under Calendar Number 795-38-SM be complied with.

(Sgd.) JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the requirements of the Labor Law, as cited in a decision of the Borough Superintendent, acting on Alt. Applic. 1877/58, Objection No. One and that the appeal be and it hereby is *granted, on condition* that the work be done in accordance with plans filed with this appeal marked, "Received March 18, 1959," 4 sheets; that the winders in the main stair between the first story and the second story be removed and replaced with straight treads; that all laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained and all work completed within six months from the date of this resolution.

569-58-A

APPLICANT—Robert Teichman, for Benjamin Grodsky, owner.

SUBJECT—Application September 26, 1958—Appeal from a decision of the Borough Superintendent, re exits, factory building.

PREMISES AFFECTED—16 East 18th Street, south side, 175 feet, 5 inches, west of Broadway, Block 846, Lot 65, Borough of Manhattan.

APPEARANCES—

For Applicant: R. Teichman.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated August 28, 1958 on Alt. Applic. 1159/58, reads:

"1. Provide two legal means of egress for all tenants all floors used for factory work. A fire escape is not a permitted legal means of egress in a factory bldg. over six stories high. 271 Labor Law."

and

WHEREAS, the applicant states that the building is 23 feet 10 inches by 85 feet in area, 9 stories, 98 feet high, of class 1 construction, located in manufacturing use, B area, class 2 height district, built in 1902, used and occupied since 1956 as follows: Cellar—storage and boiler room, no persons; 1st floor—basket manufacturing, 4 persons; 2nd floor—vacant; 3rd floor—zipper manufacturing, 6 persons; 4th floor—label manufacturing, 3 persons; 5th floor—button supplies, 3 persons; 6th floor—ornamental glass showroom, 2 persons; 7th floor—display card manufacturing, 2 persons; 8th floor—vacant; 9th floor—gift boxes manufacturing, 3 persons; Pent House—Vacant; in accordance with Certificate of Occupancy 737/18 issued against Alt. Applic. 2416/17; that the exits consist of one interior 34 inches wide steel stairs with winders, enclosed together with elevators in a masonry partitions and fireproof self-closing

doors; that the 2nd means of egress is through a rear fire escape built in accordance with Section 274 of the Labor Law; that this fire escape is connected with several other fire escapes to the rear and to the west of the building in question; that the building is equipped with a standpipe system; and

WHEREAS, the premises were inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the requirements of the Labor Law, as cited in a decision of the Borough Superintendent, acting on Alt. Applic. 1159/58, Objection No. One and that the appeal be and it hereby is *granted, on condition* that the work shall be done in accordance with plans filed with this appeal marked, "Received December 12, 1958," 5 sheets and "June 30, 1959," 3 sheets; that a legal fire escape shall be constructed on the 18th Street front of the building in accordance with Section 273 of the Labor Law; and that all work shall be completed within one year from the date of this resolution.

189-59-A

APPLICANT—Aaron Bitter, for Aaron Bitter and Ruth T. Weinstock, owner.

SUBJECT—Application March 23, 1959—Appeal from a decision of the First Deputy Comm. Dept. of Bldgs.: Tax abatement and exemption.

PREMISES AFFECTED—437-441 East 88th Street, north side, 187 feet west of York Avenue, Block 1568, Lots 15, 16 and 17, Borough of Manhattan.

APPEARANCES—

For Applicant: Philip A. Paulson and Samuel Carr.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the First Deputy Commissioner, Department of Buildings, dated March 4, 1959 on Alt. Applic. 1640/57 and Misc. Applic. 1336/58, reads:

"The scope of work performed under Alteration Application No. 1640/57 is so extensive as to constitute a new building. Such alteration is not deemed to come within the purview of Section J41-2.4, Administrative Code.

In addition to the foregoing reason(s), premises not subject to the provisions of the Emergency Housing Rent Control Law are ineligible for tax exemption and abatement under the provisions of Subdivision k, Section J41-2.4, Administrative Code, as enacted by Local Law No. 14-1959, effective January 19, 1959."

and

WHEREAS, the applicant states that the building is 50 feet by 87 feet 6 inches in area, 5 stories, 47 feet 9 inches high, of class 3 construction, located in residence use, B area, class 1½ height district, that original buildings were built in 1880 as old law tenements, now altered and classified by the Building Department on Certificate of Occupancy 49586/58 issued against Alt. Applic. 1640/57 as an old law tenement Class "A"; that the present use and occupancy is: Cellar—one janitor's apartment, boiler room, storage and porter's room (no sleeping); 1st to 5th floors—6 apartments on each story; and

WHEREAS, the applicant states that an Alteration Application 1640/57 was filed with and approved by the Building Department; that all work was completed as indicated by the issuance of the certificate of occupancy; that an application was filed for a certificate of reasonable costs, that was disapproved by the Building Department; and

WHEREAS, the Board is not passing on the question raised as to the provisions of the Emergency Rent Law as not within the jurisdiction of the Department.

MINUTES

Resolved, that the decision of the Borough Superintendent dated March 4, 1959, acting on Alt. Application 1640/57 and Misc. Applic. 1336/58 be and it hereby is modified and that the appeal be and it hereby is *granted, reversing* the decision of the Borough Superintendent.

279-59-A

APPLICANT—Herbst and Rusciano, for Anthony La Vecchia and Edward Stachnik, owners.

SUBJECT—Application April 28, 1959—Appeal from a decision of the Borough Superintendent re proposed Bowling Alleys, local retail district, permit revoked—issued in error.

PREMISES AFFECTED—1630-1640 Gun Hill Road, southeast corner of Kingsland Avenue, Block 4538, Lots 9, 13, 14, 15, 20, 22 and 24, Borough of The Bronx.

APPEARANCES—

For Applicant: Leonard F. Rothkrug, Seymour Herbst, Edward P. Stachnik and Anthony La Vecchia.

For Opposition: S. Peter La Rosa, Theresa M. Enright and E. Gluck.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—Appeal from a decision of Borough Superintendent dated April 1, 1959.

Affirmative: Commissioner Sleeper, Commissioner Fox. 2

Negative: Chairman Foley, Vice Chairman Kleinert and Commissioner Becker 3

THE VOTE TO GRANT—Appeal from a decision of Borough Superintendent dated June 10, 1959.

Affirmative: Commissioner Sleeper, Commissioner Fox. 2

Negative: Chairman Foley, Vice Chairman Kleinert, and Commissioner Becker 3

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated April 1, 1959 read:

"You are hereby advised that the above Permit No. 624-1959—and approved application—N.B. Applic. 119-1959—are revoked as of this day.

You are directed and ordered to stop work on the above project.

This action is taken in accordance with the authority vested in me under the provisions of Section C26-180.0 of the Administrative Code because of the fact that the approvals heretofore granted were issued in error, which action should not have been taken.

The premises in question are located in a Local Retail Zone upon which it had been proposed to erect bowling alleys and hotel combination in accordance with plans submitted with the above application.

A review of the plans by me indicates that the proposed use is in violation of Section 4-C Zoning Resolution inasmuch as bowling alley use is specifically prohibited in a Local Retail District. The provision mentioning such permitted use refers only to such use as is accessory to a hotel.

It is my decision that in the instant case the plans show a separate and distinct use for bowling alleys which cannot be considered by me to be a use incorporated within a hotel as such use might have been permissible in a Local Retail District.

You are hereby ordered to restore the ground conditions to their former state so as to prevent harm to persons presently jeopardized by the excavation thus far performed under the above permit."

and

WHEREAS, the decision of the Borough Superintendent, dated June 10, 1959 on N.B. Applic. 119/59, reads:

"1. Application for the erection of a building for conjunctive use for a hotel and bowling alleys, located on a lot within a Local Retail District, is contrary to Art.

II Sect, 4-c as it refers back to Art. II Sect. 4-B (a) Zoning Resolution and is hereby disapproved.

and

WHEREAS, the applicant states that the proposed building will be 178.9 feet by 347.86 feet, irregular in area, 2 stories and cellar, 21 feet 1 inch high, of class 3 construction, located in local retail use, D area, class ½ height district, and proposed to be used and occupied as follows: Cellar—laundry room, mattress room, employee locker room, boiler room, offices, 7 hotel rooms and 16 bowling alleys, 120 persons; 1st floor—13 hotel rooms and 16 bowling alleys, cocktail lounge, and locker rooms, meeting room, hotel lobby and offices, 12 persons; 2nd floor—15 hotel rooms; that there is no question of construction, multiple dwelling law or area and height requirements; that the only question involved is the erection of bowling alley and a hotel in local retail use district; and

WHEREAS, the Department of Buildings approved the drawings that are part of this appeal; that the permit was issued and work commenced; that on April 1, 1959 the Building Department revoked approval and permit for the following reason as stated by the Borough Superintendent of the Bronx;

"A review of the plans by me indicated that the proposed use is in violation of Section 4-C Zoning Resolution inasmuch as bowling alley use is specifically prohibited in a Local Retail District. The provision mentioning such use as is *accessory* to a hotel."

and

WHEREAS, the applicant contends that the proposed uses are permitted in a local retail use district; that the wording of the law is:

"(a) . . . or bowling alley other than in a hotel."; that the Borough Superintendent is acting wrongfully when he interprets the words "other in a hotel" to mean 'except use as is necessary to a hotel'; that the proposed bowling alleys are in the same building as the hotel and thereby permitted in a local retail use district."

and

WHEREAS, the premises were inspected by a committee of the Board and the Board has made a study of this appeal.

Resolved, the the decision of the Borough Superintendent, dated April 1, 1959, acting on Permit No. 624-1959 and N.B. Applic. 119-1959 be and it hereby is *affirmed* and the appeal be and it hereby is *denied*.

Resolved further, that the decision of the Borough Superintendent dated, June 10, 1959, acting on N.B. Applic. 119-1959 be and it hereby is *affirmed* and the appeal be and it hereby is *denied*.

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on December 9, 1958, after due notice by publication in the Bulletin; laid over to December 16, 1958, for inspection and decision; hearing closed; and

WHEREAS, the district maps accompanying the Zoning Resolution show that the site, Story Avenue and Hermany Avenue are in local retail and residence use, D area, class ½ height districts; Castle Hill Avenue is in a local retail use, D area, class ½ height district; *Hermany Avenue* is in a residence use, D area, class ½ height district; that as of July 25, 1916 the premises were in a class C area district and a class 1¼ height district and that part of the premises within 100 feet of Castle Hill Avenue was in a business use district; that on April 26, 1945 the present height district came into effect and the area district changed to a D-1 area district; that the present area designation became effective September 23, 1954 and the present use designation became effective on December 28, 1953; and

WHEREAS, the decision of the Borough Superintendent, dated May 7, 1958 acting on N.B. Applic. No. 82-58, reads:

"1. Proposed use gasoline service station, lubrication, minor auto repairs, car washing, store, utility room and parking of cars awaiting service in a lot partly within a local retail use district and partly within residence use district is contrary to Article II Sec. 4c & Sec. 3 of the Z.R.

CORRECTIONS

2. Entrance to service station, show window and sign within 75 ft. of residence use district is contrary to Sec. 7A of the Zoning Res."

and

WHEREAS, the applicant states that the premises consist of a plot, 103.07 feet frontage by 105 feet in depth, presently vacant; that it is proposed to erect a modern gasoline service station consisting of twelve approved type buried gasoline tanks and four dispensing pumps; that the contemplated accessory building will be one story in height, of class 3 construction having a frontage of 44 feet and a depth of 27 feet 8 inches and will contain the conjunctive uses of lubritorium, minor auto repairs, car washing, store and utility room; that a portion of the open site, not required for the gasoline service station, will be reserved for parking of cars awaiting service; and

WHEREAS, the applicant contends that Castle Hill Avenue is a heavily trafficked auto lane and as such the proposal is entirely within keeping at this point; that the development of this site with a modern gas station will provide this area with a much needed and required automotive service; that there are sufficient stores within the area to meet the needs of the people in this neighborhood; that the stores in block 3685, lots 40, 41 and 43 are non-conforming uses within the affected area; that lot No. 11, to the east, is under the same ownership; so that adjoining properties cannot be affected; and

WHEREAS, the applicant further contends that the show window and signs within 75 feet of the residence use district cannot possibly affect the residence use district, as the building is set 44 feet in from the Hermany Avenue building line; that 30 foot curb cut is required for proper operation of the service station; and

WHEREAS, the applicant states that the present owner has held title to the property since September 2, 1954 and April 25, 1955 and that the assessed valuation of land is \$11,000; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision e of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7e for a term of fifteen years to permit the premises to be occupied as a gasoline service station and uses lawfully accessory thereto substantially as proposed and as indicated on plans filed with this application marked "Received May 8, 1958", 4 sheets, *on condition* that all buildings and uses now on the premises shall be removed and the plot shall be leveled substantially to the grade of Castle Hill Avenue and Hermany Avenue and shall be constructed and arranged as indicated on plans above cited; that the accessory building shall have no cellar and shall be faced on all sides with face brick and shall comply in a other respects with the requirements of the Building Code; that pumps shall be of a low approved type erected not nearer than fifteen feet to the street building line; that gasoline storage tanks shall not exceed twelve 550 gallon approved tanks; that where not built upon, the balance of the premises shall be paved with concrete or asphaltic pavement; that curb cuts shall be restricted to two curb cuts to Castle Hill Avenue each 30 feet in width and one to Hermany Avenue of similar width; that along the interior lot line there shall be erected a woven wire fence of the chain link type not less than five feet six inches in height including a masonry base and with suitable terminating posts at the building lines; that such portable fire-fighting appliances shall be maintained as the Fire Commissioner shall direct; that under Section 7A any use considered contrary thereto may be permitted provided the requirements of this resolution are complied with; that signs shall be restricted to permanent signs attached to the

facade of the accessory building and to the illuminated globes of the pumps, excluding all roof signs and advertising devices but permitting the erection within the intersection, where shown, of one post standard for supporting a sign, which may be illuminated, advertising only the brand of gasoline on sale and permitting such sign to extend beyond the building line for a distance of not more than four feet, at right angles to Castle Hill Avenue; that at such intersection there shall be erected a block of concrete extending for a distance of five feet along either street building line from the intersection and not less than twelve inches in height; that under Section 7e for a similar term there may be parking of cars provided such parking is maintained so as not to interfere with the servicing of the station; that all permits shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

* Correction—In The Resolution portion the address corrected to read: *Hermany Avenue* is in a residence use—etc.—and also in The Resolution portion the depth of the premises corrected to read *105 feet*— as indicated in italics.

*CORRECTION

734-54-SM

APPLICANT—Seelye, Stevenson, Value and Knecht, for Granco Steel Products Company, owner.

SUBJECT—Application reopened February 11, 1958 for amendment of resolution as to additional gauges of Corruform and Tufcor—re Corruform and Tufcor Steel Deck (fire resistive roof for industrial construction); previously approved.

APPEARANCES—

For Applicant: William A. Faiella.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Murdock, Vice Chairman Keating, Commissioner Kleinert, Commissioner Foley and Commissioner Sleeper 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 734-54-SM

Subject: Amendment to resolution as to additional gauges of Corruform and Tufcor.

Seelye, Stevenson, Value and Knecht for Granco Steel Products Co. Granite City, Illinois, requested by letter dated January 24, 1958 that the resolution adopted June 28, 1955 and as amended January 24, 1956 be amended so as to include additional sections of Corruform and Tufcor. The application was reopened by a vote of the Board February 11, 1958.

Purpose

The material is used as an incombustible roof deck.

Description

The material Corruform is a galvanized corrugated steel deck with a corrugation pattern of 2 7/16 inches by 9/16 inches having a moment of inertia of 0.010, inches⁴ per foot of width.

The 26 gauge Tufcor is a galvanized corrugated steel deck with a corrugation pattern of 3 1/2 inches by 7/8 inches having a moment of inertia of 0.073 inches⁴ per foot of width.

The 24 gauge Tufcor is a corrugated steel deck with a corrugation pattern of 4 1/2 inches by 1 5/16 inches having a moment of inertia of 0.089 inches⁴ per foot of width.

CORRECTIONS

Inspection and Test

The material was tested at the Porete Co. plant in New Jersey by the Pittsburgh Testing Laboratory in accordance with the requirements of C26-626.0 Administrative Building Code. The deck was tested with a 2 inch topping of insulation unreinforced concrete *known as Poretherm*.

The results were as follows:

Type	Span	Ult Load	Area under Test	Allow Load
Corruform	4'-0"	2560	8.6 Sq. Ft.	59.6 p.s.f.
26 ga. Tufcor	6'-0"	5160	15.0 Sq. Ft.	68.6 p.s.f.
24 ga. Tufcor	8'-0"	4460	20.0 Sq. Ft.	44.6 p.s.f.

Allowable load is figured on the basis of the ultimate load divided by the area under test and then divided by a factor of safety of 5 as the construction was tested as a semi continuous span.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends that the resolution adopted June 28, 1955 and amended January 24, 1956 under Cal. No. 734-54-SM be amended so as to include the additional sections of Corruform and Tufcor as herein described for superimposed loads and spans as set forth above for use in New York City under the provisions of C26-618 and C26-619.0 for roof construction and further the Committee recommends that any other approved *cellular* concrete *without aggregate* may be used as an insulating concrete on top of the Corruform and/or Tufcor and further that all other requirements of the resolution adopted June 28, 1955 and as amended January 24, 1956 be complied with. The Committee is of the opinion that, as the welding to the supporting beams affords lateral bracing, that additional lateral bracing between beams may be dispensed with except on steel joist construction where bridging is required under C26-519-0 Administrative Building Code.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution of June 28, 1955 and January 24, 1956 in accordance with the above report.

* Correction—In the Report of Committee on Test, under the heading *Inspection and Test*, the words "*known as Poretherm*" inserted and under the heading of *Recommendation*, the words "*cellular*" and "*without aggregate*" inserted, all as indicated in italics.

WHEREAS, the applicant requested an extension of time to obtain permits and complete the work.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on May 20, 1958 only as to the time to obtain permits and complete the work, so that as *amended* this portion of the resolution shall read:

"that in view of the statement by the applicant that plans have *not* been *filed with* the Department of Buildings, that all permits required, including a certificate of occupancy, shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution from the date of this *amended* resolution." (N.B. Applic. 690/57)

*Correction—In the resolution, the phrase corrected to read "that in view of the statement by the applicant that plans have *not* been *filed with* the Department of Buildings"—etc. . . . as indicated in italics.

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result.

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the building zone resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—postage to be added if the forms are forwarded by mail.

RULES

Fire Drill Rules, Adopted by the Board of Standards and Appeals, October 5, 1923

(593-23-SR)

DEFINITION OF "FIRE DRILL"

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 thereof and in any other building in which such drills are required by the Fire Commissioner pursuant to the power conferred in section 491 of the New York City Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenants shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captain's) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned by consent in writing from Fire Commissioner.

Rule 4. Duties of Searchers.

The MALE AND FEMALE SEARCHERS shall search all toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

Rule 5. Duties of Street Alarm Box Runner.

The STREET-ALARM-BOX-RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM-BOX-RUNNER shall report to the Foreman for orders, and if his services are not required he shall promptly file out of the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET-ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

RULES

Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the Fire Department, any fire that may occur. When it is necessary for the fire brigade to respond to different floors in the building they shall not use the stairways or fire escapes while the occupants are escaping from the premises.

Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exit doors leading to fire escapes, stairways, and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion.

EXIT GUARDS shall remain at their stations until all of the occupants of the building have passed their station. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions.

Note: Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS.

On reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct all occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the

persons on the premises engaged at work for a factory, and drills shall be conducted at least twice, each year in which all of the persons on the premises shall participate simultaneously.

Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNERS, LESSEE OR TENANT, who supervises the FIRE DRILL at the building shall submit to an examination by the Division of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs, requiring winding are rewound after each alarm and kept in normal condition for operation.

Rule 11. Duties of Engineer.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc. are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills, showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

NOTICE

APPEALS AS TO MULTIPLE DWELLINGS

The Legislature, under Chapter 333 of 1948, has clarified Section 60 of the Multiple Dwelling Law by describing the agency authorized to grant variances under this Section, so as clearly to mean in New York City—the Board of Standards and Appeals.

Chapter 508 of 1948 has also been adopted by the Legislature, amending the Multiple Dwelling Law to provide, under new Section 310, for a Board of Appeals. By description the Board of Appeals means in New York City—the Board of Standards and Appeals. Section 310 provides as follows as to appeals:

LAWS OF NEW YORK—By Authority Chapter 508 of 1948

§ 310. Board of appeals. 1. As used in this section "board" shall mean the agency of a city constituted as a board and authorized by law both to grant variances of the zoning resolution and to make rules supplemental to laws regulating construction, maintenance, use and area of buildings.

2. Where the compliance with the strict letter of this chapter causes any practical difficulties or any unnecessary hardships the board shall have the power, on satisfactory proof at a public hearing, provided the spirit and intent of this chapter are maintained and public health, safety and welfare preserved, and substantial justice done, to vary or modify any provision or requirement of this chapter, or any rule, regulation, supplementary regulation, ruling or order of the department with respect to the provisions of this chapter, as follows:

a. For multiple dwellings and buildings existing on July first, nineteen hundred forty-eight, provisions relating to:

- (1) Height and bulk;
- (2) Required open spaces;
- (3) Minimum dimensions of yards or courts; or
- (4) Means of egress.

b. For multiple dwellings and buildings erected or to be erected after July first, nineteen hundred forty-eight, and

such dwellings thereafter altered or to be altered, provisions relating to:

- (1) Required open spaces; or
- (2) Minimum dimensions of yards or courts.

Variations or modifications may be granted pursuant to this paragraph b only on condition that open areas for light and air are provided which are at least equivalent in area to those required by the applicable provisions of this chapter.

3. An application for such a variance or modification may be made by any person aggrieved or by the head of any public agency, within such time and under such procedure, conditions and rules as may be prescribed by the board. The board shall fix a reasonable time for the hearing of an application and shall require that due notice be given of the time and place of such hearing to the applicant and to the department. Any person or a duly authorized representative of any public agency may appear at any such hearing and be heard on any such application.

4. In every case the board shall state the reason or reasons for its decision. All decisions of the board shall be subject to review in the same manner as is provided by law for review of decisions of such board respecting variances of the zoning resolution.

5. A record of all decisions of the board, indexed according to the section or sections of this chapter affected thereby, shall be kept in the office of the board. Such record shall be open to public inspection at all times during business hours.

CONTENTS

Docket.

Notice of Hearing Calendar.

Corrections Affecting Calendar Numbers 91-59-BZ and 486-58-BZ.

Notice of Public Hearing of Proposed Amendment to Oil Burner Rules.

Rules Pertaining to Smoking in Protected Portions of Factories, Etc.

Notice of Appeals as to Multiple Dwellings.

NOTICE

In accordance with sound management practice and due to budgetary limitations, two changes have been instituted in the Bulletin of the Board of Standards and Appeals. These changes, in compliance with the requirements of Chapter 27, Section 665 of the Charter of the City of New York and the rules of the Board, are as follows:

1—CALENDAR: Notices of public hearing on applications for zoning variances will be published twice: first publication, listing new cases set for hearing, in the Bulletin available to the public at least 14 days before the date of hearing; second publication, in the last Bulletin available to the public immediately prior to the hearing date. The second publication will be augmented with a listing of cases laid over from previous hearings. Attention is directed to the MINUTES of such previous hearings, where the reasons for laid over cases will have been published. Notices of public hearing on applications for approval of materials and appliances will be published once, at least 10 days prior to the hearing date.

2—MINUTES: The publication of the "digest" of the applicant's statement has been discontinued, except that the administrative orders, decisions, etc., which are the subject of each application or appeal will be published. The summary of information given in the Appeal Form (Form A) shall be published for Administrative Appeals. The Board will continue to publish such other matters as it may deem advisable.

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

CALENDAR

DOCKET

New Cases Filed up to September 1, 1959.

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on June 23, 1959 after due notice by publication in the Bulletin; laid over to July 7, 1959, at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated February 10, 1959 acting on Alt. Applic. No. 3831-58, reads:

"1. Extension of existing non conforming use & additional use for storage of bldg. materials within a residential use, violates Art. 2 Sect. 3 of Zoning Resolutions."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision c of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c, to permit in a residence use district the extension of the present sawmill and lumber yard *and* the additional use for the storage and sale of building materials in accordance with plans filed with this application dated February 17, 1959, 5 sheets, *on condition* that there be no extension of the building; that in all other respects all laws, rules and regulations applicable shall be complied with; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

*Correction—In the resolution, in reference to the extension of the present sawmill and lumber yard, the word 'for' changed to '*and*', in relation to the additional use for the storage and sale of building materials . . . etc., as indicated in italics.

*CORRECTION

The minutes of the meeting of the Board of Standards and Appeals held on February 25, 1959, as they appeared in Bulletin No. 9, Vol. 44, hereby corrected to read as follows:

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on January 27, 1959 after due notice by publication in the Bulletin; laid over to February 25, 1959, for inspection and decision; hearing closed; and

WHEREAS, the district maps accompanying the Zoning Resolution show that the site, Leavitt Street, Northern Boulevard, 35th Avenue and Union Street are in a retail use, B area, class 1½ height district; that as of July 25, 1916 the property was zoned as a business district and a C area district, and the present use and area designations became effective on April 8, 1946; that the height designation has not been changed since July 25, 1916 and no zoning amendment relating to this property is pending at the present time; and

WHEREAS, the decision of the Borough Superintendent, dated July 14, 1958 acting on Alt. Applic. No. 1321-58, reads:

"1. The proposed change in use from stores and service station for own cars only to stores for sale and storage of auto accessories, motor vehicle repair shop (no painting or spraying) and parking of cars waiting to be serviced on the unbuilt portion of the lot on a plot located in a retail use district is contrary to Art. 2. Sec. 4-A of the Z. R."

and

WHEREAS, the applicant states that the premises consist of a plot, 75 feet frontage by 89.5 feet in depth, irregular, on which Certificate of Occupancy No. 1944-31 was issued by the Department of Buildings for stores—auto showroom—service station for own cars only; that the premises have been altered many times since its original erection and the service station—motor vehicle repair—has continually been in use; that it is proposed to change the nomenclature to store for sale and storage of auto accessories, motor vehicle repair shop—no painting or spraying, and parking of more than five cars awaiting service on the unbuilt portion of the plot; and

WHEREAS, the applicant states that due to a violation issued by the Division of Fire Prevention, stating that the existing Certificate of Occupancy permitted servicing of own cars only, and since the auto showroom use no longer exists at the premises, that this is an appropriate case for the Board to exercise its discretion; and

WHEREAS, the applicant contends that the proposed uses have been established for many years and the premises have been so used continuously; that a grant of this application would do substantial justice in that it would clarify the owner's position without adversely affecting anyone, without altering the essential character of the neighborhood, without affecting values of nearby properties, without creating or augmenting traffic or parking congestion, without affecting pedestrian safety and without impairing light and ventilation of nearby properties; and

WHEREAS, the applicant states that the present owner has held title to the property since May 27, 1946; that the assessed valuation of land is \$6,500 and of the building \$20,000 making a total of \$26,500; that the building was erected in 1931; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions c and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7c, to permit the use of the premises as store for sale and storage of auto accessories and parking of cars waiting to be serviced on the unbuilt portion of the plot as indicated on plans filed with this application marked, "Received August 14, 1958," 3 sheets, and "November 12, 1958," 1 sheet, *on condition* that the building shall not be increased in height or area and in all other respects shall comply with all laws, rules and regulations applicable thereto; that there shall be erected on the lot lines of the portion of the premises proposed to be occupied for parking a woven wire fence of the chain link type on a masonry base to a total height of not less than 5 feet, 6 inches, including the front line on Leavitt Street in which there shall be a gate with curb cut opposite as now existing; and that under Section 7i, there may be minor repairs with hand tools only for adjustments, without painting or spraying; that such portable fire fighting appliances shall be maintained as the Fire Commissioner shall require and that all permits shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

*Correction—The wording of the resolution clarified as to permitting the storage of auto accessories and the parking of cars etc.—as indicated in italics.

PUBLIC HEARING

CAL. NO. 217-21-SR

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals *Friday*, September 25, 1959 at 10 A.M. in Room 909, at 80 Lafayette Street, Manhattan, on the following proposed amendment to the rules covering the installation and use of oil burning equipment and the storage of oils used in construction therewith. New matter in italics.

Rule 10. Permits, Plants, Inspection and Tests of Storage Tanks and Piping.

10.3 Inspection and Tests of Installations of Storage Tanks and Piping.

10.3.3 Defective tanks, if repaired by welding, shall have all oil removed and shall be purged of all explosive gases or vapors. *Fuel oil tanks may be repaired with non-metallic materials when such materials and methods are approved by the Board.*

MAX H. FOLEY, *Chairman.*

Applicants, under the zoning resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying proper owners, they may obtain such copies at

the Board of Standards and Appeals, at 80 Lafayette Street, Manhattan, at five cents each—postage to be added if the forms are forwarded by mail.

RULES

RULES RELATING TO SMOKING IN PROTECTED PORTIONS OF FACTORIES, AND IN SPECIAL CLASSES OF OCCUPANCIES.

Adopted by the Board of Standards and Appeals August 13, 1918, effective September 9, 1918, under the powers conferred upon the Board by Section 718-a, Subsections 2 and 3 (Old Charter), to supplement Section 283 of the Labor Law (Old Section 83c).

[Cal. 1262-18-SR]

Labor Law

Section 283. Smoking.

1. No person shall smoke in a factory. A notice of such prohibition stating the penalty for violation thereof shall be kept posted in every entrance hall, elevator, stair hall and room of a factory in English, and in such other languages as the fire commissioner of the city of New York in such city and elsewhere the commissioner shall direct.

2. The board in its rules may permit smoking in protected portions of a factory, or in such classes of occupancies where in its opinion the safety of the employees will not be endangered thereby. The fire commissioner of the city of New York in such city and elsewhere the commissioner may issue such permits in accordance with rules adopted by the board.

3. The fire commissioner of the city of New York in such city and elsewhere the commissioner shall enforce this section.

RULE 1. Permit.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the administrative official.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stair hall or room throughout the building, as well as in every elevator car, in English, and also in such other language or languages—as the administrative official shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the administrative official.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon the expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which the hours between which, and the place or places in such factory where smoking may be permitted, and this

permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the administrative official, and shall not again issue a permit for the same premises until at least one year has elapsed.

Rule 2. Permissible Cases.

Smoking may be permitted in:

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fireresisting partitions, with all openings therein protected by selfclosing fire doors, and further, unless the building is of fireproof construction or provided with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire retarding material.

(3) Such chemical fire extinguishers as the administrative official may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;
Boiler making;
Brick, terra cotta or artificial stone works;
Forge shops;
Foundries;
Iron, steel, brass or copper works;
Machine shops;
Smelting;
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the administrative official may direct are installed;

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

NOTICE

APPEALS AS TO MULTIPLE DWELLINGS

The Legislature, under Chapter 333 of 1948, has clarified Section 60 of the Multiple Dwelling Law by describing the agency authorized to grant variances under this Section, so as clearly to mean in New York City—the Board of Standards and Appeals.

Chapter 508 of 1948 has also been adopted by the Legislature, amending the Multiple Dwelling Law to provide, under new Section 310, for a Board of Appeals. By description the Board of Appeals means in New York City—the Board of Standards and Appeals. Section 310 provides as follows as to appeals:

LAWS OF NEW YORK—By Authority Chapter 508 of 1948

§ 310. Board of appeals. 1. As used in this section "board" shall mean the agency of a city constituted as a board and authorized by law both to grant variances of the zoning resolution and to make rules supplemental to laws regulating construction, maintenance, use and area of buildings.

2. Where the compliance with the strict letter of this chapter causes any practical difficulties or any unnecessary hardships the board shall have the power, on satisfactory proof at a public hearing, provided the spirit and intent of this chapter are maintained and public health, safety and welfare preserved, and substantial justice done, to vary or modify any provision or requirement of this chapter, or any rule, regulation, supplementary regulation, ruling or order of the department with respect to the provisions of this chapter, as follows:

a. For multiple dwellings and buildings existing on July first, nineteen hundred forty-eight, provisions relating to:

- (1) Height and bulk;
- (2) Required open spaces;
- (3) Minimum dimensions of yards or courts; or
- (4) Means of egress.

b. For multiple dwellings and buildings erected or to be erected after July first, nineteen hundred forty-eight, and

such dwellings thereafter altered or to be altered, provisions relating to:

- (1) Required open spaces; or
- (2) Minimum dimensions of yards or courts.

Variations or modifications may be granted pursuant to this paragraph b only on condition that open areas for light and air are provided which are at least equivalent in area to those required by the applicable provisions of this chapter.

3. An application for such a variance or modification may be made by any person aggrieved or by the head of any public agency, within such time and under such procedure, conditions and rules as may be prescribed by the board. The board shall fix a reasonable time for the hearing of an application and shall require that due notice be given of the time and place of such hearing to the applicant and to the department. Any person or a duly authorized representative of any public agency may appear at any such hearing and be heard on any such application.

4. In every case the board shall state the reason or reasons for its decision. All decisions of the board shall be subject to review in the same manner as is provided by law for review of decisions of such board respecting variances of the zoning resolution.

5. A record of all decisions of the board, indexed according to the section or sections of this chapter affected thereby, shall be kept in the office of the board. Such record shall be open to public inspection at all times during business hours.

Notice of Hearing Calendar.

Notice of Public Hearing of Proposed Amendment to Oil Burner Rules.

Corrections Affecting Calendar Numbers 647-57-SA, 157-58-SA, 710-51-SM.

Notice of Appeals as to Multiple Dwellings.

NOTICE

In accordance with sound management practice and due to budgetary limitations, two changes have been instituted in the Bulletin of the Board of Standards and Appeals. These changes, in compliance with the requirements of Chapter 27, Section 665 of the Charter of the City of New York and the rules of the Board, are as follows:

1—CALENDAR: Notices of public hearing on applications for zoning variances will be published twice: first publication, listing new cases set for hearing, in the Bulletin available to the public at least 14 days before the date of hearing; second publication, in the last Bulletin available to the public immediately prior to the hearing date. The second publication will be augmented with a listing of cases laid over from previous hearings. Attention is directed to the MINUTES of such previous hearings, where the reasons for laid over cases will have been published. Notices of public hearing on applications for approval of materials and appliances will be published once, at least 10 days prior to the hearing date.

2—MINUTES: The publication of the "digest" of the applicant's statement has been discontinued, except that the administrative orders, decisions, etc., which are the subject of each application or appeal will be published. The summary of information given in the Appeal Form (Form A) shall be published for Administrative Appeals. The Board will continue to publish such other matters as it may deem advisable.

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

CALENDAR

DOCKET

New Cases Filed up to September 8th, 1959.

Cal. No. Dept. Premises Affected

APPLICANT—Leonard F. Rothkrug, for Baychester-Hacker, Incorporated, owner; Park Stations Incorporated, lessee.

SUBJECT—Application April 2, 1959—decision of the Borough Superintendent, under section 7e of the Zoning Resolution, to permit in a residence use district the erection and maintenance of a gasoline service station with accessory minor auto repairs with hand tools only, non-automatic car washing, office and sales, and parking of cars awaiting service for a temporary term of fifteen (15) years.

PREMISES AFFECTED—4210 Baychester Avenue, northeast corner of Bussing Avenue, Block 5023, Lot 29, Borough of The Bronx.

115-59-BZ

APPLICANT—Robert J. Crinnion for Gerald Corporation, owner.

SUBJECT—Application February 25, 1959—decision of the Borough Superintendent, under section 7h of the Zoning Resolution, to permit the parking and storage of more than five (5) motor vehicles in a residence use district.

PREMISES AFFECTED—1776-1784 Longfellow Avenue, east side, 80 feet north of East 174th Street, Block 3011, Lots 5 and 9, Borough of The Bronx.

MAX H. FOLEY, *Chairman.*

PUBLIC HEARING

CAL. NO. 217-21-SR

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals Friday, September 25, 1959 at 10 A.M. in Room 909, at 80 Lafayette Street, Manhattan, on the following proposed amendment to the rules covering the installation and use of oil burning equipment and the storage of oils used in construction therewith. New matter in italics.

Rule 10. Permits, Plants, Inspection and Tests of Storage Tanks and Piping.

10.3 Inspection and Tests of Installations of Storage Tanks and Piping.

10.3.3 Defective tanks, if repaired by welding, shall have all oil removed and shall be purged of all explosive gases or vapors. *Fuel oil tanks may be repaired with non-metallic materials when such materials and methods are approved by the Board.*

MAX H. FOLEY, *Chairman.*

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 647-57-SA.

Subject: Sun-Ray Conversion Oil Burner, Models J-3, J-5 and J-7.

Sun-Ray Burner Mfg. Corporation, Jamaica, New York filed August 1, 1957 an application with the Board of Standards and Appeals for approval of the Sun-Ray Conversion Oil Burner, Models J-3, J-5 and J-7 under the provisions of C19-57.0 of the Administrative Code and the Oil Burner Rules of the Board.

Purpose

Conversion burners designed to burn No. 5 fuel oil.

Description

The Sun-Ray Conversion Oil Burner is a mechanical draft pressure atomizing type of burner. It employs high tension electric ignition.

Operation of the burner is similar to that of conventional gun type burners employing primary safety controls and oil pressures not greater than 150 psi. It is suitable for installation in furnaces or boilers.

The burner is made with a built-in electric preheater as part of the nozzle assembly. It is thermostatically controlled. The purpose is to reduce the viscosity of the No. 5 fuel oil for ready atomization.

The nozzle fuel line is provided with a mechanical oil cut-off just behind the nozzle so that there is no oil in the nozzle on shut down and there is an assured column of oil on start.

The firing capacities of the various models are as follows:

J-3	—	3-6	gallons oil per hour.
J-5	—	6-12	" " " "
J-7	—	10-20	" " " "

Where the firing rate is 7 gallons or less per hour, a stack switch is usually installed for automatic shut-down in case of flame or ignition failure. In the larger sizes a photo-electric cell is used for that purpose.

Inspection and Test

A typical burner was inspected and tested at the laboratory of the applicant at 139-24 Queens Blvd., Jamaica, Queens by Asst. Engr. G. F. Sklenarik, Committee on Test.

The burner operated satisfactorily producing 11% CO₂ in the flue gases without smoke. These burners were also tested and approved by the Underwriters Laboratories under File MP-1039.

Recommendation

On the basis of the inspection and test and the data filed by the applicant, the Committee on Test recommends the approval of the Sun-Ray Conversion Oil Burner, Models J-3, J-5 and J-7, also to be marketed under the name of Petroleum Heat & Power, for use in New York City in accordance

with this report and the provisions of the Oil Burner Rules of the Board provided that each burner shall bear a label permanently affixed reading as follows: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 647-57-SA."

157-58-SA

APPLICANT—Shampaine Electric Company owner.

SUBJECT—Application March 21, 1958—Shampaine Electric Co., Automatic Sterilizers, for Hospitals, various types, approval of.

APPEARANCES—

For Applicant: Robert Lewis.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Acting Chairman Kleinert, Commissioner Foley, Commissioner Sleeper and Commissioner Fox. 4

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 157-58-SA.

Subject: Shampaine Electric Co., Automatic Sterilizers.

Shampaine Electric Co., New Rochelle, New York, filed March 21, 1958 an application with the Board of Standards and Appeals for approval of the Shampaine Electric Co. Automatic Sterilizers under the provisions of the Submerged Inlet Rules of the Board.

Purpose

The appliances are sterilizers used in hospitals.

Description

The appliances are used in hospitals for the sterilizing of utensils and surgical instruments. All the sterilizers are built with an A.S.M.E. approved body and depending on the usage; the interior chamber may be monel, nickel or stainless steel.

The heating for sterilization may be either by steam, electric or gas heat.

The water supply connection to the generators in all sterilizers is either through an approved vacuum breaker and check valve, installed in accordance with the requirements of the Submerged Inlet Rules of the Board or through a Sanitary Fill Funnel having an air gap of at least 1½ inches. The sanitary waste funnel is equipped with an air gap that is twice the diameter of the discharge orifice, but in all cases at least 1½ inches.

Inspection and Test

Details of construction of the Shampaine Automatic Sterilizers were examined by Asst. Engr. J. A. Darts,

CORRECTIONS

Committee on Test, and it was noted that all the appliances were equipped with either a vacuum breaker and check valve or an air gap.

Recommendation

On the basis of the inspection and the data filed by the applicant the Committee on Test recommends the approval of the Shampaine Electric Co. Automatic Sterilizers Models SE-1624-IS, SE-2036-FS, SE-3648-C, SE-1624-HC, SE-2036-LE, SE-5115-AS, SE-2036-GS, SE-5215-WE, SE-4284-NB, SE-2416-BE, SE-2210-IE and SE-2420-US on condition that all bedpan sterilizers and steamers and similar equipment shall be equipped with approved vacuum breaker and check valve and when supplied with a flush valve fixture, the equipment shall also be equipped with an approved vacuum breaker and waste piping shall comply with Rule 5 as required by the Submerged Inlet Rules of the Board; other types of sterilizers may be equipped with an air gap as herein described; and further that when the units are gas heated, the equipment shall also comply with the requirements of Article 12, Chapter 26, Administrative Building Code and further that all electrical work shall comply with the requirements of the Electrical Code of the City of New York and that the appliance bear a label, permanently affixed reading, "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 157-58-SA".

710-51-SM

APPLICANT—Certain-teed Products Corporation, owner.
APPEARANCES—

For Applicant: Vincent J. Lipnicki.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Chairman Kleinert, Commissioner Fox and Commissioner Becker 4

Negative: 0

Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 710-51-SM.

Subject: Amendment to resolution so as to use of "5/8 inch Firestop Bestwall" Ceiling on open web steel joists and concrete floor.

Certain-teed Products Corp., Ardsmore, Penna., requested by letter dated April 15, 1953 that the resolution adopted March 24, 1953 under Calendar Number 710-51-SM be amended so as to permit the use of the Certain-teed 5/8 inch Firestop Bestwall Gypsum Board to be used in conjunction with open web steel joists and concrete floor. The application was reopened by a vote of the Board, June 9, 1953.

Purpose

The 5/8 inch gypsum board is to be used as a substitute for lath and plaster as a one hour and 2 hour fire resistive ceiling.

Description

The material is the same as the material approved March 24, 1953 under Calendar Number 710-51-SM and when erected for use as a ceiling material with bar joists, the construction is as follows:

Type I. Bar joists spaced 24 inches on centers are welded to the load bearing beams and braced by channel bridging. Ribbed lath is placed on top of the joists and wired at each rib to each joist. Wire fabric, for the concrete reinforcement is next placed over the ribbed lath and spaced to be about 1 inch below the top surface of a 2 inch concrete slab. The concrete, of cement, sand and gravel and of a mix designed for 3800 p.s.i. is then placed on the rib lath and screeded to give a 2 inch thick slab.

The 5/8 inch Firestop Bestwall is then applied to the ceiling side of the joists in the following manner; (or one half of the ceiling 3/4 inch furring channels and the other half were 7/8 inch nailing channels were used). The channels, spaced 16 inches on centers, are attached at right angles to the bottom chords of the joists with double wire ties at each crossing of the joists. The 5/8 inch Firestop Bestwall was then fastened to the furring channels with sheet metal screws, 8 inches on center, and to the nailing channels with annular type nails spaced 6 inches on center.

Type II. This construction was basically the same as Type I except that 7/8 inch nailing channels were used throughout and two layers of 5/8 inch was used instead of one layer and the layers were so arranged that there were no through joists between the layers.

Inspection and Test

The two types of construction were tested at the Underwriters Laboratory in accordance with the requirements of C26-588.0 through C26-590 Administrative Building Code.

The Type II construction successfully met the fire and hose stream requirements of a one hour fire resistive floor and ceiling construction, as the temperature on the joists exceeds 1000° at approximately 88 minutes. Type I successfully met the requirements of a 1 hour construction.

The complete reports are on file with and are part of the record.

Recommendation

On the basis of the tests and the data submitted by the applicant, The Committee on Test recommends that the resolution adopted March 24, 1953 under Calendar Number 710-51-SM be amended so as to include the two types of construction as herein described for use in New York City; the Type I as a one hour fire resistive floor and ceiling construction and the Type II as a one hour fire resistive floor and ceiling construction on condition that the joists used in conjunction with this assembly shall be approved joists and installed in accordance with their individual approvals and further that all other requirements of the resolution adopted March 24, 1953 under Calendar Number 710-51-SM are complied with.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKELNARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby amend the above cited resolution in accordance with the above report.

*Correction.—In the Report of Committee on Test under Inspection and Test and Recommendation, Type II was corrected to read one hour fire resistive floor as indicated above in italics.

NOTICE

APPEALS AS TO MULTIPLE DWELLINGS

The Legislature, under Chapter 333 of 1948, has clarified Section 60 of the Multiple Dwelling Law by describing the agency authorized to grant variances under this Section, so as clearly to mean in New York City—the Board of Standards and Appeals.

Chapter 508 of 1948 has also been adopted by the Legislature, amending the Multiple Dwelling Law to provide, under new Section 310, for a Board of Appeals. By description the Board of Appeals means in New York City—the Board of Standards and Appeals. Section 310 provides as follows as to appeals:

LAWS OF NEW YORK—By Authority Chapter 508 of 1948

§ 310. Board of appeals. 1. As used in this section "board" shall mean the agency of a city constituted as a board and authorized by law both to grant variances of the zoning resolution and to make rules supplemental to laws regulating construction, maintenance, use and area of buildings.

2. Where the compliance with the strict letter of this chapter causes any practical difficulties or any unnecessary hardships the board shall have the power, on satisfactory proof at a public hearing, provided the spirit and intent of this chapter are maintained and public health, safety and welfare preserved, and substantial justice done, to vary or modify any provision or requirement of this chapter, or any rule, regulation, supplementary regulation, ruling or order of the department with respect to the provisions of this chapter, as follows:

a. For multiple dwellings and buildings existing on July first, nineteen hundred forty-eight, provisions relating to:

- (1) Height and bulk;
- (2) Required open spaces;
- (3) Minimum dimensions of yards or courts; or
- (4) Means of egress.

b. For multiple dwellings and buildings erected or to be erected after July first, nineteen hundred forty-eight, and

such dwellings thereafter altered or to be altered, provisions relating to:

- (1) Required open spaces; or
- (2) Minimum dimensions of yards or courts.

Variations or modifications may be granted pursuant to this paragraph b only on condition that open areas for light and air are provided which are at least equivalent in area to those required by the applicable provisions of this chapter.

3. An application for such a variance or modification may be made by any person aggrieved or by the head of any public agency, within such time and under such procedure, conditions and rules as may be prescribed by the board. The board shall fix a reasonable time for the hearing of an application and shall require that due notice be given of the time and place of such hearing to the applicant and to the department. Any person or a duly authorized representative of any public agency may appear at any such hearing and be heard on any such application.

4. In every case the board shall state the reason or reasons for its decision. All decisions of the board shall be subject to review in the same manner as is provided by law for review of decisions of such board respecting variances of the zoning resolution.

5. A record of all decisions of the board, indexed according to the section or sections of this chapter affected thereby, shall be kept in the office of the board. Such record shall be open to public inspection at all times during business hours.

PETITIONS AND ORDERS OF CERTIORARI SERVED ON THE BOARD OF STANDARDS AND APPEALS

On July 30, 1959, Petition and Order of Certiorari was served on the Board by Edward I. Condren, attorney for George Nizich et al., petitioners and owners, seeking a review of the Board's determination on June 23, 1959, amending the resolution adopted on December 2, 1958 pursuant to section 35, General City Law re proposed erection of building in bed of mapped street—54th Road; Calendar Number 566-58-A; Premises 53-24 241st Street, west side, 218.42 feet south of 53rd Avenue, Block 8176, Lot 18, Douglaston, Borough of Queens.

* * * * *

On September 2, 1959, Order and Petition was served on the Board by Leonard F. Rothkrug, attorney for Anthony La Vecchia and Edward Stachnik, owners, seeking a review of the Board's denial on July 24, 1959 of their appeal from a decision of the Borough Superintendent re proposed Bowling Alleys, local retail district, permit revoked—issued in error; Calendar Number 279-59-A; Premises 1630-1640 Gun Hill Road, southeast corner of Kingsland Avenue, Block 4538, Lots 9, 13, 14, 15, 20, 22 and 24, Borough of The Bronx.

* * * * *

On July 30, 1959, Petition and Order was served on the Board by James T. Bredin, attorney for Hillside Jamaica Home Building Corp., petitioner and owner, seeking a review of the Board's denial on June 23, 1959 of their application reopened November 5, 1958 as Vol. II—decision of the Borough Superintendent, under section 7c of the Zoning Resolution, to permit in a business and residence use district, the extension of the existing parking lot into the residence portion of the premises, the capacity of the proposed lot will exceed 150 cars; Calendar Number 1478-39-BZ—Vol. II; Premises 175-01 to 175-65 Hillside Avenue, northwest corner of Edgerton Boulevard, Block 9835, Lots 16, 18 and 61, Jamaica, Borough of Queens.

COURT DECISIONS

Matter of Yates Construction Corp. vs. Board:—On July 8, 1958 the Board granted a variance under Sections 7c and 21 of the Zoning Resolution, to permit on a plot partly in a C area and partly in an E-1 area district, the erection of a six-story multiple dwelling extending into the E-1 area district; the portion in the E-1 area district occupies more than the permitted area, eliminates the required setback and side yard and having less than the required outer court; Calendar Number 209-58-BZ; premises 1140-1146 Pelham Parkway South and 2140-2150 Williamsbridge Road, southeast corner, Block 4310, Lots 1 and 53, Borough of The Bronx.

At Special Term, Supreme Court, Mr. Justice Carney affirmed the Board's determination and granted the motion for an order to vacate the order of certiorari, to dismiss the petition. (N. Y. Law Journal, August 4, 1959, page 3).

* * * * *

Matter of Schwinger vs. Murdock:—On June 24, 1958, the Board granted a variance under Section 7h of the Zoning Resolution to permit in a residence use district, the use of the vacant lot for the parking and storage of more than five motor vehicles, for a term of five years; Calendar Number 994-57-BZ; premises 1627-1631 Undercliff Avenue, west side, 349.8 feet south of West 176th Street, Block 2880, Lot 129, Borough of The Bronx.

Upon court review, Mr. Justice Chimera at Supreme Court, Special Term, Bronx County, affirmed the Board's decision and dismissed the petition. (N. Y. Law Journal, August 19, 1959, page 4).

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

258-40-SM—Vol. II

APPLICANT—The Celotex Corporation, owner—additional acoustical tile.

APPEARANCES—

For Applicant: John H. Walsh.

ACTION OF BOARD—Resolution amended in accordance with the report of and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 258-40-SM—Vol. II.

Subject: Reopen and amend as to additional tile.

The Celotex Corp., New York, requested by letter dated June 15, 1959 that the resolution adopted May 7, 1940 be reopened and amended so as to include an additional tile—Muffletone Ceiling panels.

Purpose

The material is an incombustible acoustical tile.

Description

The material is an acoustical tile made of mineral fibers pressed together and held together by a binder. It is manufactured on a paper machine with the thickness controlled by mechanical calendars and is sized as required. The thickness of the tile is $\frac{3}{4}$ inch and varies in size up to 24" x 48".

Inspection and Test

The material was tested at the Armour Research Foundation and was found to be incombustible in accordance with the requirements of Federal Spec. SS-A-1188.

The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends that the resolution adopted May 7, 1940 and amended through May 27, 1958 under Calendar Number 258-40-SM—Vols. I & II be reopened and amended so as to include Muffletone Ceiling Panels; an incombustible acoustical tile, on condition that the requirements of the resolution adopted May 27, 1958 under Calendar Number 258-40-SM—Vol. II be complied with and further that the tile shall be installed in an approved suspension system.

(Sgd.) WILLIAM A. NOLAN,
Director,

JOHN A. DARTS,
Assistant Engineer,

GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

650-47-SM

APPLICANT—Building Products Corp., owner—amendment, additional size masonry units.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Resolution amended in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 650-47-SM.

Subject: Amendment to resolution as to additional size masonry units.

Building Products Corp., Bronx, New York, requested by letter dated November 26, 1957 that the resolution adopted October 15, 1947 and amended at various times through February 27, 1951 be amended so as to include additional sizes of masonry units. The application was reopened by a vote of the Board, January 7, 1958.

Purpose

The materials are cinder blocks, used in masonry construction.

Description

The blocks are manufactured in the same manner and of the same mix as the blocks previously approved. The only difference being in the size.

Inspection and Test

Samples of the block were tested at Manhattan College, in accordance with the requirements of C26-309.0 Administrative Building Code. The results were as follows:

4" x 9" x 18" Hollow Cinder	
Compressive Strength	= 954 p.s.i.
Absorption (lbs. per cu. ft.)	= 12
4" x 9" x 18" Solid Cinder	
Compressive Strength	= 1362 p.s.i.
Absorption (lbs. per cu. ft.)	= 9.42
6" x 9" x 18" Hollow Cinder	
Compressive Strength	= 1146 p.s.i.
Absorption (lbs. per cu. ft.)	= 9.87
6" x 9" x 18" Solid Cinder	
Compressive Strength	= 2050 p.s.i.
Absorption (lbs. per cu. ft.)	= 13.92

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends that the resolution

adopted October 15, 1947 and amended at various times through February 27, 1951 under Calendar Number 650-47-SM be amended so as to include the additional size load bearing blocks as herein described, on condition that the requirements of the resolution adopted October 15, 1947 under Calendar Number 650-47-SM are complied with.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Assistant Director,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

824-47-SA

APPLICANT—Frigidaire Sales Corp., owner—amendment, new model.

APPEARANCES—

For Applicant: Walter J. Russell.

ACTION OF BOARD—Resolution amended in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 824-47-SA.

Subject: Amendment to resolution.

Frigidaire Sales Corporation, New York, N. Y., requested by letter dated December 17, 1958 that the resolution adopted under Calendar Number 824-47-SA on January 9, 1948, and amended April 18, 1950 and February 27, 1951, be amended to include the new Model WCOZ Frigidaire Washer. The resolution was reopened by a vote of the Board, January 13, 1959.

Purpose

The Model WCOZ automatic washer is essentially the same as the models previously approved by the Board under Calendar Number 824-47-SA.

A one inch air gap is provided at the fill.

Recommendation

On the basis of the data supplied by the applicant, the Committee on Test recommends that the resolution adopted January 9, 1948 and amended April 18, 1950 and February 27, 1951, be further amended to include approval of the Frigidaire Washer, Model WCOZ, on condition that the requirements of the resolutions adopted January 9, 1948, April 18, 1950 and February 27, 1951 under Calendar Number 824-47-SA be complied with.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

912-52-SM

APPLICANT—The Dow Chemical Company, owner.—amendment, additional use.

APPEARANCES—

For Applicant: Henry Weisl.

ACTION OF BOARD—Resolution amended in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 912-52-SM.

Subject: Amendment to resolution as to additional use.

The Dow Chemical Company, New York, requested by letter dated February 12, 1959 that the resolution adopted July 27, 1954 under Calendar Number 912-52-SM be amended so as to permit the material to be marketed under an additional trade name. The application was reopened by a vote of the Board, March 3, 1959.

Purpose

The material is to be used as a combustible roof insulation.

Description

The material is the same as approved by the Board except that the Styrofoam 22 is completely enclosed in two-ply kraft paper and is known under the trade name of Roofmate.

Recommendation

The Committee on Test recommends that the resolution adopted July 27, 1954 under Calendar Number 912-52-SM be amended so as to permit the material Styrofoam 22, when enclosed in two-ply kraft paper to be marketed under the trade name Roofmate, set in hot asphalt or hot pitch as a combustible insulation, on condition that the material shall not be considered to be a structural member and shall be covered with an approved roofing.

The Committee further recommends that as Styrofoam 22 was approved to be applied to the inside surface of an exterior masonry wall without applying furring, that this type of construction be permitted under C26-632.3 Administrative Building Code, on condition that the Styrofoam 22 may be applied directly to the wall with cement mortar and the interior face of the Styrofoam 22 be covered with plaster, on condition that the requirements of the resolution adopted July 27, 1954 under Calendar Number 912-52-SM be complied with.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

566-55-SA

APPLICANT—Hydrolift Corp., owner.—amendment, additional size platform and travel lift.

APPEARANCES—

For Applicant: A. J. Portugal.

ACTION OF BOARD—Resolution amended in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 566-55-SA

Subject: Amendment to resolution as to additional size platform and travel lift.

Hydrolift Corp., New York, requested by letter dated March 17, 1959 that the resolution adopted April 10, 1956 and amended February 17, 1959 under Calendar Number

MINUTES

566-55-SA be amended so as to permit the platform to be increased in size and to increase the travel height.

Purpose

A hydrolift for use in factory and commercial establishments.

Description

The design has not been changed from the design of the lift approved February 17, 1959. The requested change being in the size of the platform; the approved platform being 4'-0" x 3'-0" and the requested size being 3'-0" x 7'-6" and the height of travel increased from 12'-0" to 15'-0".

Recommendation

The Committee on Test recommends that the resolution adopted April 10, 1956 and amended February 17, 1959 under Calendar Number 566-55-SA be amended so as to permit the platform to be increased in size to 3'-0" x 7'-6" and the travel lift to be increased to 15'-0", on condition that the load on the platform shall not exceed 1000 lbs. and that all other requirements of the resolution adopted February 17, 1959 be complied with.

791-57-SA

APPLICANT—Iron Fireman Manufacturing Co., owner.
SUBJECT—Application October 16, 1957—Iron Fireman Automatic Fuel Oil Burner, Models C-240 and C-240-SM and Petro Models P-240 and P-240-SM, approval of.

APPEARANCES—

For Applicant: B. Sheridan.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 791-57-SA.

Subject: Iron Fireman Automatic Oil Burner.

B. T. Sheridan for Iron Fireman Manufacturing Co., Inc., Brooklyn, New York, filed October 16, 1957 an application with the Board of Standards and Appeals for approval of the appliance known as the Iron Fireman Automatic Oil Burner under the provisions of Article 12, Chapter 26, Administrative Building Code and the Oil Burner Rules of the Board.

Purpose

The appliance is an oil burner for commercial installation.

Description

The oil burner is a fully automatic, mechanical draft, pressure atomizing oil burner and the capacity ranges from 8 to 24 GPH of No. 2 fuel oil.

The frame is a heavy duty casting and all parts that are exposed to the fire are made from high alloy stainless steel.

The burner is equipped with circular flange for direct mounting or it may be pedestal mounted.

An integrally mounted control panel is included with combustion control, and all wiring completed, requiring only the power supply connection to be made in the field.

The automatic electronic combustion control monitors the burner flame assuring safe combustion at all times. This control immediately shuts down the burner in event of an abnormal or unsafe condition. An instantaneous cutoff and delayed opening valve on fuel unit operates in conjunction with the safety control.

Models are available with either Minneapolis-Honeywell or Fireye Electronic Combustion Controls.

Inspection and Test

The burner has been approved by the Underwriters' Laboratory under MP 725.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the Iron Fireman Automatic Fuel Oil Burner, Models C240 & C240-SM for use in New York City when constructed as herein described and installed in accordance with the requirements of Article 12, Chapter 26, Administrative Building Code and the Oil Burner Rules of the Board, on condition that the appliance bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 791-57-SA". The Committee further recommends that the burner may be marketed under the additional trade name Petro Models P-240 and P-240-SM.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Assistant Director,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this appliance in accordance with the above report.

792-57-SA

APPLICANT—Iron Fireman Manufacturing Co., owner.
SUBJECT—Application October 16, 1957—Iron Fireman Automatic Burner, for Fuel Oil or Gas, Models C-240-GO and C-240-GO-SM and Petro Models P-240-GO, P-240-GO-SM, approval of.

APPEARANCES—

For Applicant: B. T. Sheridan.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.
THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 792-57-SA.

Subject: Iron Fireman Automatic Burner—Gas and/or Oil Fired.

B. T. Sheridan for Iron Fireman Manufacturing Co., Inc., Brooklyn, New York filed October 16, 1957 an application with the Board of Standards and Appeals for approval of the appliance known as the Iron Fireman Automatic Burner—Gas and/or Oil Fired under the provisions of Article 12, Chapter 26, Administrative Building and the Oil Burner Rules of the Board.

Purpose

The appliance is a combination gas and/or oil fired burner for domestic, commercial and industrial heating.

Description

The appliance is designed for firing rates of 1,200,000 to 3,600,000 BTU input for gas and 8 to 24 GPH for oil.

Gas Burner

The gas burner which is an integral part of the draft tube, incorporates an annular distribution manifold with multiple, radial ports located around the draft tube. A vaned, circular chamber located at the end of the draft tube provides uniform and complete mixing of air and gas. These burners are equipped to burn either natural gas or L.P. gas as specified.

Oil Burner

High pressure, twin-nozzle type. Oil nozzles are very cool while burning either fuel. Approved to operate with No. 2 oil, or lighter.

Mounting

The burner is equipped with a circular flange for mounting directly to the boiler front. A heavy cast base with an adjustable post for pedestal-type mounting is furnished as standard equipment on the Model C-240G and C-240GO burners and available as optional equipment on the Model C-240G-SM and C-240GO-SM burners.

Ignition

Separate spark ignition systems are provided for each fuel.

The ignition systems for either fuel operate independently of the other.

This assures interruption-free service in the event of a failure of either system.

Controls

Gas burners are equipped with a completely assembled gas control manifold including manual shutoff valve, pressure regulator, automatic shutoff valve, and gas glow regulating valve.

An integrally mounted control panel is included with combustion control, air flow switch, and all wiring completed, requiring only the power supply connection to be made in the field.

The automatic electronic combustion control monitors the pilot and main burner flames assuring safe combustion at all times. This control immediately shuts down the burner in

event of an abnormal or unsafe condition. This control also schedules the sequence of operation in starting and stopping the burner properly.

Models are available with either Minneapolis-Honeywell or Fireye Electronic Combustion Controls.

Inspection and Test

A Model C-240-GO was inspected by Ass't Engr. J. A. Darts, Committee on Test. The burner operated as designed and controls functioned as required. It was noted that interlocking controls prevented more than one fuel being supplied at any time. The appliance has been approved by the Underwriters' Laboratory under MP 725.

Recommendation

On the basis of the tests and the data supplied by the applicant, the Committee on Test recommends the approval of the appliance known as The Iron Fireman Automatic Burner Gas and/or Oil Fired Models C240-GO and C-240-GO-SM for use in New York City when constructed as herein described and installed in accordance with the requirements of Article 12, Chapter 26, Administrative Building Code and the Oil Burner Rules of the Board, on condition that the appliance bear a label, permanently affixed, reading, "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 792-57-SA" and further that the appliance may be marketed under the additional trade names of Petro-Models P-240-GO and P-240-GO-SM.

(Sgd.) WILLIAM A. NOLAN,

Director,

JOHN A. DARTS,

Assistant Director,

GEORGE F. SKLENARIK,

Assistant Engineer,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this appliance in accordance with the above report.

Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 181-58-SA

Subject: United Premix Dispenser—600E—450E.

United Sound & Signal Co., Inc., Columbia, Pennsylvania, filed March 28, 1958 an application with the Board of Standards and Appeals for approval of the United Premix Dispenser—600E—450E under the provisions of C19-90.0 Administrative Building Code.

Purpose

The appliance is an automatic beverage vending machine.

Description

The premix beverage is mixed and put into a product tank of stainless steel at a local bottling plant so that the same beverage that is dispensed in a bottle is dispensed from the machine.

The motive power for delivery of the beverage through the beverage circuit is furnished by a small bottle of CO₂, controlled by a CO₂ regulator to maintain a constant pressure of 50 p.s.i. on the carbonated beverage in the product tank.

The refrigeration system is composed of a 1/3 H.P. condensing unit, a cast cooler with the stainless steel beverage coils and settling tanks integrally cast into one unit and an automatic expansion valve as the refrigerant control. The refrigerant is 2 1/4 lbs. of Freon-12.

As the vendor is completely self contained except for the electrical connections, there are no water connections to be made.

Inspection and Test

Details of construction were examined by Ass't. Engr. J. A. Darts, Committee on Test and it was noted that the equipment operated as designed.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the appliance known as United Premix Dispenser—600E—450E for use in New York City under the provisions of C19-90.0 Administrative Code, on condition that the appliance bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 181-58-SA" and further that all electrical work shall comply with the requirements of the Electrical Code of the City of New York.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

MINUTES

576-58-SM

APPLICANT—Edward C. Muller, for St. Regis Paper Co., Panelyte Division, owner.

SUBJECT—Application October 6, 1958—St. Regis Panelyte Models NEMA Standard LP-2-1.01, Types I, II, III and IV, decorative surfacing for counters, furniture and walls, approval of.

APPEARANCES—

For Applicant: Edward C. Muller

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 576-58-SM

Subject: St. Regis Panelyte—Wall Panel.

E. C. Muller for St. Regis Paper Co., Panelyte Division, Trenton, New Jersey, filed October 6, 1958 an application with the Board of Standards and Appeals for approval of the material known as St. Regis Panelyte-Wall Panel under the provisions of C26-667.0 Administrative Building Code.

Purpose

The material is to be used as a wall veneer.

Description

The material is a high pressure laminate surfacing material. It is composed of layers of Kraft Paper, impregnated with layers of phenolic resins, combined with a color or pattern sheet with melamine and protected by an overlay or wear sheet of this same melamine.

The material is cured under heat and pressure to form a dense sheet. During the curing process the surface is in contact with a chromium-plated stainless steel sheet which gives a luster to the finished sheet.

Inspection and Test

Samples of the material were examined by Ass't Engr. J. A. Darts, Committee on Test and it was noted that the material was manufactured in two thicknesses 1/20 of an inch and 1/16 of an inch. The difference in the thickness being in the number of laminates.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the material known as St. Regis Panelyte-Wall Veneer for voluntary use in New York City under the provisions of C26-667.0.7. Administrative Building Code under the following conditions; the material 1/16 of an inch in thickness may be used as a veneer, when the material is solidly attached to an incombustible backing but not to be installed in required exit corridors; The material 1/20 of an inch in thickness may be used without restrictions as to location but it must be backed up solidly with an incombustible backing. The Committee further recommends that the sheets be labeled with the thickness, and further all cartons in which the materials are marketed shall be labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 576-58-SM" and also the thickness should be plainly marked.

(Sgd.) WILIAM A. NOLAN,

Director.

JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

53-59-SM

APPLICANT—National Gypsum Co., owner—4 hour fire resistive floor and ceiling; approved of.

APPEARANCES—

For Applicant: Donald K. Busch.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 53-59-SM

Subject: Gold Bond Fire-Shield Plaster for fire protection of steel floors, beams, etc.

J. K. Hovind for National Gypsum Company, Buffalo, New York, filed January 22, 1959 an application with the Board of Standards and Appeals for approval of the material, Gold Bond Fire-Shield Plaster under the provisions of C26-88.0, C26-178, C26-191, C26-239.0 and C26-609 Administrative Building Code for use as fire protective material for direct application to cellular steel floors, roofs and for fire protection of steel beams.

Purpose

The material is an incombustible fire resistive mill-mixed gypsum plaster for spray application direct to steel floors and to protect steel beams.

Description

Gold Bond Fire-Shield Plaster is a mill-mixed material used for fireproofing that requires the addition of water only for use. It is composed of gypsum, perlite, asbestos fibers and a small percentage cement slurry. It weighs approximately 30 to 34 lbs. per cu. ft. when dry after normal application.

The material may be spray applied directly to the underside of steel floors, steel beams, metal lath, etc., in one continuous application to the thickness required.

Reports by Pittsburgh Testing Laboratory on file show the following:

Vibration tests (applied to cellular steel floor)

- Fire-Shield Plaster wet and unset (immediately after application) 30,000 vibrational cycles with no loss of plaster bond to steel or sign of other failure.
- Fire-Shield Plaster set and wet (18 hrs. after application) 500,000 vibrational cycles with no loss of plaster bond to steel or sign of other failure.
- Fire-Shield Plaster set and dry (8 days after application) this assembly was tested under "b" and after 8 days withstood an additional 2,000,000 vibrational cycles (2,500,000 total) with no loss of plaster bond or sign of other failure.

Tensile strength (applied to untreated steel floors and plates)—failure internally in all cases

to steel floors: 478. lbs. per sq. ft. avg.

to steel plate: rapid dry (100°F. oven)—387 lbs. per sq. ft. min.

freeze—thaw cycles—324 lbs. per sq. ft. min.

wet—dry cycles—477 lbs. per sq. ft. min.

Compressive strength

Density—33.8 lbs. per cu. ft.

Load at failure—58 lbs. per sq. in. (8352 psf).

Inspection and Test

A floor-ceiling fire resistive test was conducted at Underwriters' Laboratories, Chicago, Illinois (report dated April 1, 1959). Cellular steel floor panels manufactured by H. H. Robertson Company, Inland Steel Products Company, and

MINUTES

American Steel Band Company formed the roof of the furnace with one intermediate 8WF24 steel beam across the center of the furnace. The floor panels were covered with 2½ inches sand-gravel concrete.

The steel beam was encased with Gold Bond self-furring metal lath (3.4 lbs. per sq. yd.) previously approved under Calendar Number 342-39-SM, which was attached directly to the edges of the beam flanges with Gold Bond Beam Furring Clips, spaced 9 inches on centers. The metal lath was against the beam flanges and face of the lower flange held out about ¼ inch due to the self-furring characteristic of the lath.

Gold Bond Fire Shield Plaster was spray applied to the underside of the untreated steel floor and to the beam caging to full thickness in one continuous application. The hollows were filled and the ceiling was leveled to a thickness of ⅝ inches measured from the lower plane of the floor units. The steel beam was protected with 2 inches of Fire Shield Plaster measured from the face of the metal lath.

The Gold Bond Beam Furring Clips are "U" shaped spring steel clips, used to secure metal lath to the flanges of steel beams, joists and columns. They are available in four sizes to fit flanges of ¼ inch to 1 inch thickness.

Underwriters' Report R4197-2 of the construction and test is on file with and part of the record. After 4 hours of fire endurance the average temperature of the floor-ceiling was 41°F. below the maximum permitted and the average temperature of the steel beams with 280°F. below the maximum permitted.

Recommendation

On the basis of the tests and data filed by the applicant, the Committee on Test recommends the approval of the material, Gold Bond Fire Shield Plaster for use as an incombustible material for fireproofing of cellular steel floors and for fireproofing of steel beams when constructed as herein before described shall be rated as a four hour fire resistive floor or ceiling and as a four hour fire resistive steel beams for use in all classes of construction under C26-88.0, C26-178, C26-191 and C26-239.0 Administrative Building Code and the Committee on Test further recommends that each bag or container of Gold Bond Fire Shield Plaster and each carton or container of Gold Bond Beam Furring Clips shall be stamped, marked or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 53-59-SM". The Committee further recommends that all plans submitted to the Department of Buildings showing the proposed use of this construction shall be similarly marked.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

54-59-SM

APPLICANT—Puro-Flo Filters Company for Marston Metal Products, Company, owner; Klein Hardware Company, agent.

SUBJECT—Application January 30, 1959—Puro-Flo Filter; an all incombustible metal filter for use in ventilating systems to condense greasy vapors, approval of.

APPEARANCES—

For Applicant: J. B. Sheaffer and M. M. Klein.

ACTION OF BOARD—Material approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 54-59-SM.

Subject: Puro-Flo Filter.

Marston Metal Products Co., Philadelphia, Pa., filed January 30, 1959 an application with the Board of Standards and Appeals for approval of the Puro-Flo Filter for use in New York City under the provisions of C26-712 and C19-165.3 Administrative Code.

Purpose

Filters for prevention of excessive grease accumulation in kitchen range exhaust systems.

Description

The Puro-Flo Filters are incombustible filters designed for installation in the exhaust systems over kitchen ranges.

They are made of two sheets of expanded steel, three flat screens and six crimped screens alternate sheets of which are placed at right angles to each other with respect to the direction of crimping. Of the three flat screens, two are aluminum, one being 14 by 18 mesh and the other 8 by 8 mesh. The third is 14 by 18 mesh galvanized steel. Crimped sheets are 8 by 14 mesh galvanized steel.

These sheets of expanded steel, galvanized and aluminum mesh are arranged in alternate layers and are bound by a one piece die formed aluminum frame which is secured at one corner by two screws. This frame is provided with holes at alternate corners to enable the condensed grease to run off to the bottom of the holding troughs into which these filters are placed.

The filters are available in sizes up to 20 by 25 inches and 2 inches thick.

They can be cleaned by soaking in a hot solution of detergent in water and then thoroughly dried before replacing.

Inspection and Test

All details were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

Recommendation

On the basis of the data supplied by the applicant, the Committee on Test recommends the approval of the Puro-Flo Filter for use in New York City when installed in accordance with the requirements of section C26-712.0.e and C-19-165.3 a.b Administrative Code and provided that each filter shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 54-59-SM".

55-59-SA

APPLICANT—Fitzgibbons Boiler Company, Incorporated, owner.

SUBJECT—Application January 30, 1959—Fitzgibbons 4000 Series Gas Boilers, Models 40G3, 40G4, 40G5 and 40G6 for residential heating, approval of.

APPEARANCES—

For Applicant: Karl Badger and Daniel Rindner.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative 0

MINUTES

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 55-59-SA.
Subject: Fitzgibbons 4000 Series Gas Boilers, Models 40G3, 40G4, 40G5, and 40G6.

Fitzgibbons Boiler Co., Inc., 101 Park Avenue, New York, N. Y., filed January 30, 1959 an application with the Board of Standards and Appeals for approval of the Fitzgibbons 4000 Series Gas Boilers, Models 40G3, 40G4, 40G5, and 40G6 for use in New York City under the provisions of Article 12, Administrative Building Code.

Purpose

Gas fired steam and hot water boilers for residential use.

Description

These boilers are designed for steam or hot water with automatic gas burning equipment made an integral part of the boiler assembly.

The boilers are of two pass design with horizontal tubes. The shell and firebox are of $\frac{1}{4}$ inch flange quality steel. The boiler heads are $\frac{5}{16}$ inch flange quality steel. Boiler tubes are 12 gage electric welded steel tubing. The entire design is according to ASME boiler code.

A 1 inch fiberglass insulation is used on exposed parts of the boilers and is contained in a 20 gage sheet steel jacket.

The gas burner used is a grey iron venturi tube casting with a single port, a flame spreader baffle of 1% chrome cast iron and a flame spreader plate of 16 ga. stainless steel.

Automatic controls are provided consisting of a limit switch for steam or hot water operation, automatic gas valve, safety pilot switch and thermostat. A hot water cut-off switch is also provided on steam boilers. Operation of any of the safety switches will shut off the main gas supply to the boiler.

Optional controls offered are a manual opener for the automatic gas valve so that the boiler could be operated during a power failure, milli-voltage control systems for operating the boiler without an outside power source and operating controls to supply domestic hot water service.

The input ratings for the different boilers are:

40-G-3	165,000 Btu per hr.
40-G-4	200,000 Btu per hr.
40-G-5	265,000 Btu per hr.
40-G-6	325,000 Btu per hr.

Inspection and Test

All details were examined by Ass't Engr. G. F. Sklenarik, Committee on Test.

These boilers were tested and approved by the American Gas Association.

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of the Fitzgibbons 4000 Series Gas Boilers, Models 40G3, 40G4, 40G5, and 40G6 for use in New York City when installed in accordance with this report and the requirements of Article 12, Administrative Building Code with a minimum clearance of 6 inches from sides and rear and projecting flue box or draft hood and 18 inches in the front but in all cases adequate to allow for proper servicing of the boiler and provided that each boiler shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 55-59-SA".

73-59-SA

APPLICANT—Carrier Corporation—Allied Products Division, owner.

SUBJECT—Application February 9, 1959—Carrier Heat Diffusers—Gas and Oil Fired Models 46AF30, 40, 55, 70, 100, 125, 150, 175 and 200; 46AH30, 40, 55, 70, 100, 125, 150, 175, 200—46AG30, 40, 55, 70, 100, 125, 150, 175, 200, approval of.

APPEARANCES—

For Applicant: M. E. Barnard.

ACTION OF BOARD—Appliance approved in accordance with the report and recommendation of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 73-59-SA.

Subject: Carrier Heat Diffusers—Gas and Oil-Fired, Models 46AF30, 40, 55, 70, 100, 125, 150, 175 and 200; 46AH30, 40, 55, 70, 100, 125, 150, 175, 200; 46AG30, 40, 55, 70, 100, 125, 150, 175, 200.

Carrier Corporation, Allied Products Division, Syracuse, New York, filed February 9, 1959 an application with the Board of Standards and Appeals for approval of the Carrier Heat Diffusers—Gas and Oil-Fired, for use in New York City under the provisions of Article 12, Administrative Building Code and the Oil Burner Rules of the Board.

Purpose

Warm air furnaces for industrial and commercial use but not for garages or similar occupancies.

Description

The Carrier Heat Diffusers are direct fired forced circulation furnaces designed for use with gas burners, oil burners, for light or heavy oil or combination gas and oil burners.

The 46 AF Series are upright models for floor installation. The outer casing is glass fibre insulated sheet steel finished in baked enamel. The circulating fans are forward curved blade type and are housed in a heavy angle iron frame fan section welded into a single unit with screened air inlet opening and access doors. Fan motor is mounted on an adjustable base.

The warm air outlet nozzles are designed to allow air discharge in any direction. The outlets are equipped with double deflection adjustable vanes.

The combustion chamber is 14 gage stainless steel. On all sizes up to the 46 AF 150, the rear collection box header is $\frac{3}{16}$ " plate and front collection box header is $\frac{1}{8}$ " plate. Both collection headers are $\frac{3}{16}$ " in the two larger sizes. All heat exchanger tubes are 14 gage hot rolled welded steel.

An induced draft fan is part of the unit and provides the pre-purge and post-purge operations as well as the necessary air for combustion.

In the gas burning models, the burners used are the power type gas burners made by Industrial Combustion Inc., of Milwaukee, Wisc. The ignition system on these burners consists of an intermittent pilot. Instantaneous electronic pilot safety is provided by means of a photocell scanner.

In the light oil burning models, the burners used are the high pressure gun type made by the Nu-Way Corporation and approved by the Board under Calendar Number 829-48-SA. These burners are equipped with two stage fuel pumps and all burners up to and including 700,000 Btu output are of the "on" and "off" type in operation. Higher capacity burners operate on low fire start.

For burning No. 4 and No. 5 oil the burners used are made by Industrial Combustion, Inc., and are of the low pressure air atomizing type. No. 5 oil when used shall have a viscosity not to exceed 350 seconds Saybolt Universal at 100°F and a pour point not over 10°F. An electric preheater is available for these burners.

MINUTES

In the combination burner models, the burners are designed to burn either gas or light oil or gas or heavy oil, and both types of burners are made by Industrial Combustion, Inc. The 800,000 Btu and larger units have "low fire start" operation as standard equipment—with high to low modulation on oil and full modulation of gas on any model available as an extra. All burners have electric-gas ignition, low fire start and starting electric preheater for heavy oil (No. 5). Full modulation on both oil and gas can be furnished.

Light oil burners have Minneapolis Honeywell controls as standard. Heavy oil, gas burners and dual fuel burners are furnished with Fireye primary control. Thermostats and limit controls are provided on all furnaces.

The 46AG Series are the same as the 46AF Series, except that they are intended for horizontal suspended installation.

The fuel firing rates for the various sizes are as follows:

#2 OIL (Nu-way Burners)

Unit Size	Model #	F.F.R.*

*F.F.R.—Fuel Firing Rate

Inspection and Test

All details were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The Model 46AF, 46AG, 46AH Heat Diffusers were tested and approved by the Underwriters' Laboratories, file MP 2589.

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of the Carrier Heat Diffusers—Gas and Oil Fired, Models 46AF-30, 40, 55, 70, 100, 125, 150, 175, and 200; 46AH-30, 40, 55, 70, 100, 125, 150, 175 and 200; 46 AG-30, 40, 55, 70, 100, 125, 150, 175, and 200, for use in New York City when installed in accordance with this report, Article 12, Administrative Building Code and/or the Oil Burner Rules of the Board, provided that the single fuel gas fired models may be installed with the following minimum clearances—in inches.

MODEL	FURNACE SIZE	A	B	C	D	E
46AF, 46AG	70 or less	2	18	6	6	6
46AH	70 or less	6	18	6	6	6
46AF, 46AC	80 and over	18	48	18	18	18
46AH	80 and over	18	48	18	18	18

A—Clearance above top of furnace

B—Clearance from front of furnace

C—Clearance from flue pipe, horizontal or vertical

D—Clearance from back of furnace

E—Clearance from sides of furnace

In all cases clearances shall be adequate to allow for proper servicing of the equipment—and further, provided that each furnace shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 73-59-SA".

MINUTES

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 263-59-SM
Subject: New Haven Trap Rock.

New Haven Trap Rock Company, New Haven, Conn., filed April 27, 1959 an application with the Board of Standards and Appeals for approval of the material known as New Haven Trap Rock under the provisions of C26-312 and C26-315.0 Administrative Building Code.

Purpose

The material is to be used as an aggregate in concrete.

Description

The material is quarried from the applicants' quarries located at North Branford, Conn., Plainville, Conn. and Wallingford, Conn. The process basically consists of blasting the rock from the quarry face, the blasted rock is then crushed in the primary crusher and then to a secondary crusher which reduces its size after crushing the rock is screened and separated into size.

Before shipping, the stone is washed and then is fed to either scows or cars for shipment.

Inspection and Test

The applicant has submitted reports of test as required by New York State Department of Public Works. The complete report is on file with and is part of the record.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends the approval of the material known as New Haven Trap Rock for use in New York City under the provisions of C26-315.0 Administrative Building Code under the following conditions:

1. That each scow, rail or truck delivery destined for use in New York City shall be accompanied by a delivery slip stating, in addition to the source of material, the gradation, and it shall bear the following stamp or label, "Approval by the Board of Standards and Appeals for use in New York City under Calendar Number 263-59-SM".

2. That mill samples shall be taken from each shipment and a record kept of the resulting test for gradation.

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated July 31, 1958, on B.N. Applic. 1920/58, reads:

1. Proposed installation of infra-red drying oven shall be of a type as approved by the Board of Standards and Appeals and shall be separated from any dipping or spraying processes by a distance of at least 15 feet. Rule 4.3.2 of the Spray Rules."

and

WHEREAS, the applicant states that the building is 2 stories, 28 feet high, 125 feet 5½ inches by 123 feet 11¼ inches, class 3 construction, erected in 1925, located in a unrestricted use, B area, class 1½ height district, used and occupied since 1957 as follows: 1st floor—manufacturing, warehouse and office, 90 persons; 2nd floor—warehouse and office, 10 persons, for which a Certificate of Occupancy #35678 was issued against Alt. Applic. 2352/46; and

WHEREAS, the premises was inspected by a committee of the Board;

Resolved, that the decision of the Borough Superintendent, dated July 31, 1958, acting on B.N. Applic. 1920/58 be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the work be done in accordance with drawings filed with this application dated, December 31, 1958, 6 sheets; that an automatic CO₂ flooding system and a rate of rise fire alarm with central connection satisfactory to the Fire Commissioner shall be installed in each drying tunnel; that one sprinkler head shall be installed over each spray applicator; that the building and occupancy shall continue to comply with the current Certificate of Occupancy 35678 and there shall be no manufacturing conducted on the second floor; that all laws, rules and regulations applicable shall be complied with; and that all work shall be completed within six months from the date of this resolution.

708-58-A

APPLICANT—Crown Heights Taxpayers and Civic Association, Inc., Allan and Esther Bush, Amelia Bush, Herman Goldfarb, and Yetta Goldfarb, adjoining property owners.

OWNER OF PREMISES—Mary Smalls.

SUBJECT—Application December 5, 1958—Appeal from a decision of the Borough Superintendent—re revocation of permit issued, for conversion from one to two families, G-1 area district.

PREMISES AFFECTED—1286 Carroll Street, south side, 320 feet east of New York Avenue, Block 1291, Lot 24, Borough of Brooklyn.

APPEARANCES—

For Applicant: Joseph Krinsky.

For Opposition: Leonard F. Rothkrug.

ACTION OF BOARD—Appeal granted, revoking permit.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated November 7, 1958 acting on Alt. Applic. 1545/58, reads:

"I had called your special attention to the period of time between November 21, 1957 when the amendment to Section 14A of the Zoning Resolution permitting two family occupancy in a D-1 district became effective and the zoning change which placed these premises within a G-1 district. In your letter you make no mention of this period at all, and yet that is the crux of the entire situation.

During that period, occupancy of any building by two families became legal and gave the owners of the premises the vested right of which they could not be deprived by the subsequent rezoning to G-1.

The record in this case shows that all work necessary to convert this building from one to two family occupancy and the actual occupancy of this building by two families took place long prior to November 21, 1957. The above numbered application, although filed subsequent to the rezoning to G-1, was only for the purpose of formalizing the legal occupancy of the building."

and

WHEREAS, the applicant states that the building is 20 feet by 43 feet in area, located in G-1 area, used and occupied as a two family dwelling; that the Building Department records indicate that the building was built in 1913 as a one family dwelling; that the present use is a 2 family dwelling; that it is now located in residence use, G-1 area, class 1¼ height district; and

WHEREAS, the Board after considering and discussing this matter has concluded that the appeal of the Crown Heights Taxpayers and Civic Association should be granted.

Resolved, that permit for Alteration Application 1545/58 and Permit #3017 dated June 11, 1958, be and they hereby are *revoked* and that the appeal be and it hereby is *granted*.

785-55-A

APPLICANT—Fred C. Dahlem, for Hyman Golden, owner.

SUBJECT—Application for consideration—reopening for extension of term of variance which expired April 30, 1959—re Appeal from a decision of the Borough Superintendent—re business use, frame building, fire limits; previously granted on condition.

MINUTES

John J. Nesbitt, Inc., Phila., Pa., filed April 10, 1958 an application with the Board of Standards and Appeals for approval of Nesbitt Suspended Gas-fired Unit Heaters, Models K-25-F, K-35-F, K-50-F, K-75-F, K-100-F, K-125-F, K-150-F, K-175-F, K-200-F, K-250-F, K-50-B, K-75-B, K-100-B, K-125-B, K-150-B, K-175-B, K-200-B and K-250-B, and to be also marketed as ILG, Webster, Grinnell, Sunnyaire, Gordon, Westinghouse, various models for use in New York City under the provisions of Article 12, Chapter 26 of the Administrative Building Code.

Purpose

The appliance is a Suspended Gas-Fired Unit Heater.

Description

The Nesbitt Series K Gas-Fired Unit Heater consists of a burner box heat exchanger tubes and draft diverter. These components are electric arc welded together forming a gas-tight assembly. The burner box is a welded box which is constructed of 16 gauge cold rolled steel. The die-formed heat exchanger tubes are made of 20 gauge aluminized steel, with seam welded joints. The draft diverter is a spot welded assembly constructed of 20 gauge aluminized steel. Heat exchanger support sheets, made of 20 gauge cold rolled steel, connect the draft hood and burner box at either side of the unit and serve to channel the air stream for maximum contact with the surface of the heat exchanger tubes.

All components in the heat exchanger are finished with a high temperature, aluminum paint.

The burner assembly consists of burners, venturi mixing tubes and gas supply manifold.

The burners are raised, drilled port, heavy close grained, cast-iron, mounted on cast-iron venturi mixing tubes. Machined brass orifices are held by wrought iron pipe nipples which are in turn welded to a wrought iron gas manifold. Close grained cast-iron air shutters are used to control the quality of primary air.

The burner and venturi mixing tubes are easily removed from the unit when the bottom pan is lowered. This is accomplished without moving any screws or fasteners other than those which hold the bottom pan in place.

The outside casing is constructed of 18 gauge or heavier, cold rolled steel. The hanger assembly supports both the casing and the heat exchanger and include two $\frac{3}{4}$ inch threaded pipe fittings. The bottom pan is hinged so that it can be lowered to permit lighting of the pilot and cleaning of the interior of the unit. All casing members are die-formed. Casing finish is baked on, hammerstone, gray-green enamel. The casing interior and all interior parts are finished in a high temperature baked aluminum.

Adjustable air deflection louvers are provided as standard equipment to permit vertical direction control of the air stream. Deflection louvers to provide horizontal direction control of the air stream are available as optional equipment.

Gas burner controls consist of a manual main control valve, a manual pilot shutoff valve, pilot burner, safety pilot, automatic control valve, electric limit switch and fan switch. In addition, a gas pressure regulator is provided except where the unit is to be used on liquefied petroleum gases.

The standard control arrangements are for line voltage and employ standard line voltage room thermostats.

Low voltage controls are available as optional equipment.

Electrical assembly includes a quiet low speed motor and fan assembly (all motors are equipped with thermal overload protection), a summer-winter switch to provide for summer ventilation, a combination wire fan guard and motor mount and wiring protected by heavy flexible metal conduit. The motor and controls are completely wired at the factory with the line connection continued to a junction box on the back of the unit.

Wiring diagram Nos. 1 and 2 give the wiring connections for line voltage controls and reduced voltage controls respectively.

The Series B Nesbitt Gas-Fired Unit Heaters are identical to propeller fan unit heaters, except for the type of fan employed.

Inspection and Test

These heaters have been tested and approved by the American Gas Association, Inc. The complete report is on file with and is part of the record.

Recommendation

On the basis of the data filed by the applicant, the Committee on Test recommends the approval of the appliance known as Nesbitt Suspended Gas Fired Unit Heater, Models K-25-F, K-35-F, K-50-F, K-75-F, K-100-F, K-125-F, K-150-F, K-175-F, K-200-F, K-250-F, K-50-B, K-75-B, K-100-B, K-125-B, K-150-B, K-175-B, K-200-B and K-250-B and further that such heaters may be marketed under the following trade names and model designations; ILG Models 25M, 35M, 50M, 50BM, 75M, 75BM, 100M, 100BM, 125M, 125BM, 150M, 150BM, 175M, 175BM, 200M, 200BM and 250M, 250BM; Webster Models WK-25, WK-35, WK-50, WKB-50, WK-75, WKB-75, WK-100, WKB-100, WK-125, WKB-125, WK-150, WKB-150, WK-175, WKB-175, WK-200, WKB-200 and WK-250, WKB-250; Grinnell Models P-25, P-35, P-50, B-50, P-75, B-75, P-100, B-100, P-125, B-125, P-150, B-150, P-175, B-175, P-200, B-200 and P-250, B-250; Sunnyaire Models CK-25-F, CK-35-F, CK-50-F, CK-50-B, CK-75-F, CK-75-B, CK-100-F, CK-100-B, CK-125-F, CK-125-B, CK-150-F, CK-150-B, CK-175-F, CK-175-B, CK-200-F, CK-200-B, and CK-250-F, CK-250-B; Gordon Models GUF-25, GUF-35, GUF-50, GUB-50, GUF-75, GUB-75, GUF-100, GUB-100, GUF-125, GUB-125, GUF-150, GUB-150, GUF-175, GUB-175, GUF-200, GUB-200, and GUF-250, GUB-250; Westinghouse Models W-25-FA, W-35-FA, W-50-FA, W-50-BA, W-75-FA, W-75-BA, W-100-FA, W-100-BA, W-125-FA, W-125-BA, W-150-FA, W-150-BA, W-175-FA, W-175-BA, W-200-FA, W-200-BA and W-250-FA, W-250-BA, for use in New York City when installed in accordance with Article 12, Administrative Building Code, and in addition when installed in garages and similar occupancies, each unit shall be installed so that its base is at least 8 feet 0 inches above the floor level and a 40-40 mesh bronze screen will be installed in the unit bottom pan in such a manner as to entirely cover the combustion air intake, and further that each appliance shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 228-58-SA".

(Sgd.) SAMUEL L. BECKER,

Director,

JOHN A. DARTS,

Asst. Engr.,

GEORGE F. SKLENARIK,

Asst. Engr.,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this appliance in accordance with the above report.

* Correction—In the Report of Committee on Test under Recommendation, additions and deletions were made correcting this section as printed above.

* CORRECTION

499-48-BZ—Vol. II

APPLICANT—Leonard F. Rothkrug, for Utility Laundry Service, Inc., owner.

SUBJECT—Application for consideration—reopening for extension of term of variance which expired February 24, 1959—re Application, decision of the Borough Superintendent; previously granted on condition, under section 7h of the Zoning Resolution, to permit in a residence use district, the parking and storage of motor vehicles for owner's, patron's and employee's cars, no fee to be charged.

PREMISES AFFECTED—2822-2830 West 21st Street,

MINUTES

west side, 160 feet south of Neptune Avenue, Block 7017, Lot 20, part of Lot 14, Borough of Brooklyn.

APPEARANCES—

For Applicant: Leonard F. Rothkrug.

ACTION OF BOARD—Application reopened, subject to the regular procedure, *waiving all requirements, except a new decision of the Borough Superintendent which has been filed and two publications in the Bulletin, as notice.*

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

* Correction—Action of the Board corrected as indicated in italics.

RULES

RULES RELATING TO SMOKING IN PROTECTED PORTIONS OF FACTORIES, AND IN SPECIAL CLASSES OF OCCUPANCIES.

Adopted by the Board of Standards and Appeals August 13, 1918, effective September 9, 1918, under the powers conferred upon the Board by Section 718-a, Subsections 2 and 3 (Old Charter) to supplement Section 283 of the Labor Law (Old Section 83c).

[Cal. 1262-18-SR]

Labor Law

Section 283. Smoking.

1. No person shall smoke in a factory. A notice of such prohibition stating the penalty for violation thereof shall be kept posted in every entrance hall, elevator, stair hall and room of a factory in English, and in such other languages as the fire commissioner of the city of New York in such city and elsewhere the commissioner shall direct.

2. The board in its rules may permit smoking in protected portions of a factory, or in such classes of occupancies where in its opinion the safety of the employees will not be endangered thereby. The fire commissioner of the city of New York in such city and elsewhere the commissioner may issue such permits in accordance with rules adopted by the board.

3. The fire commissioner of the city of New York in such city and elsewhere the commissioner shall enforce this section.

RULE 1. Permit.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the administrative official.

It shall be the joint and several duty of the owner and of the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stair hall or room throughout the building, as well as in every elevator car, in English, and also in such other language or languages—as the administrative official shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the administrative official.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon the expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the administrative official, and shall not again issue a permit for the same premises until at least one year has elapsed.

Rule 2. Permissible Cases.

Smoking may be permitted in:

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fireresisting partitions, with all openings therein protected by selfclosing fire doors, and further, unless the building is of fireproof construction or provided with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire retarding material.

(3) Such chemical fire extinguishers as the administrative official may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;
Boiler making;
Brick, terra cotta or artificial stone works;
Forge shops;
Foundries;
Iron, steel, brass or copper works;
Machine shops;
Smelting;
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the administrative official may direct are installed;

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

PUBLIC HEARING

CAL. NO. 217-21-SR

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals *Friday*, September 25, 1959 at 10 A.M. in Room 909, at 80 Lafayette Street, Manhattan, on the following proposed amendment to the rules covering the installation and use of oil burning equipment and the storage of oils used in construction therewith. New matter in italics.

**Rule 10. Permits, Plants, Inspection and Tests
of Storage Tanks and Piping.**

**10.3 Inspection and Tests of Installations of Storage
Tanks and Piping.**

10.3.3 Defective tanks, if repaired by welding, shall have all oil removed and shall be purged of all explosive gases or vapors. *Fuel oil tanks may be repaired with non-metallic materials when such materials and methods are approved by the Board.*

MAX H. FOLEY, *Chairman.*

NOTICE

WARNING

Notice is hereby given to all appellants and applicants, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the Board—

First, That if they do not appear in person or by representative at the hearing of their case, dismissal for lack of prosecution is likely to result:

Second, That due and ample notice of the date set for hearing is provided in the publication of this BULLETIN of the calendars of the Board, each case being set down by Calendar Number and the premises under the date of the hearing.

Third, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the Board and of the further publication of the calendars in the daily press.

Fourth, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

Fifth, That the business of the Board is to dispose of all cases promptly; therefore, no appeal or application will be held in abeyance by reason of failure of the appellant or applicant to file necessary data, or by any other method of delay.

Sixth, That no appeal or application will be accepted for filing unless, at the time of filing, all papers, plans and data required by law are supplied, as specified on the blank appeal or application forms.

Applicants, under the building zone resolution, are entitled to one copy of Form 7NO.

If they desire additional copies, for their own convenience in notifying property owners, they may obtain such copies at the office of the Board of Standards and Appeals, 80 Lafayette Street, 9th Floor, Manhattan, at five cents each—postage to be added if the forms are forwarded by mail.

CONTENTS

COURT DECISION

Matter of Philip Kohnberg vs. Harris H. Murdock, et al:—The Appellate Division, Supreme Court, Second Department, in reviewing the decision of the lower court, affirmed same unanimously as follows: (New York Law Journal, July 9, 1958, page 3) Cal. No. 327-55-BZ, Premises 202-06 Hillside Ave., southeast corner of 202nd St., Hollis, Queens.

"Proceeding to review a determination of the Board of Standards and Appeals of the City of New York which granted an application under subdivision e of Section 7 of the Zoning Resolution of the City of New York, for a variance to permit the erection and operation of a gasoline service station and accessory uses, in a local retail district, for a period of fifteen years, subject to conditions and safeguards imposed by the board. The appeal is from an order granting motions to vacate the order of certiorari, dismiss the petition and confirm the determination of the Board. Order unanimously affirmed, with costs to respondent board, payable by the appellant. No opinion."

The Court of Appeals affirmed the Board and the lower courts in the granting of the subject variance. (New York Law Journal, July 10, 1959, page 3.)

PUBLIC HEARINGS

Tuesdays at 10 a.m. and 2 p.m.

Special meetings as published in this Bulletin.

All hearings are held at 80 Lafayette Street, 9th Floor, Borough of Manhattan.

HOURS OF CONSULTATION

10 A.M. to 1 P.M.

Any person desiring to consult the Chairman, the Commissioners, Director or the Engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on March 31, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 21, 1959 after due notice by publication in the Bulletin; laid over to September 22, 1959, at 10 A. M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated February 6, 1959 acting on Alt. Applic. No. 95-59, reads:

"1. Proposed use of parking & storage for more than five motor vehicles in a residence use district is contrary to Art. II Sec. 3 of the Z.R."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision h of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7h for a term of five years, to permit in a residence use district the storage of 24 passenger cars, on an assigned space basis, with monthly rentals and no transient parking *on condition* that the work shall be done in accordance with drawings filed with this application dated February 17, 1959, 3 sheets; that bumpers shall be placed three feet from the side lot lines; that the surface of the plot shall be paved with steam cinders or clean gravel, treated with a binder and rolled to the proper grade; that the gate be kept locked and the tenants given keys; that the sign at the entrance be in accordance with the requirements of the License Department; that all other laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained, all work done and a certificate of occupancy obtained within the requirements of Section 22A of the Zoning Resolution.

missioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on April 14, 1959 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 21, 1959 after due notice by publication in the Bulletin; laid over to September 22, 1959 at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated March 19, 1959 acting on Alt. Applic. No. 239-59, reads:

"1. The proposed parking lot for parking and storage of more than five (5) motor vehicles located in a Residence use district is contrary to Article II Section 3 of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board, which recommended the application be granted on certain conditions; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision b of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7b, to permit in a business and residence use district, the maintenance of a parking lot for the parking and storage of more than five motor vehicles of the pleasure type, *on condition* that the work shall be done in accordance with drawings filed with this application, dated March 23, 1959, 3 sheets and June 19, 1959, one sheet; that this parking lot shall not be used as an accessory lot for any manufacturing or repair business; that in all other respects all laws, rules and regulations applicable shall be complied with; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

995-48-BZ—Vol. III

APPLICANT—Henry George Greene for 444 West 55th Street Corporation, owner.

SUBJECT—Application reopened July 15, 1958 as Vol. III—decision of the Borough Superintendent under sections 7e and 7i of the Zoning Resolution to permit in a retail use district, the continuation of the present uses in an existing building with the following changes, the addition of an office on the first floor; eliminate the machine shop, add an office and extend the parts department on the second floor; use a portion of the third floor for a motor vehicle repair department; portion of the fourth floor for use of a new parts department and reduce the size of the area for repair of motor vehicles; on the sixth floor reduce the size of the repair shop to provide for a paint shop for use by the repair departments and for storage of motor vehicles for a stated term of twenty (20) years.

PREMISES AFFECTED—438-444 West 55th Street, south side, east of Tenth Avenue, Block 1064, Lot 45, Borough of Manhattan.

APPEARANCES—

For Applicant: J. G. L. Molloy and Fred L. Liebmann.
For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. III on July 15, 1958 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on July 21, 1959 after due notice by publication in the Bulletin; laid over to September 22, 1959 at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent,

MINUTES

dated June 6, 1958 acting on amendment to Alt. Applic. No. 1472-57, reads:

"1. Proposal to occupy subject 6 story class one structure, located in a retail use district, for garage of more than 5 cars, gasoline sales, lubritorium, auto sales all on various floors as indicated is contrary to Article II Sections 4-A(15), 4(29) and 4(46) of the Zoning Resolution.

Note: Under Resolution of Board of Standards & Appeals 131-51-A and 995-48-BZ Vol. II temporary C.O. 39200 was issued. (Expired June 12, 1956). Use district changed from Residential Use to Retail Use May 26, 1955."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board and the committee recommended that the application should be granted on condition; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivisions e and i of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulations of the Zoning Resolution and that the application be and it hereby is *granted* under Sections 7 e and i, for a term of twenty years, to permit in a retail use district, the continuation of the present uses in an existing building with the following changes: the addition of an office on the first floor; eliminate the machine shop, add an office and extend the parts department on the second floor; use a portion of the third floor for a motor vehicle repair department; portion of the fourth floor for use of a new parts department and reduce the size of the area for repair of motor vehicles; on the sixth floor, reduce the size of the repair shop to provide for a paint shop for use by the repair departments and for storage of motor vehicles *on condition* that the work be done in accordance with drawings filed with this application dated June 19, 1959, 11 sheets, except as such plans must be modified in accordance with the decision rendered this day under Cal. No. 131-51-A, Vol. II; that all other laws, rules and regulations applicable shall be complied with; and that all permits shall be obtained, all work completed, and a certificate of occupancy obtained within the requirements of Section 22A of the Zoning Resolution.

131-51-A—Vol. II

APPLICANT—Henry George Greene for 444 West 55th Street Corporation, owner.

SUBJECT—Application reopened July 15, 1958 as Vol. II—Appeal from a decision of the Borough Superintendent re: exterior screened stairway extension to roof, interior partitions of incombustible construction in fireproof garage and repair shop.

PREMISES AFFECTED—438-44 West 55th Street, south side, 250 feet east of 10th Avenue, Block 1064, Lot 55, Borough of Manhattan.

APPEARANCES—

For Applicant: Fred L. Liebmann and J. G. L. Molloy.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative: 0

Negative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated June 13, 1958 on Alt. Applic. 1472/57, reads:

"2. Exterior screened stairway is required to extend to the roof. Sect. 268 Labor Law.

"3. Interior partitions including doors are required to be of incombustible construction in a fireproof garage and repair shop."

and

WHEREAS, the applicant states that the building is 100 feet

by 100.5 feet in area, 6 stories, 80 feet high, of class 1 construction, located in a retail use, B area, class 1½ height district, built in 1917, used and occupied since 1949 as follows: Cellar—boiler room; 1st floor—lubritorium, parking and storage of more than 5 motor vehicles, passenger car type only, 10 persons; mezzanine—offices, 10 persons; 2nd floor—parts department, repair of motor vehicles only with use of hand tools and light machine tools, 8 persons; 3rd floor—storage and parking of more than 5 motor vehicles, passenger type only, 8 persons; 4th floor—sale of new and used cars, 5 persons; 5th floor—sale of new and used cars, 5 persons; 6th floor—repair of motor vehicles, limited to experimental work only, 8 persons; that the proposed use will be: Cellar—boiler room; 1st floor—lubritorium, parking and storage of more than 5 motor vehicles, passenger car type only and offices, 10 persons; mezzanine—offices, 10 persons; 2nd floor—parts department, repair of motor vehicles only with hand tools and light machine tools, office, 8 persons; 3rd floor—storage and parking of more than 5 motor vehicles, passenger car type only, repair shop, 8 persons; 4th floor—sale of new and used cars, and parts department, 5 persons; 5th floor—sale of new and used cars, 5 persons; 6th floor—repair of motor vehicles, limited to experimental work only, and parking and storage of more than 5 motor vehicles, passenger type only and paint spraying room, 8 persons; that the exits consist of 3 foot 8 inch wide interior steel stair enclosed in masonry walls with fireproof self-closing doors from roof bulkhead to street; that the second egress is through an exterior 3 foot 8 inch wide steel stair at the rear of the building that leads to the street through a fireproof passageway; that this rear stair does not lead to roof; that the wood partitions occur on the 1st floor, mezzanine, 3rd and 6th floors only; that all other partitions are of incombustible construction; that the exits, most of the partitions and wood framed mezzanine were previously accepted by the Board under Calendar Number 131-51-A, Volume I; and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board, which recommended compliance with the law.

Resolved, that the decision of the Borough Superintendent, acting on Alt. Applic. 1472/57, Objection No. 1, dated June 13, 1958, be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

784-53-BZ—Vol. II

APPLICANT—Lama, Proskauer and Prober, for J. R. V. Building Corp., owner.

SUBJECT—Application reopened April 7, 1959 as Volume II—decision of the Borough Superintendent, under section 7c of the Zoning Resolution, to permit in a unrestricted and business use district, the completion of a partially completed class 5 building and extend the present uses of manufacturing and storage of cast stone products.

THE RESOLUTION—

WHEREAS, a public hearing was held on this application on July 21, 1959 after due notice by publication in the Bulletin; laid over to September 22, 1959 at 10 A.M. for inspection and decision; hearing closed; and

WHEREAS, the decision of the Borough Superintendent, dated April 20, 1959 acting on Alt. Applic. No. 517-59, reads:

"1. Proposed Parking Lot located in a Residence Use District for the parking and storage of more than five (5) motor vehicles, is contrary to Article II, Section 3 of the Zoning Resolution."

and

WHEREAS, the premises and surrounding area were inspected by a committee of the Board; and

WHEREAS, the Board found that this was an appropriate case in which to exercise discretion to grant under Section 7, Subdivision h of the Zoning Resolution.

Resolved, that the Board of Standards and Appeals does hereby *make a variation* in the application of the use district regulation of the Zoning Resolution and that the application be and it hereby is *granted* under Section 7h, to permit in a residence use district, the parking and storage of five or more motor vehicles, for a period of five years, *on condition* that the work shall be done in accordance with drawings filed with this application dated, May 20, 1959, 3 sheets; that a woven wire fence of the chain link variety shall be constructed on the street front of the lot and at the

rear, and continued from the rear lot line to the two adjacent buildings as shown on the drawings; that the portion of the lot that is not now properly paved with concrete shall be paved with clean gravel or steam cinders, treated with a binder and properly rolled to grade; that the attendant on the lot at 422 West 49th Street shall be also be responsible for the supervision of this lot; that all laws, rules and regulations applicable shall be complied with; and that all permits and a certificate of occupancy shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution.

Adjourned: 3:30 P.M.

Joseph J. Doyle, *Chief Clerk*.

REGULAR MEETING TUESDAY AFTERNOON, SEPTEMBER 22, 1959, 2 P.M.

Present: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker.

110-36-SA

APPLICANT—American Mohawk Company, owner—amendment, additional trade name.

APPEARANCES—

For Applicant: Harry S. Londa.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 110-36-SA.

Subject: Amendment to resolution as to additional trade name.

American Mohawk Company of New Jersey requested by letter dated April 3, 1959 that the resolution adopted May 26, 1936 and amended at various times through November 13, 1957 under Calendar Number 110-36-SA be amended so as to permit the approved oil burner to be marketed under an additional trade name. The application was reopened by a vote of the the Board May 19, 1959.

Recommendation

The Committee on Test recommends that the resolution adopted May 26, 1936 and amended through November 13, 1957 under Calendar Number 110-36-SA be amended so as to permit the approved oil burners to be marketed by Sid Harvey Supply Company, Inc., under the trade name Home Oil Burner on condition that the requirements of the resolution adopted May 26, 1936 under Calendar Number 110-36-SA be complied with.

Asst. Engr.

GEORGE F. SKLENARIK,
Asst. Engr.
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution in accordance with the above report.

147-38-SM

APPLICANT—Johns-Manville Sales Corp., Pipe Div., owner—amendment, additional use as flue pipe.

APPEARANCES—

For Applicant: A. E. Shultis.

MINUTES

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 147-38-SM.

Subject: Amendment to resolution as to additional use of approved Transite Pipe.

Johns Manville Sales Corporation, Pipe Division requested by letter dated February 17, 1959 that the resolution adopted May 10, 1938 under Calendar Number 147-38-SM be amended so as to permit the use of the approved material under the provisions of C26-696.0 as amended by Local Law 35 of 1957. The application was reopened by a vote of the Board March 10, 1959.

Purpose

The material is to be used as a flue pipe for gas appliances.

Description

The pipe is designated as Johns Manville Transite Pipe Type B-1½ which consists of 4 inch oval and 3, 4, 5, 6 and 7 inch round type J-M vent pipe sections, elbows, ties and adapters and type B-3 which consists of 6 inch oval type J-M vent pipe section and adapters and 8, 9, 10 and 12 inch round type of J-M vent pipe sections and support assemblies and elbows, ties and adapters.

The appliances have been approved by the Underwriters Laboratory under MH-2414.

Recommendation

The Committee on Test recommends that the resolution adopted May 10, 1938 under Calendar Number 147-38-SM be amended so as to permit the material known as Johns Manville Transite Pipe to be used as a flue pipe for gas appliances as permitted under C26-696.0 as amended by Local Law 35 of 1957 on condition that the pipe be stamped with the designation as herein described namely Type B-1½ and Type B-3 and the clearance from combustible material shall be not less than 1½ inches for the Type B-1½ and 3 inches for the Type B-3 and further that all other requirements of the resolution adopted May 10, 1938 under Calendar Number 147-38-SM be complied with.

(Sgd.) WILLIAM A. NOLAN,
Director.

JOHN A. DARTS,
Asst. Engr.

GEORGE F. SKLENARIK,
Asst. Engr.

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution in accordance with the above report.

1207-40-SM

APPLICANT—Johns-Manville Sales Corp., owner—amendment, additional sheathing.

APPEARANCES—

For Applicant: A. E. Shultis.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 1207-40-SM.

Subject: Amendment of resolution as to additional sheathing.

Johns-Mansville Sales Corporation, New York requested by letter dated March 19, 1959 that the resolution adopted April 15, 1941 and amended at various times through November 4, 1953 under Calendar Number 1207-40-SM be amended so as to include additional sheathing. The application was reopened by a vote of the Board April 28, 1959.

Purpose

The material is to be used as exterior sheathing.

Description

The material is basically the same as that approved December 20, 1949, except that the Board has been increased in density during the process of manufacture.

Inspection and Test

Racking tests were conducted on a panel sheathed with this material and so constructed that there were no corner braces in the construction. The panel successfully met a thrust of 7340 lbs. The complete report is on file with and is part of the record.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends that the resolution adopted April 15, 1941 and amended at various times through November 4, 1953 under Calendar Number 1207-40-SM be amended so as to include the material known as Johns-Manville Strongbord Sheathing on condition that the requirements of the resolution adopted December 20, 1949 under Calendar Number 1207-40-SM be complied with except, that as the material exceeded the required thrust in a construction without corner bracing, the requirement of a corner of let-in brace as set forth in the resolution on December 20, 1949 under Calendar Number 1207-40-SM need not be complied with.

38-47-SM—Vols. I and II

APPLICANT—Bergen Building Block, Inc., owner—
amendment, facing on approved blocks.

APPEARANCES—

For Applicant: Bernard K. Ross.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 38-47-SM—Vols. I and II

Subject: Amendment to resolution as to facing on approved blocks.

Bergen Building Block Inc., Ridgefield, New Jersey requested by letter dated June 19, 1959 that the resolution adopted July 13, 1948 and amended through June 23, 1959 under Calendar Number 38-47-SM Vols. I and II be reopened and amended so as to permit the approved block to be faced with a decorative facing and the finished unit to be marketed under the name Aristocrat Plastic Faced Masonry Unit. The application was reopened by a vote of the Board July 14, 1959.

Purpose

The material is a plastic faced masonry unit.

Description

The units are basically concrete masonry units, approved by this Board under Calendar Number 38-47-SM—Vols. I and II, which have an integrally bonded plastic facing. The facing itself is composed of plastic resins, into which have been incorporated inert fillers, fire inhibitors, marble chips and other aggregates.

The facing is applied to a thickness of $\frac{1}{2}$ " to $\frac{3}{8}$ " depending on the size of the marble chips used.

Inspection and Test

Samples of the block, with the plastic facing bonded to the block, were tested by New Jersey Testing Laboratory in accordance with the requirements of C26-88.0 Administrative Building Code and when tested as installed, the composite block met the requirements of incombustibility.

Recommendation

The Committee on Test recommends that the resolution adopted July 13, 1948 and as amended through June 23, 1959 be amended so as to permit the approved block to be faced with a plastic facing as herein described and as the composite unit met the requirements of C26-88.0 Administrative Building Code that the unit may be installed without restriction as to location on condition that all other requirements of the resolution adopted July 13, 1948 and as amended through June 23, 1959 under Calendar Number 38-47-SM—Vols. I and II be complied with.

Committee on Test.

Resolved that the Board of Standards and Appeals does hereby *amend* the resolution in accordance with the above report.

848-47-SM

APPLICANT—Modern Faucet Mfg. Company, owner—
markings.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 848-47-SM.

Subject: To reopen and amend resolution as to marking.

Modern Faucet Mfg. Company requested by letter dated June 5, 1959 that the resolution adopted December 9, 1947 under Calendar Number 848-47-SM be reopened and amended so as to permit additional markings.

Purpose

The unit is used to prevent back syphonage.

Description

There has been no change in the construction of the #405 Transfer Unit as approved by the Board. As this unit is inserted in a faucet having a spray hose to divert the water from the faucet to the spray hose and vice versa, it is practically impossible to find the marking on the diverter.

Recommendation

The Committee on Test recommends that the resolution adopted December 9, 1947 under Calendar Number 848-47-SM be reopened and amended so that the fixture using the approved transfer unit shall have stamped on the escutcheon the letters M.F. so as to be permanently visible for inspection on condition that all other requirements of the resolution adopted December 9, 1947 under Calendar Number 848-47-SM be complied with.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,
Commissioner Fox and Commissioner Becker 4
Negative: Vice Chairman Kleinert 1

MINUTES

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 150-48-SA Vol. III.

Subject: To reopen and amend resolution as to additional burner.

R. V. Perotto, for Overhead Heaters, Inc., requested by letter dated July 20, 1959 that the resolution adopted June 8, 1948 and amended at various times through November 13, 1957 under Calendar Number 150-48-SA be reopened and amended so as to include additional gas-fired burners.

Recommendation

The Committee on Test recommends that the resolution adopted November 13, 1957 under Calendar Number 150-48-SA Vol. III be reopened and amended so as to permit the installation of any approved gun type or conversion type gas burner in the Schafconaire Suspended Gas-fired Furnace on condition that the requirements of the resolution adopted November 13, 1957 under Calendar Number 150-48-SA Vol. III are complied with.

Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 337-49-SA.

Subject: Amendment to resolution as to change of ownership and trade-name.

Ray Engineering Company, Philadelphia, Pa., requested by letters and affidavit dated April 21, 1959 and May 5, 1959 that the resolution adopted July 12, 1949 under Calendar Number 337-49-SA be amended to show change of ownership from Federal Oil Burner Company, Inc. to Ray Engineering Company, Inc. and a new trade name for the burners, Federal Oil Burner Company, Division of Ray Engineering Company, Inc., Models H-PA and H-PEA previously approved. The resolution was reopened by a vote of the Board, on May 26, 1959.

Recommendation

The Committee on Test recommends that the resolution adopted July 12, 1949 be amended so as to change the trade name from Federal Heavy Oil Burner, Model H-PA and H-PEA to Federal Oil Company, Division of Ray Engineering Company, Inc., Models H-PA and H-PEA and as to change of ownership from Federal Oil Burner Company, Inc. to Ray Engineering Company, Inc. on condition that all other requirements of the resolution adopted July 12, 1949 under Calendar Number 337-49-SA be complied with.

Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 555-49-SA

Subject: Amendment to resolution as to additional models of dishwasher.

Hobart Manufacturing Company, Troy, Ohio requested by letter dated July 9, 1959 that the resolution adopted October 25, 1949 under Calendar Number 555-49-SA be amended so as to include additional models of dishwasher. The application was reopened by a vote of the Board July 21, 1959.

Description

The requested models KD-11 and KD-12 differ from the approved Model KD-10 in the arrangement of the main motor and pump. The prior models have the pumps mounted in a vertical position. The motor is attached on the outside of the bottom of a round sump and the pump is on the inside of the sump in a vertical position. The KD-11 uses a bronze impeller and a cast iron pump housing. The KD-12 utilizes a phenolic plastic for both the impeller and pump housing.

There has been no change in the water supply features and the air gap has been maintained.

Recommendation

The Committee on Test recommends that the resolution adopted October 25, 1949 under Calendar Number 555-49-SA be amended to include the Kitchen-Aid Home Dishwasher, Models KD-11 and KD-12 on condition that the requirements of the resolution adopted October 25, 1949 under Calendar Number 555-49-SA be complied with.

Resolved, that the Board of Standards and Appeals does hereby amend the above cited resolution in accordance with the above report.

724-49-SA—Vol. II

APPLICANT—The Carlin Company, owner—amendment, additional models and trade names of oil burner.

APPEARANCES—

For Applicant: Irving T. Hecht.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 724-49-SA—Vol. II

Subject: Amendment to resolution as to additional models and additional trade names.

MINUTES

The Carlin Company, Wethersfield, Conn., requested by letter dated April 17, 1956 that the resolution adopted December 20, 1949 under Calendar Number 724-49-SA—Vol. I, and amended July 3, 1951, October 15, 1952 and on May 19, 1953 as Vol. II, be amended to include the additional oil burner models 150F, 150SF-2, 400A or AF, 800S-4 and 2000S-5 and the trade names Carlin Oil Burner, Burnswell Oil Burner, U. S. Oil Burner and the additional trade name Acme Dual 8 for the Models 150F and 400A and U. S.-Carlin for the Models 150F and 150SF-2. The resolution was reopened by a vote of the Board, May 22, 1956.

Description

The new model burners are gun type burners similar to those previously approved under Calendar Number 724-49-SA—Vol. I & II and are designed for No. 2 oil.

Their firing capacities are:

MODEL	Gallons per hour
150 F	.65 to 1.50
	1.35 to 2.00
150SF-2	.65 to 1.35
400A-AF	.65 to 1.50
	1.35 to 2.00
800S-4	4.00 to 8.00
	3.50 to 7.00
2000S-5	7.00 to 12.00

Recommendation

The Committee on Test recommends that the resolution adopted under Calendar Number 724-49-SA—Vol. I, December 20, 1949 and amended July 3, 1951, October 15, 1952 and then as Vol. II, on May 19, 1953, be amended to include the additional oil burners, Models 150F, 150SF-2, 400A or AF, 800S-4 and 2000S-5 and that such models be permitted to be sold under the additional trade names Carlin Oil Burner, Burnswell Oil Burner, U. S. Oil Burner including the trade name Acme Dual 8 for the Models 150F and 400A and U. S.-Carlin for the Models 150F and 150SF-2, on condition that the requirements of the resolution adopted December 20, 1949 under Calendar Number 724-49-SA—Vol. I and as amended July 3, 1951, October 15, 1952 and on May 19, 1953 as Vol. II, be complied with.

960-54-SA—Vol. III

APPLICANT—Linde Co., Div. of Union Carbide Corp., owner—amendment, additional models of Oxygen, Nitrogen and Argon Systems and Cold Converter Storage Units.

APPEARANCES—

For Applicant: Thomas E. Willoughby.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 960-54-SA—Vol. III

Subject: Amendment to resolution as to additional Models of Linde "Driox" Oxygen, Nitrogen and Argon Systems and Cold Converter Storage Units.

Linde Company, Division of Union Carbide Corporation, New York, requested by filing an application November 18, 1958 that the resolution adopted May 3, 1955 under Calendar Number 960-54-SA—Vol. I and amended November 19, 1957 under Vol. II be amended to include additional models of the Linde "Driox" Oxygen, Nitrogen and Argon Systems and Cold Converter Storage Units, Models 92VCC, 93VCC and 150VCC. The resolution was reopened as Vol. III by a vote of the Board, December 2, 1958.

Purpose

These appliances are used for the storage of liquid oxygen, nitrogen or argon above 6 psi pressure.

Description

The new Models 92VCC, 93VCC and 150VCC are basically the same as the previously approved models. The difference is in the capacity of the units. The construction details are:

LIQUID CONTAINER	MODELS 92VCC & 93VCC	150VCC
Capacity gallons	780	1300
Design pressure	219	217
Hydrostatic Test	330	330
Outside diameter	4 ft.	4 ft.
Steel Thickness	3/8"	5/16"
Material	Stainless steel or 9/32" 9% Ni steel	9% Ni Steel
Safety valve setting	200	200
Bursting disc	275	200
OUTER CASING		
Design pressure	15 ext.	15 ext.
Pneumatic test	22 1/2 int.	22 1/2 int.
Outside diameter	5 ft.	5 ft. 6 inches
Shell thickness	5/16"	.179"
Material	steel	steel
Length or height	12'-7 3/4"	14' 3 5/8"

The liquid container is protected by both a spring loaded safety valve and a bursting disc and the outer casing is protected by a safety device set to relieve internal pressure at not over 5 psi.

Recommendation

The Committee on Test recommends that the resolution adopted May 3, 1955 under Calendar Number 960-54-SA—Vol. I and amended November 19, 1957 as Vol. II be amended to include additional models of the Linde Driox Oxygen, Nitrogen and Argon Systems and Cold Storage Converters, Models 92VCC, 93VCC and 150VCC, on condition that the requirements of the resolution adopted May 3, 1955 under Calendar Number 960-54-SA—Vol. I be complied with.

49-55-SA

APPLICANT—Wonder Warm Company, owner—change of ownership and additional models.

APPEARANCES—

For Applicant: George R. Darche.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

MINUTES

Negative: Vice Chairman Kleinert 1
THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 49-55-SA
Subject: To reopen and amend resolution as to change of ownership and additional models.

Wonder Warm Company, Nashville, Tennessee, requested by letter dated April 29, 1959 that the resolution adopted February 17, 1959 under Calendar Number 49-55-SA be amended so as to show change of ownership from Magic Chef Inc. to Wonder Warm Company and to include the additional Magic Chef-Wonder Warm Gas Heaters, Models 8872, 8871, 8852, 8851, 8830-10, 8830-7, 8830-0, 8820-10, 8820-7, 8820-0, 8815-10, 8815-7 and 8815-0.

Description

The Magic Chef-Wonder Warm Gas Heaters, Models 8872, 8871, 8852, 8851, 8830-10, 8830-7, 8830-0, 8820-10, 8820-7, 8820-0, 8815-10, 8815-7 and 8815-0 are similar to the Magic Chef Space Heaters, Models GH30, GH-31, GH-50, GH-51, GH-70, GH-71, GH-135 and GH-235 as previously approved under Calendar Number 49-55-SA except that the styling of the outer cabinets has been changed.

The heat input ratings of the new models are as follows:

Model	Btu per hour
8872	70000
8871	70000
8852	55000
8851	55000
8830-10 }	30000
8830-7 }	
8830-0 }	
8820-10 }	20000
8820-7 }	
8820-0 }	
8815-10 }	15000
8815-7 }	
8815-0 }	

The suffix "0" indicates equipped with manual control, shut-off valve and pilot.

The suffix "7" indicates, equipped with manual control, 100% safety pilot with manual shut-off valve.

The suffix "10" indicates equipped with automatic thermostat control, combination snap action thermostat and 100% safety pilot valve.

All models are designed for venting outdoors and have a thermobulb mounted to act as a blocked flue safety control.

The new models have been approved by the American Gas Association.

Recommendation

The Committee on Test recommends that the resolution adopted February 17, 1959 under Calendar Number 49-55-SA be amended to indicate change of ownership from Magic Chef Inc. to Wonder Warm Company and to include the additional models 8872, 8871, 8852, 8851, 8830-10, 8830-7, 8830-0, 8820-10, 8820-7, 8820-0, 8815-10, 8815-7 and 8815-0 under the new trade name Magic Chef-Wonder Warm Gas Heaters on condition that the other requirements of the resolution adopted February 17, 1959 under Calendar Number 49-55-SA be complied with.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution in accordance with the above report.

632-55-SM

APPLICANT—R. K. L. Building Specialties Company, Inc., owner—additional wall ties.

APPEARANCES—

For Applicant: Joseph A. Kucich.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 632-55-SM.

Subject: To reopen and amend resolution as to additional wall tie.

R. K. L. Building Specialties Company, Inc., New York requested by letter dated July 31, 1959 that the resolution adopted February 21, 1956 under Calendar Number 632-55-SM be reopened and amended so as to include additional ties.

Purpose

The material is to be used as a wall tie for anchoring hollow wall withes together.

Description

The chemical and physical properties of the requested tie are identical with the tie previously approved; the only change being in the shape the requested ties being flat whereas the approved ties were round. The requested ties are designated as Dovetail Corrugated Block Tie RKL No. 3 and Dovetail Cavity Wall Tie No. 2.

Recommendation

The Committee on Test recommends that the resolution adopted February 21, 1956 under Calendar Number 632-55-SM be reopened and amended so as to include the additional ties designated as Dovetail Corrugated Block Tie No. 3 and Dovetail Cavity Wall Tie No. 2 on condition that the requirements of the resolution adopted February 21, 1956 under Calendar Number 632-55-SM are complied with.

(Sgd.) WILLIAM A. NOLAN,
Director.

JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the above cited resolution in accordance with the above report.

939-55-SM

APPLICANT—Certified Industrial Products, Inc., owner.

APPEARANCES—

For Applicant: R. G. Rogers.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:
Re: Calendar Number 939-55-SM.

Subject: Permalite Perlite Concrete Fill.

Certified Industrial Products Inc., Hillside, New Jersey, filed November 10, 1955 an application with the Board of Standards and Appeals for approval of the material known as Permalite Perlite Concrete Fill under the provisions of C26-88, C26-191.0 and C26-626.0 Administrative Building Code.

Purpose

The material is to be used as an insulating roof fill.

MINUTES

Description

The insulating concrete shall consist of a mix of portland cement and perlite and at times sand is added so as to increase the dry density. The mixes recommended by the applicant, with their corresponding density and compressive strength are as follows:

- 1:4 = 35 lbs. per cu. ft. and 440 p.s.i.
- 1:5 = 29 lbs. per cu. ft. and 260 p.s.i.
- 1:6 = 26 lbs. per cu. ft. and 180 p.s.i.
- 1:3:2 (sand) = 50 lbs. per cu. ft. and 1000 p.s.i.

and the mix shall be as above and the compressive strength shall not be less than 180 p.s.i.

Inspection and Test

As the material is not to be used as a structural member, the only element considered was of incombustibility and the material successfully met the requirements of C26-88.0 Administrative Building Code.

Recommendation

On the basis of the inspection and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Permalite Perlite Concrete Fill and also Certified Perlite Concrete Fill for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code as an incombustible insulating roof deck on condition that the insulating roof deck shall not be considered as adding to the structural strength of the roof and shall only be used as an insulating fill and further that the deck shall be covered with an approved roofing material and further that each container in which the material is marketed shall be stamped, tagged or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 939-55-SM". The mixes and denatures herein described having a minimum compressive strength of 180 p.s.i. shall be maintained.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

366-56-SM

APPLICANT—Johns-Manville Products Corp., owner.

APPEARANCES—

For Applicant: Radley E. Collins.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 366-56-SM.

Subject: Placewel (additive for concrete & mortar).

Johns-Manville Corp., New York, filed April 30, 1956 an application with the Board of Standards and Appeals for approval of the material known as Placewel-W under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is used as an additive to concrete and mortar to increase its workability.

Description

The material Placewel is a liquid water-reducing air entraining agent and it's formulation has been considered

to be of a proprietary nature and therefore the formula has been placed in a sealed envelope and put in the Board's safe.

Inspection and Test

The applicant has submitted test reports of tests conducted by various laboratories including Pittsburgh Testing Laboratory, Haller Testing Laboratory, Barrow-Agee Laboratory, Herron Testing Laboratory, University of Akron and others and in all instances the tests were conducted with the cement content reduced when Placewel was added. The results showed that the concrete with the additive had higher strengths. The reports are on file with and are part of the record.

Recommendation

On the basis of the data submitted by the applicant, the Committee on Test recommends the approval of the material Placewel as manufactured by the Johns-Manville Products Corp., for voluntary use in New York City under the provisions of C26-191.0 Administrative Building Code, as an admixture to concrete and mortar, on condition that the amount used shall not exceed 0.20 lbs. per sack of cement and further that all containers in which the material is marketed shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 366-56-SM", and that the cement content shall not be reduced.

(Sgd.) WILLIAM A. NOLAN,
Director.
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

480-56-SA

APPLICANT—Carrier Corporation, owner.

APPEARANCES—

For Applicant: None.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5

Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 480-56-SA.

Subject: Carrier Forced Warm Air Gas and Oil Fired Furnaces, Series 38.

Carlton-Stuart Corp., for Carrier Corporation, filed June 13, 1956 an application with the Board of Standards and Appeals for approval of the Carrier Forced Warm Air Gas and Oil Fired Furnaces, Series 38, H, J and N for use in New York City under the provisions of Article 12, Administrative Building Code, and the Oil Burner Rules of the Board.

Purpose

Warm air heating furnaces for residential and commercial use.

Description

38H & J

The furnace is a compact heating unit made in six sizes and capacities for the 38H and five sizes and capacities for the 38J. The 38H capacities are 75, 100, 125, 150, 175 and 200 thousand BTU input. The 38J capacities are 80, 100, 135, 170, and 200 thousand BTU input. There are two types, classified as to air flow. One is where the direction of air flow is upward vertically, and the other is where normal air flow is downward. The two types are commonly known as "upflow" and "downflow".

MINUTES

The cabinets are highly styled so that they may be installed in the occupied space. They are bonderized and finished in decorator colors, of blue and gray, with baked enamel. The cabinets are built of heavy gauge sheet metal and assembled by spotwelding. There are two readily removable access doors in the front for access to the controls, burners, motors, and blowers. The cabinets vary in width only. The 38H upflow is 28 $\frac{1}{4}$ inches deep, 56 $\frac{1}{2}$ inches high, and variable width. The 38J upflow is 28 $\frac{7}{8}$ inches and 30 $\frac{3}{4}$ inches deep, 56 $\frac{1}{2}$ inches high, and variable width. The 38H downflow is 28 $\frac{1}{4}$ inches deep, 63 inches high, and variable in width. The 38J downflow is 28 $\frac{7}{8}$ inches and 30 $\frac{3}{4}$ inches deep, 58 inches, 62 inches, and 65 inches high, and variable in width.

The heat exchanger is electrically welded to form one piece and prevent leakage. The sections are die formed with reenforcing ridges and dimples. The 38H is made of 14 gauge and 38J is made of 19 gauge SAE 1010 steel or equivalent.

The burners are cast iron and have either drilled or slotted ports. The burner and heat exchanger section are designed for optimum operation when operated together. They are designed for one specific input. The size and capacity of the unit is determined by the number of heat exchanger sections and burners used.

The blower and motor are of conventional design. The motor is of standard make and design and sized to furnish proper air flow. The blower is of squirrel cage design, operating on the centrifugal principle. The blower and motor assembly are completely sound vibration isolated from the unit, using rubber mounting lugs and felt or asbestos air seal.

The controls are a standard type. The main manual valve is of the plug cock type. The pressure regulating valve, when used, is actuated by downstream pressure acting against a diaphragm tending to close off the gas flow. An adjustable spring acts in the opposite direction to the force on the diaphragm, caused by the downstream pressure, thereby maintaining a constant downstream pressure relative to the spring adjustment. The main automatic valve is either a diaphragm type or solenoid type. The diaphragm type closes off the gas supply by use of a diaphragm being actuated by the upstream gas pressure. The upstream gas pressure is controlled by a small pilot valve which is in turn controlled by a small electric solenoid. The solenoid valve acts to close off the gas supply by acting directly to operate a valve disc. Both valves are opened by being energized with a twenty-four volt circuit.

A constant burning pilot fire is employed to light the furnace when the main automatic valve is opened and admits gas. Should the constant burning pilot go out for any reason, the twenty-four volt control circuit is interrupted, thereby preventing the main automatic valve from opening.

A limit control is used to prevent the ventilating air from exceeding two hundred degrees F. A blower control, adjustable between eighty degrees F and one hundred fifty degrees F, is used to start the blower on temperature rise.

Fixed orifices which, together with the pressure regulating valve, serve to maintain constant gas supply to the burners.

A built in draft diverter prevents any draft caused by the flue from causing adverse operation of the furnace.

38N

These compact units include all elements necessary for heating, cleaning, and circulating air. They are to be fired with an approved mechanical draft gun type oil burner. The 38N capacities are 91,000, 119,000, 140,000, 175,000 and 231,000 BTU, with firing rates of .65, .75, 1.0, 1.25 and 1.65 gal. per hour respectively.

The heat exchanger is constructed of No. 12 gauge hot rolled steel electrically welded to provide leak proof construction. It is equipped with clean out access plates.

The combustion chamber is fabricated from stainless steel die formed parts to prevent buckling.

The cabinet is constructed from cold rolled steel with a baked enamel finish. Front panels are easily removable

for cleaning the best exchanger. Cabinet is lined with foil faced corrugated asbestos insulation.

Fan is double inlet centrifugal type equipped with sleeve type bearings and 115 volt, single phase, 60 cycle motor. Drive is through a V-belt with the motor pulley being adjustable for efficient fan performance under a wide range of air quantities and air pressures. Fan operation is controlled through a combination fan and limit switch.

Oil burner is controlled through the limit switch, primary oil control and room thermostat.

Inspection and Test

All details of construction were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The 38 H and J Series were tested and approved by the American Gas Association.

The 38 N Series were tested and approved by the Underwriters' Laboratories.

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of the Carrier Warm Air Gas and Oil Fired Furnaces Series 38H, 38J and 38N for use in New York City in accordance with this report and the provisions of Article 12, Administration Building Code and the Oil Burner Rules of the Board (38N Series) and in addition the 38H and 38J Series may be installed with the following minimum clearance as listed by the American Gas Association.

MODEL	A	B	C	D	E _l	E _r
38H 75VG	3	10	6	0	0	0
38H 100VG	3	10	6	0	0	0

38H 125CG	2	6	6	0	0	0
38H 150CG	2	6	6	0	0	0

VG Models are verticle upflow units, the CG Models are counterflow units and the HG Models are horizontal units. The numerals in the model designation indicate in thousands the BTU input per hour.

A = clearance from top of furnace.

B = clearance from front of unit.

C = clearance from flue or vent connector in any direction.

D = clearance from back of unit.

E_l = clearance from left side.

E_r = clearance from right side.

Clearances are in inches and in all cases clearance should be adequate to allow for proper servicing of the unit.

The Committee further recommends that these furnaces not be installed in garages or explosive atmospheres or occupancies and that each furnace bear a label permanently affixed reading "Approved by the Board of Standards and

MINUTES

487-56-SA

APPLICANT—Temco Inc., owner—amendment, additional model gas-fired heater.

APPEARANCES—

For Applicant: George R. Darche.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 487-56-SA

Subject: Amendment to resolution.

Masda Corporation for Temco, Inc., requested by letter dated April 29, 1959 that the resolution adopted September 17, 1958 under Calendar Number 487-56-SA be amended so as to include the additional Temco Radiant Gas-Fired Vented Circulator Type Room Heaters, Models CVR-75-1, CVR-75-1T, CVR-60-1, CVR-60-1T, CVR-40-1 and CVR-40-1T. The application was reopened by a vote of the Board, May 19, 1959.

Description

The new model heaters CVR-75-1, CVR-75-1T, CVR-60-1, CVR-60-1T, CVR-40-1 and CVR-40-1T are similar to the room heaters previously approved, Models 304-4, 454-4, 604-4 and 764-4 under Calendar Number 487-56-SA except for heat capacity, styling of the outer cabinets and accessibility to the controls. The new models have a thermobulb mounted to act as a blocked flue control.

The heat capacities of the new models are:

Model	INPUT-Btu/hr.
CVR-75-1	75,000
CVR-60-1	60,000
CVR-40-1	40,000

The suffix 1 indicates semi-automatic operation.

The suffix 1T indicates fully automatic operation.

All models are designed for venting to outdoors and have been approved by the American Gas Association.

Recommendation

The Committee on Test recommends that the resolution adopted September 17, 1958 under Calendar Number 487-56-SA be amended so as to include the Temco Radiant Gas-Fired Vented Circulator Type Room Heaters, Models CVR-75-1, CVR-75-1T, CVR-60-1, CVR-60-1T, CVR-40-1 and CVR-40-1T, on condition that the requirements of the resolution adopted September 17, 1958 under Calendar Number 487-56-SA be complied with.

Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution in accordance with the above report.

488-56-SA

APPLICANT—Temco Inc., owner—amendment, additional model gas-fired heater.

APPEARANCES—

For Applicant: George R. Darche.

ACTION OF BOARD—Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4

Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 488-56-SA

Subject: Amendment to resolution.

Masda Corporation for Temco Inc., requested by letter dated April 29, 1959, that the resolution adopted by the Board, September 17, 1958 under Calendar Number 488-56-SA be reopened and amended so as to include the additional Temco Vented Circulator Gas Type Room Heaters, Models CVC-70-1, CVC-70-1T, CVC-55-1, CVC-55-1T, CVC-35-1, CVC-35-1T and 302-7. The application was reopened by a vote of the Board, May 19, 1959.

Description

The new model heaters CVC-70-1, CVC-70-1T, CVC-55-1, CVC-55-1T, CVC-35-1, CVC-35-1T and 302-7 are similar to the room heaters previously approved, 705-1 142-4, 202-4, 302-4, 452-4 and 602-4 under Calendar Number 488-56-SA except for heat capacities, styling of the outer cabinets and accessibility to controls. The new models have a thermobulb mounted to act as a blocked flue control.

The heat capacities of the new models are:

Model	INPUT Btu/hr.
CVC-70-1	70,000
CVC-55-1	55,000
CVC-35-1	35,000
302-7	30,000

The suffix 1 indicates semi-automatic operation.

The suffix 1T indicates fully automatic operation.

The 302-7 is available with manual semi-automatic, or fully automatic operation.

All models are designed for venting to outdoors and have been approved by the American Gas Association.

Recommendation

The Committee on Test recommends that the resolution adopted September 17, 1958 under Calendar Number 488-56-SA be amended so as to include the Temco Vented Circulator Gas Type Room Heaters, Models CVC-70-1, CVC-70-1T, CVC-55-1, CVC-55-1T, CVC-35-1, CVC-35-1T and 302-7, on condition that the requirements of the resolution adopted September 17, 1958 under Calendar Number 488-56-SA be complied with.

For Applicant: Frank Brown.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,

MINUTES

Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 749-56-SA

Subject: Eureka Williams Gas-O-Matic Furnaces HG-67, HG-77, HG-90 and HG-112.

The Eureka Williams Corporation, Bloomington, Illinois, filed October 10, 1956, an application with the Board of Standards and Appeals for approval of Eureka Williams Gas-O-Matic Furnaces HG-67, HG-77, HG-90 and HG-112 for use in New York City under the provisions of Article 12, of the Administrative Building Code.

Purpose

Gas-fired Warm Air Furnace for domestic use. Not to be used in garages or places of explosive atmosphere.

Description

The Eureka Williams Gas-O-Matic Warm Air Furnaces, Hi-Boy Models consist of 22 gauge steel, glass-wool insulation with aluminum foil facing. Wide top flanges for attachment of plenum chambers. Exterior finish of Hammerloid baked-on enamel, in two-tone brown and beige. Front panel removes for installation and service.

Heat exchanger is 14 gauge steel of sectional design, built-in draft diverter and baffled flue. Individual inshot burner for each section consisting of burner box, drawn steel Venturi tubes, cast iron burner head and flame spreader.

In the blower compartment is a large centrifugal blower, heavy duty motor and filters that are easily accessible through door on front panel.

Controls are a combination gas valve and automatic pilot valve for 100% shut-off. Room thermostat, combination Fan and Limit Control, Gas Pressure Regulator (omitted on LPG units), and Automatic Pilot.

Optional Equipment—Automatic pan type humidifier.

Electric pilot ignition.

These models are designed for an input rating as follows:

HG-67	—	67,000 BTU
HG-77	—	77,500 BTU
HG-90	—	90,000 BTU
HG-112	—	112,500 BTU

and used with natural, manufactured, mixed and liquefied petroleum gases.

Inspection and Test

Details of the construction were examined by Ass't. Architect T. W. Farricker, Committee on Test. The appliances have been approved by the American Gas Association under certificates:

4—(1266.0, -2.0, .3&3.3) .001 4—(1266-3.0, &-2.3) .001

Recommendation

On the basis of the examination, test and data submitted by the applicant, the Committee on Test recommends the approval of the appliance known as Eureka Williams Gas-O-Matic Furnaces HH-67, HG-77, HG-90 and HG-112 for use in New York City when installed in accordance with this report and the provisions of Article 12, Administrative Building Code.

The Committee on Test further recommends the approved clearances to combustible material, from top of furnace (casing, Bonnet or Plenum) 4 inches—from front of unit 18 inches—from flue or vent connector in any direction 6 inches—from back of unit 1 inch—from left side of unit 1 inch—from right side of unit 1 inch—type of floor, combustible. In all cases however, adequate ventilation shall be provided for and clearances shall be sufficient to allow for proper servicing of the furnaces.

The Committee further recommends that each unit shall bear a label, permanently affixed reading as follows "Approved by the Board of Standards and Appeals for use in

New York City under Calendar Number 749-56-SA".

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 90-57-SA

Subject: To reopen and amend the resolution for additional use.

Armstrong Furnace Company, Columbus, Ohio, requested by letter dated July 22, 1959 that the resolution adopted December 17, 1957 under Calendar Number 90-57-SA be amended so as to permit the use of the Model 8801-L6 & L8, 225 & 275 furnaces in garages and oil selling stations.

Purpose

Oil fired warm air furnaces for domestic, commercial and industrial use.

Description

The Model 8801-L6, 225 & 275 and 8801-L8, 225 & 275 warm air furnaces were approved December 17, 1957 under Calendar Number 90-57-SA. The request is that these suspended type furnaces be permitted in garages and oil selling stations if 40/40 mesh bronze screening be provided over the combustion air intake.

Recommendation

On the basis of the data and drawings filed by the applicant, the Committee on Test recommends that the resolution adopted December 17, 1957 under Calendar Number 90-57-SA be amended so as to permit the use of the Armstrong Climate Conditioners, Models 8801-L6, 8801-L8, 225 & 275 in garages and oil selling stations when installed so that the bottom of the furnace is at least 8 feet above the floor and all combustion air intake openings to the burners are provided with 40/40 mesh bronze screening made tight fitting at the edges and on condition that the other requirements of the resolution adopted December 17, 1957 under Calendar Number 90-57-SA be complied with.

220-57-SA

APPLICANT—Chrysler Corporation, owner—additional model room air cooler.

MINUTES

APPEARANCES—

For Applicant: E. G. Hirsh.

ACTION OF BOARD—Application reopened and resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 220-57-SA.

Subject: To reopen and amend resolution as to additional model.

Chrysler Corporation, Airtemp Division, New York requested by letter dated July 30, 1959 that the resolution adopted October 29, 1957 under Calendar Number 220-57-SA be reopened and amended so as to include an additional model of room air cooler.

Description

The characteristics of the requested model are as follows:

The cooling capacity has been increased to 9500 BTU/hr, the condenser coil has been increased to 4 rows to obtain the additional capacity, the controls have been moved to front of cabinet and other styling changes.

The appliance has been approved by the Underwriters Laboratory under SA-2230.

Recommendation

The Committee on Test recommends that the resolution adopted October 29, 1957 under Calendar Number 220-57-SA be reopened and amended so as to include the Chrysler Airtemp Window Type Room Air Conditioner, Model 1800-1-C on condition that the requirements of the resolution adopted October 29, 1957 under Calendar Number 220-57-SA be complied with.

Committee on Test.

Resolved that the Board of Standards and Appeals does hereby amend the above cited resolution in accordance with the above report.

562-57-SM

APPLICANT—Fred G. MacKenzie Co., Agent for Vonnegut Hardware Co., owner.

APPEARANCES—

For Applicant: Robert F. Ball.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 562-57-SM.

Subject: Von Duprin Panic Exit Devices, Type 88 (rim, vertical, mortise).

Fred G. MacKenzie Co., New York, N. Y., Agent for Vonnegut Hardware Co., Indianapolis, Ind., filed July 25, 1957, an application with the Board of Standards and Appeals for approval of Von Duprin Panic Exit Devices, Type 88 (rim, vertical, mortise) for use in New York City under the provisions of C26-178.0b of the Administrative Building Code.

Purpose

These latches are intended for use in connection with exit doors of theatres, schools, churches and other public or factory buildings equipped with single or double doors swinging outward.

Not to be used on fire doors.

Description

These devices are self-releasing exit latches combining in one unit, the usual door locking devices and self-releasing mechanism. The system of levers is designed so as to release the lock and latches simultaneously and permit the doors to open by the application of force on a cross bar extending across the interior side of the door.

The Reversible Rim Type Exit Devices, Type 88, consists of main housing, end housing, curved brackets or arms and cross bar. The main housing contains all the actuating levers, springs and latch bolt assembly to insure smooth evenly well balanced coordinated action. The housing also is provided with a dogging feature which holds the cross bar in a retracted position. All component parts are heavy castings free from flaws, strong and durable and machined to insure ease of operation and long wear. A strong spring holds the arm in projected position and permits action of the cross bar to be coordinated. Lever arms are drop-forged bronze or aluminum. Latch bolt tail piece is drop-forged bronze $\frac{3}{4}$ inch throw latch bolt is extruded bronze. Lock case, hinge stile case and adjustable-roller strike are pressure cast bronze or aluminum. Finishes available in architectural bronze (US-9, US-10), satin aluminum (US-27) and chromium (US-26, US-26D). The device is furnished for single doors or pairs of doors arranged with fixed or movable mullions.

Other type numbers of this device are:

Standard Functions—88DT, 88NL, 88EO, 88TP, *88K.
Double Cylinder Device (not reversible) *88TP-2R, *88TP-2L, *88K-2R, and *88K-2L.

Type 88NL, operates by key only from the outside when latch bolt is locked in retracted position. By means of dogging key the door can be opened from outside by door pull. In Type 88EO, operated by exit bar only from inside, no outside trim. Type 88TP, have latch bolt operated by thumb of handle from outside, except when thumb piece has been locked by a twin or master key only in inside cylinder. When thumb piece is so locked, latch bolt can be operated by key from outside when releasing the thumb piece. In Type *88K latch bolt can be operated by knob from outside except when knob has been locked by a turn of master key only in inside cylinder.

The exit devices are installed upon single or double doors swinging outwardly in a manner characteristic of all door hardware. The latch devices are made with variable length of cross bar and adaptable to the specified width and thickness of each individual door, width of stile, and type of the astragal used on the particular set of doors.

In design the Mortise and Verticle Rod Devices are companion units to the Type 88 Rim Devices. Lever arms, mortise locks and strikes, center case internal parts and standard outside trims pressure are drop-forged. All other formed members are pressure or precision castings, or stampings of brass or stainless steel.

The vertical rod design and the inside trim for mortise lock devices are reversible. Mortise locks are not reversible.

The bottom-latch is a combustion of hinged bolt and dead-bolt operating in unison, making it adoptable from Latch-Track thresholds or conventional sill details.

Both top and bottom latch bolts are held retracted by the automatic slide when door is opened. As door closes, the slide is depressed upon contact with the soffit strike, and releases latch bolts to locked positions.

The type number of this device are as follows:

1.a. Mortise Lock Devices for Single Doors.

8824—Key locks thumbpiece.

8824-NL—Key retracts latch bolt.

8822—Key locks knob.

MINUTES

8830—Exit only, no outside trim.
8830-DT—Push-pull when dogged.

- b. Mortise Lock Devices for Active Door (Same as for single doors, except with open back strike)

8824—Key locks thumbpiece.
8824-NL—Key retracts latch bolt.
8822—Key locks knob.
8830—Exit only, no outside trim.
8830-DT—Push-pull when dogged.

2. Vertical Rod and Mortise Lock Combination for Double Doors.
8827—Inactive door device.

- 3.a. Two Vertical Rod Combinations for Double Doors.
8827—Inactive door device.

- b. Vertical Rod Devices for Active Door.
8827—Exit only, no outside trim.
8827 x NL83—Thumbturn operates device only when key is used.
8827 x FNL—Outside operation only when key is used.
*8823—Key lock knob.
*8823 x 5660S—Thumbturn operates devices except when locked by key.

4. Vertical Rod and Rim Type Combinations for Double Doors.
8827—Inactive door device.

Active door device—any type 88 Rim.

OUTSIDE CONTROLS

For Vertical Rod Devices (Type B², X or VA device)
NL53—Thumbturn operates device only.

When used with:

B², complete device No. is NL 53 B²
X, complete device No. is NL 53 X
VA, complete device No. is NL 53 VA

- 63—Thumbturn operates device except when locked by key.
for S device only
complete device—63S

Inspection and Test

Samples of the material and details of construction were examined by Ass't. Architect T. W. Farricker, Committee on Test.

The device has been in successful operation at various places in New York City for many years.

Recommendation

On the basis of test and data filed by the applicant, the Committee on Test recommends that Von Duprin Panic Exit Devices, Type 88 (rim, vertical, mortise) be approved for use in New York City under the provisions of C26-191.0 and C26-285.0 of the Administrative Building Code, and in specific cases, subject to a variation by the Board in such cases, under Section 272, Par. 3 of the State Labor Law, and further that each device bear a label permanently affixed reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 562-57-SM".

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

575-57-SM

APPLICANT—Sidney D. Friedman, owner.

APPEARANCES—

For Applicant: Sidney D. Friedman.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Com-
missioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 575-57-SM

Subject: Flameproofed Holly, Ruscus and Princess Pine Foliage.

Sidney D. Friedman, partner, of New Jersey Plant Preservers, filed May 14, 1957 an application with the Board of Standards and Appeals, for approval of a method of flameproofing of Holly, Ruscus and Princess Pine Foliage for decorative use in public buildings in accordance with Section C19-161.1 Administrative Code.

Purpose

To flameproof decorative foliages used for display purposes.

Description

The plants Holly, Ruscus and Princess Pine (*Lycopodium*) which are to be used in the form of branches, roping or wreaths for display purposes are classed as not containing any pitch or resin.

In flameproofing these plants, they are first boiled in a water soluble dye bath for a period of time and then immersed in a 28% solution of a chemical salt bath after which they are dried and immersed or sprayed in a fire retarding chemical solution containing 2 pounds of retardant mixture to a gallon of water.

After drying, the Princess Pine is ready for display use but the Holly and Ruscus are additionally coated with a fire retarding green colored paint.

The details of the process and the compounds and mixtures used are of a proprietary nature and are kept in a sealed envelope in the Board's safe for possible future reference.

Inspection and Test

Samples of all three plants were flame tested at the premises of the applicant. Present were Ass't. Engr. G. F. Sklenarik, Committee on Test, Lt. J. P. Manfredi, N. Y. Fire Dept., Mr. S. Friedman and others representing the applicant.

The plants were tested with a butane torch and failed to sustain combustion when the torch flame was removed.

Recommendation

On the basis of the test and the data submitted by the applicant, the Committee on Test recommends the approval of the Method of Flameproofing of Holly, Ruscus and Princess Pine Foliage by the New Jersey Plant Preservers as described in this report and in accordance with the requirements of Section C19-161.1 Administrative Code, provided that each carton or container in which the individual decorative green is to be marketed shall be labeled or stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 575-57-SM" and further that each such carton or container also be labeled or stamped "Not to be used after mo/day/yr.", the date to be six months after flameproofing for the Princess Pine and one year after flameproofing for the Holly and Ruscus.

862-57-SM

APPLICANT—Stanley G. Flagg & Company, Inc., owner—
additional size vent cap.

APPEARANCES—

For Applicant: Eugene F. Brown, Jr.

ACTION OF BOARD—Application reopened and Resolution amended in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 862-57-SM

Subject: To reopen and amend resolution as to additional size vent cap.

Stanley G. Flagg & Company, Inc., Philadelphia, Pa., requested by letter dated July 22, 1959 that the resolution adopted June 2, 1959 under Calendar Number 862-57-SM be reopened and amended so as to include an additional size vent cap.

Purpose

The material is a cap for use on fuel oil storage tank vent pipes.

Description

The vent cap is 2½ inch diameter having a venting area of 5.893 sq. inches as compared with 4.788 sq. inches; the area of a 2½ inch diameter pipe.

Recommendation

The Committee on Test recommends that the resolution adopted June 2, 1959 under Calendar Number 862-57-SM be reopened and amended so as to include the 2½ inch mushroom vent so that the sizes recommended for approval, including those previously approved are Fig. S-800 ¾", 1", 1¼", 1½", 2", 2½" and 3" on condition that the requirements of the resolution adopted June 2, 1959 under Calendar Number 862-57-SM are complied with.

34-58-SM

APPLICANT—Joseph Platzker, for The Dow Chemical Company, owner.

APPEARANCES—

For Applicant: Joseph Platzker.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 34-58-SM

Subject: Saraloy-400—Flashing Material.

J. Platzker for Dow Chemical Co., filed January 29, 1958 an application with the Board of Standards and Appeals for approval of the material known as Saraloy-400—Flashing Material under the provisions of C26-191.0 Administrative Building Code.

Purpose

The material is to be used as a flashing material.

Description

The material is a thermoplastic sheet material based on a copolymer of vinylidene chloride. It is produced by an extrusion process into a dense flexible sheet ¼" thick, 36 inches wide and weighs 50 lbs. per 100 sq. ft.

Inspection and Test

The material was tested at the Foster D. Snell Laboratory.

The test for water penetration was conducted in accordance with the requirements of Federal Spec. PPP-T-60. The water penetration is the grams of water penetrating the specimen per 100 sq. inch per 24 hrs. at 100°F.

The water vapor transmission test was conducted in accordance with the requirements of ASTM-E-96-53T. The water vapor transmission rate is expressed by the following

$$\text{formula—} W V T R = \frac{G \times 2,400}{T \times A}$$

where G = weight gain, in grams
T = Time, in hours
A = Area, exposed, in sq. in.

Results were as follows:

Water Penetration Rate—under 6.1 inches of water = 0.336 grams per 100 sq. inches per 24 hours.

Water Vapor Transmission—0.196 grams per 100 sq. in. per 24 hrs. The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the material known as Saraloy 400, Flashing Material, for voluntary use in New York City under the provisions of C26-191.0, on condition that each container in which the material is marketed shall be tagged, stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 34-58-SM."

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Assistant Engineer,
GEORGE F. SKLENARIK,
Assistant Engineer,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

138-58-SM

APPLICANT—Columbia Acoustics and Fireproofing Co., for United States Mineral Wool Co., owner.

APPEARANCES—

For Applicant: Frank M. Stumpf and Frank W. Hayes.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

MINUTES

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 138-58-SM

Subject: Cafco Blaze-Shield for use as fire retardant for steel columns.

Columbia Acoustics and Fireproofing Company for United States Mineral Wool Company, Stanhope, New Jersey, filed March 18, 1958, an application with the Board of Standards and Appeals for approval of the material known as Cafco Blaze-Shield under provisions of C26-593.0, C26-594.0, C26-595.0 and C26-599.0 Administrative Building Code.

Purpose

The Cafco Blaze-Shield is to be used as an acoustical and thermal insulation, a plaster base, and as a fire retardant on steel construction.

Description

The material is the same as that approved November 27, 1956, under Calendar Number 633-55-SM for acoustic and thermal insulation. Cafco Blaze-Shield is the trade name of a mixture of mineral wool, asbestos and cementacious binders; the proportions of which are of a proprietary nature and are on file with the Board.

The fibers are applied by blowing them, along with a mist of water, onto a surface which has been treated with a thin coat of latex-type adhesive.

Inspection and Test

The material was tested at Underwriters' Laboratories, Inc., Chicago, Illinois, in accordance with the requirements of C26-593.0, C26-594.0, C26-595.0 and C26-599.0 Administrative Building Code.

The COLUMN was constructed as follows:

A structural steel I beam, approximately 8' 3" long between concrete caps encasing at top and bottom and attached to a steel base at the bottom was sprayed directly with a coating of Cafco Adhesive followed by Cafco Blaze-Shield fiber built up and tamped to an average thickness of 2½ inches following the contour of the beam.

Results of Test: The construction successfully met the fire test for a five-hour fire resistive column construction.

Recommendation

On the basis of the test and data filed by the applicant, the Committee on Test recommends the approval of the material known as Cafco Blaze-Shield for use in the City of New York as a fireproofing medium when used in construction as herein described as five-hour resistive column construction in classes of construction as permitted under the pertinent sections of the Administrative Building Code, on condition that all plans submitted to the Department of Buildings showing the proposed use of this construction shall be stamped or labeled "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 138-58-SM" and further that all bags or containers in which this material is marketed shall be similarly marked and further that this material shall only be marketed under the trade name of Cafco Blaze-Shield.

Director,

JOHN A. DARTS,
Asst. Engr.,

GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

150-58-SM

APPLICANT—S. F. Lackey, for The Duriron Co., Inc., owner.

APPEARANCES—

For Applicant: James R. Adcock.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleintert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 150-58-SM

Subject: Duriron Corrosion Resisting Pipe and Fittings, approval of.

S. F. Lackey for The Duriron Company, Dayton, Ohio, filed February 27, 1958 an application with the Board of Standards and Appeals for approval of Duriron Corrosion Resisting Pipe and Fittings for use in New York City for acid drain systems under the provisions of C26-1297.0 Administrative Building Code.

Purpose

Corrosion resisting pipe and fittings for acid drain systems.

Description

Duriron is a high silicon iron alloy with good corrosion resistance to most chemical wastes. It is made in the form of pipe and fittings up to 15 inches in size.

It's chemical composition is:

Silicon	—14.5%
Carbon	— 0.85%
Manganese	— 0.65%
Iron	remainder

It's physical properties are:

Tensile strength—	15,000 psi (½" bar)
Brinell hardness—	520
Specific gravity	7.0
Melting point	1200°F

Duriron pipe and fittings are assembled by means of bell and spigot joints. A specially impregnated asbestos rope packing is used to make a tight joint. This packing after proper placement is poured over with molten lead to complete the joint.

Each length of Duriron pipe in a horizontal line is supported. If the line consists in part of fittings, supports are placed not farther than 5 feet apart. Supports are placed directly beneath the horizontal fittings that connect to the stack and supports used do not prevent normal lateral movement due to expansion. Vertical lines are supported at intervals not exceeding 10 feet.

Inspection and Test

All details were examined by Ass't Engr. G. F. Sklenarik, Committee on Test.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of Duriron Corrosion Resisting Pipe and Fittings for use in New York City for acid and chemical drain systems in accordance with this report and the provisions of C26-1297.0 and C26-1263.0 through C26-1267.0 Administrative Building Code provided that each length of pipe and each fitting will have the name Duriron cast thereon and provided that the piping and fittings on their containers

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 237-58-SM

Subject: Asco Aluminum Double Hung Window.

Asco Window Corporation for Metwall Mfg. Corporation, Hicksville, New York filed April 14, 1958 an application with the Board of Standards and Appeals for approval of the Asco Aluminum Double Hung Window under the provisions of C26-88.0 and C26-650.0 Administrative Building Code.

Purpose

The windows are to be used in location not requiring a fire resistive opening protective assembly.

Description

The window designated DHA-3 or monumental is made of aluminum alloy—6063-T-5 throughout. All tubular and extruded sections are $\frac{3}{32}$ of an inch in thickness. The sill is $\frac{1}{8}$ of an inch thick and the frames, jambs and head are $\frac{3}{32}$ inches thick.

All hardware on the window is of stainless steel except the lock, which is a bronze chrome and the pull which is of extruded aluminum and the guides and meeting rail blocks are of Zamak; a zinc composition.

Inspection and Test

Details of construction were examined by Asst. Engr. J. A. Darts, Committee on Test and the material met the requirements of C26-88.0 Administrative Building Code.

Recommendation

On the basis of the test and the data filed by the applicant, the Committee on Test recommends the approval of the Asco Aluminum Double Hung Window also known as Monumental Window for use in New York City under the provisions of C26-650.0 Administrative Building Code on condition that the window shall not be used in locations requiring a fire resistive opening protective assembly and further that the window shall bear a label, permanently affixed reading: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 237-58-SM."

307-58-SA

APPLICANT—Safety Stackheater, Inc., owner.

APPEARANCES—

For Applicant: Lee Wilcox.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 4
Negative: 0
Not Voting: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 307-58-SA

Subject: Safety Stackheater, Model A, approval of.

Safety Stack Heater Inc. c/o Max Dobler 2690 Sunrise Highway, Bellmore, Long Island filed February 28, 1958 an application with the Board of Standards and Appeals for approval of the Safety Stackheater, Model A for use in New York City under the provisions of C26-191.0 Administrative Building Code and the Oil Burner Rules of the Board.

Purpose

A device to recover part of the heat from flue gases.

Description

The Safety Stackheater, Model A is designed for installation in the flue pipe of electrically operated oil-fired heating boilers or furnaces with a firing rate not over 2 gallons per hour. It is to be located between the oil burning appliance and the chimney but in back of any primary safety control mounted in the flue pipe.

The heat reclaimer is made up of two concentric pipes. The inner pipe, made of copper .062 inch thick and $9\frac{1}{2}$ inches in diameter, serves as a flue gas passage and is heated by the flue gases. Heat is transferred to air which is circulated through the annular space between the inner and outer pipe by a motor driven fan and conveyed by duct work to the space to be heated. Operation of the fan is automatically controlled by a temperature actuated switch set at 150°F and mounted on the outer pipe. The outer pipe, warm air outlet and blower mounting are made of steel not less than .031 inches thick and painted on all surfaces.

Inspection and Test

An installation of the Safety Stackheater, Model A was inspected at Baldwin, Long Island by Asst. Engr. G. F. Sklenarik, Committee on Test.

The Safety Stackheater was tested and approved by the Underwriters Laboratories, file MP-2618. The report is on file and is part of the record.

Recommendation

On the basis of the inspection and the data filed by the applicant, the Committee on Test recommends the approval of the Safety Stackheater, Model A for voluntary use when installed in accordance with this report and the Oil Burner Rules of the Board provided that each installation will be made by a licensed oil burner installer and further that each such device shall bear a label, permanently affixed, reading:

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 327-58-SA

Subject: Westinghouse Gas-fired Furnaces, Central System,
Models GB, GU, GC, GH, GUE and GCE.

The Westinghouse Electric Corporation, Staunton, Va., filed May 22, 1958 an application with the Board of Standards and Appeals for approval of the appliance known as Westinghouse Central System, Gas-fired Furnaces, Models GB, GU, GC, GH, GUE and GCE for use in New York City under the provisions of Article 12, of the Administrative Building Code.

Purpose

The appliance is a gas-fired central heating system for domestic installation. Not to be used in garages and places of explosive atmosphere.

Description

The GB Basement Series (upflow) is a forced air heating unit gas-fired, basement floor type, designed for installation with low overhead clearance. These furnaces use as many as to 4 to 8 modified steel ribbon burners (number of burners depend on model BTU) installed with a sectional 16 gauge steel electrically welded-heat exchanger. A flue connection and draft diverter are provided. These furnaces are provided with oversized belt driven centrifugal blower fan for forced up-flow air circulation. Heat inputs vary from 85,000 BTU per hour to 200,000 BTU per hour. Standard controls include gas-pressure regulator and gas valve, adjustable blower-control and temperature limit control and automatic pilot. Remote thermostat is 24 volts, $\frac{3}{4}$ in. IPS connection when manufactured gas is used. The assembled unit is housed in a steel casing. Return air cabinet connecting to the rear panel of furnace, constructed and finished (matching color) to become an integral part of the furnace. This cabinet houses dust filters which can be changed easily and provides for top attachment of return Air Plenum.

The GH Horizontal Series, attic type forced air furnace are designed for overhead suspension, attic and crawl space installation has centrifugal fan for forced air circulation with heat input that vary from 80,000 BTU per hour to 140,000 BTU per hour. These furnaces use 2 cast iron drilled port burners with a sectional 16 gauge steel electrically welded heat exchanger. A flue connection and a draft diverter are provided. Furnace is provided with a dust filter and a belt driven centrifugal blower fan for forced air circulation. Blower is mounted on rubber mounts. Blower drives are suitable for air conditioning application. $\frac{3}{4}$ in. IPS connection when manufactured gas is used. Remote

thermostat is 24-Volt Fan control automatically turns blower on and off. Limit control protects furnace from excessive temperature. Gas valve-100% shut-off on all gases in case of pilot failure. The assembled unit is housed in a steel casing, with baked enamel finish.

The GU Utility Series, upflow, are a forced air circulation floor type furnace for alcove, closet or utility installation consisting of from 4 to 8 modified steel ribbon burners (number of burners depend on model BTU) installed with a sectional 16 gauge steel electrically-welded heat exchanger. A flue connection and draft diverter are provided. These furnaces are provided with oversized belt driven centrifugal blower fan for forced upflow air circulation. Heat input vary from 85,000 BTU per hour to 150,000 BTU per hour. Standard controls include main manual shut-off valve, pressure regulator, combination automatic main valve control and pilot switch, limit and fan control. For liquefied petroleum gas, automatic main control valve, manual main shut-off valve, 100% shut-off pilot valve, limit and fan control. Return air opening must be field cut. $\frac{3}{4}$ in. IPS connection when manufactured gas is used. Remote thermostat is 24-volt. The assembled unit is housed in a steel casing.

The GUE Utility Series (upflow) is basically almost identical to the GU Models. For basement installation, a Return Air Cabinet connecting to the Rear panel of furnace, constructed and finished (matching color) to become an integral part of the basement furnace. This cabinet houses the filter and provides for top attachment of return Air Plenum.

The GC Counterflow Series (downflow) is designed furnaces for homes without a basement. These are the same as the GU and GUE Models except they are downflow and may be used in homes with crawl space or slab floor construction. The furnaces are for crawl space perimeter type system, and for slab construction with ducts imbedded in concrete floors. With this installation an accessory combustible floor base is used. Add 3 in. height to casing when combustible base is used. Standard controls include main manual shut-off valve, pressure regulator, combination automatic main valve control and pilot switch, limit and fan control and manual reset limit control. For liquefied petroleum gas, automatic main control valve, manual main shut-off valve, 100% shut-off pilot valve, limit and fan control and manual reset limit control.

The GCE Counterflow Series (downflow) is basically almost identical to the GC Models. The furnace is designed for small closets, alcoves and utility rooms on slab construction with ducts imbedded in concrete floor. Also designed for crawl space installation with perimeter type system. With this installation an accessory combustible floor base is used. Add 3 inches in height to casing when combustible base is used.

Inspection and Test

All details of construction were examined by Ass't Architect T. W. Farricker, Committee on Test.

The furnaces listed in this application were tested and approved by the American Gas Association. The report is on file and is part of the record.

Recommendation

On the basis of the examination, test and data filed by the applicant, the Committee on Test recommends the approval of the appliance, known as Westinghouse Gas-Fired Furnaces, Central System, Models GB, GU, GC, GUE and GCE for use in New York City under the provisions of Article 12 of the Administrative Building Code.

The Committee further recommends that the Westinghouse Gas-Fired Furnaces may be installed with the following approved minimum reduced clearances in inches from combustible construction in accordance with the test of the American Gas Association as listed in table.

MINUTES

For Use With Natural, Manufactured and Mixed Gases

BASEMENT HEATING UNIT (Upflow)

Model	BTU	A	B	C	D	E _i	E _r	F
GB- 85A	85,000	Minimum clearances 6 in. between adjacent combustible bldg. structure, sides and/or rear of the Jacket, and projecting flue box or draft hood. A minimum clear space of 18 in. in front of the furnace. Adequate combustion and ventilating air must be provided.

Not Voting: Vice Chairman Kleinert..... 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 667-58-SA

Subject: Cincinnati Jet Dryer, Models 4830G, 4848G, 4860G, 4872G, 4896G, 6060G, 7272G for drying printing on paper, cardboard, masonite.

Cardel Electric Co., Inc., Cincinnati, Ohio, filed November 19, 1958 an application with the Board of Standards and Appeals for approval of the Cincinnati Jet Dryer, Models 4830G, 4848G, 4860G, 4872G, 4896G, 6060G, 7272G, for use in New York City under the provisions of Sections C19-11.0 and C26-191.0 Administrative Code.

Purpose

An appliance for drying of printed paper or cardboard and hardboard.

Description

The Cincinnati Jet Dryer used for drying of silk screen printing made on sheets of paper or cardboard with a combustible ink.

The basic parts of the dryer are a belt type conveyor which serves to carry the printed material placed thereon beneath an insulated metal hood which directs a flow of heated air onto the paper drying the ink. The paper is then cooled beneath another hood which directs room temperature air over it and the finished print is removed at the end of the conveyor.

MINUTES

The heated air for drying is supplied from an indirect gas furnace installed adjacent to the hood. The furnace uses Beck Engineering Combustion Company atmospheric type raised drilled port burners firing into a steel combustion chamber and radiator. The combustion products are independently vented to outdoors. Combustion air is taken 48 inches off the floor.

A portion of the heated air and solvent vapor from the printed material is constantly discharged to outdoors by means of an independent duct and fan. This exhaust is sufficient to provide not less than 10,000 cubic feet of air per gallon of combustible solvent evaporated.

The controls used are an automatic safety gas valve and pilot with gas pressure regulator valve. M-H or Fenwall temperature controller to regulate heated air temperature in the hood, 150°-160° F. Electrical interlocks so that failure of any of the motors that operate the recirculating fan, conveyor belt or exhaust fan would automatically shut off the gas supply to the burner.

The heat input in Btu per hour for the different models is:

4830G	—	150,000
4848G	—	150,000
4860G	—	225,000
4872G	—	225,000
6060G	—	225,000
4896G	—	300,000
7272G	—	300,000

The first two numbers in the model designation indicate the width of the conveyor in inches; the last two numbers indicate the length of the hood.

Inspection and Test

All details were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the Cincinnati Jet Dryer, Models 4830G, 4848G, 4860G, 4872G, 4896G, 6060G and 7272G for use in New York City under the provisions of Article 12, Administrative Building Code and Section C19-11.0 Administrative Code when installed in accordance with this report and the requirements of the Fire Commissioner provided that each dryer shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 667-58-SA."

Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this appliance in accordance with the above report.

725-58-SM

APPLICANT—Daniel J. O'Connell, for Econolite Corporation, owner.

APPEARANCES—

For Applicant: Daniel J. O'Connell.

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Commissioner Foley, Vice Chairman Kleinert, Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 725-58-SM

Subject: Econolite Block using Betonite.

Econolite Corporation, New York, filed December 10, 1958 an application with the Board of Standards and Appeals for the approval of the material known as Econolite Block using the material known as Betonite as the aggregate under the provisions of C26-191.0 and C26-636.0 Administrative Building Code.

Purpose

The block is to be used as a one hour fire resistive non-load bearing partition.

Description

The block is manufactured from a lightweight aggregate and portland cement. The chemical treatment of the aggregate and the manufacture of the block is of a proprietary nature and, therefore, this information, in a sealed envelope, has been placed in the Board's safe so that the constituent parts and the manufacture will not be disclosed but can be checked at any time, if necessary.

Inspection and Test

A non load bearing partition constructed of 4" x 8" x 18" Econolite Block was tested in accordance with the requirements of C26-579.0 through C26-587.0 and C26-591.0 and C26-592.0 Administrative Building Code in a fire test structure constructed at the applicant's plant.

The test was witnessed by Director William A. Nolan and Ass't. Engr. J. A. Darts, Committee on Test, Messrs. J. DeFeo and J. J. Cannon of the Econolite Corp. and D. J. O'Connell P. E. Consulting Engineer.

The partition successfully met the requirements of both the fire exposure and hose stream tests. The maximum rise in temperature of any one thermocouple on the unexposed face did not exceed 70°F at the termination of the test, which was well below the permitted average rise of five couples of 250°F. The complete report is on file with and is part of the record.

Recommendation

On the basis of the plant inspection and successfully meeting the requirements of C26-591.0 and C26-592.0 Administrative Building Code, the Committee on Test recommends the approval of the material known as Econolite Block using Betonite aggregate, as herein described, for use in New York City, under the provisions of C26-636.0.C Administrative Building Code, as a non load bearing one hour fire proof partition, on condition that the blocks used in the construction of the partition shall be of a size as herein described, namely, 4" x 8" x 18", that the blocks shall have cast into the end face the letter "E" and further that all plans submitted to the Department of Buildings showing the proposed use of the block, for the purpose intended, shall be stamped "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 725-58-SM" and all bills of lading and/or shipping tickets shall be similarly marked.

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby *approve* this material in accordance with the above report.

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 751-58-SM

Subject: Neoprene and Hypalon Synthetic Rubbers.

E. I. du Pont de Nemours & Company, Elastomer Chemicals Dept., Wilmington, Delaware filed December 22, 1958 an application with the Board of Standards and Appeals for approval of the material known as Neoprene and Hypalon Synthetic Rubbers under the provisions of C26-605 through C26-608.0 Administrative Building Code.

Purpose

The materials are to be used as roof coverings over a structural roof.

Description

Neoprene is a synthetic rubber and chemically it is polychloroprene. Neoprene in solvent solutions together with curing agents, resins and pigments make up a roof covering and is applied in thickness ranging from 10 to 20 mils.

Hypalon is also a synthetic rubber and chemically it is chlorosulfonated polyethylene. Hypalon in solvent solutions together with curing agents, resins and pigment make up a roof covering.

Due to its cost, it is usually applied in thickness of 5 to 10 mils over the 10 to 20 mils of neoprene.

Inspection and Test

Various types of roof construction, both combustible and incombustible covered with Neoprene and Hypalon were tested at Manhattan College in accordance with the requirements of C26-605.0 through C26-608.0 Administrative Building Code and successfully met the requirements. The complete report is on file with and is part of the record.

Recommendation

On the basis of the tests and the data filed by the applicant, the Committee on Test recommends the approval of the materials known as Neoprene and Hypalon for voluntary use in New York City as a roof covering as having met the requirements of C26-605.0 through C26-608.0 Administrative Building Code on condition that each carton or container in which the material is marketed shall be tagged, stamped or labeled: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 751-58-SM."

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

46-59-SA

APPLICANT—Eclipse Machinery Company, Inc., owner.
APPEARANCES—

For Applicant: Eugene Gruen.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Sleeper, Commissioner Fox and Commissioner Becker 5
Negative: 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 46-59-SA

Subject: Eclipse Silk Screen Printing Drying Machine, approval of.

Eclipse Machinery Co., Inc., Woodside, N. Y., filed Janu-

ary 26, 1959 an application with the Board of Standards and Appeals for approval of the Eclipse Silk Screen Printing Drying Machine for use in New York City under the provisions of Sections C19-11.0 and C26-191.0 Administrative Code.

Purpose

A machine for drying printed paper or cardboard.

Description

The Eclipse Silk Screen Printing Drying Machines are made in three sizes with furnace capacities of 180,000 Btu per hr., 270,000 Btu per hr. or 360,000 Btu per hr.

Paper or cardboard printed with a combustible ink applied by a silk screen method is placed on a belt type conveyor which moves the material below a hood where heated air is blown over the printed material. The printed paper then is passed below a cooling chamber where room temperature air is blown over it to cool it. Finally the finished material is dropped off at the end of the conveyor.

The gas fired indirect heating furnace is installed adjacent to the drying hood and connected to it by duct work. The furnace contains a sealed combustion chamber and tubular heat exchanger made of welded steel. Heat is supplied from C. A. Hones atmospheric type gas burners. These burners have venturi gas-air mixers and drilled raised ports. Ignition is by means of an electric spark and safety pilot. The combustion chamber is independently vented to outdoors in accordance with Article 12, Administrative Building Code. Combustion draft is induced by means of a blower fan. The burners are approximately 24 inches off the floor.

Air for drying is heated by being forced over the heat exchanger by means of a circulating fan installed beneath the drying hood. A portion of this air is constantly exhausted to outdoors through a suitable duct and exhaust fan. Ventilation is proportioned for each drying machine without the use of dampers so as to keep vapor concentration less than 25% of the low explosive limit of the combustible solvent used in the printing ink; approximately 10,000 cubic feet of fresh air for each gallon of ink solvent evaporated.

Controls for this drying machine are such that if the conveyor belt should stop, or the air recirculating fan and exhaust fan stop, or the induced draft fan should stop, the M-H gas valve will shut off gas supply to the burners. Gas supply will also be cut off on flame failure of the pilot, or when the thermostat controlled operating temperature is reached, approximately 160°F. Electrical current failure or continued operation of the electric igniter will close the gas valve.

Inspection and Test

All details were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

An installation was inspected at 22-25 46th St., Queens. Present was Mr. E. Gruen of the Eclipse Machinery Co.

Recommendation

On the basis of the examination and the data filed by the applicant, the Committee on Test recommends the approval of the Eclipse Silk Screen Printing Drying Machine for use in New York City under the provisions of Article 12, Administrative Building Code and Section C-19-11.0 Administrative Building Code when installed in accordance with this report and the requirements of the Fire Commissioner provided that each drying machine shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 46-59-SA".

75-59-SA

APPLICANT—Roberts-Gordon Appliance Corporation, owner.

APPEARANCES—

For Applicant: Walter A. Sottung.

ACTION OF BOARD—Appliance approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Commissioner Foley, Vice Chairman Klei-
ert, Commissioner Sleeper, Commissioner Fox and
Commissioner Becker 5

Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 75-59-SA

Subject: "Gordonaire" Furnaces, Gas-Fired, Models SFA-160, RGH-85, RGH-105, GC-100, GL-80, GL-100, GL-125, GH-80, GH-100, GH-125.

Roberts-Gordon Appliance Corp., Buffalo, N. Y., filed February 9, 1959 an application with the Board of Standards and Appeals for approval of the Gordonaire Furnaces, Gas-Fired, Models SFA-160, RGH-85, RGH-105, GC-100, GL-80, GL-100, GL-125, GH-80, GH-100 and GH-125 for use in New York City under the provisions of Article 12, Administrative Building Code.

Purpose

Warm air furnaces for residential use.

Description

These furnaces are forced air furnaces with the blowers sized sufficiently for addition of summer cooling. All models except the RGH-85 and RGH-105 use a cylindrical heat exchanger of 12 gauge steel with a wrap around economizer. The RGH-85 and RGH-105 have a 14 gauge "tear drop" shape combustion chamber and a multi tube heat exchanger. Heat exchangers are of welded construction with bolted and gasketed joints where necessary for assembly and clean out.

The cabinets for the furnaces are of interlocking sheet steel panels finished in baked enamel. Insulation consists of foil faced fibreglas cemented to the inside of the cabinet. Except for the SFA-160 Model, all furnaces have built-in draft diverters.

Each furnace has a single port gas burner employing a cast chrome alloy flame spreader to shape the flame to the combustion chamber.

Controls consist of an electric gas valve, thermostat, gas pressure regulator, automatic safety pilot, combination fan and temperature limit control and a manual shut off valve.

The numeral in the model designation indicates in thousands the Btu input per hour. The GC Model is a counter-flow furnace, the others are designed for upflow and all are designed for use with duct work.

Inspection and Test

All details were examined by Ass't. Engr. G. F. Sklenarik, Committee on Test.

The Roberts-Gordon, Gordonaire furnaces were tested and approved by the American Gas Association.

Recommendation

On the basis of the examination and the data submitted by the applicant, the Committee on Test recommends the approval of the Roberts-Gordon Appliance Corporation Gordonaire Furnaces, Gas-Fired, Models SFA-160, RGH-85, RGH-105, GC-100, GL-80, GL-100, GL-125, GH-80, GH-100 and GH-125 for use in New York City when installed in accordance with this report and the requirements of Article 12, Administrative Building Code with a minimum clearance of 6 inches from sides and rear of jacket and projecting flue box or draft hood, the GH-80 and GC-100 Models may be installed with 6 inches clearance from the

top, front and flue or vent connector and 1 inch from the back and sides but in all cases clearance should be sufficient to allow for proper servicing of the unit and further provided that each furnace shall bear a label, permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 75-59-SA".

129-59-SA

APPLICANT—Water Purifier, Incorporated for Ogden Filter Company, Incorporated, owner.

APPEARANCES—

For Applicant: Dewey Stolfi.

ACTION OF BOARD—Appliance disapproved.

THE VOTE—

Affirmative: 0

Negative: Chairman Foley, Vice Chairman Klei-
ert, Commissioner Sleeper, Commissioner Fox and
Commissioner Becker 5

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 129-59-SA

Subject: Ogden Water Purifiers, Models A, AB, AL & B.

Howard A. Thomas, Water Purifier, Inc., Long Island, New York, for Ogden Filter Co., Inc., Los Angeles, California, filed March 4, 1959 an application with the Board of Standards and Appeals for approval of The Ogden Water Purifiers, Models A, AB, AL & B, under the provisions of C26-178.0 & C26-191.0 Administrative Building Code.

Purpose

The appliance is to be used as a water purifier.

Description

The appliance is a compact unit made of stainless steel, arranged to be mounted alongside the cold water outlet. This unit contains a filtering media, which, the applicant claims, is treated chemically so that one portion acquires a permanent negative molecular charge and the other portion a permanent positive molecular charge; in addition, a completely insoluble bactericidal additive is dispersed in the medium. The medium is furnished in the form of a pack or cartridge. The basic granular material is activated carbon and the other chemical components are of a proprietary nature.

Inspection and Test

The applicant has submitted tests as conducted by the United States Testing Co., Inc., and also a statement from the U. S. Public Health Service. The report and statement are on file with the application.

Recommendation

The Committee on Test is of the opinion that, as no evidence was submitted that this appliance would benefit or improve New York City tap water and as the appliance does not come within the scope of the Submerged Inlet Rules of the Board, the Committee on Test recommends that the application be either withdrawn or disapproved.

(Sgd.) WILLIAM A. NOLAN,

ACTION OF BOARD—Material approved in accordance with the report of Committee on Test.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper, Commissioner Fox and Commissioner Becker..... 4
Negative: Vice Chairman Kleinert 1

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

Re: Calendar Number 197-59-SM

Subject: Perfection Gas Room Heaters, X221, X231, X246 and X266.

W. H. McAmblay, for Perfection Industries, Division of Hupp Corp., filed an application with the Board of Standards and Appeals for approval of the appliance known as Perfection Gas Room Heating, X221, X231, X246, and X266 for use in New York City under the provisions of Article 12, Administrative Building Code.

Purpose

Gas-fired heater for space heating.

Description

Model X221 (20,000 Btu input) Vented Circulator Type Room Heater (.030 in.) cold rolled steel.

The heater is an assembly of parts, namely a cabinet, burner, heat exchanger, draft diverter and controls. The combustion chambers and all other parts in contact with the flue gases are fabricated from a minimum of 20 gauge (.036 in.) steel. The heater cabinet is of 22 gauge (.030 in.) cold rolled steel with a baked enamel Mahogany finish, with golden glow screens, lined with ½ inch fiberglass insulation—foil-faced—one side. The main burner is stamped from 20 gauge (.036 in.) steel and is finished, inside and outside, in porcelain enamel. There are eighty (80) main burner ports, sized No. 34 DMS. The pilot burner is a Baso R36, non-linting type. The main gas control is a combination A-P5010, 100% safety shut-off type with a mechanical thermostat. The mechanical thermostat sensing element is located near the relief opening of the draft diverter, which will affect a shut off of gas to the main burner in the event of a down draft on blocked-flue condition. Finished in Dawn Grey baked enamel, golden-sheen screens and chrome trim.

Model X231, (30,000 btu input) Vented Circulator Type Room Heater. Its main burner is cast iron with slotted ports. There are thirty-seven (37) ports, the milled width of each being 0.045 inches. All other materials and controls are the same as Model X221. Finished in Dawn Grey baked enamel, golden-sheen screens and chrome trim.

Model X246, (45,000 Btu input) Vented Circulator Type Room Heater. Its main burner is cast iron with slotted ports. There are thirty-seven (37) ports, the milled width of each being 0.045 inches. All other materials and controls are the same as Model X221. Finished in Dawn Grey baked enamel, golden-sheen screens and chrome trim.

Model X266 (65,000 Btu input), Vented Circulator Type Room Heater. It employs the same cast iron burner as the Model X246, except that the burner ports are milled 3/32 inches deeper. All other materials and controls are the same as Model No. X221.

Inspection and Test

All details of construction were examined by Ass't. Architect T. W. Farricker, Committee on Test.

The above Perfection Gas Room Heaters have been tested and approved by the American Gas Association for

natural, manufactured, mixed and liquefied petroleum gas. The complete report is on file with and is part of the record.

Recommendation

On the basis of the examination and test and data filed by the applicant, the Committee on Test recommends the approval of the appliance known as Perfection Gas Room Heaters, X221, X231, X246 and X266 for use in New York City when installed in accordance with this report and the requirements of Article 12, Administrative Building Code with a minimum clearance from cabinet to combustible wall or adjacent combustible building structure of 6 in. from rear and sides and 2 in. from projecting flue box or draft hood.

The Committee on Test also recommends that the units shall not be installed in garages or places of explosive atmosphere and further that the appliance bear a label permanently affixed, reading "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 197-59-SM".

(Sgd.) WILLIAM A. NOLAN,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
Asst. Engr.,
Committee on Test.

Resolved, that the Board of Standards and Appeals does hereby approve this material in accordance with the above report.

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated April 29, 1958, on amendment to B.N. Applic. 3406/57, reads:

"Disapproved (1) Revised—Under Cal. 130-51-A the B'd of Stds. and Appeals ruled on exit requirements—change in exit requirements is referred back to the Board of S. & A."

and

WHEREAS, the applicant states that the building has 2 stories and cellar, 28 feet 6 inches in height, 25 feet by 98 feet 9 inches in area at 1st floor, 25 feet 94 feet in area at typical floor, class 3 construction, erected 1912, located on a lot 25 feet front by 98 feet 9 inches in depth, in restricted and retail use, B area, class 2 height district, and used and occupied since 1925; cellar—boiler room and storage, 1st floor—store, 5 persons; 2nd floor—manufacturing of electrical appliances, 12 persons; that no change in use of occupancy is now proposed; that the building is equipped with a one-source sprinkler system; that it has a one 3 foot 10 inch wide interior steel stairs with cement treads, enclosed in fire retarded partitions, equipped with kalamein self-closing doors; that stairhall leads direct to street and is provided with a ladder and scuttle to roof; and

WHEREAS, the Board on July 10, 1951 under Calendar Number 130-51-A, modified Objection 1 issued by the Borough Superintendent, June 27, 1951 on B.N. Applic. 3876/50 on condition that a balcony and ladder at the rear lead to the roof of the adjoining building at the rear facing at 43rd Street with access across the roof of such 43rd Street building and through a stair enclosed in fire retarded partitions, directly to West 43rd Street, on condition that a one-source sprinkler system which may be fed from the house water supply be installed throughout the cellar; that the occupancy of the 2nd floor shall not exceed the capacity of the primary means of egress; and

WHEREAS, the Board requested in its action of October 21, 1958 that the applicant file permission of owner of record of parking lot for use of same as an emergency exit; that such permission can not be obtained; that the applicant proposes to erect an approved type Labor Law fire escape on the front of the building to provide a second means of egress; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended that the appeal be granted under certain conditions.

Resolved, that the Board of Standards and Appeals does hereby make a variation in the requirements of the Labor Law, as cited in a decision of the Borough Superintendent, acting on amendment to B.N. App. 3406/57, dated April 29, 1958, and that the appeal be and it hereby is granted, on condition that the occupancy of the building shall be limited to five occupants on the 1st floor and twelve on the second floor; that a new legal fire escape shall be erected on the street front of the building, in accordance with the requirements of the Labor Law; and that in all other respects the building and occupancy shall comply with all laws, rules and regulations applicable thereto.

530-58-A—Vol. II

APPLICANT—Leonard F. Rothkrug and Herbst and Rusciano, for Ohav Sholem Center of the Bronx, owner.

SUBJECT—Application reopened March 17, 1959 as Volume II—appeal from a decision of the Borough Superintendent re—as caretaker's apartment, third floor.

PREMISES AFFECTED—838 Gerard Avenue, east side, 263 feet 5 inches south of East 161st Street, Block 2474, Lot 32, third floor, Borough of the Bronx.

APPEARANCES—

For Applicant: Leonard F. Rothkrug.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Vice Chairman Kleinert,
Commissioner Fox and Commissioner Becker 4
Negative: 0
Absent: Commissioner Sleeper 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated March 2, 1959 on Alt. Applic. 846/57, reads:

"1. Proposed occupancy of 3rd floor as caretaker's apartment is contrary to Board of Standards and Appeals Cal. No. 530-58-A and therefore is denied."

and

WHEREAS, the applicant states that the building is 3 stories, 32 feet high, 31 feet 6 inches by 46 feet 4 inches in area, of class 3 construction, erected prior to 1901, located in residence use, B area, class ½ height district, used since 1958 as follows: Cellar—ordinary storage; 1st floor—synagogue, 126 persons; 2nd floor—rabbinical office and classrooms, 25 persons; 3rd floor—vacant; that this case and occupancy was granted under Calendar Number 530-58-A, Volume I; and

WHEREAS, the applicant states that it is proposed to occupy the 3rd story as a caretaker's apartment in conjunction with the synagogue use; that the owner was unable to afford the alteration of the 3rd story when the Board first considered these premises and proposed to keep it vacant; that the alteration of the 2nd story is completed; that the 3rd floor will be used by the caretaker of the building for his dwelling; that originally, before the alteration this 3rd story was occupied by 2 families; that the continuation of the fireproof stairway to the 3rd story improves the exit conditions of the entire building, particularly since the occupancy of the 3rd story is by only one family; that a caretaker's apartment insures 24 hour supervision of the building; that the exits will consist of one interior 3 foot 8 inch wide steel stairs from top floor to cellar and street enclosed in masonry walls with fireproof self-closing doors; that the roof termination will be through a stationary iron ladder and a shuttle; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended the appeal be granted on certain conditions.

Resolved, that the decision of the Borough Superintendent, dated March 2, 1959, acting on Alt. Applic. 846/57, Objection 1, be and it hereby is modified and that the appeal be and it hereby is granted on condition that the necessary work shall be done in accordance with drawings filed with this appeal dated June 12, 1959, 8 sheets and July 2, 1959, one sheet; that there shall be one interior stair from top floor to the cellar 3 feet, 8 inches wide, enclosed in masonry walls, with fireproof self-closing doors in all openings to the surrounding area; and that all other laws, rules and regulations applicable shall be complied with; and that a certificate of occupancy shall be obtained.

255-43-A—Vol. IV

APPLICANT—Holtzman, Sharf, Mackell & Hellenbrand for Highview Realty Co., Inc., owner; Bayside Country School, Inc., lessee.

SUBJECT—Application reopened March 31, 1959 as Volume IV—Appeal from a decision of the Borough Superintendent re: proposed change in occupancy from Nursing Home to Nursery School, Day Care Agency from Private Non-profit country club—Class IV Construction.

PREMISES AFFECTED—28-53 216th Street, northeast corner 29th Avenue, Block 6019, Lot 1, Bayside, Borough of Queens.

APPEARANCES—

For Applicant: Edward Sharf and George J. Meltzer.

ACTION OF BOARD—Appeal granted on condition.

THE VOTE—

Affirmative: Chairman Foley, Commissioner Sleeper,
Commissioner Fox and Commissioner Becker..... 4
Negative: Vice Chairman Kleinert..... 1

THE RESOLUTION—

WHEREAS, the decision of the Borough Superintendent, dated July 16, 1959 on Alt. Applic. 1812/55, reads:

"1. The proposed change in occupancy from a Nursing and Convalescent Home to a Nursery School Day Care Agency in a frame (class IV) building is contrary to 4.1.3 (5c) and contrary to Board of Stds. and Appeals Res. 255-43-A and is referred back to the Board for reconsideration."

and

WHEREAS, the applicant states that the building is 45 feet by 116 feet irregular in area, on a lot 148 feet by 556 feet irregular, located in residence use, G-1 area, class ½ height district, basement, 2 stories and attic, 29 feet high, of class 4 construction, veneered with stone, used and occupied as follows: Basement—Heating, recreation, kitchen, wards and

storage, 10 persons; 1st floor—nursing, sanitarium proprietary, nursing and convalescent for aged or chronic patients, 25 persons; 2nd floor—nursing and convalescent or chronic patients, (ambulatory only), 19 persons; attic—attendants sleeping quarters and storage, 2 persons; which use is substantially as shown on Certificate of Occupancy Q125469/58 issued against Alt. Applic. 1628/44; and

WHEREAS, the applicant states that the building has two interior wood stairs 3 feet 2 inches and 3 feet 11 inches wide, interior stair is centrally located from the basement floor to the attic floor; that this stair and hall is protected with a sprinkler system; that there is an interior fire alarm system; that a Fire Department call box is located on 216th Street in front of the premises; that it is proposed to change use and occupancy as follows: basement—boiler, classroom, kitchen, lounge and first aid office, 19 students and 6 employees; 1st floor—class rooms, offices, recreation, kitchen and pantry, 60 students and 6 employees; 2nd floor—classrooms, and offices, 36 students and 4 employees; attic—caretaker's quarters, 2 employees; that this use constitutes a school and day care agency; and

WHEREAS, the premises was inspected by a committee of the Board, which recommended the appeal be granted on certain conditions:

Resolved, that the decision of the Borough Superintendent, dated July 16, 1959, acting on Alt. Applic. 1812/55, be and it hereby is *modified* and that the appeal be and it hereby is *granted* for a term of twenty years *on condition* that the work shall be done in accordance with drawings marked "Received May 14, 1959", 12 sheets and "July 17, 1959", 3 sheets; that a complete sprinkler system be installed throughout the building; and that all other laws, rules and regulations shall be complied with; *that all existing stairs and exits shall be maintained; as shown on the drawings, except* that all doors shall open in the direction of egress and not interfere with the passage through the corridors; that an approved interior fire alarm system shall be installed and monthly fire drills maintained; that any accessory structures constructed on the plot shall comply with the Building Code, the Zoning Law and all other laws and regulations applicable thereto; that all permits shall be obtained and all work completed within twelve months from the date of this resolution.

* Correction—The resolution corrected in relation to the existing stairs and exits, as indicated in italics.

APPLICANT—Dominick Salvati and Son, for Pasquale Palagano, owner.

SUBJECT—Application reopened July 23, 1957 as Vol. II—re decision of the Borough Superintendent under Section 7h of the Zoning Resolution, to permit in a residence use district the extension of the present parking lot to include adjacent lot 17.

PREMISES AFFECTED—1818-1830 Bergen Street, south side, 125 feet east of Ralph Avenue, Block 1451, Lots 14 and 17, Borough of Brooklyn.

APPEARANCES—

For Applicant: Leon Komondorea.

For Opposition: None.

ACTION OF BOARD—Resolution amended.

THE VOTE—

Affirmative: Chairman Murdock, Commissioner Kleinert, Commissioner Foley and Commissioner Sleeper.. 4
Negative 0
Absent: Vice Chairman Keating..... 1

THE RESOLUTION—

WHEREAS, this application was reopened as Vol. II on July 23, 1957 subject to regular procedure; and

WHEREAS, a public hearing was held on this application on October 7, 1958 after due notice by publication in the Bulletin; laid over to October 21, 1958, for inspection and decision; hearing closed; and

WHEREAS, the district maps accompanying the Zoning Resolution show that the site is in a residence use, C area, class 1 height district; Bergen Street and St. Marks Avenue are in residence, local retail and business use, C area, class 1 height districts; Ralph Avenue is in a local retail use, C area, class 1 height district; Howard Avenue is in a business use, C area, class 1 height district; and

WHEREAS, the decision of the Borough Superintendent, dated June 5, 1957 acting on Alt. Applic. No. 164-57, reads:

"1. Proposed parking lot for motor vehicles in residence use district is contrary to Art. II Sec. 3 of Zone Resolution."

and

WHEREAS, the applicant states that the premises consist of a plot, 135 feet frontage by 127 feet 9½ inches in depth; that it is proposed to increase the area of an existing day and night parking lot for more than five motor vehicles, previously approved by the Board; that the lot would be increased 60 feet on Bergen Street, which has already been included in the 135 foot frontage; and

WHEREAS, the applicant states that the parking lot has been in operation in accordance with the recommendations set forth by the Board on December 28, 1951; that this has greatly helped to alleviate the parking situation in the vicinity, but the problem of parking still prevails; that due to the demand for more parking space, the owner purchased the 60 foot parcel adjoining his parking lot; that the overflow of parking on the new parcel helped further to mitigate the bumper to bumper parking of cars in the street; and

WHEREAS, the applicant contends that the variance for the existing parking lot expires on June 22, 1959, and it is requested that said variance now be extended for a period of five years for the parcel mentioned herein, so that the variance on both parcels will expire simultaneously; and

WHEREAS, the applicant states that the present owner has held title to the property since May, 1947 and that the assessed valuation of land is \$11,100; and

WHEREAS, the premises and surrounding area were inspected by a committee on the Board.

Resolved, that the Board of Standards and Appeals does hereby *amend* the resolution adopted on July 1, 1952, as thereafter amended by resolutions adopted through June 22, 1954 by adding thereto:

"that in the event the owner desires to increase the parking lot by the addition of the adjoining lot, No. 17, as shown on plans filed with this application marked "Received July 3, 1957", 1 sheet and "August 29, 1958", 3 sheets, such extension may be permitted *on condition* that the requirements of the resolution above cited shall be complied with as to fencing and surfacing of such lot No. 17, so that Lot 14 and Lot 17 may be operated together; that the fence on the easterly lot line of Lot 14 may be partially removed so as to permit communication between the two lots; *that the term of variance is extended for both Lots 14 and 17 for a term of five (5) years from the date of this amended Resolution* and that all permits shall be obtained and all work completed within the requirements of Section 22A of the Zoning Resolution *and that a new Certificate of Occupancy shall be obtained.*"

* Correction—the term of the variance inserted in the resolution, as indicated in italics.

210-58-SM

APPLICANT—Wilfred F. Cole, for Litecraft Manufacturing Corp., owner.

SUBJECT—Application April 8, 1958—Litecraft Lumirama; corrugated Plastic diffuser, approval of.

APPEARANCES—

For Applicant: Warren Flanigen.

ACTION OF BOARD—Material approved in accordance

THE VOTE—

Affirmative: Acting Chairman Kleinert, Commissioner Foley, Commissioner Sleeper and Commissioner Fox. 4
Negative 0

THE RESOLUTION—

WHEREAS, the report of a Committee on Test reads:

REPORT OF COMMITTEE ON TEST

Re: Calendar Number 210-58-SM.

Subject: Litecraft Lumirama.

Wilfred F. Cole for Litecraft Mfg. Corp., filed April 8, 1958 an application with the Board of Standards and Appeals for approval of the material known as Litecraft Lumirama under the provisions of C26-461.0 Administrative Building Code.

Purpose

The material is to be used as a plastic light diffusing ceiling.

Description

The ceiling consists of a plastic diffuser which is 0.007 gauge corrugated vinyl sheet as manufactured by the Bakelite Division of Union Carbide Corp. The plastic sheet is suspended in extruded aluminum channels. The channels are made of 6063-T5 alloy and have a wall thickness of 0.625 inches.

CORRECTIONS

The installation is as follows:

The ceilings hanger or clip is attached directly to the ceiling floor or roof above and the ¼ inch steel hanger is inserted into the clip. The other end of this hanger is "J" shaped and is inserted into an inverted "U" on top of the main carrying member. The hook assembly and ceiling clip are installed 3 feet no inches on centers in one direction and a maximum of 8 feet no inches on centers perpendicular to those on 3 feet no inches so that a grillage is set up supporting 3 feet no inches in one direction and 8 feet no inches in the other direction.

Inspection and Test

The plastic has been tested by the Underwriters' Laboratory and is rated self extinguishing under ASTM-D-635-44.

Recommendation

On the basis of the inspection and test and the data filed by the applicant, the Committee on Test recommends the approval of the *Lumirama* Ceiling (plastic light diffusing ceiling) for installation in New York City when constructed of materials as herein described and installed in accordance with the requirements of C26-461.1 Administrative Building Code on condition that the main carrying members shall be carried on straps as herein described secured to the ceiling, floor or roof construction above, that wires shall not be used in the suspension system and further that all plans filed with the Department of Housing and Buildings showing the proposed use of this system shall be marked or stamped as follows: "Approved by the Board of Standards and Appeals for use in New York City under Calendar Number 210-58-SM", and that the containers or cartons in which the material is marketed shall be similarly marked. It is further recommended that the use of this material in Class I and II construction be limited to an area to be covered not to exceed 10,000 sq. ft. in area and only when such space is separated from the remainder of the floor area by an approved wall, fire wall, fire partition or fireproof partitions. In class III, construction shall be limited in accordance with the requirements of the Administrative Building Code.

The Committee further recommends that as C26-1354.0 Administrative Building Code was amended by Local Law 105 of 1955 to allow the use of this type of light diffuser in locations as permitted under C26-1351.1 Administrative Building Code as amended by Local Law 91 of 1954, plans filed with the Department of Buildings and will also show the proposed occupancy so that the use of this ceiling in the proposed location may be checked as to its use in the type of hazard occupancy as set forth under C26-1351.1 Administrative Building Code as amended by Local Law 91 of 1954. The Committee further recommends that in approving the installation, the Department of Buildings shall require that in the event of a change in occupancy the installation shall be re-examined under C26-1354.0 Administrative Building Code as amended by Local Law 105 of 1955.

(Sgd.) SAMUEL L. BECKER,
Director,
JOHN A. DARTS,
Asst. Engr.,
GEORGE F. SKLENARIK,
